BILLING CODE 3410–02–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Temporary Placement of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This final rule is issued by the Administrator of the Drug Enforcement Administration (DEA) in order to temporarily place 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxy-amphetamine and 4-methylaminorex into Schedule I of the Controlled Substances Act (CSA) pursuant to the emergency scheduling provisions of the CSA. This action is based on a finding that the scheduling of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxy-amphetamine and 4-methylaminorex is necessary to avoid and imminent hazard to the public safety. As a result of this rule, the regulatory controls and criminal sanctions imposed on a Schedule I substance under the CSA will be applicable to the manufacture, distribution and possession of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxy-amphetamine and 4-methylaminorex.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION: Notice of intent to temporarily place 3,4-methylenedioxy-N-ethylaphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I of the CSA were published in the **Federal Register** on August 13, 1987 (52 FR 30174–75 and 52 FR 30175–77). The Comprehensive Crime Control Act of 1984 (Pub. L. 98–473) which was signed into law on October 12, 1984, amended section 201 of the CSA (21 U.S.C. 811) to give the Attorney General the authority to temporarily place substances into schedule I of the CSA if he finds that such action is necessary to avoid and imminent hazard to the public safety. The Attorney General has delegated his authority under 21 U.S.C. 811 to the Administrator of the Drug Enforcement Administration (28 CFR 0.100).

The Administrator transmitted notice of his intention to temporarily place 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I of the CSA to the Assistant Secretary for Health of the Department of Health and Human Services. In response to the notification, the Food and Drug Administration has advised DEA that none of the three substances being proposed for emergency scheduling are currently being investigated under the Food, Drug and Cosmetic Act nor are they the subject of approved new drug applications. Therefore, the Food and Drug Administration has no objections to the placement of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I of the CSA. No comments have been received from any other interested parties.

Based upon the information and data contained in the notices of intent (52 FR 30174–75 and 52 FR 30175–77), the Administrator, pursuant to Section 201(h) of the CSA (21 U.S.C. 811(h)) and

28 CFR 0.100, has found that scheduling 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex in Schedule I of the CSA, on a temporary basis, is necessary to avoid an imminent hazard to the public safety.

Regulations that are effective on October 15, 1987 and imposed on 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex are as follows:

1. *Registration.* Any person who manufactures, distributes, engages in research, imports or exports 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3, 4-methylenedioxyamphetamine or 4-methylaminorex or who proposes to engage in the manufacture, distribution, importation, exportation or research of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex shall obtain a registration to conduct that activity by October 15, 1987, pursuant to Parts 1301 and 1311 of Title 21 of the Code of Federal Regulations.

2. *Security.* 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex must be manufactured, distributed and stored in accordance with §§ 1301.71–1301.76 of Title 21 of the Code of Federal Regulations.

3. *Labeling and packaging.* All labels on commercial containers of, and all labeling of, 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex which are packaged after October 15, 1987 shall comply with the requirements of §§ 1302.03–1302.05, 1302.07 and 1302.08 of Title 21 of the Code of Federal Regulations.

4. *Quotas.* All persons required to obtain quotes for 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxy-amphetamine or 4-methylaminorex shall submit applications pursuant to §§ 1303.12 and 1303.22 of Title 21 of the CFR.

5. *Inventory.* Registrants possessing 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex are required to take inventories pursuant to §§ 1304.11–1304.19 of Title 21 of the CFR.

6. *Records.* All registrants required to keep records pursuant to §§ 1304.21–1304.27 of Title 21 of the CFR shall do so regarding 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex.

7. *Reports.* All registrants engaged in the manufacture, packaging, labelling or distribution of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex are required to file reports pursuant to §§ 1304.35–1304.37 of Title 21 of the CFR.

8. *Order Forms.* Each distribution of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex requires the use of an order form pursuant to §§ 1305.01–1305.16 of Title 21 of the CFR.

9. *Importation and Exportation.* All importation and exportation of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex shall be in compliance with Part 1312 of Title 21 of the CFR.

10. *Criminal Liability.* Any activity with 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine or 4-methylaminorex not authorized by or in violation of the CSA or the Controlled Substances Import and Export Act occurring on or after October 15, 1987 is unlawful.

Pursuant to Title 5, U.S.C., section 605(b), the Administrator certifies that the temporary placement of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I of the CSA, as ordered herein, will not have a significant impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96–354). This action involves the temporary control of substances with no currently approved medical use or manufacture in the United States.

It has been determined that the temporary placement of 3,4-methylenedioxy-N-ethylamphetamine, N-hydroxy-3,4-methylenedioxyamphetamine and 4-methylaminorex into Schedule I of the CSA under the emergency scheduling provision is a statutory exception to the requirements of Executive Order 12291 (46 FR 13193).

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 201(h) of the CSA (21 U.S.C. 811(h)), and delegated to the Administrator of DEA by Department of Justice regulations (28 CFR 0.100), the Administrator hereby amends 21 CFR Part 1308 as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

1. The authority citation for 21 CFR Part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b).

2. Paragraphs (g)(4) through (g)(6) are added to § 1308.11 to read as follows:

§ 1308.11 Schedule I.

* * * * *

(g) * * *

(4) 3,4-methylenedioxy-N-ethylamphetamine (also known as N-ethyl-alpha-methyl-3,4(methylenedioxy)phenethylamine, N-ethyl MDA, MDE, and MDEA)—7404

(5) N-hydroxy-3,4-methylenedioxyamphetamine (also known as N-hydroxy-alpha-methyl-3,4-(methylenedioxy)phenethylamine, and N-hydroxy MDA)—7402

(6) 4-methylaminorex (also known as 2-amino-4-methyl-5-phenyl-2-oxazoline)—1590

Dated: October 2, 1987.

John C. Lawn,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410–09–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1613

Equal Employment Opportunity in the Federal Government

AGENCY: Equal Employment Opportunity Commission.

ACTION: Revocation of adoption of Federal Personnel Manual (FPM) letters and Civil Service Commission (CSC) bulletins.

SUMMARY: Pursuant to Reorganization Plan No. 1 of 1978, effective January 1, 1979, all equal opportunity in federal employment enforcement and related functions vested in the former Civil Service Commission pursuant to section 717 (b) and (c) of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-16(b) and (c); section 501 of the Rehabilitation Act of 1973, 29 U.S.C. 791; the Equal Pay Act under the Fair Labor Standards Act, as amended, 29 U.S.C. 204 *et seq.*, the Portal-to-Portal Act of 1947 as amended, 29 U.S.C. 259 and the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. 621 *et seq.*,

were transferred to the Equal Employment Opportunity Commission (EEOC). On December 29, 1978, the EEOC adopted the substance of the following FPM letters and CSC Bulletins (See 43 FR 60901 and FPM Bulletin 720–5, dated November 29, 1979): FPM Letter 713–19, FPM Letter 713–21, FPM Letter 713–30, FPM Letter 713–32, FPM Letter 713–36, FPM Letter 713–38, FPM Letter 713–40, FPM Letter 713–42, FPM Letter 713–44, FPM Letter 551–9, CSC Bulletin 713–50, CSC Bulletin 713–43.

Guidance contained in those adopted documents is either obsolete or has been superseded by guidance issued by the EEOC. Accordingly, the EEOC has revoked its adoption of the above-referenced FPM Letters and CSC Bulletins.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: Robert Lowell, Hearings Program Division, Federal Sector Programs, Equal Employment Opportunity Commission, Room 422, 2401 E Street, NW., Washington, DC 20507, telephone: (202) 634–7833.

SUPPLEMENTARY INFORMATION: Current EEOC guidance concerning the processing of federal sector employment discrimination complaints under Title 29 CFR Part 1613, is contained in EEO Management Directive (MD) 107, dated September 1, 1987, entitled Federal Sector Complaint Processing Manual. Paragraph 3, EEO–MD 107, contains a cross-reference, where applicable, to previous guidance contained in the revoked FPM Letters/CSC Bulletins. The EEOC is disseminating copies of the manual to the EEO Directors of the various federal agencies. For additional information concerning this matter contact the above individual.

This notice has been coordinated with the U.S. Office of Personnel Management (OPM). OPM has advised the EEOC that its Issuance System Manager, Office of Planning and Evaluation, will issue a separate bulletin cancelling FPM Part 713 and those FPM Letters/CSC Bulletins previously adopted by the EEOC. Effective on the date of the publication of this **Federal Register** notice, only that guidance contained in EEO–MD 107 will govern federal sector complaint processing under Title 29 CFR Part 1613.

Accordingly, the Equal Employment Opportunity Commission hereby revokes its adoption of FPM Letters 713–19, 713–21, 713–30, 713–32, 713–36, 713–38, 713–40, 713–42, 713–44, and 551–9 and CSC Bulletins 713–50 and 713–43.

For the Commission.

Clarence Thomas,

Chairman.

BILLING CODE 6750–06–M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Single-Employer Plans; Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the regulation on Valuation of Plan Benefits in Single-Employer Plans contains the interest rates and factors for the period beginning November 1, 1987. The use of these interest rates and factors to value benefits is mandatory for some terminating single-employer pension plans and optional for others. The PBGC adjusts the interest rates and factors periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after November 1, 1987, and will remain in effect until the PBGC issues new interest rates and factors.

EFFECTIVE DATE: November 1, 1987.

FOR FURTHER INFORMATION CONTACT: John Foster, Attorney, Corporate Policy and Regulations Department, Code 35400, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006, 202–778–8850 (202–778–8859 for TTY and TDD). These are not all toll-free numbers.

SUPPLEMENTARY INFORMATION: The PBGC's regulation on the valuation of plan benefits in single-employer plans (29 CFR Part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Although the amendments to Title IV effected by the Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") change significantly the rules for terminating single-employer plans, the valuation rules are much the same. (SEPPAA applies to all plan terminations initiated on or after January 1, 1986.) Under amended ERISA section 4041(c), all plans wishing to terminate in a distress termination (like all insufficient plans under prior law) must value guaranteed benefits and (new under SEPPAA) benefit commitments under the plan using the formulas set forth in Part 2619. Plans terminating in a standard termination may, for purposes of the notice given to the PBGC, use these formulas to value benefit commitments, although this is not required. (Such plans may value benefit commitments that are payable as annuities on the basis of a qualifying bid obtained from an insurer.)

Appendix B in Part 2619 sets forth the interest rates and factors that are to be used in the formulas contained in the regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The rates and factors currently in use have been in effect since October 1, 1987 (52 FR 34773 (September 15, 1987)). Changes in the financial and annuity markets now require an increase in those rates. Accordingly, this amendment adds to Appendix B a new set of interest rates and factors for valuing benefits in plans that terminate on or after November 1, 1987, which set reflects an increase of ¼ percent in the immediate interest rate to 8¼ percent.

Generally, the interest rates and factors will be in effect for at least one month. However, any published rates and factors will remain in effect until such time as the PBGC publishes another amendment changing them. Any change in the rates normally will be published in the **Federal Register** by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately and possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in plans that will terminate on or after November 1, 1987, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a

major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

In consideration of the foregoing, Part 2619 of Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2619—[AMENDED]

1. The authority citation for Part 2619 continues to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, 1362, as amended by secs. 11004(a), 11007–11009, 11016(c)(12)–(c)(13) and 11011(a), Pub. L. 99–272, 100 Stat. 239–240, 244–252, 274 and 253–257.

2. Rate Set 70 of Appendix B is revised and Rate Set 71 of Appendix B is added to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix B—Interest Rates and Quantities Used to Value Immediate and Deferred Annuities

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "G_y" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, k_1, k_2, k_3, n_1, and n_2 are defined in § 2619.45.

Rate set	For Plans With a Valuation Date		Immediate annuity rate (percent)	Deferred annuities				
	On or after	Before		k_1	k_2	k_3	n_1	n_2
70	10–1–87	11–1–87	8.00	1.0725	1.0600	1.0400	7	8
71	11–1–87		8.25	1.0750	1.0625	1.0400	7	

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal; Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR Part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281 (b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of November 1987.

EFFECTIVE DATE: November 1, 1987.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Corporate Policy and Regulations Department (35400), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; 202–778–8850 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans and Pensions.

In consideration of the foregoing, Part 2676 of Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for Part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

§ 2676.15 Interest.

* * * * *

(c) *Interest rates.*

For valuation dates occurring in the month:	The values if i_k are															
	i_1	i_2	i_3	i_4	i_5	i_6	i_7	i_8	i_9	i_{10}	i_{11}	i_{12}	i_{13}	i_{14}	i_{15}	i_{16}

BILLING CODE 7708-01

POSTAL SERVICE

39 CFR Part 111

Nonmailable Matter; Mail Order Drug Paraphernalia and Ballistic Knives

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule amends the Domestic Mail Manual to reflect the Mail Order Drug Paraphernalia Control Act and the Ballistic Knife Prohibition Act of 1986, both enacted last year. The Mail Order Drug Paraphernalia Control Act makes it unlawful, with certain exceptions stated in the Act, for any person to use the Postal Service as part of a scheme to sell drug paraphernalia, as that term is defined by the Act. The Ballistic Knife Prohibition Act of 1986 makes ballistic knives, defined as knives with detachable blades that are propelled by a spring-operated mechanism, generally nonmailable.

EFFECTIVE DATE: December 20, 1987.

FOR FURTHER INFORMATION CONTACT: George C. Davis, (202) 268-3076.

SUPPLEMENTARY INFORMATION: On April 29, 1987, the Postal Service published for comment in the **Federal Register** proposed amendments of 124.36, 124.55, and 124.56 of the Domestic Mail Manual to implement the two laws referred to in the **SUMMARY** above, which are parts of a legislative package entitled the Anti-Drug Abuse Act of 1986, Pub. L. 99-570 (52 FR 15513). The proposed amendments were explained in detail in the proposal and are not repeated here. Since no comments were received on the proposed amendments, they are being adopted without change. Accordingly, the Postal Service adopts the following changes to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

PART 124—NONMAILABLE MATTER—ARTICLES AND SUBSTANCES; SPECIAL MAILING RULES

2. In 124.3, revise the heading of .36, renumber .366 as .367, and add a new .366 reading as follows:

.36 Poisons, Controlled Substances and Drug Paraphernalia.

* * * * *

.366 Drug Paraphernalia. It is unlawful to make use of the services of the Postal Service as part of a scheme to sell drug paraphernalia.

a. The term "drug paraphernalia" means any equipment, product, or material or any kind which is primarily intended or designed for use in manufacturing, compounding, converting, concealing, producing, processing, preparing, injecting, ingesting, inhaling, or otherwise introducing into the human body a controlled substance in violation of the Controlled Substances Act (see 124.364). It includes items primarily intended or designed for use in ingesting, inhaling, or otherwise introducing marijuana, cocaine, hashish, hashish oil, PCP, or amphetamines into the human body, such as—

(1) metal, wooden, acrylic, glass, stone, plastic, or ceramic pipes with or without screens, permanent screens, hashish heads, or punctured metal bowls;

(2) water pipes;

(3) carburetion tubes and devices;

(4) smoking and carburetion masks;

(5) roach clips: meaning objects used to hold burning material, such as a marijuana cigarette, that has become too small or to short to be held in the hand;

(6) miniature spoons with level capacities of one-tenth cubic centimeter or less;

(7) chamber pipes;

(8) carburetor pipes;

(9) electric pipes;

(10) air-driven pipes;

(11) chillums;

(12) bongs;

(13) ice pipes or chillers;

(14) wired cigarette papers; or

(15) cocaine freebase kits.

b. In determining whether an item constitutes drug paraphernalia, in addition to all other logically relevant factors, the following may be considered;

(1) instructions, oral or written, provided with the item concerning its use;

(2) descriptive materials accompanying the item which explain or depict its use;

(3) national and local advertising concerning its use;

(4) the manner in which the item is displayed for sale;

(5) whether the owner, or anyone in control of the item, is a legitimate supplier of like or related items to the community, such as a licensed distributor or dealer of tobacco products;

(6) direct or circumstantial evidence of the ratio of sales of the item(s) to the total sales of the business enterprise;

(7) the existence and scope of legitimate uses of the item in the community; and

(8) expert testimony concerning its use.

c. 124.366 does not apply to—

(1) any person authorized by local, State, or Federal law to manufacture, possess, or distribute items described in 124.366; or

(2) any item that, in the normal lawful course of business, is sold through the mail, and primarily intended for use with tobacco products, including any pipe, paper, or accessory.

3. In 124.5, revise the heading of .55, the introductory paragraph of .551, .551b., .553, and .56 to read as follows:

124.5 Firearms, Knives, and Sharp Instruments (18 U.S.C. 1715, 1716).

* * * * *

.55 Switchblade and Ballistic Knives

.551 When Mailable. Knives (including sharp pointed instruments such as stilettos which lack cutting edges) having a blade which opens automatically by hand pressure applied to a button or other device in the handle, or by operation of inertia, gravity, or both, or having a detachable blade that is propelled by a spring-operated mechanism, are mailable only when sent to:

a. * * *

b. Manufacturers of such knives, or bona-fide dealers therein, in connection with a shipment made pursuant to an order from any person designated in 124.551a. (For advertisements for the mailing of switchblade and ballistic knives, see 123.431.)

* * * * *

.553 Explantation of Mailing. When in doubt as to the mailability of a proposed shipment of ballistic or switchblade knives, the postmaster will require the mailer to furnish a written statement explaining how the mailing complies with this section. If the explanation is not satisfactory, the postmaster will forward it to the appropriate Rates and Classification Center for a ruling.

.56 Marking Parcels of Firearms, Switchblades, and Ballistic Knives. No markings of any kind which would indicate the nature of the contents will be placed on the outside wrapper or container of any parcel containing firearms, ballistic or switchblade knives.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 111.3.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

[FR Doc. 87-23851 Filed 10-14-87; 8:45 am]

BILLING CODE 7710-12-M

---

39 CFR Part 266

Privacy of Information; Schedule of Fees

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service amends its Privacy Act regulations relating to fees that may be charged in connection with Privacy Act requests for records to make them consistent with the changes made in its FOIA fee schedule pursuant to the guidelines recently issued by the Office of Management and Budget (52 FR 10012 of March 27, 1987) implementing the fee provisions of the Freedom of Information Reform Act of 1986, and to reflect the increase in the directy cost to the Postal Service of duplicating records (from 10 cents to 15 cents per page).

EFFECTIVE DATE: October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Martha J. Smith, Program Manager, Records Office (202) 268-2931.

SUPPLEMENTARY INFORMATION: On August 31, 1987, the Postal Service published in the **Federal Register** (52 FR 32816) proposed changes to its regulations at 39 CFR 266.8 to conform the fees charged for duplication of records under the Privacy Act to the duplication fees reflected in 39 CFR 265.8(c)(4), Freedom of Information Act (FOIA) fee regulations (52 FR 13667 of April 24, 1987). No comments were received regarding these proposed changes. However, consistent with the intent of the proposed notice, a change is made to more fully conform the duplication fees under the Privacy Act with those under the FOIA by adding a sentence to § 266.8(b)(3) to read: "If duplicate copies are furnished at the request of the requester, the per page fee is charged for each copy of each duplicate page without regard to whether the requester is eligible for free copies pursuant to § 266.8(b)(1)." This change, added for clarification, is being issued as a final rule. In effect, the duplication fee assessed for processing a request for information maintained within a privacy system of records would be consistent with the fee charged for processing a request for information about an individual made by the subject of the information pursuant to the FOIA.

List of Subjects in 39 CFR Part 266

Postal Service, Privacy.

Accordingly, Part 266 of 39 CFR is amended as follows:

PART 266—PRIVACY OF INFORMATION

1. The authority citation for Part 266 continues to read as follows:

Authority: 39 U.S.C. 401; 5 U.S.C. 552a.

2. Section 266.8 is revised to read as follows:

§ 266.8 Schedule of fees.

(a) *Policy.* The purpose of this section is to establish fair and equitable fees to permit duplication of records for subject individuals (or authorized representatives) while recovering the full allowable direct costs incurred by the Postal Service.

(b) *Duplication.* (1) For duplicating any paper or micrographic record or publication or computer report, the fee is $.15 per page, except that the first 100 pages furnished in response to a particular request shall be furnished without charge. See paragraph (d) of this section for fee limitations.

(2) The Postal Service may at its discretion make coin-operated copy machines available at any location. In that event, requesters will be given the opportunity to make copies at their own expense.

(3) The Postal Service normally will not furnish more than one copy of any record. If duplicate copies are furnished at the request of the requester, the per page fee is charged for each copy of each duplicate page without regard to whether the requester is eligible for free copies pursuant to § 266.8(b)(1).

(c) *Aggregating requests.* When the custodian reasonably believes that a requester is attempting to break a request for similar types of records down into a series of requests in order to evade the assessment of fees, the custodian may aggregate the requests and charge accordingly.

(d) *Limitations.* No fee will be charged an individual for the process of retrieving, reviewing, or amending a record pertaining to that individual.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6765]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the

effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register.**

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 *et. seq.*). Accordingly, the communities will be suspended on the effective date in the fourth column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register.** In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Administrator finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6–month, and 30–day notification addressed to the Chief Executive Office that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[General Docket No. 86-285]

Establishment of a Fee Collection Program To Implement the Provisions of the Consolidated Omnibus Budget Reconciliation Act of 1985

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: On February 20, 1987, the Commission published a final rule in this proceeding concerning the establishment of a fee collection program. This document corrects errors in the rules amendments portion of that document.

FOR FURTHER INFORMATION CONTACT: Brent Weingardt, (202) 632-3906.

SUPPLEMENTARY INFORMATION: 1. On FR page 5289, the Table of Contents is corrected for § 1.1105 to read: "Schedule of charges for common carrier service requests."

2. On FR page 5292, § 1.1108(b) was miscodified. The paragraphs designated as (b)(i) introductory text, (A)–(D), (ii), and (iii) are hereby correctly designated as (b)(1) introductory text (i)–(iv), (2), and (3), respectively.

William J. Tricarico,

Secretary, Federal Communications Commission.

[FR Doc. 87-23777 Filed 10-14-87; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 85-251]

Television Broadcasting Services; Santa Barbara, CA, et al. and Galesburg, IL, et al.

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: By this document, the Commission on its own motion substitutes the following UHF television channels.

1. UHF Channel 45 for 48, Bakersfield, California;

2. UHF Channel *55 for *32, Santa Barbara, California;

3. UHF Channel 57 for 41, Ventura, California;

4. UHF Channel 67 for 63, Galesburg, Illinois;

5. UHF Channel *64 for *63, Streator, Illinois.

Originally, the above substitutions were proposed in order to implement the changes proposed in *General Docket* No. 85-172, wherein the Commission proposed additional spectrum sharing to provide sufficient communication capacity for land mobile services in certain major urban areas of the country. However, in light of the fact that Docket 85-172 is still pending, and construction permits have been granted in Bakersfield and Ventura, the Commission believes that it is in the public interest to make the proposed substitutions in order to expedite service to these communities. Furthermore, final action in this proceeding is not dependent on the outcome of the larger land mobile proceeding, since for each vacant channel proposed to be removed there is a comparable substitute channel and no oppositions have been submitted. Finally interested parties should note that the temporary freeze instituted in certain metropolitan areas pursuant to MM Docket 87-268 is applicable as follows:

(1) UHF Channel 48, Bakersfield, California; no impact, construction permit awarded;

(2) UHF Channel *55, Santa Barbara, California: applications may be accepted with a waiver request;

(3) UHF Channel 57, Ventura, California: no impact, construction permit awarded;

(4) UHF Channel 67, Galesburg, Illinois: no applications will be accepted;

(5) UHF Channel *64, Streator, Illinois: applications may be accepted with a waiver request.

EFFECTIVE DATE: November 23, 1987.

FOR FURTHER INFORMATION CONTACT: Arthur D. Scrutchins, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 85-251, adopted September 5, 1987, and released October 8, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

[Docket Nos. 50828–7106 and 70620–7184]

Reef Fish Fishery of the Gulf of Mexico and Northeast Multispecies Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rules; notice of OMB control numbers.

SUMMARY: This rule makes effective sections in the final rule implementing mandatory reporting requirements prescribed in the Fishery Management Plan for the Reef Fish Fishery of the Gulf of Mexico (FMP) and in the final rule implementing Amendment 1 to the Fishery Management Plan for the Northeast Multispecies Fishery. The Office of Management and Budget (OMB) has approved information collection requirements (ICR) of § 641.5(g) of the Reef Fish Fishery FMP and § 651.22(f) of the Northeast Multispecies Fishery FMP Amendment 1.

EFFECTIVE DATE: Sections 641.5(g) and 651.22(f) are effective October 2, 1987.

FOR FURTHER INFORMATION CONTACT: William R. Turner (Reef Fish Plan Coordinator), 813–893–3722, or Peter D. Colosi, Jr. (Multispecies Plan Coordinator), 617–281–3600, ext. 252.

SUPPLEMENTARY INFORMATION: On September 23, 1987 (52 FR 35717), NOAA published a final rule implementing mandatory reporting requirements prescribed in the final rule for the Reef Fish Fishery which becomes effective October 23, 1987. On October 2, 1987, OMB approved the ICR of § 641.5(g) for the Reef Fish Headboat logbook. On September 17, 1987 (52 FR 35093), NOAA published a final rule implementing Amendment 1 to the Northeast Multispecies Fishery FMP which was effective October 1, 1987. On October 2, 1987, OMB approved the ICR of § 651.22(f) for the Northeast Multispecies exempted fishery reporting revisions. This notice informs the public of the OMB approval of §§ 641.5(g) and 651.22(f) under control number 0648–0016.

Dated: October 8, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

Proposed Rules.

Federal Register
Vol. 52, No. 199
Thursday, October 15, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 911 and 915

Limes and Avocados Grown in Florida; Expenses and Assessment Rates for Specified Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish assessment rates under Marketing Orders 911 and 915 for the 1987–88 fiscal year established for each order. Funds to administer these programs are derived from assessments on handlers.

DATE: Comments must be received by October 26, 1987.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085-S, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523-S, Washington, DC 20090–6456, telephone 202–447–5697.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Order Nos. 911 (7 CFR Part 911) and 915 (7 CFR Part 915), regulating the handling of limes and avocados grown in Florida. Both orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 26 handlers of Florida limes and 34 handlers of Florida avocados under these marketing orders, and approximately 260 lime producers and 300 avocado producers in Florida. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

Each marketing order requires that the assessment rate for a particular fiscal year shall apply to all assessable commodities handled from the beginning of such year. An annual budget of expenses is prepared by each administrative committee and submitted to the Department of Agriculture for approval. The members of administrative committees are handlers and producers of the regulated commodities. They are familiar with the committees' needs and with the costs for goods, services and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by each committee is derived by dividing anticipated expenses by expected shipments of the commodity (e.g., pounds, tons, boxes, cartons, etc.). Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committees' expected expenses. Recommended budgets and rates of assessment are usually acted upon by the committees shortly before a season starts and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the committees will have funds to pay their expenses.

The Florida Lime Administrative Committee unanimously recommended 1987–88 fiscal year expenditures of $259,000 and an assessment rate of $0.15 per bushel of fresh limes shipped under M.O. 911. In comparison, 1986–87 fiscal year budgeted expenditures were $204,000, and the assessment rate was $0.15. Major expenditure categories in the 1987–88 budget are $121,000 for program administration, $25,000 for market development, and $113,000 for research. Assessment income for 1987–88 is expected to total $210,000, based on shipments of 1,400,000 bushels of limes. Interest income will amount to $1,000. The committee also unanimously recommended that excess 1986–87 assessments ($36,763) be placed in its reserve, resulting in a reserve well within the maximum authorized under the order. Committee reserves and other available funds amounted to about $137,538 on March 31, 1987 (the end of the 1986–87 fiscal year), and will be available to cover the anticipated $48,000 deficit for 1987–88.

The Avocado Administration Committee unanimously recommended a 1987–88 fiscal year budget with estimated expenditures of $200,000 and an assessment rate of $0.11 per bushel of fresh avocados. In comparison, 1986–87 fiscal year budgeted expenditures were $193,000 and the assessement rate was $0.11. Major expenditure categories in the 1987–88 budget are $120,000 for program administration, $25,000 for market development, and $55,000 for research. Assessment income for 1987–88 is expected to total $132,000, based on shipments of 1,200,000 bushels of avocados. Interest income will amount to $10,000. The committee also unanimously recommended that excess 1986–87 assessments ($54,957) be placed in its reserve, resulting in a reserve well within the maximum authorized under the order. Committee reserves and other available funds amounted to about $100,390 on March 31, 1987 (the end of the 1986–87 fiscal year), and will be available to cover the anticipated $58,000 deficit for 1987–88.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional cost may be passed onto producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing orders. Therefore, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for both programs need to be expedited. The committees need to have sufficient funds to pay their expense which are incurred on a continuous basis.

List of Subjects in 7 CFR Parts 911 and 915

Marketing agreements and orders, Limes (Florida), and Avocado (Florida).

For the reasons set forth in the preamble, it is proposed that §§ 911.226 and 915.226 be added as follows:

1. The authority citation for both 7 CFR Parts 911 and 915 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. The proposal is to add new §§ 911.226 and 915.226, to read as follows:

PART 911—LIMES GROWN IN FLORIDA

§ 911.226 Expenses and assessment rate.

Expenses of $259,000 by the Florida Lime Administrative Committee are authorized, and an assessment rate of $0.15 per bushel of limes is established for the fiscal year ending March 31, 1988. Unexpended funds from the 1986–87 fiscal year may be carried over as a reserve.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

§ 915.226 Expenses and assessment rate.

Expenses of $200,000 by the Avocado Administrative Committee are authorized, and an assessment rate of $0.11 per bushel of avocados is established for the fiscal year ending March 31, 1988. Unexpected funds from the 1986–87 fiscal year may be carried over as a reserve.

Dated: October 7,1987.

Deputy Director,

Robert C. Kenney,

Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

7 CFR Part 1030

[Docket No. AO–361–A25]

Milk in the Chicago Regional Marketing Area; Emergency Partial Decision on Proposed Amendments to Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts, on an expedited basis, amendments to the order regulating the handling of milk in the Chicago Regional marketing area based on industry proposals considered at a public hearing held at Madison, Wisconsin, on June 2–4, 1987. It establishes transfer credits on movements of bulk milk from pool plants to distributing plants for Class I use. One credit, the transportation credit, reimburses distributing plant handlers from marketwide pool funds up to .28 cents/cwt./mile on such tranfer milk. The other credit, the assembly credit, provides an 8-cent per cwt. pool reimbursement to pool plant handlers who assemble milk for transfer to bottling plants.

Marketwide service payment program were authorized by Congress when it amended the Agricultural Marketing Agreement Act of 1937 by the Food Security Act of 1985. The Food Security Improvements Act of 1986 provided further that any program providing payments for marketwide services adopted by the Secretary must be implemented not later than 120 days after a hearing is conducted. Therefore, the order changes must be effective by November 6, 1987; however, for administrative purposes November 1 is a preferable effective date. Accordingly, a recommended decision and the opportunity to file exceptions thereto have been omitted. Other issues considered at the June hearing will be dealt with in a later decision on this record.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–4829.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601 through 612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The amendments will promote more orderly marketing of milk by producers and regulated handlers.

This action does not change the current regulatory status of any pool plant located in the Chicago Regional marketing area. It does reimburse to handlers, from pool funds, some of the costs involved in getting milk to bottling plants. This action helps equate the cost of milk for fluid handlers who receive milk by transfer with the cost of milk for fluid handlers who received milk directly from farms. This action also helps equate the monetary returns of handlers who ship milk to bottlers for Class I uses with the returns of handlers who keep their milk and realize marketing margins on finished products. The economic impact of these provisions on dairy farmers whose milk is pooled is expected to be minimal.

Prior documents in this proceeding:

Notice of Hearing: Issued May 15, 1987; published May 19, 1987 (52 FR 18894).

Extension of Time for Filing Briefs: Issued July 31, 1987; published August 6, 1987 (52 FR 29196).

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Chicago Regional marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), and the applicable rules of practice (7 CFR Part 900), at Madison, Wisconsin on June 2–4, 1987. Notice of such hearing was issued on May 15, 1987 and published May 19, 1987 (52 FR 18894).

Interested parties were given until July 9, 1987, to file post-hearing briefs on proposals for marketwide service payments (numbers 1, 2, 3, 4, 5, and 11 as published in the hearing notice).

The material issues on the record of the hearing relate to:

1. Marketwide service payments.
2. Performance standards for pool plants.

3. Definition of supply plant and reserve supply plant.
4. Definition of producer milk.
5. Location adjustments.
6. Omission of a recommended decision and the opportunity to file written exceptions thereto with respect to material issue number 1.

This decision deals with issues 1 and 6. The remaining issues will be considered in a later decision on this record.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. Marketwide Service Payments.

Payments from the Order 30 pool funds should be provided to those handlers who perform certain marketwide services. Payments should be made to distributing plant handlers in the form of a transportation credit on bulk Class I milk received by transfer from pool plants and to pool plant handlers in the form of an assembly credit on milk tranferred to distributing plants for Class I use.

The transportation credit, in most cases, would be an additional credit for distributing plant handlers on receipts of milk from other pool plants, the other credit being the location adjustment such handlers already receive on certain transfer. A transferee handler would be reimbursed from pool funds for a portion of the hauling costs through a transportation credit equal to .28 cents per mile-per hundredweight times the miles between the shipping and receiving plants and less the difference in location adjustments for the zones where the two plants are located if the milk movement is to a higher-priced zone. For instance, the per hundredweight transportation credit for a distributing plant in Zone 1 that received milk from a pool plant located 50 miles away in Zone 4 would be determined by multipling .28 cents times 50 miles, which equals 14 cents, and subtracting the difference in location adjustments for the two plants of 9 cents (the Zone 1 adjustment is zero and the Zone 4 adjustment is 9 cents). Thus, the transportation credit from the pool would be 5 cents.

At times the transportation credit would be at the maximum level of .28 cents per mile—per hundredweight times the miles between the transferor-transferee plants. This would occur in those cases where a distributing plant handler would not receive any location adjustment credit because either the transferor plant is located closer to Chicago than the transferee plant or both plants are in the same zone. There are also instances when no transportation credit would apply. This would happen when the difference in location adjustments is greater than the amount computed by multiplying .28 cents per mile—per hundredweight times the miles between the two plants. For example, a distributing plant in Zone 1 receiving milk from a pool plant located five miles away in Zone 2 would not receive a transportation credit. This would be the case because the location adjustment in Zone 2 is 3 cents, which is greater than .28 cents times 5 miles, or 1.4 cents.

The volume of Class I milk eligible for the combined hauling credit would be that currently assigned pro rata to receipts during the month of bulk fluid milk products from other pool plants multiplied by 110 percent. And, as indicated above, the transportation credit would apply to all movements of milk for Class I uses from transferor to transferee (distributing plant) regardless of the direction of the milk movements.

The assembly credit is a credit to the transferor-plant handler on bulk transfers to pool distributing plants for Class I use. The transferor plant, year round, would receive an 8-cent per hundredweight credit on its pro rata share of shipments of Class I milk to a bottler, determined on the same basis as described above.

Included in the hearing notice were proposals of Central Milk Producers Cooperative (CMPC), a federation of 11 dairy-farmer cooperatives, which would provide for payments from the Order 30 pool to those who perform certain marketwide services. Under its proposals, there would be payments made to: (1) Distributing plant handlers in the form of a transportation credit on Class I milk received by transfer from pool plants; (2) supply plant handlers in the form of an assembly credit on all milk transferred to distributing plants; (3) producers via distributing plant handlers in the form of a direct-delivery differential on all milk shipped from farms to distributing plants; and (4) producers via supply plant handlers in the form of a divert-transfer type of direct-delivery differential on all milk shipped from farms to distributing plants.

The transportation credit proposed by CMPC would provide for an additional credit at the transferee plant (i.e., distributing plant) on fluid milk products transferred in bulk between pool plants. Together with the location adjustment credits that are already in the order, each distributing plant handler would receive a total credit of .42 cents and .28 cents per mile—per hundredweight on receipts of bulk fluid milk products by transfer from pool plants for Class I uses. The rate of .22 cents would apply during the period of March through July and the .28 cent rate would apply for the August through February period. The volume of Class I milk eligible for the combined hauling credit would still be assigned pro rata to receipts during the month of producer milk and of bulk fluid milk products from other pool plants as a group; however, the milk received by transfer which is eligible for the credit would be multiplied by 110 percent and further assigned for transportation credit starting with the receipts from the nearest plant (i.e., sequentially instead of proportionately). An exception to this additional credit would occur when an adjustment for location differences between a transferor plant and a transferee plant already yields a rate greater than the rates proposed. In this case, the greater rate would still apply. One final feature of this proposal is that it would apply to all movements of milk for Class I uses from transferor to transferee, regardless of the direction of the milk movements (i.e., the traditional north and south movements and movements from south to north and west to east). Therefore, movements of milk which presently go against the grain, from a plant in a zone with a higher price than that of the distributing plant to which the milk is being transferred, and presently do not receive any price adjustment for location differences would be given a transportation credit at the full rate proposed.

CMPC's proposed assembly credit would also provide a deduction from the handler's obligation to the pool. As proposed, supply plant handlers, which transfer milk to distributing plants would be entitled to a credit of 6 cents or 8 cents per hundredweight. The 6 cents per hundredweight would apply during the period of March through July and the 8 cents per hundredweight would apply for the August through February period. This credit would apply to the total amount of milk transferred and not just on the Class I portion as proposed for the transportation credit.

The direct-delivery differentials proposed by CMPC would be deducted in the uniform price computation. Producers would receive 6 cents or 8 cents per hundredweight of milk shipped directly from their farms to the distributing plants. As with the assembly credit, the 6 cents and 8 cents per hundredweight would apply during March through July for the former and

during August through February for the latter and the payment would be based on the actual amount of the shipment. As proposed, the distributing plant handlers would be obligated to pay these proceeds to those particular producers who shipped to them directly.

The fourth marketwide service payment proposed by CMPC would provide for further deductions from the uniform price computation in order to compensate those particular producers whose milk was delivered directly to distributing plant handlers by divert-transfer. The specifics of this payment are identical to those for the direct-delivery differentials except that a supply plant handler that diverts milk to a distributing plant would be responsible for the direct-delivery differential payment to producers.

Other proponents, The Southland Corporation and Kraft, Inc. (Southland and Kraft), also offered a proposal to consider marketwide service payments. Dean Foods Company (Dean) originally was a co-proponent with these handlers, but at the hearing and in its brief Dean supported CMPC's proposals on marketwide service payments. The Southland and Kraft proposal, however, is basically a modification of CMPC's proposals for assembly credits, direct-delivery differentials and divert-transfer type of direct-delivery differentials. As such, Southland and Kraft proposed that payments from the Order 30 pool should be made to those who make milk available for Class I uses at all pool plants, regardless of whether the receiving plant is a distributing or supply plant. Also, they proposed that beyond Zones 1 and 2, the per hundredweight rate should decrease one cent for each more distant zone until no payment is realized.

As with the CMPC proposal, Southland and Kraft's assembly credit would be a deduction from the handler's obligation to the pool and the rates used would be 6 cents per hundredweight during the March-July period and 8 cents per hundred weight during the August–February period. However, the similarity ends there because: (1) Southland and Kraft's assembly credit applies to any pool plant (supply or distributing) that transfers milk to another pool supply or distributing plant, whereas CMPC's credit is for transfers from a supply plant to a distributing plant only; (2) Southland and Kraft's assembly credit would apply only on the Class I portion of the transfer whereas CMPC's would be based on the actual amount of the transfer; and (3) Southland and Kraft's assembly credit decreases 1 cent per zone for transferee plants located beyond Zone 2 whereas CMPC's credit is constant throughout the marketing area.

Southland and Kraft's direct-delivery differential and divert-transfer type of direct-delivery differential, also like the CMPC proposals would be a deduction in the uniform price computation at the 6 cent and 8 cent per hundredweight rates. However, as with Southland and Kraft's assembly credit proposal, these proposed differentials would be paid only on the Class I portion of the farm deliveries to pool plants at decreasing rates beyond Zone 2.

In its brief, Southland, on its own behalf, modified its proposal to provide for an assembly credit and direct-delivery differential on milk moved to plants for Class I and Class II uses. Also, both the assembly credit and direct-delivery differential, year-round, would be 8 cents per hundredweight for plants in Zones 1 and 2, 7 cents per hundredweight for plants in Zones 3 and 4, and 6 cents per hundredweight for plants located beyond Zone 4.

In its brief, Kraft did not concur with the Southland modification of the assembly credit and direct-delivery differentials. Furthermore, Kraft took a supporting stance concerning CMPC's proposed transportation credit, and suggested limiting the transportation credit to transfers of milk which exceed 60 miles in order to encourage direct deliveries of close-by milk, while compensating handlers when nearby milk is unavailable.

At the hearing, two farmer organizations, National Farmers Organization (NFO) and Farmers Union Milk Marketing Cooperative (FUMMC), opposed the CMPC proposals and the part of the Southland and Kraft proposal which deals with assembly credits. NFO and FUMMC did support the Southland and Kraft concept of direct-delivery differentials and divert-transfer type of direct-delivery differential; however, they did not favor the decreasing-rate schedule.

Also at the hearing, a proprietary group, the Trade Association of Proprietary Plants (TAPP), said that CMPC's proposed transportation credit had merit although they questioned the need for a reduced rate during the flush months, because in their opinion both rates are sufficiently below actual hauling costs to discourage unnecessary milk movements. In its brief TAPP supported that proposal suggesting the following limitations:

1. If a distributing plant receives enough direct-shipped milk to satisfy its Class I needs, then there would be no transportation credit on shipments received from any other pool plant, be it affiliated, (i.e., the distributing plant and supplying pool plant are owned by the same entity), or non-owned.

2. If a distributing plant does not receive enough direct-shipped milk to satisfy its Class I needs, then there would be a transportation credit on shipments received from other pool plants, however, such supplemental shipments would have to come from affiliated pool plants and the transportation credit would be snubbed at that amount resulting from shipment between the closest distributing plant-supplying pool plant pairing of affiliated plants. Only if a distributing plant does not receive enough direct-shipped milk to satisfy Class I needs and has no affiliation with other pool plants would a transportation credit apply on shipments from non-owned supplying pool plants.

Notwithstanding its support for a transportation credit, TAPP, in general, opposed all marketwide service payments. Wisconsin Cheesemakers Association (WCMA) likewise stated that the transportation credit proposal was justifiable but opposed the other marketwide service payment proposals. However, in its brief, WCMA suggested that the rate be reconsidered. Instead of the .28 cent and .22 cent per mile rate proposed, they called for the rate to be constant throughout the year, set at 50 percent of actual transportation costs. Utilizing the data introduced at the hearing, they arrived at a rate of .21 cents.

CMPC is composed of the following 11 dairy cooperatives: Alto-Golden Guernsey Cooperative, Associated Milk Producers Inc.–Morning Glory Farms Region, Independent Milk Producers Cooperative, Lake-to-Lake Division of Land O'Lakes Dairy Cooperative, Manitowoc Milk Producers Cooperative, Mid-West Dairymen's Company, Milwaukee Cooperative Milk Producers, Outagamie Milk Producers Cooperative, Southern Milk Sales, Wisconsin Dairies Cooperative, and Woodstock Progressive Milk Producers Association. CMPC members account, in the aggregate, for approximately 80 percent of the milk delivered monthly to Order 30 pool plants. Also each month, approximately 94 percent of the milk allocated to Class I is received by Order 30 pool plants subject to the CMPC announced terms of sale.

In support of its proposal for payment from the Order 30 pool for a transportation credit, the spokesman for CMPC claimed that the present location adjustments do not adequately cover the cost of hauling milk from a supply plant

UMI

to a bottling plant, a milk movement that involves approximately 116 million pounds per month or 40 percent of the milk needed for fluid use, nor do they recognize all ordinary movements of milk for fluid use. He stated, however, that because the 1985 Farm Bill amended the Agricultural Marketing Agreement Act (Act) to allow payments from the pool for services of marketwide benefit, now both of these problems can be simultaneously resolved.

Proponent testified that other approaches to solving the problem of inadequate location adjustments were not acceptable. One approach, to increase the location adjustment between plants, he said, would not only increase the transportation rate but also decrease the uniform price for most producers. This, he said, could result in a mass exodus of producers from the pool. He added that one other approach, to increase the Class I differential, repeatedly was denied by the Department for hearing.

The proponent claimed that the rate now employed under location adjustments is clearly outdated. Proponent introduced an exhibit into the record to show that distributing plant handlers, on average, are presently paying 72 percent of the cost of hauling milk from supplying plants to their bottling operations. However, proponent also showed that when the proposed $.0028 per mile rate was applied, handlers would have to pay an average of only 35 percent of the actual cost of hauling. Thus, he said, CMPC's goal of effectively increasing the rate applicable on all transfers without completely recovering the hauling costs for most fluid handlers would be accomplished.

Proponent testified that present location adjustment provisions were structured on the premise that milk moves from the milkshed in the north to the city of Chicago in the south. Proponent's claim is that milk no longer just moves in a north-south direction but also in south-north and west-east directions because the bottling industry has developed along the eastern side of the marketing area. Proponent added that milk moves in any direction in which it is economically feasible to satisfy the needs of the fluid sector. Therefore, it was their belief that these new provisions should accommodate everyday milk movements.

The proponent also stated that CMPC proposed a lower rate of $.0022 per mile applicable during the period of March through July, in order to discourage milk from moving long distances during the flush. Although transportation costs do not vary seasonally, proponent believes that it is not necessary for the order to provide the same rate for transportation during the period of higher production as it does for the short production months.

Proponent testified that a sequential assignment of transfers would help assure that the transportation credit is not abused. Such a change, he said, would encourage transfers from pool plants located the shortest distance from the receiving plant.

NFO and FUMMC both opposed CMPC's transportation credit proposal. Their spokesmen concurred that such credit is not advisable because it would take money out of the pool, thereby decreasing the blend price. Also, it was their view that a south to north shipment is inefficient and uneconomic. FUMMC added that the transportation credit would encourage less efficient milk movements. Taking into account that the haul of direct-shipped milk is highly subsidized by bottlers, FUMMC believes that the extra credit to handlers would be more than enough to get them to switch from direct to transfer milk.

In support of its proposal for payment from the Order 30 pool for an assembly credit, a CMPC spokesman claimed that the cost of supplying milk to distributing plants is not borne evenly by all pool supply plants or their associated producers. Proponent stated that although 40 percent of all the milk needed by bottling plants is received by way of transfer, i.e., roughly 116 million pounds per month, only some supply plants actually meet these needs while others realize manufacturing margins from retained milk. Yet, he added, all draw equally from the pool money generated by the Class I value of milk supplied by the performing plants.

The spokesman stated that the assembly credit which they proposed fits the description of a marketwide service benefit. As proponent took note in it statement from the Department's earlier decision which dealt with this same issue, the entire market benefits from market balancing activities performed by certain handlers; therefore, all producers should share in the cost of providing these services.

In its brief, proponent pointed to statistics presented at the hearing to show the contrast between those who perform for the fluid market and those that do not. Proponent showed that during the period of September 1986–April 1987, CMPC member plant shipments to distributing plants averaged 38 percent of monthly receipts. On the other hand, for the period August 1984–January 1985, there were 66 pool supply and reserve supply plants that shipped less than 5 percent of their producer receipts.

Proponent stated that the assembly credit rate proposed would only provide partial compensation. This is so, he said, because CMPC did not want the Federal order to be an establisher of rates. In its brief, CMPC added that the rate proposed is constant over all 16 zones because this added incentive is needed to move milk from supply plants to distributing plants irrespective of the zone in which the bottler is located. Proponent acknowledged that the Chicago metroplitan area exhibits the greatest deficit of producer milk production in relaton to consumer demand. However, CMPC holds the view that there is a demand for milk at bottling plants located in farther-out zones that may be shipping packaged milk into the Chicago area to meet consumer demands for fluid milk. Proponent added that the distributing plants in the outer zones face steep competition with the manufacturing plants for their milk supplies.

One final point of the proponent was that the credit would apply only on actual shipments to pool distributing plants because of the fact that retained milk realizes marketing margins. It would, however, apply on the entire shipment regardless of the use made of it by the bottling handler. Otherwise, according to proponent, shipping handlers would request (but not all would get) Class I status for the milk that they transfer to bottlers.

Alto-Golden Guernsey (AGG), a member of CMPC which operates three reserve supply plants and two distributing plants regulated under Order 30, gave a minority statement regarding who should be entitled to the assembly credit. It was AGG's view that milk shipments from any pool plant to a distributing plant should entitle the transferor, whether supply plant or another distributing plant, to the credit. This is consistent, a spokesman said, with the current location adjustment provisions and the CMPC proposed transportation credit, which allow distributing plants a credit on receipts of milk from any pool plant.

NFO, FUMMC, TAPP, and WCMA all opposed the assembly credit proposal because they believe such costs should be paid through over-order charges by the handlers who receive the milk. NFO added that the proposed rate may be set at a point where some supply plants would cover all operational costs because they believe that efficient reloads can operate at the 8 cent per hundredweight level or less.

In support of its proposed direct-delivery differentials, the CMPC spokesman stated that such payments

would help preserve the direct-shipped milk and divert-transfer milk that currently moves to fluid handlers. The proponent claimed that direct farm to distributing plant type of shipments supply a monthly average of 173 million pounds or 60 percent of the milk needed each month at the bottling plants, with 81 million pounds being direct-shipped milk and 92 million pounds being divert-transfer milk. These milk movements, he said, are the most efficient and should be encouraged.

Proponent testified that the differentials should apply on the entire shipment to a distributing plant, because to limit it to anything less could result in producers receiving varying values based on handlers' Class I utilizations. In addition, CMPC, in its brief, claimed that the Food Security Act of 1985 specifically provides for such payments out of pool funds irrespective of the use classification of such milk. CMPC also stated that to limit the credit based on a plant's Class I utilization clearly would violate the marketwide pooling requirement of the Act, and in effect, create an individual-handler pool. It was CMPC's opinion that any such proposal would lead to producers switching to the plants with highest utilization. This is turn would cause those plants with relatively lower utilization to match the extra payment to retain supplies, and thus, costs would increase. CMPC added that limiting the credit based on a plant's Class I utilization would also lead to producers shipping milk farther distances to get to the highest utilization plants, at least further than necessary to derive the benefit that would be secured by CMPC's proposal.

Southland and Kraft, co-proponents of a proposal which basically modifies the CMPC assembly credit and direct-delivery differential proposals, each operate in the Chicago Regional market. Southland has one and Kraft five regulated reserve supply plants. A spokesman for Southland and Kraft claimed that such modifications are necessary because as proposed, the CMPC assembly credit and direct-delivery differential proposals would both create an unfair price difference between competing handlers and give special incentives for moving milk to distributing plants located in areas of high milk production when not needed.

The spokesman, referring to a 1977 decision of the Secretary to amend the Chicago Regional order, pointed out that it has been Department policy to promote a more equitable and competitive basis between a handler with Class I and II products produced in one plant and a handler with these same products produced in separate, specialized plants. However, he stated that CMPC's proposal, if not modified, would result in distributing plants with other than Class I products having an advantage over supply plants that produce like Class II or III products. This is so, he said, because producers or handlers who ship to any distributing plant would collect the 6 or 8 cents per hundredweight on the entire load no matter what class-use was made of it, whereas if they were to ship milk to any supply plant, they would not receive extra monies from the pool even if such shipment was directed for Class I use.

He added that such a proposition ignores the basic rationale for marketwide service payments of supplying the Class I needs of the market. Also, he said, it creates an incentive to couple Class II and III operations with Class I operations.

In its brief, Kraft claimed that the Southland and Kraft proposal would more effectively achieve the intent espoused by CMPC (i.e., meeting the fluid needs of the market) and would avoid inequities between Class II handlers. However, in its brief, Southland alone took the revised stance that the assembly credit and direct-delivery differential be provided for milk moved to plants for both Class I and Class II uses in order to maintain competitive equity among handlers producing like products. Kraft stood firm in its view that it is inappropriate to provide credits for milk shipments used to produce Class II products.

It was Southland and Kraft's view that prior to deciding which direct-delivery differential proposal had merit, the Secretary would have to answer the question of whether or not either proposal is authorized by the Act because both cause unequal payments to producers for milk delivered to similarly situated plants, depending upon the utilization or status of the plant. Southland and Kraft pointed out that under the CMPC proposal, producers delivering milk directly to a distributing plant would be eligible to receive a credit, while producers deliverying to a neighboring supply plant, at the same location, would not be eligible for such additional compensation. In addition, under their own proposal, the amount of credit passed on by handlers to producers would vary, depending on the Class I utilization of the plant.

In support of their proposal to gradually reduce the assembly credit and direct-delivery differential to zero in the outer zones, the Southland and Kraft spokesman claimed that it would provide an incentive for producers and shipping plants to supply the fluid needs of Class I handlers in the milk-deficient zones of the market. Outside of Zones 1 and 2, he said, there is sufficient milk to meet the consumer fluid milk demands. Southland and Kraft introduced an exhibit into the record to show that the Chicago area was milk-deficient relative to consumer demand, having to reach out 90 miles to meet that demand. Two other consumption centers of the market shown on the exhibit, Madison and Milwaukee, Wisconsin, had sufficient milk production in their own and surrounding counties. Therefore, Southland and Kraft believes that the credits are acceptable incentives for the Chicago area, specifically Zones 1 and 2, and that they compensate for the hauling shortfall built into the present location adjustment system, but elsewhere in the market they are not acceptable. The spokesman added that in other markets, direct-delivery differentials are given on milk deliveries to bottlers located in the major consumption area, not in the milkshed.

One other point put forth by the spokesman was that the assembly credit should be decreased in direct relationship to the need for assembled milk. If a bottler is located in a sea of milk, then the handler's milk supply should be obtained by direct-delivery; there should be no encouragement to pass through a supply plant before delivering it to plants so situated. However, for plants located in Chicago, he said, running the milk through a reload from some supply areas may be the most efficient system.

In its brief, Southland took the revised stance that year-round, the assembly credit and the direct-delivery differentials should be 8 cents per hundredweight for plants in Zones 1 and 2, 7 cents for Zones 3 and 4, and 6 cents for the remaining zones. Citing several marketing facts brought out at the hearing, such as distributing plants are located throughout the 16-zone area and that these plants currently receive milk by transfer, including the plants in Zones 8 through 16, Southland stated that while the need for assembling and transferring milk may not be as great in some parts of the market as others, it is an important part of milk procurement throughout the Order 30 region.

Kraft, in its brief, stood firm that these payments should only apply to shipments to the inner zones of the market where milk supplies are short and the need for milk is greatest. Furthermore, Kraft stated that CMPC's proposals would reward those who made close-by shipments the same as

those who moved their milk relatively longer distances. Therefore, Kraft holds the view that under such a scheme, shipments to bottlers in the milkshed would be preferred since one would reap the same reward at less expense. Kraft added that if the credits are allowed on shipments to bottlers in the milkshed, then inefficient transfers of milk would ensue, in place of direct shipments, so that plant operators could take advantage of all the new credits.

As stated, Dean, a major milk handler in the Chicago Regional market with three distributing plants, two reserve supply plants, and one supply plant regulated under Order 30, withdrew as a co-proponent of alternative proposals and gave its support to CMPC's proposals. In its brief, Dean stated that the assembly credit and direct-delivery differentials should apply towards an entire shipment, not just the portion used in Class I, because operators of supply plants and producers ship to bottlers believing that their milk will be used in Class I products. The cost over the entire load is the same, Dean said, no matter what its ultimate use is at the plant. Therefore, they should not be deprived the extra monies when a distributing plant handler decides to use only part or none of the load in the bottle. Dean warned that a handler who owns both a bottling and shipping plant could decide to assign all Class I to its own shipments, which, Dean believes, would not be in the best interest of orderly marketing. One other outcome, Dean stated, could be that the shippers, either plant operators or producers, would ssek out the higher Class I use bottlers and avoid those with relatively low Class I use.

Dean also stated opposition to the decreasing payment by zone proposed by Southland and Kraft, contending that milk delivered to a plant in Green Bay (Zone 12) is equally valuable to the fluid market as that delivered to plant in Milwaukee (Zone 4) or Chicago (Zone 1).

Although they favored the Southland and Kraft direct-delivery differential proposal inasfar as it limits such payments to the Class I use at the receiving plant, NFO and FUMMC opposed the decreasing rate schedule because they believe that distributing plants located beyond Zone 2 also serve the fluid needs of the milk-deficient Chicago area. In their opinion it is equally important that all bottling plants be granted identical differentials in order to draw milk to them.

TAPP and WCMA both opposed any form of direct-delivery differentials because in their view, such payment, especially to plants located beyond Zone 6, would be disruptive to orderly marketing. This is so, they said, because direct-delivery differentials would give bottling plants a 6 or 8 cent competitive advantage over proprietary manufacturing plants located in the same area. Such proposals, they said, would undermine the manufacturing segment of the dairy industry. They added that the Southland and Kraft modification, i.e., payment on the Class I portion of a shipment, would undermine the marketwide concept of pooling. One further point raised was that the direct-delivery differentials proposed may not even be authorized by the Food Security Act of 1985, which allows for payment from the pool to handlers, not to producers.

a. *Transportation Credits.* The order should provide transportation credits at the rate of .28 cents per mile per hundredweight to pool distributing plant operators for the Class I portion of bulk milk received by transfer from other pool plants. The volume of such transfers on which the transportation credit would be allowed would be determined on the same basis that location adjustment credits are determined for Class I milk from pool plants. The transportation credits would thus be assigned pro rata to Class I receipts from each pool plant multiplied by 110 percent. The transportation credits would be based on the distance between the distributing plant and the shipping pool plant, as determined by the market administrator, and would be applicable to movements of milk in any direction.

Supply plants are a major source of milk for distributing plants in the Chicago order. In 1986, actual transfers of milk from supply plants and reserve supply plants to pool distributing plants averaged bout 116 million pounds per month, varying from less than 100 million pounds in June and July to about 145 million pounds in October and November. In 1986, 40.2 per cent of the total raw milk physically received at distributing plants was received by transfer from supply plants and reserve supply plants.

In the Chicago market, the distributing plant operator pays the cost of hauling to the distributing plant milk purchased from a supply plant. The distributing plant operator receives any allowable Class I location adjustment under the order on Class I milk at the shipping plant zone. In contrast, milk that a distributing plant receives directly from dairy farms is accounted for at the order prices applicable for the zone where the plant is located. If authorized by the producer, the handler may deduct from payments to a producer the cost of hauling milk from the farm to the plant. Accordingly, if the hauling deduction is made, the handler's lowest cost source of milk should be milk that is recieved directly from producers.

The order provides a location adjustment to the Class I price for milk obtained from a plant located in a zone more distant from Chicago than the distributing plant. This pricing system is intended to recognize the cost of moving milk toward the major population center in the market, Chicago. However, the location adjustment rate of 2.3 cents per hundredweight per 15 miles provided in the order (equal to 1.5 cents per hundredweight per 10 miles) no longer adequately reflects actual hauling costs for moving milk from one plant to another plant. Thus, the additional cost not covered by the order for transferring milk from another pool plant to a distributing plant creates an inequity at a given location between handlers who receive milk via other plant transfers and those who receive milk by direct shipments from the farms of producers. Where there may not be adequate supplies of direct-shipped milk to meet the Class I needs of distributing plants, plants that rely on supply plant milk have some competitive disadvantage compared to those plants that are able to meet their needs with direct-shipped milk.

In addition to the inadequacy of the location adjustment rate provided in the order, the very nature of the market tends not to encourage the movement of milk to distributing plants for Class I uses because manufacturing plants are located throughout the marketing area and provide strong competition for producer milk supplies. The result is that distrubuting plants have difficulty attracting adequate milk supplies at prices that allow them to be competitive with handlers under other nearby orders.

It is not the purpose of the Federal milk marketing order program to arrange for a supply of milk for any milk plant, or to find an outlet for any supply of milk. However, contrary to views expressed by opponents at the hearing, a major purpose of the order program is to assure an adequate supply of pure and wholesome milk for the fluid market and to establish and maintain orderly marketing conditions. This includes adopting order provisions to facilitate securing adequate supplies of milk to meet the market's fluid milk needs. The record shows that obtaining adequate milk for those needs is not being accomplished in an orderly and equitable fashion under the current order provisions.

Conceptually, there are more ways than one to approach this problem. One way would be to increase the Class I price level and increase the location adjustment rate under the Chicago order. While this would encourage more milk to move to fluid milk plants, it would also create misalignment of prices with other nearby orders. Since the Chicago price would be too high relative to the other orders, fluid milk handlers would be placed in an unfavorable competitive position and could lose sales to handlers regulated under other orders. Moreover, a higher Class I price would be difficult, if not impossible, to justify given the current supply-demand situation in the Chicago market where the Class I utilization level averages about 20 percent annually.

Another way to encourage milk to move to the market for Class I use would be to simply provide a steeper slope to the location adjustments of the Class I and unform prices. However, this approach also would create price alignment problems which could result in a competitive advantage for Chicago area handlers relative to other orders. This, too, would not be an acceptable solution.

Because of the existence of these price alignment constraints, the cooperatives that make up CMPC have implemented a system outside the order to deal with a portion of the transportation costs of moving milk between plants. Now that the Agricultural Marketing Agreement Act (the Act) has been amended to permit payments to handlers out of pooled producer returns for services of marketwide benefit, CMPC is proposing that the order do what CMPS has attempted to do outside the order, namely, reimburse handlers of Class I milk for a portion of the cost of obtaining milk from supply plants.

The concept of using pool funds to facilitate the movement of milk from supply plants and other pool plants to distributing plants was widely supported at the hearing. However, two cooperatives, FUMMC and NFO, opposed the concept. Their position was that no provision should be adopted that would take money from producers to pay handlers for providing services that benefit primarily the handlers. This position is noted. However, the Act provides that such payments may be made.

Specifically, in section 608c(5)(J)(iii) of the Act, Congress has delineated "transporting milk from one location to another for the purpose of fulfilling requirements for milk of a higher use classification * * *," as a service of marketwide benefit. Congress also indicated that any program of paying handlers for performing marketwide services must meet the requirements of the Act.

The transportation credit provisions adopted in this decision meet the requirements set forth in the statute. The market as a whole benefits from having the fluid milk market adequately supplied in a manner that promotes orderliness in the marketplace. The transportation credits will tend to promote the orderly marketing of milk by encouraging supply plants and other pool plants to make milk available to distributing plants for Class I use.

Distributing plants are located throughout the market. Some are situated with plentiful supplies of raw milk nearby. Others are located more distant from milk supplies. However, a principal characteristic of the Chicago market is that manufacturing plants also are located throughout the milkshed, thus providing intense competition for milk supplies. In this situation, it is essential to orderly marketing that the order recognize more fully the costs of transporting milk.

The current order has location adjustment provisions that recognize a portion of the costs of transporting milk. Through the operation of marketwide pooling, that portion of the hauling costs covered by the location adjustments is shared by all producers. However, as noted earlier in this decision, the location adjustment provisions no longer adequately reflect current hauling costs. Thus, handlers who pay for transporting for milk between plants incur a greater cost than is recognized by the order. Those handlers who incur such additional hauling costs have higher costs than other handlers who do not receive milk from other plants. Moreover, the additional hauling costs, which are not reflected in the order's blend prices, are not shared by all the producers who enjoy the blend prices that results from marketwide pooling. However, as indicated earlier, full recognition of hauling costs in the location adjustment provisions is not a practicable means of dealing with this problem.

The transportation credits provided herein will promote orderly marketing through provisions that are fully consistent with the intent and purposes of the Act. The operation of the credits will improve equity among competing fluid milk handlers by reimbursing a protion of the additional costs incurred when such handlers must reach out to other plans to obtain milk for Class I uses. On the other hand, the costs of such reimbursement will be spread out among all of the market's producers. Thus, all producers who share in the benefits of the higher returns of the fluid market through marketwide pooling will share also the costs of servicing the fluid milk sector of the market on a more equitable basis.

CMPC's proposal would have varied the per-mile hundredweight rate from .28 cents for September through February to .22 cents for March through August. The purpose behind the seasonal variation was that during the surplus production season milk moves to distributing plants from significantly shorter distances than it does during the short production season. CMPC was concerned that a constant rate could encourage distant shipments when not needed and thus further reduce the blend price unnecessarily.

Proponents introduced exhibits showing actual hauling costs paid by distributing plant operators during May, October, November, and December 1986 for plant-to-plant shipments of milk. These data, covering shipments ranging from one mile to 393 miles, indicate an overall average hauling rate of about .42 cents per mile-per hundredweight, although there was a wide range in the hauling rates paid. CMPC chose to propose two-thirds of the average hauling cost to yield a transportation credit rate of .28 cents in the fall months in order to not provide total recovery of hauling cost. Similarly, they proposed 80 percent of the fall rate for the flush production months.

The .28 cents per mile-per hundredweight rate is reasonable and should be adopted as the maximum transportation credit for all months. There is no basis in the record for concluding that hauling rates in the flush production season are 80 percent of short-season rates.

The transportation credits should be applied pro rata to receipts of milk from pool plants. This procedure will conform to the way location adjustments are applied. Since the transportation credits are intended to supplement the location adjustments, it is consistent to follow the same procedures for both provisions.

As proposed, the transportation credits should be applicable to plant-to-milk shipments that move in any direction. The market's principal direction of milk movements is from north to south and northwest to southeast, that is, from the production areas to the principal population center, the Chicago area, which is located in the southeast corner of the marketing area. However, other major population areas, such as Milwaukee and Green Bay, Wisconsin, are along the western shore of Lake Michigan, which forms the

eastern boundary of the marketing area. The record demonstrates that in certain cases shipments of milk from west to east and south to north are feasible and economically practicable. However, the order's location adjustments apply only to shipments that move in the traditional north to south or northwest to southeast direction. Thus, there is no incentive under the order's price structure to move milk supplies in those directions for which there are no location adjustments. The current location adjustment provisions would not be changed by this decision.

There was no specific opposition to the proposed application of transportation credits to milk movements as just described. However, the brief filed on behalf of Kraft urged that the transportation credits apply only to shipments that originate from plants located more than 60 miles from the distributing plant. The purpose of such a limitation would be to encourage primarily the longer distance shipments to distributing plants located in zones one through four. It is clear that these plants do not have sufficient supplies of milk nearby and must depend to a great degree on supply plant milk for their supplies. Also, according to the brief, such a limitation on the application of the transportation credits would discourage distributing plant operators from reaching out to distant supply plants for milk when direct-shipped milk is available from nearby farms.

A similar view was expressed in the brief filed by TAPP, which proposed several restrictions on allowing distributing plants to receive transportation credits. The brief urged that transportation credits only apply to:

1. Class I use, including inventory and shrinkage;
2. Necessary supplemental milk from supply plants; the credits should not apply if the distributing plant has an adequate supply of direct-shipped milk or if the distributing plant shifts milk available by direct shipment to other plants.

Similarly, distributing plants should not receive hauling credits in excess of those applicable to receipts from its own closest supply plants.

The concerns addressed in the briefs filed by Kraft and TAPP should be adequately addressed under the safeguard adopted herein. That is, the less than total coverage of hauling costs by the credits should discourage bypassing locally available supplies in order to obtain credits by receiving milk from more distant plants. Moreover, it would be administratively burdensome to make some of the determinations that would be required to carry out the intent of some of the restrictions called for in TAPP's brief.

As adopted the transportation credits and the current location adjustment provisions will be complementary. The maximum total credit (the transportation credit and the location adjustment combined) on any shipment of milk will be the amount determined by multiplying the .28 cents per mile-per hundredweight rate by the distance between the shipping and receiving plants. Such distance would be determined by the market administrator on the same basis that distances between plants are determined under the current location adjustment provisions of the order. If milk moves in a direction such that a location adjustment covers part of the transportation cost, the location adjustment would apply and the transportation credit would be reduced by the amount of the transportation costs covered by the location adjustment. However, if the location adjustment does not cover any of the transfer cost, the full transportation credit would be allowed. This will carry out the intent that credits apply to milk movements in any direction, but that total compensation not cover the entire hauling cost.

b. *Assembly Credits.* The order also should provide an assembly credit to pool plant operators on milk they assembly and ship to distributing plants for Class I use. Like the transportation credits, the assembly credits would be deducted from the pooled value of milk before computation of the uniform price and would be credited against the supplying handler's pool obligation. The rate for the credit should be eight cents per hundredweight.

The Act, in 608c(5)(J)(i), delineates "providing facilities to furnish additional supplies of milk needed by handlers * * * *" as a service of marketwide benefit. The operation of supply plant facilities is a service of marketwide benefit because it is a function involved in moving milk from one location to another for the purpose of fulfilling requirements for milk of a higher use classification. Before milk can be transported from a supply plant to a distributing plant, it must be assembled, and perhaps cooled and stored, then reloaded onto a truck. The costs incurred in performing these functions are not currently recognized in the order.

Since servicing the Class I milk needs of fluid milk handlers is recognized as a service of marketwide benefit, it is appropriate that all producers share in the cost of providing that service. This will be realized by providing an assembly credit, and it is consistent with a major purpose of the Act to assure an adequate supply of pure and wholesome milk for the fluid market and to maintain orderly marketing conditions.

The assembly credit as adopted differs from CMPC's proposal in that the eight cents per hundredweight rate would be applicable each month, rather than varying seasonally, and would be based on transfers assigned to Class I use of the receiving plant. The assembly credit recognizes that there are certain costs associated with the process of assembling and shipping milk to distributing plants. These costs are in addition to the hauling costs that are incurred when milk is shipped from a supply plant to a distributing plant and which will be recovered in part through the transportation credits as discussed elsewhere in this decision.

CMPC proposed that an assembly credit be provided at eight cents per hundredweight for the months of August through February and six centers per hundredweight in the remaining months.

In order to develop a cost basis for the assembly credit, CMPC conducted a detailed survey of the costs incurred in operating 10 reload plants that are totally dedicated to serving the fluid milk market. It was CMPC's view that the mixed operations of manufacturing plants precluded the isolation and determination of the basic costs of assembling Grade A milk for shipment to the fluid market from such plants.

The survey of costs of the 10 reloads yielded a weighted average costs of operation of 12.79 cents per hundredweight, comprised of both fixed and variable costs, for the months of September 1985 through August 1986. A summary of the costs were presented in exhibit number 35 and need not be set out herein in detail. During the 12-month period, the total volume of milk handled through the reloads each month varied from just under 100 million pounds to more than 123 million pounds. The reloads were operated by cooperative associations and proprietary handlers.

It is apparent from data provided in exhibits that the milk received at the 10 reloads included in the detailed cost survey represents a substantial portion of the milk that is transferred to distributing plants from supply plants and reserve supply plants. For example, in Janaury 1986, the 10 reloads had producer milk receipts of 108.3 million pounds. In that month, distributing plants received 110.6 million pounds of milk by transfer from supply and reserve supply plants. Thus, the producer milk receipts of the 10 reloads equaled about

98 percent of the amount actually transferred that month. In June 1986, the same computation yields about 78 percent. Thus, it appears that the cost survey represents costs applicable to a vast majority of the milk that moves from supply and reserve supply plants to distributing plants via actual transfer.

The cost data assembled for the reload operations must be viewed as being suitable for the purpose intended here. Although some questions were raised about the cost data, no other data was presented to refute the validity of the costs submitted by CMPC as representative of actual reload operating costs.

The proponents also did not wish to reimburse supply plants for the total costs of assembling milk, yet they wanted to cover much of those costs. So they first multiplied 12.79 cents by 80 percent, which yielded about 10 cents. This was again by 20 percent because there was variation in the costs of operating the various reloads. The end result thus was the eight cents per hundredweight that CMPC proposed for the short production season. The 80 percent was applied again because the use of reloads varied from month-to-month, which yields the six cents per hundredweight that was proposed as the rate for the assembly credits during March through July.

As in the case of the transportation credits, the arguments in favor of seasonally varying the assembly credits are not convincing. The cost data submitted by CMPC does not reveal any particular seasonal pattern. If a seasonal variation were adopted, it should be based on a demonstration that costs actually vary on a seasonal basis. That is not the case here and so the eight cents per hundredweight rate should be applicable each month.

As adopted herein, the assembly credit will be available to any pool plant that receives milk and ships it to a distributing plant. CMPC's proposal would have limited the credit to shipments from supply plants to distributing plants. However, it is more consistent with the structure of the Chicago order to provide the credits for the pro rata share of Class I milk in any pool plant's shipments of bulk milk to a distributing plant. Whether such shipments originate at a supply plant or another distributing plant, the benefit to the market it terms of supplying milk for Class I use is the same.

Similarly, CMPC's proposal to apply the assembly credit to the entire quantity of milk from a supply plant to a distributing plant should not be adopted. Instead, each pool plant that ships milk to a distributing plant should receive a credit based on a pro rata share of the distribution plant's allocation of Class I use. The procedure to be followed would be essentially the same as now applies in determining the total location adjustment allowed a distributing plant when it receives Class I milk from several different sources. As in the case of both the location adjustment and the transportation credit, the basis for establishing the total amount of assembly credits to be allowed would be 110 percent of the distributing plant's total Class I assigned to receipts from other pool plants.

The primary reason, according to CMPC's spokesman, for proposing to allow assembly credits on all milk that is shipped form the supply plant to a distributing plant was to facilitate the billing process between the shipping and receiving handler. Nevertheless, it is more consistent with the concept of recognizing service to the Class I market to restrict the assembly credits to a measure of the receiving plant's Class I use.

c. *Direct-Delivery Differentials.* Proposals to provide separate payment of up to eight cents per hundredweight from pool funds to producers on milk direct-shipped or divert-transferred from farms to distributing plants should not be adopted. Although such payments perhaps would get milk to bottling plants, they would tend to offset what is intended to be accomplished by adoption of the transportation credits and the assembly credit. In addition, the authority for such payments under the marketwide service provisions of the Act is questionable, since the provisions are couched in terms of payments to handlers for services they perform.

Presently, about 60 percent of the milk needed by bottlers is shipped directly from farms, either by direct delivery or divert-transfer, based on data for the period of January-December 1986. Proponent and others at the hearing testified that the minority of milk moves in this manner because it is the most efficient way to get milk to bottlers. Furthermore, it was proponent's belief that payments should be made to producers for direct-shipped milk in order to maintain the present level of efficient shipments in light of their other proposals.

One reason for adopting proponent's other proposals is to alleviate the cost difference between handlers who obtain their milk by transfer and those who receive milk directly from farms. To also grant a per-hundredweight payment to producers on the milk that they direct deliver to bottlers would be a contrary action. Yet, not adopting the direct-delivery differential will not jeopardize these most-efficient shipments because even with adoption of the transportation credits, the recipient of transfer milk will still, on the average, have to pay 35 percent of the shipping cost.

In its brief, Kraft questioned whether such a proposal was authorized under the amended Act. However, in light of the conclusion that the proposal would thwart the other order provisions adopted herein, Kraft's contention need not be addressed.

For the foregoing reasons, all proposals relating to direct-delivery differential payments are denied.

6. Omission of a Recommended decision and the Opportunity to File Written Exceptions Thereto

The Food Security Improvements Act of 1986, mandates that the Secretary shall implement a marketwide service program that meets the requirements of the Agricultural Marketing Agreement Act of 1937 not later than 120 days after a hearing is conducted. The Department has determined that the receipt of briefs represents the completion of the hearing conducted by the Administrative Law Judge on the issue and the start of the 120-day timeframe for implementation. Accordingly, any amendatory action taken as a result of the public hearing held in Madison, Wisconsin, on June 2–4 1987, with the briefing date on marketwide service payments issue being July 9, 1987, must have an effective date of no later than November 6, 1987. However, for administrative purposes, November 1 is a preferable effective date.

If the normal rulemaking procedures of issuing a recommended decision and providing time to file exceptions thereto were followed, the amended order could not be made effective by November 1, 1987.

It is therefore found that the due and timely execution of the functions of the Secretary under the Act imperatively and unavoidably require the omission of a recommended decision and an opportunity for written exceptions with respect to issue No. 1.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the

VOL
52
ISS

1987
UMI

requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Chicago Regional order was first issued and when it was amended. The previous findings and determinations are hereby ratified an confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Marketing Agreement and Order.

Annexed hereto and made a part hereof are two documents, a Marketing Agreement regulating the handling of milk, and an Order amending the order regulating the handling of milk in the Chicago Regional marketing area, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered that this entire decision and the two documents annexed hereto be published in the Federal Register.

Determination of Producer Approval and Representative Period

June 1987 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Chicago Regional marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

List of Subjects in 7 CFR Part 1030

Milk marketing orders, Milk, Dairy products.

Signed at Washington, DC, on October 8, 1987.

Richard E. Lyng,

Secretary.

Order Amending the Order, Regulating the Handling of Milk in the Chicago Regional Marketing Area

(This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.)

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings

A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Chicago Regional marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which effect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which as has been held.

Order Relative to Handling

It is therefore ordered that on and after the effective date hereof, the handling of milk in the Chicago Regional marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

1. The authority citation for CFR Part 1030 continues to read as follows:

Authority: Secs 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. In § 1030.52, paragraph (b) is revised to read as follows:

§ 1030.52 Plant location adjustments for handlers.

* * * * *

(b) For the purpose of this section and §§ 1030.55 and 1030.75, the distances to be computed shall be on the basis of the shortest highway mileage as determined by the market administrator—with fractions rounded up to the next whole mile.

(1) The market administrator shall notify each handler of the zone of mileage determination from the city hall in Chicago for each plant and for each handler's pool distributing plant the mileage to each transferor pool plant.

(2) Mileage determinations are subject to redetermination at all times. In the event a handler requests a redetermination of the mileage pertaining to any plant, the market administrator shall notify the handler of such redetermination with 30 days after the receipt of such request. Any financial obligations resulting from a change in mileage shall not be retroactive for any period prior to the redetermination announced by the market administrator.

* * * * *

3. A new § 1030.55 is added to read as follows:

§ 1030.55 Transfer credits on bulk Class I milk

(a) For each handler who operates a pool distributing plant (or plants) a transportation credit on milk received from each other pool plant shall be computed by the market administrator as follows, except that paragraph (a)(2) shall not apply when the Class I milk price adjusted for location pursuant to

§ 1030.52(a) is higher at the transferor plant than at the transferee plant:

(1) Multiply the number of hundredweights of the quantities of milk subject to the computations pursuant to § 1030.52(c)(9) and (10) times the product of 0.28 cents times the number of miles between the transferor plant and the transferee plant; and

(2) Subtract an amount computed by multiplying the absolute value difference between the location adjustment rates specified in § 1030.52(a) applicable at the transferee and transferor plants times the hundredweights of milk used in the computation in paragraph (a)(1) of this section. If the amount computed pursuant to this paragraph is greater than the amount computed in paragraph (a)(1) of this section the transportation credit will be zero.

(b) For each handler who transfers milk from a pool plant to a pool distributing plant (or plants) an assembly credit shall be computed by the market administrator at the rate of 8 cents per hundredweight of such handler's transfers of milk included in the computations pursuant to § 1030.52(c) (9) and (10).

4. In § 1030.60, change the reference "§ 1033.44(a)(9)" in paragraph (c) to "§ 1030.44(a)(9)", delete the word "and" at the end of paragraph (f); at the end of paragraph (g) change the period to a semicolon and add the word "and"; and add a new paragraph (h) to read as follows:

§ 1030.60 Handler's value of milk for computing uniform price.

* * * * * *

(h) Subtract an amount equal to any credits applicable pursuant to § 1030.55.

Marketing Agreement Regulating the Handling of Milk in the Chicago Regional Marketing Area

The parties hereto, in order to effectuate the declared policy of the Act, and in accordance with the rules of practice and procedure effective thereunder (7 CFR Part 900), desire to enter into this marketing agreement and do hereby agree that the provisions referred to in paragraph I hereof as augmented by the provisions specified in paragraph II hereof, shall be and are the provisions of this marketing agreement as if set out in full herein.

I. The findings and determinations, order relative to handling, and the provisions of §§ 1030.1 to 1030.86, all inclusive, of the order regulating the handling of milk in the Chicago Regional marketing area 7 CFR Part 1030 which is annexed hereto; and

II. The following provisions:

§ 1030.87 Record of milk handled and authorization to correct typographical errors.

(a) *Record of milk handled.* The undersigned certifies that he handled during the month of June 1987, hundredweight of milk covered by this marketing agreement.

(b) *Authorization to correct typographical errors.* The undersigned hereby authorizes the Director, or Acting Director, Dairy Division, Agricultural Marketing Service, to correct any typographical errors which may have been made in this marketing agreement.

§ 1030.88 Effective date.

This marketing agreement shall become effective upon the execution of a counterpart hereof by the Secretary in accordance with § 900.14(a) of the aforesaid rules of practice and procedure.

In Witness Whereof, The contracting handlers, acting under the provisions of the Act, for the purposes and subject to the limitations herein contained and not otherwise, have hereunto set their respective hands and seals.

Detention and Release of Juveniles

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: The purpose of this regulations is to codify Service policy regarding detention and release of juvenile aliens and to provide a single policy for juveniles in both deportation and exclusion proceedings. This regulation will provide consistent servicewide standards and treatment for exclusion and deportation cases.

DATE: Comments must be received on or before November 16, 1987.

ADDRESS: Please submit written comments in triplicate to the Director of Policy Directives and Instructions, Room 2011, 425 I Street NW., Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT: Mary Ruth Calhoun, Juvenile Detention Specialist, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-4120.

SUPPLEMENTARY INFORMATION: The proposed rule adds a new § 242.24 which sets forth Immigration and Naturalization Service policy regarding detention and release of juvenile aliens.

The new section defines "juvenile" as an alien under the age of eighteen (18) years and provides guidelines to the district director regarding the decision to detain or release a juvenile. In addition, the position of "Juvenile Coordinator" is created for the purpose of coordinating family reunification and/or locating suitable placement of juvenile detainees. The regulation also provides a procedure for cases in which the interests of a juvenile are at odds with the wishes of the parents or legal guardian. Finally, the proposed rule would delete the existing text of § 212.5(a)(2)(ii) and would provide in lieu thereof, for the district director or chief patrol agent to consider the factors set forth in § 242.24 in determining whether juveniles detained in accordance with § 235.3(b) or (c) will be paroled out of detention.

In accordance with 5 U.S.C. 605(b) the Commissioner of the Immigration and Naturalization Service certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule would not be a major rule within the definition of section 1(b) of E.O. 12291.

List of Subjects

8 CFR Part 212

Administrative practice and procedure, Parole, Juveniles.

8 CFR Part 242

Administrative practice and procedure, Aliens, Juveniles.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

1. The authority citation for Part 212 is revised to read as follows and all other authority citations which appear in Part 212 are removed:

Authority: 8 U.S.C. 1101, 1103, 1182, 1184, 1225, 1226, 1228, 1252, 1182b, 1182c.

2. Section 212.5(a)(2)(ii) is revised to read as follows:

§ 212.5 Parole of aliens into the United States.

(a) * * *

(2) * * *

(ii) Aliens who are defined as juveniles in 8 CFR 242.24. The district director shall follow the guidelines set

forth in § 242.24(b) in determining under what conditions a juvenile should be paroled from detention.

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

3. The authority citation for Part 242 is revised to read as follows and all other authority citations which appear in Part 242 are removed:

Authority: 8 U.S.C. 1101, 1103, 1182, 1184, 1252, 1254, 1255, 1357, and 1362.

4. A new § 242.24 would be added to read as follows:

§ 242.24 Detention and release of juveniles.

(a) *Juveniles.* A juvenile is defined as an alien under the age of eighteen (18) years.

(b) Juveniles for whom bond has been posted, for whom parole has been authorized, or who have been ordered released on recognizance, shall be released pursuant to the following guidelines:

(1) Juveniles may be released, in order of preference, to:

(i) A parent;

(ii) Legal guardian;

(iii) Adult relative (brother, sister, aunt, uncle, grandparent);

who is not presently in INS detention.

(2) If an individual specified in paragraph (b)(1) of this section cannot be located to accept custody of a juvenile, and the juvenile has identified an adult relative or legal guardian in INS detention, release of the juvenile and the adult relative or legal guardian shall be evaluated on a discretionary case-by-case basis.

(3) In cases where the parent or legal guardian in in INS detention or outside the United States, the juvenile may be released to such person as designated by the parent or legal guardian in a sworn affidavit, executed before an immigration officer or consular officer, as capable and willing to care for the juvenile's well-being. Such person must execute an agreement to care for the juvenile and to ensure the juvenile's presence at all future proceedings before the Service or an immigration judge.

(4) In unusual and compelling circumstances and in the discretion of the district director or chief patrol agent, a juvenile may be released to an adult, other than those identified in paragraph (b)(1) of this section, who executes an agreement to care for the juvenile's well being and to ensure the juvenile's presence at all future proceedings before the INS or an immigration judge.

(c) The case of a juvenile for whom detention is determined to be necessary should be referred to the "Juvenile Coordinator," located in INS Central Office, whose responsibilities should include but not be limited to, finding suitable placement of the juvenile in a facility designed for the occupancy of juvenile. These may include juvenile facilities contracted by the INS, state or local juvenile facilities, or other appropriate agencies authorized to accommodate juveniles by the laws of the state or locality.

(d) In the case of a juvenile for whom detention is determined to be necessary, for such interm period of time as is required to locate suitable placement for the juvenile, whether such placement is under paragraph (b) or (c) of this section, the juvenile may be temporarily held by INS authorities or placed in any INS detention facility having separate accommodations for juveniles.

(e) If a parent of a juvenile detained by the INS can be located, and is otherwise suitable to receive custody of the juvenile, and the juvenile indicates a refusal to be released to his/her parent, the parent(s) shall be notified of the juvenile's refusal to be released to the parent(s), and shall be afforded an opportunity to present their views to the district director, chief patrol agent, or immigration judge before a custody determination is made.

(f) If a juvenile seeks release from detention, voluntary departure, parole, or any form of relief from deportation, where it appears that the grant of such relief may effectively terminate some interest inherent in the parent-child relationship and/or the juvenile's rights and interests are adverse with those of the parent, and the parent is presently residing in the United States, the parent shall be given notice of the juvenile's application for relief, and shall be afforded an opportunity to present his/her views and assert his/her interest to the district director or immigration judge before a determination is made as to the merits of the request for relief.

(g) *Notice and request for disposition.* When a juvenile alien is apprehended, he/she must be given a Notice and Request for Disposition. In the event a juvenile who has requested a hearing pursuant to the Notice decides to accept voluntary departure, a new Notice and Request for Disposition should be given to, and signed by the juvenile.

Date: September 18, 1987.

Raymond M. Kisor,

Associate Commissioner, Enforcement, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF THE INTERIOR

Office of Hearings and Appeals

43 CFR Part 4

Special Rules Applicable to Surface Coal Mining Hearings and Appeals

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule changes the burden of proof as to whether a violation occurred by allocating the ultimate burden of persuasion to the petitioner for review in a civil penalty proceeding under the Surface Mining Control and Reclamation Act of 1977.

DATE: Comments on the proposed rule are due November 16, 1987.

ADDRESS: Comments may be hand delivered or addressed to: Director, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Will A. Irwin, Board of Land Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Phone: (703) 235-3750.

SUPPLEMENTARY INFORMATION: 43 CFR 4.1155, the existing regulation governing the allocation of burdens of proof in a proceeding for administrative review of a civil penalty imposed on a permittee under section 518(a) of the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1268(a), provides: "In civil penalty proceedings OSM shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion as to *the fact of violation* and as to the amount of the penalty." (Emphasis added.) Both the fact of violation and the amount of the penalty may be contested in a civil penalty proceeding because section 518(c) of the Act, 30 U.S.C. 1268(c) provides: "The person charged with the penalty shall then have thirty days to pay the proposed penalty in full or, if the person wishes to contest either the amount of penalty or the fact of the violation, forward the proposed amount to the Secretary for placement in an escrow account."

A permittee or person with an interest which is or may be adversely affected may also seek administrative review of a notice of violation or cessation order issued under section 521(a) (2) or (3) of the Act, 30 U.S.C. 1271(a) (2) or (3) (or pursuant to a Federal program or Federal lands program), by filing an application for review in accordance with section 525 of the Act, 30 U.S.C.

1275. The regulation governing the allocation of burdens of proof in an application for review proceeding, however, provides that "OSM shall have the burden of going forward to establish a prima facie case as to the validity of the notice or order" but that "[t]he ultimate burden of persuasion shall rest with the applicant for review." 43 CFR 4.1171. It allocates the ultimate burden of persuasion to the applicant for review because "the legislative history clearly states that an applicant for review has the ultimate burden of proof in proceedings to review notices and orders. S. Rep. No. 128, 95th Cong., 1st Sess. 93 (1977)." 43 FR 34381 (Aug. 3, 1978).

The result of the different allocation of the burden of ultimate persuasion as to the fact of the violation in 43 CFR 4.1155 and 4.1171 is not only that the former regulation is inconsistent with congressional intent but also that there are contradictory provisions applicable to the same burden of proof in administrative review proceedings which consolidate an application for review of a notice or order under section 525 with a petition for review of a civil penalty under section 518. (Section 518(b), 30 U.S.C. 1268(b), provides that section 518 hearings shall be consolidated with proceedings resulting from section 521 of the Act when appropriate.)

To correct inconsistency and provide for the same ultimate burden of persuasion as to the fact of a violation in a civil penalty proceeding as in an application for review proceeding, it is proposed to amend 4.1155 to specify that OSM has the burden of going forward to establish a prima facie case as to the fact of a violation and the amount of proposed penalty and the ultimate burden of persuasion as to the amount of the proposed penalty, while the applicant for review has the ultimate burden of persuasion concerning the fact of the violation.

Determination of Effects

Because this proposed rule merely amends an aspect of administrative review procedures, the Department has determined that the proposed rule is not major, as defined by Exec. Order No. 12291, and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

National Environmental Policy Act

The Department has determined that this proposed rule will not significantly affect the quality of the human environment on the basis of the categorical exclusion of regulations of a procedural nature set forth in 516 DM 2, Appendix 1, section 1.10.

Paperwork Reduction Act

The proposed rule contains no information collection requirements requiring Office of Management and Budget approval under 44 U.S.C. 3507.

The author of this proposed regulation is Will A. Irwin, Administrative Judge, Board of Land Appeals, Office of Hearings and Appeals.

List of Subjects in 43 CFR Part 4

Administrative practice and procedure; Penalties, Surface mining.

For the reasons stated in the preamble and under the authority of 30 U.S.C. 1201 *et seq.*, § 4.1155 of Subpart L of Part 4 of Title 43 of the Code of Federal Regulations is proposed to be amended as set forth below:

Dated: September 11, 1987.

Paul T. Baird,

Director.

PART 4—[AMENDED]

1. The authority for 43 CFR Subpart L continues to read:

Authority: 30 U.S.C. 1256, 1260, 1261, 1268, 1271, 1272, 1275, 1293; 5 U.S.C. 301.

2. Section 4.1155 is revised to read as follows:

§ 4.1155 Burdens of proof in civil penalty proceedings.

In civil penalty proceedings, OSM shall have the burden of going forward to establish a prima facie case as to the fact of the violation and the amount of the civil penalty and the ultimate burden of persuasion as to the amount of the civil penalty. The person who petitioned for review shall have the ultimate burden of persuasion as to the fact of the violation.

DEPARTMENT OF AGRICULTURE

Forest Service

Environmental Impact Statement Supplement to the 1981–86 and 1986–90 Operating Plan Environmental Impact Statements for the Alaska Pulp Corporation (formerly Alaska Lumber & Pulp Company)

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare supplement to environmental impact statements.

SUMMARY: The Forest Service will prepare a supplement to the Environmental Impact Statements (EIS) associated with the 1981–86 and 1986–90 operating periods for the Alaska Pulp Corporation (APC) Long-term Timber Sale Contract. A newsletter and other media sources will be used to notify the public of the scope of the supplement and opportunities for public participation. Those interests in receiving the newsletter are invited to write to the individual listed below and request they be added to the supplement mailing list.

FOR FURTHER INFORMATION CONTACT: Information relating to the supplement may be obtained by contacting James Pierce, supplement team leader, Regional Office, Alaska Region, P.O. Box 21628, Juneau, Alaska 99802. Written comments and suggestions may be sent to above listed individual.

SUPPLEMENTARY INFORMATION:

A. Purpose of Scope of Supplement

This supplement is being prepared to address issues identified in a Federal District Court decision, *City of Tenakee Springs, Southeast Alaska Conservation Council, The Sierra Club, and the Wilderness Society v.* Craig V. Courtright, et al., Civil No. J86–24, Memorandum and Order filed June 25, 1987 (District of Alaska). The lawsuit which led to the court decision challenged the adequacy under the National Environmental Policy Act (NEPA) of the environmental impact statement for the 1981–86 Operating Plan for the APC long-term timber sale contract. The Record of Decision for the 1981–86 Plan, issued April 11, 1980, made available to APC for harvest about 525 million board feet of Tongass National Forest timber, from designated units in varous areas of Baranof, Catherine, Chichagof, and Kuiu Islands. The Record of Decision authorized the roadbuilding and other operations associated with harvesting this timber. Approximately 126 million board feet of sawtimber (154 million board feet with utility logs) remain to be harvested and approximately 119 miles of road remain to be completed to access this timber under the Plan. The June 25, 1987, court decision indicated that supplementation of the 1981–86 Plan EIS was required for the following issues:

1. Changes in implementing the Plan since issuance of the Record of Decision, due to Native Corporation land selection and other actions resulting in deletion or deferral of a substantial number of harvest units from the Plan.

2. Further discussion of a no-action alternative (no further roading or harvest until at least the next 5-year operating plan) specific to each drainage or similar geographic area remaining to be entered for roading and harvest under the Plan, particularly in light of the deletions or deferrals of harvest units in various areas.

3. Further site-specific detail regarding environmental effects of alternate road and harvest configurations in the Upper Game Creek area of Chichagof Island, an area about which plaintiffs alleged particular concern in the lawsuit.

4. Further discussion of cumulative impacts of forseeable roading and timber harvest in the vicinity of Upper Game Creek, and impacts associated with any changes in harvest practices on neighboring lands conveyed to Native Corporations.

The supplement will address these issues and in addition will address other issues of concern to the Plaintiffs in the lawsuit. These issues extend to areas included in the EIS for the 1986–90 Operating Plan for the APC contract, for which a Record of Decision adopting a final alternative for the 1986–90 Plan was issued December 31, 1986. The supplement will therefore extend to the 1986–90 Plan EIS, and will consider whether to modify the Record of Decision for the 1986–90 Plan, as well as the Record of Decision for the 1981–86 Plan, in light of further analysis and discussion of environmental effects in the EIS supplement. The additional issues to be addressed in the supplement in response to plaintiffs' concerns include:

1. Further analysis and discussion of site-specific and cumulative environental impacts associated with alternative road and timber harvest configurations in other areas included in the 1981–86 or 1986–90 Plan which are not expected to be entered prior to completion of the supplement, equivalent to that required by the court decision for Upper Game Creek.

2. Further analysis and discussion regarding effects on subsistence resources and uses in relation to alternatives considered in the supplement, including an evaluation and determination of whether a significant restriction of subsistence uses would result, pursuant to section 810 of the Alaska National Interest Lands Conservation Act.

3. Further analysis and discussion regarding mitigating measures, in relation to the alternatives considered in the supplement. Other issues and alternatives identified during the supplement process may also be addressed.

B. Geographic Scope and Interim Activities

The geographic areas upon which the supplement will focus, and in which further roading or timber harvest operations under the APC contract will be deferred until at least completion of the supplement and associated record of decision, are as follows (described by Tongass Land Management Plan Value Comparison Unit (VCU), which conforms to drainage or watershed boundaries generally):

1. VCU 203 (Seagull Creek).

2. Portion of VCU 204, south of the existing road system (Upper Game Creek). (Whether the harvest unit numbered 97 in this VCU is deferred depends on further discussions among the parties to the *Tenakee Springs v. Courtright* lawsuit.)

2. Portion of VCU 216, northwest of the existing road system (Upper Freshwater Creek).

4. VCU 235 (Kadashan; only roading was scheduling as part of 1981–86 and 1986–90 Plans; salvage harvesting of downed right-of-way timber lying across and stacked alongside the already completed portion of the road, as allowed by a June 23, 1987, court order, will not be deferred for the supplement).

5. VCU's 237, 238 (Trap Bay).

6. VCU's 247, 279–281, 283, 285 (Finger Creek, Poison Cove, Ushk Bay, and Patterson Bay, Upper Hoonah Sound).

7. VCU's 416–418 (East Kuiu Island).

8. Portion of VCU's 419, 420 (Port Camden and 3-Mile Arm areas, north of existing and projected roading and harvest shown in the preferred alternative map (alternative J) in the 1986–90 Plan EIS; 3-Mile Arm area, south of the harvest unit numbered 5 depicted in VCU 419 of the preferred alternative map. However, activities in harvest units numbered 8 through 11 and associated roads as depicted in VCU 419 on map 6 for Alternative D in the 1986–90 Plan EIS, and as authorized in the 1986–90 Plan Record of Decision, will not be deferred.)

Roading and harvest will continue on other areas of Chichagof and Kuiu Islands under the 1981–86 and 1986–90 Plans while the supplement is being prepared. Whether and how to proceed with activities presently authorized for these areas under these plans will not be further addressed in the EIS supplement. Completion of such activities will be considered a part of the no-action alternative in the supplement for these areas. Additional roading and harvest in these areas beyond what is included in the presently approved Plans is expected to be considered in the supplement. Further roading and harvest in other areas included in the 1981–86 and 1986–90 EIS study areas, but for which further roading or harvest was deferred in the presently approved operating plans until at least the 1991–96 Plan, such as the Kadashan River drainage, likewise may be considered as alternatives in the supplement.

If further litigation enjoins road or harvest operations under the 1916–86 or 1986–90 Operating Plan in areas not listed for deferral of operations while the supplement is being prepared, then initiation of further operations in one or more areas listed for deferral above, prior to completion of the supplement, may be necessary to meet existing government contract obligations and to avoid undue hardship upon dependent timber industry and communities. The same may be the case if the supplement takes longer to complete than currently projected. The Forest Service hopes no such changes will be necessary. Any such proposed change would be the subject of discussions among at least the parties to the *Tenakee Springs v. Courtright* lawsuit and public notice prior to implementation.

C. Two Phases of Supplement

The EIS supplement is expected to consist of two phases. These phases may proceed concurrent with one another, but a supplement document for the first phase may be circulated for public comment and completed prior to circulation and completion of one or more supplement documents for the second phase. A draft and a final supplement document or documents will be issued for both phases.

The first phase will address changes in the implementation of the Operating Plan and other circumstances since issuance of the 1981–86 Plan ROD. This phase will address the environmental impacts of relevant changes and their relation to alternatives for each area covered by the supplement. This phase will address generally whether to modify the 1981–86 or 1986–90 Operating Plans regarding roading and harvest in each such area. This phase will tier to the Alaska Regional guide, Tongass Land Management Plan, 1976–81 Plan EIS, 1981–86 Plan EIS, and 1986–90 Plan EIS. It is expected to consider, among other alternatives, increased harvest in the portions of the 1981–86 and 1986–90 Plan EIS study areas where roading or harvest is expected to take place while the supplement is being completed, in order to allow decreased harvest in other portions of the study area. This phase will provide an updated section 810 Alaska National Lands Conservation Act (ANILCA) evaluation and determination, regarding alternatives considered in this phase, for the entire study area.

The second phase will further address site-specific effects of alternatives for each area within the study area in which harvest and roading are not expected to take place during completion of the supplement, except those for which the first phase indicates no further roading or harvest until at least the 1991–96 operating plan is the preferred alternative. The second phase will analyze site-specific effects of alternatives for each such area which the first phase indicates should be entered prior to 1991. With respect to areas where already authorized roading and harvest are expected to continue during preparation of the supplement, the second phase will further address site-specific effects of alternatives for additional roading or harvest in those areas which the first phase indicates additional roading or harvest prior to 1991, beyond that already authorized, is the preferred alternative. The seond phase will consider a no-action alternative in light of site-specific effects, for each such area. It will consider mitigation measures and subsistence impacts, including a section 810 ANILCA evaluation and determination, at the site-specific level. It will tier to the first phase and the EIS's to which the first phase is tiered.

Both phases of the supplement are expected to be completed 12 to 18 months from the date of this Notice of Intent. The projected date for issuance of a draft supplement for the first phase is May 1988. Issuance of a draft supplement document or documents for the areas included in the second phase is scheduled for not later than December 1988, and may be issued concurrently with a first phase draft. The projected date for issuance of a final supplement docment or documents for the first phase and second phase, with an accompanying Record of Decision, is May 1, 1989.

D. Comments

The comment period of the draft EIS supplement document or documents will be 45 days from the date the Environmental Protection Agency's notice of availability for the document appears in the **Federal Register**. It is very important that those interested in the management of the Tongass National Forest participate during the comment period. To be the most helpful, comments on each supplement document should be as specific as possible and may address the adequacy of the supplement or the merits of the alternatives discussed (see The Council of Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' positions and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553, 1978, and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement, *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can

BEST COPY AVAILABLE

meaningfully consider them and respond to them in the final.

After the comment period ends on each draft supplemental document, the comments will be analyzed and considered by the Forest Service in preparing the final supplement document. In the final supplement document, the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the supplement document or documents, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR 211.18.

Michael A. Barton, Regional Forester of the Alaska Region, located in Juneau, Alaska, is the responsible official.

Date: September 30, 1987.

Michael A. Barton,

Regional Forester.

[FR Doc. 87-23840 Filed 10-14-87; 8:45 am]

BILLING CODE 3410-11-M

Intermountain Region; Proposed Fee Schedule for Electronic Communication Sites and Request for Public Review and Comments

AGENCY: Forest Service, USDA.

ACTION: Notice of proposed fee schedule.

SUMMARY: The Intermountain Region, administering those National Forests in the States of Nevada, Utah, and portions of California, Colorado, Idaho, and Wyoming, is revising procedures governing determination of rental fees for electronic communication sites. Public review and comment on the proposal are invited. This proposal is based on a market study conducted by the Region during the spring and summer of 1987. The market study and a proposed rental fee schedule are available for review and comment.

DATE: Comments on the proposal must be received, in writing, on or before December 14, 1987.

ADDRESS: Send comments on the proposal to J.S. Tixier, Regional Forester, Intermountain Region, 324 25th Street, Ogden, UT 84401. Comments received in response to this notice may be reviewed in the office of the Director of Recreation and Lands, Room 6025, Federal Building, 324 25th Street, Ogden, UT during normal business hours.

FOR FURTHER INFORMATION CONTACT: Frank Elder (801) 625-5150 or Lynn Bidlack (801) 625-5141, Recreation and Lands Staff.

SUPPLEMENTARY INFORMATION: The Forest Service administers approximately 1,031 electronic communication site authorizations within the Intermountain Region. The existing policy for determining annual land use rental fees is a mixture of schedule and formula. Fees are based on 0.2 percent of the authorization holder's total investment value for electronic communication facilities and equipment plus 5 percent of the rental income from building tenants and/or equipment users served by the holder. Fees for many holders are currently at levels of $25 to $2,695/year while private land rentals for communication sites are in the $175 to $6,886/year range.

Revised Forest Service National Policy contained in **Federal Register** Vol. 50, page 40574, dated October 4, 1985, established that electronic communication site fees are to be based on the fair market value of the rights and privileges authorized rather than on a percentage of investment value and rental income. This change is consistent with requirements of the Federal Land Policy and Management Act of 1976 and accompanying regulations.

Future fees are to be determined by individual appraisals, competitive bidding, or a fee schedule derived through market analysis. The Intermountain Region has determined a fee schedule would be an appropriate cost-effective method to be used for most electronic communications sites. When appropriate, as determined by the Regional Forester, individual site appraisals or competitive bidding can be used to establish fees on large or unique sites of where a competitive interest exists.

Proposed Rental Fee Schedule

The proposed rental fee schedule has been prepared based on (1) analysis of market data of similar uses in Arizona, California, Colorado, Idaho, Montana, North Dakota, New Mexico, Nevada, Oregon, Utah, Washington, and Wyoming and (2) sound business management principles. The proposed rental fee schedule for the Intermountain Region appears at the end of this notice. The proposed schedule establishes annual rental fees by type of electronic use (as listed in the Definitions section of this notice) and population categories for the Intermountain Region. After implementation, the proposed schedule will be updated annually by application of the Implicit Price Deflator-Gross National Product Index and further updated by periodic market reviews.

Shared Space

Electronic communication space is frequently shared by several users within an authorized building at a Forest Service administered electronic site. In the private sector, market data shows a very broad range of fees for shared uses: a common fee for second and subsequent users is 50 percent of sublet shared space rentals. Market information also indicates that sublet rentals tend to correlate to category of use, similar to primary use rentals.

Analysis of the market data and consideration of the special limitations and conditions of use of public lands indicate that secondary and subsequent user fees of 50 percent of the full fee for the kind of electronic use are fair and reasonable to electronic site users in this category and to the public. With the implementation of the proposed rental fee schedule, fees for secondary and subsequent users will be established on this basis except in the case of 2-way radio installations (commercial communicators), where specific market data was found as indicated on the proposed rental fee schedule.

Under the proposal, primary users will pay the Forest Service the appropriate shared-service fee for each of their tenants/users, and are free to negotiate a reasonable charge with their tenants.

Miscellaneous Electronic Uses

A review of Forest Service records discloses a number of authorized electronic uses for which the market analysis provided insufficient information on market rent. Many of these uses involved "receive only" equipment, such as TV and radio receiving antennas, satellite dishes, and other equipment or structures designed solely for the reception of electromagnetic signals. Some miscellaneous uses may involve both transmitting and receiving equipment and structures.

There are comparatively few of these installations in the Intermountain Region. Fair market value of these uses can be established administratively through consideration of sound business management principles as provided in Secretary of Agriculture's Regulation 36 CFR 251.57a. The Intermountain Region, Forest Service, has reviewed available information and the market analysis for other electronic uses as listed in the proposed rental fee schedule and concluded that an appropriate annual fee for various miscellaneous electronic uses not otherwise identified in the

proposed fee schedule is $75 per year per unit. A unit is defined as one receiving antenna, one transmit/receive antenna combination serving one radio, one satellite dish, etc.

The field of electronics is expanding rapidly. Many electronic uses are in developmental stages. The Intermountain Region's proposed rental fee schedule is not intended to include these new and developing uses. Fees will be established on the basis of appraisal, sound business management principles, and/or negotiation when these new and developing uses become operational in the Intermountain Region.

Proposed Implementation

Fees proposed according to this schedule will apply to each electronic use on National Forest System lands in the Intermountain Region upon adoption of the final schedule and publication in the **Federal Register.**

For the many cases where more than one user occupies an electronics building on a site, the owner of the building will become the permit holder. The other users of the building, previously also permit holders, will cease to hold permits and will be considered simply as tenants of the permit-holding landlord. The surcharge for tenants of commercial communicator permit holders is shown in the proposed fee schedule. The surcharge for tenants of other permit holders shall be 50 percent of the fee for the use from the schedule for that use (not necessarily the permit holder's use).

Conversion to the new system will occur as the existing authorizations of building owners expire over the next 5 years, or no later than December 31, 1992. As these new authorizations are issued, the authorizations of the other users (tenants) will be terminated.

Under certain qualifying circumstances, as provided by Secretary of Agriculture's Regulations 36 CFR 251.57b and current Forest Service policy, fees may be waived or reduced. These procedures are not affected by the proposed fee schedule.

Copies of this notice and the proposed fee schedule are being mailed to holders of existing communication site authorizations and will also be sent to anyone requesting copies from the contacts listed in this notice. The market study and proposed rental fee schedule are also available for review at Forest Supervisors' Office.

Definitions

Following are definitions for the nine categories as listed in the proposed rental fee schedule for the Intermountain Region:

1. *Passive Reflector:* This use involves a passive antenna element or elements, located to reflect radiation from or redirect radiation to a directional transmitting and/or receiving antenna.

2. *Translators, TV or FM Radio:* This use involves the re-transmission of TV or FM broadcast programs and signals without significantly altering any characteristic of the original signal other than its frequency and amplitude. Stations in this category are licensed under Part 74 of the Code of Federal Regulations.

3. *2-way Radio, Site Only:* This use involves operation of 2-way radios for the purpose of internal communications in support of business, community activities, or other organizational objectives. This user occupies the site only and provides his own building and/or tower.

4. *2-way Radio, Site and Building:* This use involves operation of 2-way radios for the purpose of internal communications in support of business, community activities, or other organizational objectives. This user occupies the site and the landowner's (U.S. Government) building.

5. *Industrial Microwave:* This use involves operation of non-common carrier microwave relay applications (such as utility companies) for internal communications and remote monitoring/control. It may also include uses by state agencies.

6. *Cable Television:* This use applies to cable television receiving and retransmission units. Incoming signals may be received by antenna, satellite dish, or microwave. Retransmission/distribution is generally by cable but may be by microwave to another location. References to population pertaining to this use will mean the total estimated number of people that could potentially be served by the system.

7. *Common Carrier Microwave:* This use relays telephone, television, or other signals over point-to-point microwave metworks.

8. *Commercial Communicators:* This use is for companies or individuals which develop electronic sites for use by their customers. They typically rent out vault space in a building and antenna space on a tower. They may sell, rent and service electronic equipment. The most wide-spread use is for 2-way radio repeaters, but this group also includes such uses as microwave mobile telephone systems, answering services, and paging systems. Often the commercial communicators lease the land and construct the improvements. Occasionally, they are able to lease both the land and improvements. Typically, commercial communicators have a radio for their own use and one or more that are rented out on a time-sharing basis to several users. Commercial communicators include National companies as well as small local businesses.

9. *TV and Radio Broadcast:* This use is for electronic users who broadcast audio and/or video signals which are intended for general public reception. It relates only to primary transmitters and not any rebroadcast systems such as translators. User revenues are generated primarily from commercial advertising.

BILLING CODE 3410-11-C

Soil Conservation Service

Tazewell Middle School Critical Area Treatment RC&D Measure, Virginia

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Tazewell Middle School Critical Area Treatment RC&D Measure, Tazewell, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. George C. Norris, State Conservationist, Soil Conservation Service, 400 North Eighth Street, Richmond, Virginia 23240–9999, telephone (804) 771–2455.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Norris, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for constructing 600 feet of subsurface drainage, 700 square feet of lined waterway, and seeding of 1.5 acres of eroding school grounds on the campus of Tazewell Middle School, Tazewell, Virginia.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single-copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. George C. Norris, State Conservationist.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Executive Order 12372 regarding inter-government review of federal and federally-assisted programs and projects is applicable)

George C. Norris,

State Conservationist.

BILLING CODE 3410–16–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Endangered and Threatened Species; Sea Turtles

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of receipt of a petition for reconsideration of a rule.

SUMMARY: Mr. Lacy H. Thornburg, Attorney General of North Carolina, petitioned the Department of Commerce to amend final regulations concerning shrimp trawling requirements to conserve endangered and threatened sea turtles. Mr. Thornburg petitioned the Department to withdraw and repeal parts of the final regulations pertaining to North Carolina waters not included in the proposed regulations. The petition states, among other things, that addition of these waters constitutes an abuse of agency discretion and violates the notice and comment procedures of the Administrative Procedures Act, 5 U.S.C. 553. The petition has been reviewed and accepted. It is being processed according to procedures established for responding to such petitions.

DATE: Written comments concerning the proposed actions will be accepted until November 16, 1987.

ADDRESS: Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, NMFS, Washington, DC 20235.

FOR FURTHER INFORMATION CONTACT: Patricia A. Carter, Office of Protected Resources and Habitat Programs, NMFS, U.S. Department of Commerce, Washington, DC 20235 (202/673–5351).

SUPPLEMENTARY INFORMATION:

Background

All sea turtles that occur in U.S. waters are listed as endangered or threatened species under the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.*, (ESA). Five of these, the loggerhead (*Caretta caretta*), Kemp's ridley (*Lepidochelys kempi*), green (*Chelonia mydas*), leatherback (*Dermochelys coriacea*) and hawksbill (*Eretmochelys imbricata*), are found in marine waters from North Carolina through Texas. Based on information provided by observers on shrimp trawlers, NMFS estimates that each year more than 47,000 sea turtles are caught in shrimp trawls; about 11,000 of these die.

In 1978, NMFS began a research program to develop gear or methods to reduce the mortality of sea turtles in shrimp trawls. The program led to the development of a turtle excluder device (TED) which releases 97 percent of the turtles caught in shrimp trawls with no loss of shrimp. Since development of the NMFS TED, other TEDs have been developed and certified for use. NMFS began a formal program in 1983 to encourage shrimp fishermen to use the TED voluntarily. Despite substantial efforts to transfer the technology to the shrimping industry, the voluntary program was not successful because sufficient numbers of TEDs were not used on a regular basis.

On March 2, 1987, NMFS published proposed regulations (52 FR 6179–6199) that would require shrimp trawlers in the Gulf of Mexico and the Atlantic Ocean off the coast of the Southeastern United States to use approved gear in specified locations and at specified times. Most North Carolina waters were not included in the proposed regulations.

Thousands of comments were received on the proposed regulations. Based on those comments, NMFS made a number of changes, including areas affected and an additional protective measure. On June 29, 1987, NMFS published final regulations (52 FR 24244–24262) requiring shrimp trawlers to use certain protective measures in specified waters at specified times. The final regulations contained requirements for protective measures for sea turtles in North Carolina waters not included in the proposed regulations.

On August 27, 1987, Mr. Lacy H. Thornburg, Attorney General of North Carolina petitioned Mr. Clarence Brown Acting Secretary of the Department of Commerce, to amend the final rules published on June 29, 1987. The petition requested that parts of the regulations dealing with North Carolina waters be withdrawn and repealed. The petition states among other things, that addition of these waters constitutes an abuse of agency discretion and violates the notice and comment procedures of the Administrative Procedures Act, 5 U.S.C. 553.

The petition has been reviewed and accepted by the Department. It is being processed by NMFS according to procedures established for responding to such petitions. These procedures require the agency to nofity the petitioner within

120 days of receipt of a petition as to whether or not the requested rulemaking will be undertaken. A Notice announcing the agency's decision will be published in the **Federal Register**.

To ensure that there is a complete review of this issue, NMFS is soliciting comments and information from any interested party. All responses should include the party's name, address and any association, institution or business that the party represents.

Dated: October 8, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

International Trade Administration

[C-351-609]

Final Affirmative Countervailing Duty Determination; Certain Forged Steel Crankshafts From Brazil

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Brazil of certain forged steel crankshafts ("CFSC" or "the subject merchandise") as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is determined to be 5.23 percent ad valorem. However, consistent with our stated policy of taking into account program-wide changes that occur before our preliminary determination, we are adjusting the duty deposit rate to reflect changes in the Preferential Working-Capital Financing for Exports program. Accordingly, the duty deposit rate is 5.10 percent ad valorem.

However, the Department of Commerce, the Government of Brazil, and the manufacturers, producers, and exporters of CFSC entered into a suspension agreement on July 21, 1987. At the request of the Government of Brazil, we continued the investigation.

Subsequent to this determination, the ITC will determine whether imports of CFSC from Brazil materially injure, or threaten material injury to, a U.S. industry. If that injury determination is affirmative, we shall not issue a countervailing duty order as long as the conditions of the agreement are met. If that injury determination is negative, we will terminate the suspension agreement and our investigation.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: Bradford Ward, Office of Investigations, or Richard Moreland, Office of Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-2239 or 377-2786.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Brazil of CFSC. For purposes of this investigation, the following programs are found to confer subsidies:

- Income Tax Exemption for Export Earnings;
- Preferential Working-Capital Financing for Exports (including Incentives for Trading Companies); and
- Import Duty and IPI Tax Exemptions Under Decree-Law 1189 of 1971, as amended.

We determine the estimated net subsidy to be 5.23 percent ad valorem. However, we are adjusting the duty deposit rate to reflect a program-wide change in the Preferential Working-Capital Financing for Exports program. Therefore, the duty deposit rate is 5.10 percent ad valorem.

Case History

The last **Federal Register** publication pertaining to this investigation (*Suspension of Countervailing Duty Investigation: Certain Forged Steel Crankshafts from Brazil* (52 FR 28177, July 28, 1987) contains the case history. Petitioners and respondents filed briefs on the final determination on July 13 and 15, 1987, concurrently with their comments on the suspension agreement. On August 17, 1987, the Government of Brazil requested that this investigation be continued under section 704 (g) of the Act. Therefore, we are required to issue a final determination in this investigation.

There are two known producers in Brazil of CFSC that exported to the United States during the review period. Those producers are Krupp Metalurgica Campo Limpo Ltda. (Krupp) and Sifco S.A. (Sifco). In addition, Brasifco S.A. (Brasifco) is a trading company wholly-owned by Sifco which exported the subject merchandise from Brazil to the United States during the review period. We verfied that Krupp, Sifco, and Brasifco account for substantially all exports of the subject merchandise to the United States.

Scope of Investigation

The products covered by this investigation are forged carbon or alloy steel crankshafts with a shipping weight of between 40 and 750 pounds, whether machined or unmachined. These products are currently classified under items 660.6713, 660.6727, 660.6747, 660.7113, 660.7127, and 660.7147 of the *Tariff Schedules of the United States, Annotated* (TSUSA). Neither cast crankshafts nor forged crankshafts with shipping weights of less than 40 pounds or greater than 750 pounds are subject to this investigation.

Analysis of Programs

Throughout this notice we refer to certain general principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

For purposes of this determination, the period for which we are measuring subsidization (the review period) is calendar year 1985. Based upon our analysis of the petition, the responses to our questionnaire, our verfication, and comments received from interested parties, we determine the following:

I. Programs Determined To Confer Subsidies

We determine that subsidies are being provided to manufacturers, producers, or exporters in Brazil of CFSC under the following programs:

A. Income Tax Exemption for Export Earnings

Under Decree-Laws 1158 and 1721, Brazilian exporters are eligible for an exemption from income tax on a portion of income attributable to export revenue. Because this exemption is tied to exports and is not available for domestic sales, we determine that this exemption confers an export subsidy.

All of the respondent companies used this exemption on their corporate income tax forms filed during the review period. The companies determined their net taxable income and deducted the exemption from that income to lower, or eliminate, their tax liability. We multiplied the value of the exemption by the effective tax rate for each company

and allocated the sum of the benefits over the total value of 1985 exports to calculate an estimated net subsidy of 1.70 percent ad valorem.

B. Preferential Working-Capital Financing for Exports

The Carteira do Comercio Exterior (Foreign Trade Department, or CACEX) of the Banco do Brasil administers a program of short-term working capital financing for the purchase of inputs. During the review period, these loans were provided under Resolution 882, and also under Resolution 950, as amended by Resolution 1009. Under Resolution 643, as amended by Resolutions 883, 950, and 1009, trading companies can obtain export financing identical to that obtained by manufacturers under Resolution 950. Eligibility for this type of financing is determined on the basis of past export performance or an acceptable export plan. During the review period, the maximum level of eligibility for such financing was 20 percent of the adjusted value of exports.

Under Resolutions 882/883, the statutory interest rate on loans was 100 percent of monetary correction, plus up to three percent interest. This rate is below our commercial benchmark for short-term loans, which is the short-term discount rate for accounts receivable in Brazil as published in *Analise/Business Trends* magazine.

On August 21, 1984, Resolution 950 made these loans available from commercial banks at the prevailing market rates, with interest calculated at the time of repayment. Under Resolution 950, as amended by Resolution 1009, the Banco do Brasil pays the lending institution an equalization fee of up to 15 percentage points (after monetary correction). The lending bank passes the 15 percent equalization fee on to the borrower in the form of a reduction of the interest due. Receipt of the equalization fee by the borrower reduces the interest rate on these working capital loans below the commercial rate of interest. Resolution 950 loans are also exempt from the Imposto Sobre Operacoes Financeiras (Tax on Financial Operations, or IOF), a 1.5 percent tax charged on all domestic financial transactions in Brazil.

Since receipt of working capital financing under Resolutions 882/883/950/1009 is contingent upon export performance, and provides funds to borrowers at preferential rates, we determine that this program confers an export subsidy. During the review period, all of the companies had loans outstanding under Resolutions 882 or 883 and 950/1009.

To calculate the benefit from this program, we multiplied the value of those loans on which interest payments were made during the review period by the sum of: (a) The difference between the applicable interest rates and our benchmark, plus (b) the IOF. We then allocated the benefit over the total value of 1985 exports, resulting in an estimated net subsidy of 3.43 percent.

In cases in which program-wide changes have occurred prior to our preliminary determination and where the changes are verifiable, the Department's practice is to adjust the duty deposit rate to correspond more closely to the eventual duty liability. We have verified that companies no longer receive loans under the terms of Resolutions 882 and 883, and that there are no outstanding loans under 882 and 883. Resolution 950 as amended by 1009, the directive currently in force for this financing program, provides for an "equalization fee" against commercial interest rates as described above. Therefore, we calculated a subsidy rate for duty deposit purposes based on the interest rate rebate provided for under Resolution 950/1009 plus the IOF exemption. The methodology used is consistent with that relied upon in our most recent final countervailing duty determination involving Brazil where this program was found to be used, *Final Affirmative Countervailing Duty Determination: Brass Sheet and Strip from Brazil* (51 FR 40837, November 10, 1986). We multiplied the maximum percentage amount of financing for which the companies were eligible (20 percent) by the sum of the 15 percent interest rate rebate plus the IOF to arrive at an estimated duty deposit rate of 3.30 percent ad valorem.

C. Import Duty and IPI Tax Exemptions Under Decree-Law 1189 of 1971

Our examination of company documents at verification revealed that one respondent company had imported certain items free of the normal import duty and the IPI tax (Imposto Sobre Produtos Industrializados, or Industrialized Products Tax—IPI). These exemptions were granted under a provision of Decree-Law 1189 of 1971, as amended, which allows for the duty- and tax-free importation of certain non-physically incorporated merchandise based on a percentage of a company's increase in exports.

Because these exemptions from import duty and IPI tax are contingent upon export performance, we determine that this program constitutes an export subsidy. In order to calculate the benefit, we divided the total value of import duties and IPI taxes not paid during the review period by the value of all exports during the review period, resulting in an estimated net subsidy of 0.10 percent ad valorem.

II. Programs Determined Not To Be Used

We determine, based on verified information, that manufacturers, producers, ro exporters in Brazil of CFSC did not apply for, claim, or receive benefits during the review period under the following programs which were listed in our notice of *Initiation of Countervailing Duty Investigation: Certain Forged Steel Crankshafts from Brazil* (51 FR 40240, November 5, 1986):

A. Export Financing Under the CIC–CREGE 14–11 Circular
B. Resolution 330 of the Banco Central do Brasil
C. The BEFIEX Program
D. The CIEX Program
E. Exemption of IPI Tax and Customs Duties on Imported Capital Equipment (CDI)
F. IPI Rebates for Capital Investment
G. Accelerated Depreciation for Brazilian-Made Capital Equipment
H. The PROEX Program
I. Resolutions 68 and 509 (FINEX) Financing
J. Loans Through the Apoio o Desenvolvimento Tecnologica a Empresa Nacional (ADTEN)
K. Articles 13 and 14 of Decree Law 2303

This decree law was announced in November, 1986, and implementing regulations had not been promulgated as of the date of our verification. We verified that the respondent companies did not use this program on corporate income tax returns filed during the review period. If there is a subsequent administrative review in this investigation, we will investigate any use of this program which may provide countervailable benefits.

III. Program Determined To Have Been Terminated

IPI Export Credit Premium

Until May 1, 1985, Brazilian exporters of manufactured products were eligible for a tax credit on the IPI. The IPI export credit premium, a cash reimbursement paid to the exporter upon the export of otherwise taxable industrial products, was found to constitute a subsidy in previous countervailing duty investigations involving Brazilian products. After having suspended this program in December 1979, the Government of Brazil reinstated it on April 1, 1981.

Subsequent to April 1, 1981, the credit premium was gradually phased out in

accordance with Brazil's commitment pursuant to Article 14 of the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade ("the Subsidies Code"). Under the terms of "Portaria" (Notice of the Ministry of Finance) No. 176 of September 12, 1984, the credit premium was eliminated effective May 1, 1985.

The IPI export credit premium was terminated over one year before the initiation of this investigation and we verified in this case that the companies ceased receiving benefits during the review period. Accordingly, we determine that this program has been terminated, and no benefits under this program are accruing to current exports of CFSC.

Comments

Comment 1: Regarding the Income Tax Exemption for Export Earnings program, petitioner argues that the Department should: (a) Not deduct receipts of the IPI export credit premium from the exemption claimed by the respondent companies; (b) use only verified effective income tax rates in our calculations; and (c) allocate the benefit over export sales to calculate the ad valorem subsidy rate. Respondents argue that the Department should: (a) Deduct the IPI export credit premium from the companies' adjusted profits to calculate the benefit from this exemption; (b) use effective rather than nominal tax rates to calculate tax savings; and (c) calculate the ad valorem subsidy rate from this program by dividing benefits over total sales because this exemption is a rebate of an indirect tax which cannot be tied to export sales.

DOC Position: Our calculation of the value of the benefit provided by the income tax exemption for export earnings is based on the full amount claimed on the companies' income tax returns filed during the review period. The companies calculated the amount of the exemption by adjusting net sales and multiplying by the ratio of export sales to all sales. Since the net sales value used as a starting point in calculating the exemption includes receipts of the IPI export credit premium, the exemption likewise includes a proportion of that amount. We are not countervailing the receipt of the IPI export credit premium itself but rather the actual benefit accruing to the companies from the use of this income tax exemption, however derived. As this notice and our verification reports make clear, the companies' receipts of the IPI export credit premium are not accruing to current exports of CFSC and have not been included in our subsidy or duty deposit rates.

We have used only the verified effective income tax rate applicable to each company. In past Brazilian countervailing duty investigations, we have verified that companies which make investments to lower their tax rates receive dividends from those investments, and that the ability to make those investments is not limited to a specific enterprise or industry or group thereof. See *Final Affirmative Countervailing Duty Determination: Iron Ore Pellets from Brazil,* (51 FR 21961, June 17, 1986). Therefore, when we calculate the subsidy rate from this program, we take into account the 35 percent base tax rate and all appropriate adjustments claimed by the companies, and verified by the Department, to calculate an effective tax rate.

Regarding respondents' other concerns, as we have stated in numerous previous Brazilian cases, when a benefit such as this one is contingent upon exports, that program confers an export subsidy and the benefit is properly allocated over export revenues. See *e.g., Final Affirmative Countervailing Duty Determination: Brass Sheet and Strip from Brazil* (51 FR 40837, November 10, 1986) (*Brass Sheet and Strip from Brazil*).

Comment 2. Petitioner argues that the verified interest rates for loans under the Preferential Working-Capital Financing for Exports program are lower than those originally submitted to the Department and we should use verified information to value the subsidy from these loans.

DOC Position. We agree. Interest rate data provided in the questionnaire response for several loans was discovered to be incorrect at verification. An amended response was filed and our calculations for this determination are based on verified data.

Comment 3. Respondents argue that the Department should calculate the country-wide rate for the Preferential Working-Capital Financing for Exports and the Income Tax Exemption for Export Earnings programs by weight-averaging the benefit by each company's exports of the subject merchandise to the United States.

DOC Position. We disagree. We have calculated the country-wide rate for these programs using the same methodology we have applied in past Brazilian investigations. When calculating the benefit from general export subsidy programs, such as those at issue, where the benefits are not tied to specific shipments or products, we are not convinced that weight-averaging would more accurately reflect the actual subsidy provided under the programs since all exports can benefit equally. This is the first instance in any of the previous Brazilian countervailing duty investigations in which the Government of Brazil has argued that the calculation of the coutnry-wide rate for these programs should be based on weight-averaging. The Government of Brazil simply states that weight-averaging would result in a lower subsidy rate, and has cited no basis for its argument in the Act, our regulations, or economic analysis.

Comment 4. Respondents argue that the Department failed to take into account the program-wide change in the Resolution 882/883/950/1009 financing program. Respondents state that the Department should calculate a duty deposit rate based on the current interest rates in this program, and also that the Department should not include the IOF tax exemption in the benefit rate. Finally, respondents argue that the Department should use historical loan utilization information to calculate the present benefit and use relevant daily or weekly interest rates, rather than an average annual rate, to determine the alternative financing costs.

DOC Position. We agree that the duty deposit rate for this program should be based on the most recent program-wide changes, which adjusted the interest rate benefit under Resolution 950, as amended by Resolution 1009, and our determination reflects this.

Regarding the issues of the IOF tax exemption and the appropriate short-term benchmark, we have stated our position in numerous past Brazilian countervailing duty investigations. See, *e.g., Brass Sheet and Strip from Brazil, supra,* and *Final Affirmative Countervailing Duty Determination: Certain Heavy Iron Construction Casting from Brazil* (51 FR 9491, March 19, 1986). Because the IOF tax is charged on all domestic financial transactions, it is appropriate that we include the value of the IOF exemption when calculating the subsidy from this program. Concerning respondents' comments on our short-term benchmark for purposes of the deposit rate, we have valued the benefit on the basis of the 15 percent maximum interest rate differential. We consider these loans to be made on non-preferential terms absent this "equalization fee" (originating from CACEX and passed through to the borrower by the lending bank) and the IOF exemption. Therefore, it is not necessary to calculate a specific

benchmark, since the equalization fee of 15 percent constitutes the difference between the commerical rate and the preferential rate.

With regard to the issue of historical loan utilization, we have based our calculation of the duty deposit rate on the companies' maximum financing eligibility as described above under *Programs Determined To Confer Subsidies.* We have seen in this and past investigations that companies may use less than complete eligibility at times. However, we have also seen eligibility carried over from prior years, eligibility increased during the term of the proposal, and eligibility based on projected exports. In all instances, the maximum eligibility has remained at 20 percent of adjusted exports. Therefore, we consider it appropriate for the calculation of the duty deposit to use the 20 percent maximum eligibility level as an estimate of the companies' potential duty liability.

Comment 5. Citing the legislative history of the Trade Agreements Act of 1979 (S. Rep. No. 249, 96th Cong., 1st Sess. 85–86 (1979); H.R. Rep. No. 317, 96th Cong., 1st Sess. 74–75 (1979)), petitioner argues that the duty and tax reductions on capital equipment imports under the CDI program are "nonrecurring" subsidies in the nature of grants which provide ongoing benefits to CFSC currently being produced and exported by the respondent companies. Accordingly, petitioner contends that the Department should: (a) Investigate benefits received under the program over the past 15 years (the generally accepted useful life of capital equipment), and (b) amortize those benefits over that same period consistent with our grant methodology.

Citing *Can-Am Corp. v. United States,* Slip Op. 87–67, C.I.T. (June 4, 1987) and past Department determinations on the CDI program's import duty and IPI tax exemptions, respondents argue that any of these benefits provided to the respondent companies are tax benefits properly expensed in the year of receipt. Accordingly, import duty and IPI tax exemptions provided to the respondent companies outside the review period are irrelevant to this investigation. Respondents also argue that the CDI program is not limited to a specific enterprise or industry, or group thereof, and, therefore, is not countervailable in any case.

DOC Position. Given our present understanding of this program, we determine that any duty and tax reductions provided by the CDI program are benefits properly allocated to the year of receipt rather than amortized over time. Accordingly, only benefits from the CDI program received during the review period would be countervailable in this investigation. We found no use of duty or tax reductions under the CDI program during the review period.

The expensing of benefits received under the CDI program is consistent with our past practice for this and similar programs in other cases (*see, e.g., Final Affirmative Countervailing Duty Determination: Certain Carbon Steel Products from Brazil* (49 FR 17988, April 18, 1984)) and is supported by the recent Court of International Trade decision in *Can-Am* (*supra*). The *Can-Am* case upheld the Department's longstanding practice of expensing tax benefits in the year of receipt. The specific tax program in *Can-Am* involved a tax credit received for making capital investments. In the Department's determination involved in that case, we allocated the benefit to the year of receipt rather than allocating it over the useful life of the equipment acquired.

The tax benefits provided under the CDI program, like those at issue in *Can-Am*, were received after a firm made an approved investment in plant and equipment and the firm, not the government, furnished the capital for the total investment. The court in *Can-Am*, faced with the same argument as presented by petitioner in this case, specifically held that there was no "clear legislative requirement" that the Department amortize tax benefits relating to capital equipment purchases. Since the circumstances of the program at issue in *Can-Am* are analogous to those at issue here, that decision supports our determination on the CDI program.

Since we have determined that the CDI program was not used by the respondents in this investigation, we need not address respondents' comments on the question of whether this program is limited to a specific enterprise or industry, or group of enterprises or industries. Further, we note that the respondents provided no documentation pertaining to their argument on the noncounteravailability of the CDI program until long after verification. Therefore, any such information could not have been used in our final determination.

Verification

In accordance with section 776(a) of the Act, we verified the information used in making our final determination. During verification, we followed standard verification procedures, including meeting with government and company officials, inspecting documents and ledgers, and tracing information in the response to source documents, accounting ledgers, and financial statements, and collecting additional information that we deemed necessary for making our final determination.

Administrative Procedures

We afforded interested parties an opportunity to present information and written views in accordance with 19 CFR 355.34(a). Written views have been received and considered in reaching this final determination.

Subsequent to this determination, the ITC will determine whether imports of CFSC from Brazil materially injure, or threaten material injury to, a U.S. industry. If that injury determination is affirmative, we shall not issue a countervailing duty order as long as the conditions of the suspension agreement are met. If that injury determination is negative, we will terminate the suspension agreement and our investigation.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

October 8, 1987.

National Oceanic and Atmospheric Administration

Mid-Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council will convene a public meeting at the Carousel Hotel, on the Ocean at 118th Street, Ocean City, MD (telephone: 301–524–1000). On October 28, 1987, at 8:30 a.m., the Council will commence discussion of the Summer Flounder Fishery Management Plan, Parts 601, 602, and 603, of the Code of Federal Regulations, as well as discuss other fishery management and administrative matters. The public meeting will adjourn on the afternoon of October 29 but may be lengthened or shortened depending upon progress of the agenda. Also, the Council may go into closed session (not open to the public) to discuss personnel and/or national security matters.

For further information, contact John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building, 300 South New Street

Room 2115, Dover, DE 19901; telephone (302) 674–2331.

Dated: October 8, 1987.

Richard H. Schaefer,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textiles and Textile Products Produced or Manufactured in Mexico

October 13, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 16, 1987. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535–9481. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to amend the previously established limits for cotton, wool and man-made fiber textiles and textile products in Categories 310–320 and 610–614, as a group, 300/301, 313, 335, 336/636, 340/640, 342/642, 347/348, 352/652, 359–C, parts of Category 369, 435, 633, 635, 647/648, 659–O, 666, 669–C and 669–P; and to establish limits for newly merged Categories 310/318, 338/339/638/639 and 349/649, produced or manufactured in Mexico and exported during 1987. As a result, the limits for Categories 313 and 335, which are currently filled, will re-open.

Background

CITA directives dated November 28, 1986 and April 7, 1987 (51 FR 43960 and 52 FR 12230) established import restraint limits for certain cotton, wool and man-made fiber textiles and textile products, including Categories 310–320 and 610–614, as a group, 300/301, 310, 313, 318, 335, 336/636, 338/339, 340/640, 342/642, 347/348, 352/652, 359–C (coveralls and overalls), 369pt. (shoe uppers), 369pt. (other), 435, 633, 635, 638/639, 647/648, 649, 659–O (other), 666, 669–C (cordage) and 669–P (man-made fiber bags), produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

During consultations held August 16–21, 1987 between the Governments of the United States and the United Mexican States, agreement was reached to further amend the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, to increase the current designated consultation levels for cotton and man-made fiber textiles and textile products in Categories 310–320 and 610–614, as a group, and individual Categories 300/301, 313, 335, 336/636, 342/642, 342/642, 352/652, 369pt. (shoe uppers), 369pt. (other), 635, 659–0, 666, 669–C, and 669–P; and specific limits for Categories 347/348 and 359–C, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

The designated consultation levels for Categories 340/640, 435 and 633, previously a specific limit, and the specific limit for Category 647/648 are being reduced.

Within the fabric group (Categories 310–320 and 610–614, as a group) Categories 310 and 318 are being merged to become Category 310/318. In addition, currently merged Categories 338/339 and 638/639 are being merged to become Category 338/339/638/639 and Categories 349 and 649 are being merged to become Category 349/649. New limits are being established for the newly merged Categories 310/318, 338/339/638/639 and 349/649.

Import restraint limits for the foregoing categories are being amended and established at the designated levels.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Rgister** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the

categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

The actions taken pursuant to the letter to the Commissioner of Customs are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

October 13, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directives issued to you November 28, 1986 and April 7, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textiles and textile products, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 16, 1987, the directives of November 28, 1986 and April 7, 1987 are hereby amended to include the following new and amended import restraint limits:

Category	12-mo limit [1]
300/301	9,750,000 pods.
310–320 and 610–614, as a group.	35,000,000 sq yds.
313	18,000,000 sq yds.
310/318	1,000,000 sq yds.
335	55,000 doz.
336/636	160,000 doz.
338/339/638/639.	875,000 doz.
340/640	290,000 doz.
342/642	240,000 doz.
347/348	2,000,000 doz. of which not more than 1,200,000 doz. shall be in Category 347 and not more than 1,200,000 doz. shall be in Category 348.
349/649	1,200,000 doz.
352/652	1,600,00 doz.
359–C [2]	1,500,000 pods.
369pt.[3]	1,500,000 pods.
369pt.[4]	400,000 pods.
435	11,000 doz.
633	70,000 doz.
635	110,000 doz.
647/648	1,200,000 doz. of which not more than 636,000 shall be in Category 647 and not more than 636,000 shall be in Category 648.
659–0 [5]	1,500,000 pods.
666	6,000,000 pods.
669–C [6]	400,000 pods.
669–P [7]	850,000 pods.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

[2] In Category 359–C, only TSUSA numbers 381.0822, 381.6510, 384.0928 and 384.5222.

[3] In Category 369pt., only TSUSA numbers 386.0410 and 386.5210.

[4] In Category 369pt., all TSUSA numbers except 355.0200, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440, 366.2860, 386.0410, 386.5210, 706.3210, 706.3280, 706.3640, 706.3650, 706.4106 and 706.4111.

[5] In Category 659–O, all TSUSA numbers except 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607, 384.9310, 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650.

[6] In Category 669–C, only TSUSA numbers 348.0065, 384.0075, 348.0565 and 348.0575.

[7] In Category 669–P, only TSUSA number 385.5300.

Textile products in Category 349 which have been exported to the United States prior to January 1, 1987 shall not be subject to this directive. Charges to category 349 are 38,968 dozen for the period January 1, 1987 through July 31, 1987. Additional charges will be supplied as they become available.

Textile products in Category 349 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(l)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(l).

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Department of the Army

Intent To Grant an Exclusive Patent License to Boron Biologicals, Inc.

The Department of the Army announces its intention to grant an exclusive license to Boron Biologicals, Inc., a corporation of the State of North Carolina, having a place of business at 2811 O'Berry Street, Raleigh, NC 27607, under the following United States Patents and Patent Applications: 4,209,510, "Ammonia-Cyanoborane, Sodium Iodide Complex," issued June 24, 1980; 4,312,989, Pharmacologically active Amine-Boranes," issued January 26, 1982; 4,368,194, "Pharmacologically Active Amine-Boranes, Method of Use," issued January 11, 1983; 4,587,359, "Amine-Carbamoylborane Adducts," issued May 6, 1986; 4,647,555, "Esters of Boron Analogues of Amino Acids," issued March 3, 1987; Serial No. 864,612, "Method of Making Boron Analogues," filed May 19, 1986; and Serial No. 882,562, "Pharmacological Active Amine-Carboxyboranes," filed July 7, 1986.

The proposed exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and the Department of Commerce's regulations at 37 CFR 404.7. The proposed license may be granted unless, within 60 days from the date of this notice, the Department of the Army receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest. All comments and materials must be submitted to the Intellectual Property Counsel of the Army, Patents, Copyrights, and Trademarks Division, Office of The Judge Advocate General, Department of the Army, 5611 Columbia Pike, Falls Church, VA 22041–5013.

For further information concerning this notice, contact: Lieutenant Colonel William V. Adams, Patents, Copyrights, and Trademarks Division, OTJAG, Attention: JALS–PC, 5611 Columbia Pike, Falls Church, VA 22041–5013, Telephone No. (202) 756–2434/2435.

Corps of Engineers, Department of the Army

Coastal Engineering Research Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting:

Name of Committee: Coastal Engineering Research Board (CERB).

Date of Meeting: November 4–6, 1987.

Place: Savannah Sheraton Resort and Country Club, Savannah, Georgia.

Time: 8:00 a.m. to 5:30 p.m. on November 4; 8:00 a.m. to 5:30 p.m. on November 5; 8:00 a.m. to 12:00 p.m. on November 6.

Theme: Sea Level Rise—Its Implications to Coastal Engineering.

Proposed Agenda: The November 4 session will consist of a discussion of old CERB business, status of recommendations to the Chief of Engineers, status of coastal R&D program, presentations on North Atlantic and South Atlantic Divisions research needs, and overview of Savannah District and a tour briefing.

A field trip to Tybee Island, Fort Pulaski, and the Savannah Tidegate is planned for the afternoon of November 4.

The session on November 5 will consist of several presentations entitled: Results of Beach Repenishment Study; Beach Nourishment—Corps Perspective; Experience with Beach Restoration; Introduction to Sea Level Rise Issue; Implications of Sea Level Rise Report of Marine Board Study; Experiences on a U.S. Coast with Rapid Relative Sea Level Rise; International Experience. The session will also consist of two panel discussions: Predicted Magnitude of Sea Level Rise and Where do we go from here?

On November 6 there will be an open discussion of the theme with both panels, recommendations by members of the Board and selection of date for the next CERB.

This meeting is open to the public; participation by the public is scheduled for 9:10 a.m. on November 6. The public may attend the tour on November 4, but must provide their own transportation.

The entire meeting is open to the public subject to the following:

1. Since seating capacity of the meeting room is limited, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during the time scheduled on the agenda; written statements may be submitted prior to the meeting or up to 30 days after the meeting.

Inquiries and notice of intent to attend the meeting may be addressed to Colonel Dwayne G. Lee, Executive Secretary, Coastal Engineering Research Board, U.S. Army Engineer Waterways Experiment Station, P.O. Box 631, Vicksburg, Mississippi 39180–0631.

Dwayne G. Lee,

Colonel, Corps of Engineers Executive Secretary.

Department of the Navy

Public Information Collection Requirement Submitted to OMB for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded, (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Employment in Private Shipyards under Cognizance of Supervisors of Shipbuilding, Conversion and Repair (SUPSHIPS), 0703–0005, NAVSEA 4350–2, NAVSEA 4350/2.

To collect information on employment in private shipyards to make a determination of the capabilities of the shipbuilding industry and its ability to meet the shipbuilding, conversion and repair needs for Navy and Merchant ships. It is collected from firms that build, convert or repair ships.

Businesses or other for profit
Responses 115
Burden hours 11,040

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Manager and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503 and Ms. Pearl Rascoe-Harrison, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson-Davis Highway, Suite 1204, Arlington, VA 22202–4302, telephone (202) 796–0933.

FOR FURTHER INFORMATION CONTACT: A copy of the information collection proposal may be obtained from Ms. Maxine Eldridge, Commander, Naval Sea Systems Command, National Center #3, Washington, DC 20360, telephone (202) 692–2064.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA C&E–87–47; OFP Case No. 56290–9367–20, 21, 22, 22–24]

Order Granting an Exemption Pursuant to the Powerplant and Industrial Fuel Use Act of 1978 to Mobil Oil Corp.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Order granting exemption.

SUMMARY: On April 1, 1987, Mobil Oil Corporation (Mobil or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for its refinery located in Paulsboro, New Jersey.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant, and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type of exemption are found at 10 CFR 503.32.

Pursuant to section 212(a) of the Act and 10 CFR 503.32, ERA hereby issues this order granting a permanent exemption from the prohibitions of FUA for the proposed powerplant at the aforementioned installation.

The basis for ERA's order is provided in the **SUPPLEMENTARY INFORMATION** section below.

DATE: In accordance with section 702(a) of FUA, this order and its provisions shall take effect on December 14, 1987.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue SW, Room GA–093, Washington, DC 20585, Telephone (202) 586–8233.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A–113, 1000 Independence Avenue SW, Washington, DC 20585, Telephone (202) 586–6947.

The public file containing a copy of this order and other documents and supporting materials on this proceeding is available on request from DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E–190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

SUPPLEMENTARY INFORMATION: FUA prohibits the use of natural gas or petroleum in certain new powerplants unless an exemption for such use has been granted by ERA. The petitioner has filed a petition for a permanent exemption to use natural gas or oil as a primary energy source in its facility located in Paulsboro, New Jersey.

NEPA Compliance

After a review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of

section 102(2)(C) of the National Environmental Policy Act (NEPA).

Procedural Requirements

In accordance with the procedural requirements of FUA and 10 CFR 501.3(d), ERA published its Notice of Acceptance of Petition for Exemption and Availability of Certification relating to this petition in the **Federal Register** on April 30, 1987 (51 FR 15752), commencing a 45-day public comment period pursuant to section 701(c) of FUA.

Copies of the petition were provided to the Environmental Protection Agency and the Federal Energy Regulatory Commission as required by sections 213(c)(2) and 701(f) of the Act, respectively. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on June 15, 1987; no comments were received and no hearing was requested.

Order Granting Permanent Exemption

Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all of the eligibility requirements for the requested exemption as set forth in 10 CFR 503.32, and pursuant to section 212(a) of FUA, ERA hereby grants the petitioner's permanent exemption for the unit to be installed at its facility in Paulsboro, New Jersey permitting the use of natural gas or oil as a primary energy source in each unit identified in this order.

Pursuant to section 702(c) of the Act and 10 CFR 501.69 any person aggrieved by this order may petition for judicial review at any time before the 60th day following the publication of this order in the **Federal Register.**

Issued in Washington, DC, on October 6, 1987.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. G-6355-001, et al.]

Conoco Inc., et al., Applications for Certificates, Abandonments of Service and Petitions to Amend Certificates [1]

October 9,1987.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 27, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petitition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

FOOTNOTES

[1] Partial Assignment of Operating Rights to Lynx Petroleum Consultants, Inc.

[2] Sun assigned its interest in Property No. 826335, Ellen, to Entex Petroleum, Inc.

[3] Sun assigned its interest in Property No. 864013, National, to Spess Oil Co.

[4] Sun assigned its interest in Property No. 854714, Mance-Lowe Unit; and No. 891714, Lillian Wallace Unit to Getty Oil Co.

[5] Sun assigned its interest in and to the wells located in Sec. 6-T13N-R15W, Custer County, Oklahoma, limited to the Morrow Springer Formation to Gulf Oil Corporation.

[6] Sun assigned its interest in and to the wells located in W/2 Sec. 25-T24S-R36E, below the depth of 5,000 feet, Lea County, New Mexico covered by Operating Agreement described in said Quitclaim and Bill of Sale (B.P. No. 83755/QC) to Exxon Corp. and Shell Western E&P Inc.

[7] Sun assigned its interest in and to the Scrivner No. 1-26 well located in Sec. 26-T14N-R26W, from the surface down to the base of the Morrow Formation in Roger Mills County, Oklahoma covered by Operating Agreement described in said Quitclaim and Bill of Sale (B.P. No. 83601) to Petroleum Equities Corp.

[8] Additional information received 6-25-87 and 10-2-87.

[9] The application was noticed on June 23, 1987 (52 F.R. 23585). However, on October 2, 1987, Applicant requested, in addition to permanent abandonment, pregranted abandonment authorization for a period of three years for sales of released gas in interstate commerce under its small producer certificate issued in Docket No. CS72-723.

[10] Additional information received 10-5-87.

[11] Applicant requests authorization for a limited-term abandonment expiring January 9, 1990, to cover the sale of its interest to Colorado Interstate Gas Company. Applicant also requests authorization for limited-term pregranted abandonment expiring January 9, 1990, of its sales for resale of the released gas in interstate commerce under its small producer certificate issued in Docket No. CS71-340. In support of its application, Applicant states that takes of gas are substantially below contract levels. The deliverability from Applicant's interest is approximately 90 Mcf/day of NGPA section 104 flowing gas (67%) and section 104-Post 1974 gas (33%).

[12] Applicant requests two-year limited-term abandonment with pregranted abandonment. The purchaser cannot purchase the gas due to market constraints. Deliverability is approximately .100 MMcf/d. The gas is NGPA section 104 minimum rate gas. Applicant intends to sell the released volumes to new purchasers.

[13] Applicant requests two-year limited-term abandonment with pregranted abandonment. The purchaser cannot purchase the gas due to market constraints. Deliverability is approximately .130 MMcf/d. The gas is NGPA section 104 minimum rate gas. Applicant intends to sell the released volumes to new purchasers.

[14] The last well in the McCormick Unit was plugged and abandoned in July 1982, and there are no prospects for additional gas sales from this property. Williams Natural Gas Compony and ARCO have agreed to terminate subject contract effective 9-25-84. All other wells subject to the 7-17-59 contract had been plugged and abandoned and the leases associated therewith had lapsed prior to 1979.

[15] The leases dedicated to the contract filed in Docket No. CI67-1693 and designated Union Texas Petroleum Corp.'s FERC Rate Schedule No. 92 were abandoned as non-productive in February 1982. The remaining leases assigned to other parties and were deleted by an FERC Order issued on 7-28-86.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILING CODE 6717-01-M

[Docket Nos. CP88-2-000, et al.]

Northern Natural Gas Co. et al.; Natural Gas Certificate Filings

October 8, 1987.

Take notice that the following filings have been made with the Commission:

1. Northern Natural Gas Company

[Docket No. CP88-2-000]

Take notice that on October 1, 1987, Northern Natural Gas Company, Division of Enron Corp., (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-2-000, an application pursuant to section 7(c) of the Natural Gas Act for (1) a blanket certificate for authorization to make sales in interstate commerce for resale of existing natural gas supplies, which are surplus to the current and projected needs of Northern's existing on-system customers to off-system and on-system purchasers including interstate and Hinshaw pipelines and local distribution companies (LDC's), on an interruptible basis, in accordance with the provisions of two new sales rate schedules, Interruptible Sales Service-1 and Interruptible Sales Service-2 (ISS-1 and ISS-2) and (2) blanket authorization to utilize Northern's transmission facilities to effectuate interruptible direct sales to end-users, all as more fully, set forth in the application which is on file with the Commission and open to public inspection.

Northern states that is proposes to charge a negotiated rate for sales under ISS-1 and ISS-2 within a range of rates between a minimum and maximum. It is stated that the maximum rate will be equal to Northern's 100 percent load factor CD-1 Zone 2 rate and the minimum rate will equal Northern's actural weighted average cost of natural gas purchased in the month of delivery plus fuel, variable costs of delivery and GRI and AGA if applicable.

Regarding ISS rate schedule sales to end users, Northern proposes to adopt

the following procedures, Northern shall notify the appropriate State Commission LDC of a potential direct sale fifteen days prior to commencement of service, if such end user is currently served by an LDC as listed in Northern's Directory of Communities Served. It is stated that during this fifteen day period, such LDC will have the ability to protest said proposed sale with the FERC. It is further stated that the FERC shall have thirty days to approve the sale, in light of the protest, or the requested sale shall become subject to a section 7(c) application.

Northern states that sales under ISS–1 and ISS–2 would be made through Northern's existing facilities. Northern further states that the purchaser under ISS–2 would be responsible for all costs of third party transportation.

Northern states that ISS–1 and ISS–2 are essential tools that will allow Northern to purchase natural gas at competitive prices by increasing market diversity and thus retain the merchant function. The increased market diversity, Northern explains, will allow it to purchase supplies at the same competitive prices and terms as non-jurisdictional marketers, improve its overall load factor and therein retain long term supplies, manage market more effectively the supply imbalances that result from customers sales entitlement reductions and/or conversions and serve its seasonal markets at reasonable prices.

Comment date: October 29, 1987, in accordance with Standard Paragraph F at the end of this notice.

2. National Fuel Gas Supply Corporation

[Docket No. CP85–608–011]

Take notice that on September 25, 1987, National Fuel Gas Supply Corporation (National) Ten Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP85–608–011 a petition to further amend its certificate of public convenience and necessity in this proceeding so as to authorize, for an additional one-year period commencing January 1, 1988, the transportation of up to 66,403 Mcf of natural gas per day on behalf of National Fuel Gas Distribution Corporation (Distribution) for the account of 33 end-user customers, all as more fully set forth in the Appendix hereto and in the application which is on file with the Commission and open to public inspection.

The petition states that National was authorized by Commission order issued December 31, 1986, as amended and modified, to transport up to 60,858 Mcf of natural gas per day on an interruptible basis for Distribution for the account of 33 specified industrial and large commercial customers for a term ending on December 31, 1987. The Appendix hereto provides details for each of the 33 industrial and commercial customers of Distribution for which Distribution seeks an extension of transportation service by National. National states that it would receive the transportation volumes at existing receipt points on its system and deliver the volumes to Distribution at existing points of deliver.

National seeks authorization to continue to provide the transportation service authorized in this proceeding for an additional term of one year commencing January 1, 1988. The petition states that authorization of this extension prior to January 1, 1988, is needed to avert a disruptive suspension of service to the existing transportation customers.

National adds that it would charge Distribution pursuant to its Rate Schedule T–1 which currently provides for a rate of 31.08 cents per Mcf and 2 percent shrinkage.

Comment date: October 29, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket No. CP87-556-000]

Take notice that on September 24, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP87-556-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) to establish two new delivery points to its existing firm sales customer, the City of Springfield, Tennessee (Springfield) under the blanket certificate issued in Docket No. CP82-413-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee states that pursuant to Springfield's request, it has agreed to establish two new delivery points to Springfield in Tennessee's Rate Zone 1 to be known as (1) the Betts Road Meter Station located in Robertson County, Tennessee and (2) the Cross Plains Meter Station located in Robertson County, Tennessee. Tennessee states that the new delivery point is necessary to better serve the requirements of Springfield's existing service area. The total estimated cost of the proposed new delivery points is $115,000.

Tennessee does not propose to increase or decrease the total daily and/or annual quantities it is authorized to deliver to Springfield. Tennessee asserts that establishment of the proposed new delivery points is not prohibited by Tennessee's currently effective tariff and that it has sufficient capacity to accomplish the deliveries at the proposed new delivery points without detriment or disadvantage to any of Tennessee's other customers.

Comment date: November 23, 1987, in accordance with Standard Paragraph G at the end of this notice.

4. Texas Eastern Transmission Corporation

[Docket No. CP87-28-001]

Take notice that on September 29, 1987, Texas Eastern Transmission Corporation (Applicant), Post Office Box 2521, Houston, Texas 77252, filed in Docket No. CP87-28-001 an amendment to Docket No. CP87-28-000, pursuant to section 7(c) of the Natural Gas Act, to reflect a modification to the proposed facilities for which authorization to construct and operate was sought in Docket No. CP87-28-000, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that, by its original application in Docket No. CP87-28-000, it sought to provide a firm storage service (referred to as Phase V) for Consolidated Edison Company of New York, Inc. of 23,115 dekatherms equivalent per day and to construct and operate 8.0 miles of 36-inch pipeline looping at four locations on its system in Pennsylvania, and to upgrade compression facilities by 8,600 Horsepower at each of two locations in Pennsylvania. Applicant further states that the total estimated cost for these facilities was $13,438,000.

Applicant requests that the original application be amended so as to construct and operate 6.25 miles of 36-inch pipeline looping at five locations on its system in various countries in Pennsylvania in lieu of the looping proposed in the original filing. Applicant indicates that it still requests authorization to provide the services and to upgrade compression facilities by 8,600 horsepower at each of two locations in Pennsylvania, as proposed in the original filing. Applicant states that the total capital cost is estimated to be $12,256,000.

Applicant submits that the original facilities were to be extended for approved pipeline looping authorized by Commission Order dated September 12, 1986 (36 FERC ¶ 61,273) in *Texas Eastern Transmission Corporation's* Docket No. CP85-806-000. Applicant further submits that, on June 12, 1987, Columbia Gas Transmission Corporation filed a petition to review such order in the United States Court of Appeals for the District of Columbia Circuit, Columbia *Gas Transmission Corp.* vs. *FERC*, Case No. 87-1260. It is indicated that Applicant has not accepted the certificate nor constructed facilities authorized in Docket No. CP85-806-000, since the order is pending judicial review.

Applicant states that the modification to the proposed facilities would result in a reduction of the estimates of Applicant's firm demand charge from $10.035 to $8.797.

Comment date: October 29, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

5. Williams Natural Gas Company

[Docket No. CP87-557-000]

Take notice that on September 25, 1987, Williams Natural Gas Company (WGN), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP87-557-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to abandon by reclaim regulating, measuring and appurtenant facilities serving Dooley and Company (Dooley) alfalfa dehydrator in Leavenworth County, Kansas; Western Alfalfa Corporation (Western Alfalfa) alfalfa dehydrating plant in Saline County, Missouri; Highway House Development Company (HHD) service station and restaurant in Newton County, Missouri; and Williams Pipe Line Company (WPL) pump station in Jefferson County, Kansas, and the transportation of gas through said facilities, under the authorization issued in Docket No. CP82-479-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the

Commission and open to public inspection.

WNG states that Dooley, Western Alfalfa, HHD and WPL have requested that the facilities be reclaimed. The total cost of the abandonment is approximately $6,780 with an estimated salvage value of $6,420.

Comment date: November 23, 1987, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date filed with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-1-48-000]

ANR Pipeline Co.; PGA Rate Change Filing

October 9, 1987.

Take notice that on October 1, 1987, ANR Pipeline Company ("ANR"), pursuant to section 15 of the General Terms and Conditions of its F.E.R.C. Gas Tariff, Original Volume No. 1, tendered for filing with the Federal Energy Regulatory Commission ("Commission") the following tariff sheets:

Fourteenth Revised Sheet No. 18
Alternate Fourteenth Revised Sheet No. 18

ANR states that Fourteenth Revised Sheet No. 18 and Alternate Fourteenth Revised Sheet No. 18 incorporate changes proposed in its September 1, 1987 application to institute the Annual Charge Adjustment (ACA) and its September 25, 1987 filing pertaining to the functionalization and classification of Canadian gas costs consistent with Opinion Nos. 256 and 256-A.

ANR states that this filing also includes changes proposed in its concurrent Opinion Nos. 258 and 258-A compliance filing on October 1, 1987 relative to adoption of a Modified Fixed Variable rate design and elimination of ANR's non-gas fixed cost commodity minimum bill.

ANR states that copies of the filing were served upon all of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules and Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests must be filed on or before October 16, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-80-026]

ANR Pipeline Co.; Compliance Filing

October 8, 1987.

Take notice that on October 1, 1987, ANR Pipeline Company (ANR) tendered for filing proposed changes in its FERC Gas Tariff, Original Volume Nos. 1 and 1-A, to become effective November 1, 1987. ANR states that the filing reflects compliance with the Commission's Opinion Nos. 258 and 258-A and its subsequent order dated May 29, 1987. The revised Tariff Sheets and Alternate Tariff Sheets submitted with this filing are listed below:

Original Volume No. 1

Thirteenth Revised Sheet No. 18
Alternate Thirteenth Revised Sheet No. 18
Second Revised Sheet No. 20
Second Revised Sheet No. 25
First Revised Sheet No. 79
First Revised Sheet No. 80
Original Sheet No. 80A
Second Revised Sheet No. 111
First Revised Sheet No. 112
Second Revised Sheet No. 113
Second Revised Sheet No. 114

Original Volume No. 1-A

Third Revised Sheet No. 5
Alternate Third Revised Sheet No. 5
Third Revised Sheet No. 6
Alternate Third Revised Sheet No. 6
Second Revised Sheet No. 7
Alternate Second Revised Sheet No. 7
Second Revised Sheet No. 8
Alternate Second Revised Sheet No. 8

ANR states that this filing is being made under protest, and with full reservation of all rights relative to appeal of Opinion Nos. 258 and 258-A and any other lawful action relative to the subject matter. ANR has also stated that it has filed its apeal of Opinion Nos. 258 and 258-A to a court of competent jurisdiciton.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the federal Energy regulatory commission, 825 North Capitol Street NW., Washington, DC 20426, in accordance with Rules 211

and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any party wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP88-1-000]

Bayou Interstate Pipeline System; Proposed Changes in FERC Gas Tariff

October 8, 1987.

Take notice that on October 1, 1987, in compliance with 18 CFR 154.38(d)(4)(vi), Bayou Interstate Pipeline System (Bayou) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, tariff sheets set forth in Appendix A. Bayou states that an Annual Charges Adjustment provision, pursuant to 18 CFR Part 382, was also included in the filing. Bayou also proposed Original Volume No. 1A which sets in place the General Terms and Conditions under which Bayou could perform firm and interruptible onshore and offshore transportation under Section 311 of the Natural Gas Policy Act along with Rate Schedules FTS and ITS. The proposed effective date is November 1, 1987.

Copies of this filing have been served upon Bayou's jurisdictional customer, the Louisiana Public Service Commission, and the Department of Natural Resources Office of Conservation of the State of Louisiana.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the requirements of Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI88-1-000]

CSX Oil Gas Corp.; Application for Blanket Certificate of Public Convenience and Necessity and for an Order Authorizing Pre-Granted Abandonment

October 9, 1987.

Take notice that on October 2, 1987, CSX Oil, & Gas Corporation (CSX), pursuant to section 7 of the Natural Gas Act, 15 U.S.C. 717f (1982), and the Federal Energy Regulatory Commission's (Commission) Regulations promulgated thereunder, applied for a blanket certificate of public convenience and necessity with pre-granted abandonment of the sale, of natural gas which remains subject to the Commission's Natural Gas Act jurisdiction for which producers have already received separate abandonment authority under section 7(b) of the Natural Gas Act.

CSX states that it is seeking resale and pre-granted abandonment authority for all Natural Gas Policy Act (NGPA) categories of natural gas subject to the Commission's jurisdiction under the Natural Gas Act, including contractually uncommitted natural gas reserves, for which producers selling gas to CSX have secured the necessary sales and abandonment authorizations pursuant to sections 7(b) and 7(c) of the Natural Gas Act. This includes, but is not necessarily limited to, natural gas abandoned in connection with take-or-pay settlements under §§ 2.76 or 2.77 of the Commission's regulations, 18 CFR 2.76 and 2.77 (1987), and natural gas abandoned under the authority of Commission Order No. 451, which provides producers automatic abandonment and blanket sales authority for gas released to them pursuant to the good faith negotiation procedures promulgated by Order No. 451. CSX is only seeking sales and abandonment authority for sales made on its own behalf. CSX's potential resale customers under the requested blanket certificate include interstate, intrastate and so-called "Hinshaw" pipelines, local distribution companies and industrial and other end-users, including firm sales customers of releasing interstate pipelines. CSX is not seeking transportation authority of gas sold under the blanket certificate sought by its application. The transportation authority necessary to implement the requested authorization is proposed to consist of transport authority provided by Commission Order Nos. 451 and 436, and NGPA section 311.

The natural gas sold by CSX under its requested blanket certificate, if granted, will be sold at market-clearing prices, not to exceed the applicable NGPA maximum lawful price of the applicable contract price, whichever is lower.

CSX further states that its request is consistent with the Commission's recently issued order in *The Resource Group, et al.*, 40 FERC (CCH) ¶ 61,153 (issued August 4, 1987), wherein the Commission granted blanket sales certificates with pre-granted abandonment authorizing a number of marketing companies to make sales for resale, and providing pre-granted abandonment for such sales. CSX has expressed its willingness to comply with the terms and conditions set forth in the Commission's order in *Citizens Energy Corporation, et al.*, 39 FERC (CCH) ¶ 61,106 (1987), except as to the term of such authority. CSX requests that the term of the sales and abandonment authority it requests extend for at least three years from the date of approval of such authority by the Commission.

CSX further states that it is willing to subject itself to the Commission's Natural Gas Act jurisdiction to the extent, and only to the extent, of its participation in these jurisdictional transactions in the same manner and on the same basis that the Commission's

jurisdiction was stated to attach to certain marketers in prior Commission orders granting such entities certain blanket sales and abandonment authorizations. CSX also requests that the Commission clarify and declare that CSX will be subject to the Commission's Natuiral Gas Act jurisdiction only to the extent necessary to effectuate the requested authority and only with respect to its participation in the transactions authorized.

Any person desiring to be heard or to make any protest with reference to say Application should on or before October 26, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a Motion to Intervene or Protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a Motion to Intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-1-51-000]

Great Lakes Gas Transmission Co.; Proposed Changes in F.E.R.C. Gas Tariff Under Purchased Gas Adjustment Clause Provisions

October 8, 1987.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on October 1, 1987, tendered for filing Ninth Revised Sheet Nos. 57(i) and 57(ii), and Fifteenth Revised Sheet No. 57-A to its FERC Gas Tariff to be effective November 1, 1987.

Ninth Revised Sheet Nos. 57(i) and 57(ii) reflect a purchased gas cost surcharge resulting from maintaining an unrecovered purchased gas cost account for the period commencing March 1, 1987 and ending August 31, 1987.

Fifteenth Revised Sheet No. 57-A reflects the estimated incremental pricing surcharge for the six month period commencing November 1, 1987 and ending April 30, 1988. No incremental costs are estimated for this period.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-1-53-000]

K N Energy, Inc.; Proposed Changes in FERC Gas Tariff

October 8, 1987.

Take notice that K N Energy, Inc. ("K N") on October 1, 1987, tendered for filing proposed changes in its FERC Gas Tariff to adjust the rates charged to its jurisdictional customers pursuant to the Gas Cost Adjustment provision (section 19) and the Incremental Pricing Surcharges provision (section 20) of the General Terms and Conditions of K N's FERC Gas Tariff, Third Revised Volume No. 1 to reflect a decrease in the base cost of gas and to amortize certain unrecovered gas costs. K N states that the proposed changes would decrease the commodity rate under each of its jurisdictional rate schedules by 17.22¢ per Mcf, of which 16.85¢ per Mcf represents the decrease in the base purchase gas cost and .37¢ per Mcf represents the decrease in the unrecovered gas cost surcharge.

Copies of the filing were served upon K N's jurisdictional customers, and interested public bodies.

Any person desiring to be heard or to make any protest with reference to this filing should, on or before October 15, 1987, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, a motion to intervene or a protest in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-W

[Docket No. RP88-6-000]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

October 8, 1987

Take notice that North Penn Gas Company (North Penn) on October 1, 1987, filed the following revised tariff sheets to Original Volume No. 1 of its FERC Gas Tariff:

Eighty-Sixth Revised Sheet No. PGA-1
Second Revised Sheet No. 15 G(1)

North Penn states that these tariff sheets are being filed to be effective on October 1, 1987 in compliance with Commission Order Nos. 472 and 472-B issued May 29, 1987 and September 16, 1987, respectively in Docket No. RM87-3-018.

North Penn states that the revised tariff rates reflect an increase in the commodity portion of existing rates of $.0021 per Mcf to include the FERC Annual Charge Adjustment. A new section 16 Federal Energy Regulatory Commission Annual Charge Adjustment Provision has been added to the General Terms and Conditions of North Penn's Tariff to include the provision for the FERC Annual Charge Adjustment.

North Penn respectfully requests waiver of any of the Commission's Rules and Regulations as may be required to permit this filing to become effective October 1, 1987, as proposed.

Copies of this letter of transmittal and all enclosures are being mailed to each of North Penn's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CI88-4-000]

Pogo Producing Co.; Application for Limited-Term Blanket Certificate of Public Convenience and Necessity With Pregranted Abandonment

October 9, 1987.

Take notice that on October 1, 1987, Pogo Producing Company ("Pogo") filed an application pursuant to section 7(c) and 7(b) of the Natural Gas Act and Part 157 of the regulations of the Federal Energy Regulatory Commission (the "Commission") requesting a limited-term blanket certificate of public convenience and necessity authorizing the sale for resale of production from East Cameron Block 270 and Eugene Island Blocks 295 and 330 with pregranted abandonment. Pogo requests such certificate authority for a limited term of 3 years.

The subject production previously had been sold to Sea Robin Pipeline Company ("Sea Robin") under certificate authority granted in Docket Nos. CI73-477-000 and CI73-546-000. On September 15, 1987, the Commission granted Pogo authority to permanently abandon such sales to Sea Robin. *Phillips 66 Natural Gas Co., et al.*, Docket Nos. G-2605-001, *et al.* Currently, Pogo's production from the subject blocks is being sold under authority of Sea Robin's limited-term abandonment program authorized by the Commission in Docket No. CI86-595-000.

Pogo requests that the Commission process its application on an expedited basis pursuant to Rule 802 of the Commission's rules of practice and procedure.

Any person desiring to be heard or to make any protest with reference to said application should, on or before October 26, 1987, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the Commission's rules of practice and procedure. 18 CFR 385.211, 385.214. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestant a party to the proceeding. Persons desiring to become parties to the proceeding or to participate as a party in any hearing herein must file motions to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23873 Filed 10-14-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-38-000]

Ringwood Gathering Co.; Filing of Revised Tariff Sheets

October 9, 1987.

Take notice that on October 1, 1987 Ringwood Gathering Company tendered for filing Forty-Second Revised Sheet PGA-1. Ringwood Gathering Company states that Forty-Second Revised Sheet PGA-1 with a proposed effective date of November 1, 1987, is being filed to revise its Base Tariff Rate to reflect a net decrease for changes in the system cost of purchased gas and the recovery of the balance accumulated in its unrecovered purchased gas cost account.

Ringwood Gathering Company further states that the projected cost of purchased gas, as computed in said filing, is based on the applicable NGPA rates that will be paid during the effective period of this PGA. In certain instances, Ringwood has renegotiated the price to be paid for certain gas at costs below the maximum lawful NGPA rates. In these cases the renegotiated prices have been used.

Ringwood Gathering Company states that copies of this filing were served upon Williams Natural Gas Company, Oklahoma Natural Gas Company and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.211 and 385.214 of the Commission's Rules of Practice and Procedure, to be filed on or before October 16, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23870 Filed 10-14-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-29-000]

Transcontinental Gas Pipe Line Corp., Proposed Changes in FERC Gas Tariff

October 8, 1987.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on October 1, 1987 the following proposed tariff sheets to Second Revised Volume No. 1 of its FERC gas tariff:

Proposed Tariff Sheets

Forty-Ninth Revised Sheet No. 12
Forty-Fifth Revised Sheet No. 15
Sixth Revised Sheet No. 15-A
Fifth Revised Sheet No. 247
Fifth Revised Sheet No. 248
Seventh Revised Sheet No. 249
Fifth Revised Sheet No. 250
Third Revised Sheet No. 250-A
Second Revised Sheet No. 250-B
Second Revised Sheet No. 250-C
First Revised Sheet No. 250-D
First Revised Sheet No. 250-E
First Revised Sheet No. 250-F

Transco states that the proposed tariff sheets reflect an overall rate increase of 14.9 cents per dt in the commodity charge under the CD, G, OG, E, ACQ and S-2 Rate Schedules.

Transco states that the increase of 14.9 cents per dt in commodity charges under the aforementioned Rate Schedules is comprised of 11.5 cents per dt increase related to the current gas cost portion of commodity rates and a 2.0 cents increase in the Deferred Adjustment and a 1.4 cents per dt increase related to the Special Transition Gas Cost Surcharge. Transco states that the instant PGA filing reflects a projected average cost of purchased gas of approximately $2.23 /dt based on projected system gas purchases as more fully reflected on Appendix B of the filing.

Transco states that as background to the instant filing, by order issued May 18, 1987 in TA85-1-29 et al., the Commission approved a Transco PGA Settlement which resolved for the period encompassed by 6 PGA proceedings all outstanding issues in those dockets except for those issues reserved by Art. II of the Settlement. Pursuant to such Settlement, Transco agreed, among other things, (i) to reflect a cost of gas in the instant PGA filing no greater than

BEST COPY AVAILABLE

$2.25 per dt, (ii) to be "at risk" for gas costs in excess of $2.2132 per dt for the period April 1, 1987, through October 31, 1987 (summer period) under certain specified conditions and (iii) to suspend normal deferred accounting for the foregoing summer period and to refund or surcharge customers directly, as appropriate, within sixty days of the conclusion of the summer period. Therefore, Transco states, as reflected in Appendix D of the filing, the negative surcharge of the instant PGA filing of 0.6 cents per dt is attributable only to (i) Account No. 191 carrying charges computed for the period April 1, 1987 through August 31, 1987 and (ii) an adjustment related to the inclusion of deferred state income taxes in the computation of Account No. 191 carrying charges.

Transco has also included revisions to Section 22 of its General Terms and Conditions to eliminate all incremental pricing provisions as a result of Congress' repeal of Title II of the NGPA and the Commission's Order No. 478.

Transco states that copies of the instant filing are being mailed to its jurisdictional customers and interested state commissions. In accordance with the provisions of Section 154.16 of the Commission's Regulations, copies of this filing are available for public inspection during regular business hours, in a convenient form and place at Transco's main office at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. In accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP88-5-000]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

October 8, 1987.

Take notice that on October 1, 1987, Transcontinental Gas Pipe Line Corporation ("Transco") tendered for filing First Revised Sheet Nos. 187 through 196, 196-A and 371 through 375 to its FERC Gas Tariff, Second Revised Volume No. 1.

The proposed effective date of the revised tariff sheets is November 1, 1987.

Transco states that the purpose of the filing is to revise its currently effective Rate Schedule FT and its form of Service Agreement for use under its Rate Schedule FT so as to bring such tariff provisions into conformity with the manner in which its expects to operate as an open-access transporter under Commission Order 436 and 500. Transco states that the provisions of the revised Rate Schedule FT and FT Form of Service Agreement are more consistent with the Commission's policies than are the comparable provisions of Transco's currently effective tariff and that the revised tariff sheets delete any reference to Rate Schedule MDQ which has, not to date, been made effective.

Transco states that copies of the filing have been served upon its customers, State Commissions and other interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protest should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are availabale for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6712–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–799–DR]

Major Disaster and Related Determinations; California

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of California, (FEMA–799–DR), dated October 7, 1987, and related determinations.

DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3614.

Notice: Notice is hereby given that, in a letter of October 7, 1987, the President declared a major disaster under the authority of the Disaster Relief act of 1974, as amended (42 U.S.C. 521 *et seq.*, Pub. L. 93–288), as follows:

I have determined that the damage in certain areas of the State of California resulting from an earthquake and continuing aftershocks beginning on October 1, 1987 is of sufficient severity and magnitude to warrant a major-disaster declaration under Public Law 93–288. I therefore declare that such a major disaster exists in the State of California.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under PL 93–288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

Pursuant to section 408(b) of PL 93–288, you are authorized to advance to the State its 25 percent share of the Individual and Family Grant program, to be repaid to the United States by the State when it is able to do so.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. Tommie C. Hamner of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of California to have been affected adversely by this declared disaster.

Los Angeles County for Individual Assistance and Public Assistance.
Orange County as an adjacent county for Individual Assistance only.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Julius W. Becton, Jr.,

Director.

BILLING CODE 6718–02–M

FEDERAL MARITIME COMMISSION

[Docket No. 87–21]

Marine Surveyors Guild, Inc. et al. v. Cooper/T. Smith Corp.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Marine Surveyors Guild, Inc., Captain Davenport & Associates, Inc. and Thomas F. Sessum d/b/a Sessum's Marine Surveyors ("Complaints") against Cooper/T. Smith Corporation ("Respondent") was served October 8, 1987. The complaint was filed pursuant to the Shipping Act, 1916, 46 U.S.C. app. 801, et seq., and the Shipping Act of 1984, 46 U.S.C. app. 1701, et seq. Specific alleged violations include sections 15, 16 and 17, Shipping Act, 1916, 46 U.S.C app. 816, 815 and 816, arising out of a requirement that Complainants execute an indemnity agreement and provide insurance coverage before access is allowed to Respondent's premises or vessels.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by October 10, 1988, and the final decision of the Commission shall be issued by February 10, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Arrow Bank Corp., et al.; Formations of: Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 6, 1987.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045.

1. Arrow Bank Corp. Glen Falls, New York; to acquire 100 percent of the voting shares of Saratoga National Bank and Trust Company, Saratoga Springs, New York, a *de novo* bank. Comments on this application must be received by October 28, 1987.

B. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. Atlantic Bancorporation, Voorhees, New Jersey; to acquire 100 percent of the voting shares of Glendale Bank of Pennsylvania, Philadelphia, Pennsylvania, a *de novo* bank.

C. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. First State Corporation, Waynesboro, Mississippi; to acquire 24.9 percent of the voting shares of First National Bank of Lucedale, Lucedale, Mississippi.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Malta Banquo, Inc., Malta, Montana; to become a bank holding company by acquiring at least 80 percent of the voting shares of First Security Bank of Malta, Malta, Montana.

E. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Community Bankers, Inc., Granbury, Texas; to acquire 100 percent of the voting shares of Farmers & Merchants State Bank, Burleson, Texas. *Comments on this application must be received by November 4, 1987.*

Board of Governors of the Federal Reserve System, October 9, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Indiana National Corp.; Application To Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 6, 1987.

A. Federal Reserve Bank of Chicago (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Indiana National Corporation, Indianapolis, Indiana; to engage *de novo* through its subsidiary, Indiana National Network Corporation, Indianapolis, Indiana, in providing data processing services pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 9, 1987.

James McAfee,

Associate Secretary of the Board.

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than November 3, 1987.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Salem Bancorp, Inc.,* Salem, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of Salem Bank, Inc., Salem, Kentucky.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Maryville Bancshares, Inc.,* Chillicothe, Missouri, and its subsidiary Citizens State Bank of Maryville, Maryville, Missouri; to merge with Savannah Bancshares, Inc., Chillicothe, Missouri, and thereby indirectly acquire Community Bank of Savannah, Savannah, Missouri. Comments on this application must be received by October 30, 1987.

Board of Governors of the Federal Reserve System, October 8, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Statement of Organization, Functions, and Delegations of Authority; Food and Drug Administration

Part H, Chapter HF (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, as amended most recently in pertinent parts at 49 FR 10168, FR March 19, 1984) is amended to reflect the establishment of the Center for Drug Evaluation and Research and the Center for Biologics Evaluation and Research in place of the current Center for Drugs and Biologics.

Currently, there are two major program concerns within the Center for Drugs and Biologics—Acquired Immune Deficiency Syndrome (AIDS) and the new drug review process. The crises and public pressures generated by these two major programs make them unmanageable in a single organization. FDA believes both programs need more focused leadership on a day-to-day basis and better management of resources than a single center director and deputy can provide. FDA believes that the director of its biologics program, which will focus on the development of AIDS vaccines and diagnostic tests and coordinate all other AIDS activities, needs to continue to report directly to the Commissioner due to the public health significance of the AIDS threat. FDA also believes that the director of the new drug review program needs to continue to report directly to the Commissioner due to the major public health gains that result from the approval of new therapies. Consequently, FDA believes that the establishment of two new centers in place of the current Center for Drugs and Biologics, with the AIDS program as the dominant focus in one and with the new drug review program as the dominant focus in the other, will enable FDA to focus more attention on these two vital programs.

Section HF-B, Organization and Functions is amended as follows:

1. Delete paragraph (n) and all subparagraphs for *Center for Drugs and Biologics (HFN).*

2. Insert new paragraph (n), *Center for Drug Evaluation and Research (HFN)* reading as follows:

(n) *Center for Drug Evaluation and Research (HFN).* Develops FDA policy with regard to the safety, effectiveness, and labeling of all drug products for human use.

Reviews and evaluates new drug applications (NDAs) and investigational new drug applications (INDs).

Develops and implements standards for the safety and effectiveness of all over-the-counter (OTC) drugs.

Monitors the quality of marketed drug products through product testing, surveillance, and compliance programs.

Coordinates with the Center for Biologics Evaluation and Research regarding activities for biological drug products. Such activities include research, compliance, and product review and approval.

Develops and promulgates guidelines on Current Good Manufacturing Practices for use by the drug industry.

Develops and disseminates information and educational material dealing with drug products to the medical community and the public in coordination with the Office of the Commissioner.

Conducts research and develops scientific standards on the composition, quality, safety, and effectiveness of human drugs.

Collects and evaluates information on the effects and use trends of marketed drug products.

Monitors prescription drug advertising and promotional labeling to assure their accuracy and integrity.

Analyzes data on accidental poisonings and disseminates toxicity and treatment information on household products and medicines.

In carrying out these functions, cooperates with other Agency components of FDA, other PHS organizations, governmental and international agencies, volunteer health organizations, universities, individual scientists, nongovernmental laboratories, and manufacturers of drug products.

3. Insert new paragraph (p), *Center for Biologics Evaluation and Research (HFB)* reading as follows:

(p) *Center for Biologics Evaluation and Research (HFB).* Administers regulation of biological products under the biological product control provisions of the Public Health Service Act and applicable provisions of the Federal Food, Drug, and Cosmetic Act.

Provides dominant focus in FDA for coordination of the Acquired Immune Deficiency Syndrome (AIDS) program. Works to develop an AIDS vaccine, AIDS diagnostic tests and conducts other AIDS-related activites.

Inspects manufacturers' facilities for compliance with standards, tests products submitted for release, establishes written and physical standards, and approves licensing of manufacturers to produce biological products.

Plans and conducts research related to the development, manufacture, testing, and use of both new and old biological products to develop a scientific base for establishing standards designed to ensure the continued safety, purity, potency, and efficacy of biological products.

Coordinates with the Center for Drug Evaluation and Research regarding activities for biological drug products. Such activities include research, compliance, and product review and approval.

Plans and conducts research on the preparation, preservation, and safety of blood and blood products, the methods of testing safety, purity, potency, and efficacy of such products for therapeutic use, and the immunological problems concerned with products, testing, and use of diagnostic reagents employed in grouping and typing blood.

In carrying out these functions, cooperates with other Agency components of FDA, other PHS organizations, governmental and international agencies, volunteer health organizations, universities, individual scientists, nongovernmental laboratories, and manufacturers of biological products.

Prior Delegations of Authority

Pending further delegations, directives, or orders by the Commissioner of Food and Drugs all delegations of authority to the Director, Deputy Director, and office directors of the abolished Center for Drugs and Biologics are vested in the Directors, Deputy Directors, and office directors of the new Center for Drug Evaluations and Research and the Center for Biologics Evaluation and Research as the delegations relate to their newly assigned functions and all delegations of authority to any other officer or employee of the Center in effect prior to the date of this order shall continue in effect in them or their successors.

Date: October 6, 1987.

Otis R. Bowen,

Secretary.

[FR Doc. 87-23833 Filed 10-14-87; 8:45 am]

BILLING CODE 4160-01-M

VOL 52 ISS 199 OCT 15 1987 UMI

Food and Drug Administration

[Docket No. 79D-0124]

Draft Guideline for Drug Master Files; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guideline to assist persons submitting information to drug master files. FDA is making the draft guideline available for public comment to assist the agency in developing a final guideline. The guideline, when issued in final form, may be relied on by holders of drug master files in submitting information to FDA. The draft guideline was prepared by FDA's Center for Drugs and Biologics.

DATE: Written comments by January 13, 1988.

ADDRESSES: Requests for a copy of draft guideline and written comments regarding the draft guideline may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-adhesive labels to assist the Branch in processing your requests.

FOR FURTHER INFORMATION CONTACT: Steven H. Unger, Center for Drug and Biologics (HFN-360), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8038.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of a draft guideline on drug master files. The guideline is intended to assist submitters of information to drug master files in preparing useful and well-organized submissions. The guideline is intended to replace the current Guideline for Drug Master Files published in 1978.

FDA is making this draft guideline available for public comment before issuing the guideline in final form. Following review of the comments submitted and after making any revisions the agency considers to be appropriate, the guideline will be made final, and FDA will announce its availability under § 10.90 (21 CFR 10.90(b)).

Section 10.90(b) provides for the use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. Under § 10.90(b), a person who follows a guideline can be assured that his or her conduct will be acceptable to the agency. A person may also choose to use alternative procedures even though they are not provided for in the guideline. A person who chooses to use an alternate procedure may discuss the matter further with the agency to prevent an expenditure of money and effort for work that the agency may later determine to be unacceptable. Therefore, interested persons are encouraged to use this opportunity to submit comments on the draft guideline if they have suggestions for its revision.

Interested persons may, on or before January 13, 1988, submit written comments on the draft guideline to the Dockets Management Branch (address above). These comments will be considered in determining whether amendments to, or revisions of, the draft guideline are warranted. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guideline and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Requests for a single copy of the draft guideline should be sent to the Dockets Management Branch.

Dated: October 2, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 87-23812 Filed 10-14-87; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 80N-0005]

Safety of Electromedical Devices

AGENCY: Food and Drug Administration.

ACTION: Withdrawal of notice of intent.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing its notice of intent concerning the establishment of uniform standards for electromedical devices. FDA has determined that immediate action on a standard generic to all electromedical devices is not needed. FDA has concluded that there is insufficient evidence of actual risks to health owing to electrical leakage current from medical devices alone and that existing voluntary standards are being adhered to by manufacturers.

FOR FURTHER INFORMATION CONTACT: James J. McCue, Jr., Center For Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION: During the period from 1976 through 1982 under section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c), FDA's medical device classification panels recommended the classification of approximately 1,100 devices into class II (performance standards). Approximately 300 of these devices are electrically powered. During their review of devices, classification panels identified electrical safety as a concern for virtually every electrically powered device.

In the **Federal Register** of September 5, 1980 (45 FR 58970), FDA published a notice of intent announcing that it would consider various alternative approaches in providing reasonable assurance of the safety and effectiveness of electromedical devices. The agency announced that it would consider establishing a performance standard for electromedical devices to minimize electrical hazards, especially the hazards associated with electrical shock or leakage current. The notice requested data, information, and comment on the need for a safety performance standard for electromedical devices, how to achieve the establishment of such a standard, and whether certain existing voluntary standards were suitable for use as the basis of a mandatory performance standard. FDA also requested comments on whether it should endorse a voluntary standard or aspects of voluntary standards under FDA's then-proposed voluntary standards policy (45 FR 7490; February 1, 1980), or whether FDA should adopt or adapt an existing voluntary standard or parts of existing voluntary standards as a guideline. The then-proposed voluntary standards policy articulated FDA's involvement in the development, support, endorsement, and use of voluntary performance standards for medical devices. In the notice of September 5, 1980, FDA proposed to endorse voluntary standards that conformed to the "Criteria for Endorsement of Voluntary Standards" discussed in the notice of February 1, 1980. The notice of September 5, 1980, also discussed existing voluntary standard activities, State and local electrical codes, user practices, and the need for uniformity of electrical standards. An FDA summary of several voluntary standards dealing with electrical safety was included, as well as FDA's suggestion that a combination of provisions from the American National Standards Institute, Inc./ Association for the Advancement of Medical Instrumentation (ANSI/AAMI) SCL-12/78 and the International Electrical Commission (IEC) 601-1 might be the best approach to achieving uniformity and ensuring safety of electromedical devices.

FDA received 58 comments on the notice of September 5, 1980. Of these 58 comments, 29 were from manufacturers and trade associations, 21 were from professional users, 5 were from government agencies, and 3 were from individuals. Few comments supported the establishment of an electromedical performance standard. Most of the comments recommended that FDA do nothing at this time in regard to the alternatives proposed in the notice, i.e., performance standard, endorsement, or guidelines.

As noted above, one of FDA's reasons for issuing the notice of the ageny's intent to consider establishing standards for electromedical devices was its then-proposed voluntary standards policy. For the reasons discussed below, FDA changed its policy toward adoption of voluntary standards for devices.

In the **Federal Register** of October 23, 1985 (50 FR 43060), FDA published a notice, "Policy Statement; Class II Medical Devices," announcing its policy for setting priorities for initiating proceedings to establish performance standards for medical devices classified into class II. Under the amendments, FDA is required to establish performance standards for class II devices. At this time, however, FDA does not have the resources to establish performance standards for all of the devices already classified (or being classified) in class II. Under the amendments, FDA is using the regulatory controls of class I to regulate a device classified into class II until a performance standard is established under section 514 of the act (21 U.S.C. 360d) for a class II device. In the October 23, 1985, notice, FDA announced it will consider the following factors when setting priorities for establishing performance standards for class II devices:

a. The seriousness of questions concerning the safety and effectiveness of the device; the risks associated with use of the device; the significance of a device to the public health; and the present and projected use of the device;

b. The recommendations of FDA's advisory committees;

c. The impact of an FDA guideline or recommendation;

d. The effect of a Federal standard or other regulatory controls under an authority other than the act;

e. The impact of voluntary standards;

f. The impact of activities authorized under the general controls provisions of the act;

g. The effect of dissemination of information and education efforts;

h. The sufficiency of voluntary corrective actions;

i. Valid scientific evidence developed since classification;

j. The existence of a petition for reclassification;

k. The impact of any other factors that affect a device's safety or effectiveness.

Based on its current policy on setting priorities for establishing performance standards for devices described above and based on a review of the comments received on the notice of intent of September 5, 1980, FDA concludes that the notice of intent should be withdrawn. A summary of the comments received on the notice of intent, and FDA's response follows:

1. Fourteen comments explicitly desired uniform standards for electrical safety of electromedical devices. Nineteen additional comments stated a preference for a particular standard, therefore implying a desire for uniformity.

Mandatory Standards

2. Three comments favored a mandatory electromedical device standard. Fifteen comments opposed any action by FDA, claiming that existing voluntary standards adequately address electrical hazards and that there is no electrical safety problem or, at least, none has been demonstrated.

FDA agrees that existing voluntary standards adequately address electrical hazards and that the number of electrical safety problems is small. In the mid-1960's, electrical safety was one of the most written about and talked about subjects in the health care industry. In 1970, Carl Walter estimated that 5,000 individuals died each year as a result of electric shock from medical devices. (Walter, Carl W., "Electrical Hazards in Hospitals," *Hospital Practice*, December 1970, pp. 53–56.)

To determine the extent of the electrical risks presented by devices, FDA reviewed the recent published literature, the data from FDA's Device Experience Network (DEN), and reports submitted to FDA under the medical device reporting regulations (21 CFR Part 803).

Since FDA published the notice of intent in 1980, FDA published the medical device reporting regulations (21 CFR Part 803) (49 FR 36326; September 14, 1984). These regulations became effective on December 13, 1984, and provide that manufacturers and importers of medical devices which receive, or otherwise become aware of, information that reasonably suggests that one of their marketed devices (1) may have caused or contributed to a death or serious injury or (2) has malfunctioned and that the device or any other device marketed by the manufacturer or importer would be likely to cause or contribute to death or serious injury if the malfunction were to recur, report such occurrence to FDA. An analysis of the medical device reporting data demonstrates that an electrical safety standard generic to all electromedical devices would not have prevented the majority of the deaths, serious injuries, and malfunctions which have been reported to FDA regarding electromedical devices. Indeed, most reports of deaths or injuries from electromedical devices do not involved electrical shock or leakage current and any such reports that are received are not common to all electromedical devices.

FDA's review of the current literature, data from DEN, and reports submitted under Part 803 identified only a few cases of deaths or injuries that might have been prevented by a performance standard. While it is possible that the extent of unreported deaths and injuries may be higher than what is documented in the literature, DEN, and reported to FDA under Part 803, FDA could find no tangible evidence that this is the case. FDA concludes that a reasonable assurance of safety has already been achieved without the need for additional FDA actions.

If the number of deaths and injuries has decreased since the late 1960's as the comments argue and the available data support, it may be due, in part to the development and use of voluntary standards. Compared to the 1960's, FDA believes that the conformance by device manufacturers with any one of the current voluntary standards provides a reasonable assurance of the safety of electromedical devices.

Under section 513 of the act, all medical devices are subject to the general controls provisions of the act. These provisions provide FDA with authority (1) to determine whether a device is adulterated (section 501 of the act); (2) to determine whether a device is misbranded (section 502 of the act); (3) to require registration of device manufacturers and listing of their devices (section 510 of the act); (4) to determine whether a device should be banned (section 516 of the act); (5) to require notification by health professionals of device defects and, where necessary, to order repair replacement, or refund for the device (section 518 of the act); (6) to require records and reports necessary to ensure that a device is not adulterated or misbranded (section 519 of the act); (7) to require restricted sale, distribution, or use of a device (section 520(e) of the act); (8) to require device manufacturers

VOL
52
ISS
199
OC
15
1987
UMI

to follow current good manufacturing practices (section 520(f) of the act); and (9) to require manufacturers of new or investigational devices to submit applications for exemption before initiating clinical investigations (section 520(g) of the act). These general controls provisions, coupled with the requirements under Part 803 for reporting to FDA of deaths, serious injuries, and malfunctions associated with medical devices, have enabled FDA to act quickly to correct device safety problems reported to the agency. For example, FDA has worked directly with manufacturers of apnea detection monitors to redesign their products to eliminate potential safety problems caused by incorrect use. These design changes, however, were not made because of electrical leakage current such as would be covered by an electrical safety standard.

As noted above, FDA will initiate proceedings to establish performance standards for class II devices on a priority basis, underaking action first for devices with the most serious health hazards. FDA continues to develop the information necessary to initiate proceedings to establish performance standards for specific electromedical devices for which associated hazards (other than electrical safety) warrant a high priority. Because FDA believes that current voluntary electrical safety standards adequately address the electrical hazards of electromedical devices and are adhered to by manufacturers, FDA will continue to participate in the development and revision of voluntary standards for electromedical devices.

In summary, FDA will defer the initiation of proceedings to establish a safety performance standard for electromedical devices because (1) there is a lack of documented evidence of electrical safety risks; (2) if deaths or injuries from electrical shock or leakage current do occur, manufacturers must report them to FDA promptly under Part 803; (3) the existence of voluntary standards and the adherence to voluntary standards by the majority of manufacturers provide adequate control of risks of electrical shock or leakage current; and (4) the general controls provisions of the act are sufficient to provide reasonable assurance of the safety and effectiveness of devices that present risks to health only of electrical shock or leakage current.

Endorsement

3. Four comments supported FDA endorsement of voluntary standards and 15 comments explicitly opposed any action by FDA. Several comments argued that such endorsement by FDA would give the appearance of substantive rulemaking by FDA and would be perceived as mandatory.

Although FDA did not intend that its endorsement of a voluntary standard would have the force and effect on law, FDA concurs with these comments objecting to endorsement. FDA now believes that endorsement of a voluntary standard by FDA would mislead manufacturers and consumers to believe that the endorsed standard was mandatory. FDA, therefore, does not consider endorsement of an existing voluntary standard as a viable option.

Guideline

4. Four comments objected to FDA developing a guideline regarding safety of electromedical devices under § 10.90(b) of the agency's administrative practices and procedures regulations (21 CFR 10.90(b)). These comments generally discouraged the use of a guideline in lieu of a mandatory performance standard on the ground that confusion existed as to whether a guideline is enforceable. The comments also questioned the use of a guideline as a possible means of issuing a de facto regulatory standard. Four additional comments stated a preference for an FDA guideline on electrical safety to help address uniformity.

FDA believes that the regulatory status of a guideline is not confusing. FDA considers that a guideline made available under 21 CFR 10.90(b) states procedures or standards of general applicability that are not legal requirements but are acceptable to FDA for a subject matter which falls within the laws administered by FDA. Manufacturers of electromedical devices could have relied upon a guideline with the assurance that it is acceptable to FDA. FDA concludes, however, that a guideline is not necessary at this time because voluntary standards appear adequate in preventing risks to health from electrical shock or leakage current from eletromedical devices.

Uniformity

5. Thirty-one comments stated preferences for one or more specific voluntary standards, with 19 comments preferring a particular standard. Therefore, these comments indicate a desire for uniformity of standards. Fourteen comments stated explicitly that uniformity of standards for the safety of electromedical devices was desired. Two comments stated that uniformity of voluntary standards is not a factor in the safety or effectiveness of a device and, therefore, should not be FDA's concern. Only one comment saw an advantage to diversity of standards.

FDA believes that a lack of uniformity of voluntary standards does play a role in the marketplace by raising the costs of medical devices. Higher costs may, in turn, reduce the availability of some devices to patients. Uniformity is also a concern of FDA when diversity of device characteristics results in risks regarding safety or effectiveness. However, in the case of risk of electrical shock or leakage current, the lack of uniformity has not resulted in unsafe electromedical devices because, as discussed infra, all of the voluntary standards are adequate to protect the public health. Moreover, the voluntary standards appear to be undergoing revisions which would render them more uniform.

Uniformity is not the only concern of FDA. FDA considers the factors listed in the notice described above (50 FR 43060) when setting priorities for initiating proceedings to establish performance standards under section 514 of the act (21 U.S.C. 360d). Because FDA considers these other factors in setting priorities for initiating such proceedings, the lack of uniformity of existing voluntary standards alone is insufficient to cause FDA to establish a mandatory performance standard for electromedical devices.

ANSI/AAMI SCL–12/78 and IEC 601–1

6. In the September 5, 1980, notice, FDA suggested a standard combining ANSI/AAMI SCL–12/78 and IEC 601–1 as a possible approach to the control of electrical hazards in electromedical devices. Nine comments were in favor of ANSI/AAMI SCL–12/78, while five comments were opposed to its use. Fifteen comments were in favor of IEC 601–1, while six were opposed to its use.

Currently, the American voluntary standards community and American manufacturers are working to have IEC–601–1 revised to more closely reflect the American position on leakage current.

Because FDA has decided at this time to defer any of its proposed actions to control electrical hazards of electromedical devices, the agency's acceptance or rejection of these voluntary standards as the basis for a uniform electrical safety standard is not necessary.

FDA will, however, consider the specifications of these two voluntary standards in addition to specifications of other voluntary standards when the agency initiates a proceeding to establish a mandatory performance standard for a specific eletromedical device.

Conclusion

For the reasons above, FDA concludes that immediate action on a standard generic to all electromedical devices is not necessary. FDA will consider electrical leakage current risks when it initiates a proceeding to establish a mandatory standard for a specific eletromedical device. Accordingly, FDA withdraws the notice of intent published in the **Federal Register** of September 5, 1980 (45 FR 58970).

Dated: October 7, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK-963-4213-15; F-14862-A]

Alaska Native Claims Selection; Kuitsarak, Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that the decision to issue conveyance (DIC) to Kuitsarak, Inc., notice of which was published in the **Federal Register** 48 FR 44668 on September 29, 1983, is modified by the addition of two easements and amended to exclude Native allotment AA-53859, Parcel C, in Section 32, Township 11 South, Range 72 West, Seward Meridian.

A notice of the modified DIC will be published once a week, for four (4) consecutive weeks, in *The Tundra Drums*. Copies of the modified DIC may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government, or regional corporation, shall have until November 16, 1987, to file an appeal on the issue in the modified DIC. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements in 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Except as modified, the decision, notice of which was given September 29, 1983, as final.

Ann Johnson,

Chief, Branch of Calista Adjudication.

Three Emergency Road Closures in Rio Puerco Resource Area; New Mexico

October 8, 1987.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Effective October 10, 1987.

The Rio Puerco Resource Area, Albuquerque District, Bureau of Land Management will be closing (except for authorized users and administrative purposes) three segments of road located in the Ignacio Chavez Grant in T. 15 and 16N., R4 and 5W., Sandoval and McKinley Counties, New Mexico. This closure supersedes the May 18, 1987 closure filed on May 15, 1987, FR Document 87-11323; NM-010-GP7-0119. The first segment is approximately six miles of BLM Road No. 1103 traversing the Grant. The second segment is approximately 1.5 miles in length and begins near Toro Tank. The road proceeds south past Toro Tank and turns west to regain BLM Road No. 1103. The third portion begins at the southern terminus of BLM Road No. 1103 and proceeds in a northwest direction near Heifer Tank for approximately 3 miles to the junction of Forest Service Road No. 239. A map depicting the three closures is available at the Bureau of Land Management, Albuquerque District Office. Under the emergency closure authority contained in 43 CFR 8341.2, this action is being taken to prevent vehicle use associated with these access routes from causing additional damage to the soils, vegetative and scenic resource values on the Ignacio Chavez Grant. The closures will remain in effect until the adverse impacts are eliminated and adequate measures are implemented to prevent recurrence.

FOR FURTHER INFORMATION CONTACT: Herrick E. Banks, Area Manager, Rio Puerco Resource Area, 435 Montano NE, Albuquerque, NM 87107, (505) 761-4504.

Andrew Aboytes,

Acting Associate District Manager, Bureau of Land Management

[CA-930-08-4332-09]

Availability of Draft Environmental Impact Statement; Preliminary Wilderness Recommendations for the Garcia Mountain, Rockhouse, Domeland, Machesna, South Warner Contiguous, Yolla Bolly-Big Butte, and Carson Iceberg Section 202 Wilderness Study Areas, CA; Public Hearings

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of Draft EIS and Public Hearing.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy act of 1969, the Bureau of Land Management has prepared a Draft Environmental Impact Statement (DEIS) on wilderness recommendations for eight section 202 Wilderness Study Areas (WSAs); The Garcia Mountain WSA, Rockhouse WSA, Domeland WSA and Machesna WSA in the Bakersfield District; the South Warner Contiguous WSA in the Susanville District; the Big Butte WSA and Yolla-Bolly WSA in the Ukiah District; and the Carson Iceberg WSA in the Carson City District.

Alternatives analyzed for each of the section 202 WSAs were: (1) All Wilderness and (2) No Wilderness/No Action, which is the continuation of present management under the guidance of existing land use plans. A Partial Wilderness Alternative was also analyzed for the South Warner Contiguous WSA. The preliminary recommendations presented in the DEIS are: Garcia Mountain WSA—No Wilderness/No Action; Rockhouse WSA—No Wilderness/No Action; Domeland WSA—No Wilderness/No Action; Machesna WSA—No Wilderness/No Action; South Warner Contiguous WSA—Partial Wilderness; Big Butte WSA—No Wilderness/No Action; Yolla-Bolly WSA—No Wilderness/No Action; and Carson Iceberg WSA—All Wilderness.

DATES: Comments on the DEIS are being solicited form public agencies and interested individuals and organizations. Written Comments should be submitted by January 18, 1988, to the California State Director (CA-930.16), Bureau of Land Management, 2800 Cottage Way, Sacramento, CA 95825, in order to be considered in the Final Environmental Imapct Statement.

Three public hearings on the adequacy of the DEIS and the preliminary recommendations are scheduled.

December 1, 1987 beginning at 7:30 p.m., Cedarville Community Hall, Bonner and Center Steets, Cedarville, CA.
December 2, 1987 beginning at 7:00 p.m., Ukiah District Office, Bureau of Land Management, 555 Leslie Street, Ukiah, CA.
December 9, 1987 beginning at 7:30 p.m., Bakerfield District Office, Bureau of Land Management, 800 Truxtun Drive, Room 224, Bakersfield, CA.

SUPPLEMENTARY INFORMATION:

Statements concerning any of the WSAs may be presented and will be recorded at any of the public meetigns. Copies of the DEIS are available for review at local libraries and a limited number of copies can be obtained from the following Bureau of Land Management offices: Ukiah District Office, Ukiah, CA; Arcata Resource Area Office, Arcata, CA; Redding Resource Area Office, Redding, CA; Susanville District Office, Susanville, CA; Surprise Resouce Area Office, Cedarville, CA; Bakersfield District Office, Bakersfield, CA; Carson City District Office, Carson City, NV; and Walker Resource Area Office, Carson City, NV. Additional copies of the DEIS are available from the California State Office, 2800 Cottage Way, Sacramento, CA 95825 and the Washington Office, 18th and C Streets NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT:

BILLING CODE 4310–40–M

[Alaska AA–48583–AY]

Proposed Reinstatement of a Terminated Oil and Gas Lease; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease AA–48583–AY has been received covering the following lands:

Copper River Meridian, Alaska

T. 13 N., R. 7 W.,
Sec. 29, NE¼NW¼.
(40 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals and royalties accruing from April 1, 1987, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA–48583–AY as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective April 1, 1987, subject to the terms and conditions cited above.

Dated: October 5, 1987.

Kay F. Kletka,

Chief, Branch of Mineral Adjudication.

BILLING CODE 4310–JA–M

[Alaska AA–48686–AX]

Proposed Reinstatement of a Terminated Oil and Gas Lease; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease AA–48686–AX has been received covering the following lands:

Fairbanks Meridian, Alaska

T. 22 S., R. 6 E.,
Sec. 11, E½.
(320 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals and royalties accruing from July 1, 1987, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA–48686–AX as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective July 1, 1987, subject to the terms and conditions cited above.

Dated: October 5, 1987.

BILLING CODE 4310–JA–M

Proposed Reinstatement of a Terminated Oil and Gas Lease; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease AA–48596–B has been received covering the following lands:

Copper River Meridian, Alaska

T. 10 N., R. 6 W.,
Sec. 25 NW.
(160 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals and royalties accruing from June 1, 1987, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA–48596–B as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective June 1, 1987, subject to the terms and conditions cited above.

BILLING CODE 4310–JA–M

[Alaska AA–49100–I and AA–49073–S]

Proposed Reinstatement of Terminated Oil and Gas Leases; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas leases AA–49100–I, and AA–49073–S has been received covering the following lands:

Fairbanks Meridian, Alaska (AA–49100–I)

T. 18 S., R. 3 W.,
Sec. 11, S½NW¼.
(80 acres)

Fairbanks Meridian, Alaska (AA–49073–S)

T. 19 S., R. 4 E.,
Sec. 7, N½NW¼.
(75 acres)

The proposed reinstatement of the leases would be under the same terms and conditions of the original leases, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals

and royalties accruing from March 1, 1987, the date of termination, have been paid.

Having met all the requirements for reinstatement of leases AA–49100–I, and AA–49073–S as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the leases, effective March 1, 1987, subject to the terms and conditions cited above.

[CO–940–87–4111–15; C–26486]

Proposed Reinstatement of Oil and Gas Lease; Colorado

Notice is hereby given that a petition for reinstatement of oil and gas lease C–26486 for lands in Montrose County, Colorado, was timely filed and was accompanied by all the required rentals and royalties accruing from May 1, 1987, the date of termination.

The lessee has agreed to new lease terms for rentals and royalties at rates of $5.00 and 16-⅔ percent, respectively.

The lessee has paid the required $500 administrative fee for the lease and has reimbursed the Bureau of Land Management for the estimated cost of this **Federal Register** notice.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920, as amended, (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective May 1, 1987, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Questions concerning this notice may be directed to Joan Gilbert of the Colorado State Office at (303) 236–1772.

Richard E. Richards,

Supervisor, Oil and Gas/Geothermal Leasing Unit.

[MT–920–08–4111–14; NDM 63257]

Proposed Reinstatement of Terminated Oil and Gas Lease; North Dakota

Under the provisions of Pub. L. 97–451, a petition for reinstatement of oil and gas lease NDM 63257, Bowman County, North Dakota, was timely filed and accompanied by the required rental accruing from the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $10 per acre and 16⅔ percent respectively. Payment of a $500 administration fee has been made.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective as of the date of termination, subject to the original terms and conditions of the lease, the increased rental and royalty rates cited above, and reimbursement for cost of publication of this Notice.

Dated: October 6, 1987.

BILLING CODE 4310–DN–M

Public Review Period for U.S. Geological Survey and United States Bureau of Mines; "Mineral Survey Reports": Wilderness Study Areas; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Idaho, Bureau of Land Management (BLM), is requesting the public to review combined U.S. Geological Survey (USGS) and U.S. Bureau of Mines (USBM) "Mineral Survey Reports" which have been completed for preliminarily suitable Wilderness Study Areas (WSAs). If the public identifies significant differences in interpretation of the data presented in the reports or submits significant new minerals data for consideration, the Bureau of Land Management will request USGS/USBM evaluate these comments in relation to their final Mineral Survey Report. The BLM will consider the USGS/USBM evaluations as well as the Mineral Survey Report in developing final wilderness suitability recommendations. Copies of the WSA reports can be reviewed in BLM offices in Boise, Burley, Idaho Falls, Salmon, Shoshone, and Coeur d'Alene.

DATE: New Information will be accepted on the reports enumerated in this notice until December 31, 1987.

ADDRESS: Send information on reports to: Deputy State Director for Minerals, BLM, Idaho State Office, 3380 Americana Terrace, Boise, ID 83706.

FOR FURTHER INFORMATION CONTACT: Bob DeTar or Bill LaVelle, BLM, Idaho State Office, Division of Mineral Resources, 3380 Americana Terrace, Boise, Idaho 83706 (208) 334–1189.

SUPPLEMENTARY INFORMATION: Section 603 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2785, directed the Secretary of Interior to inventory lands having wilderness characteristics as described in the Wilderness Act of September 3, 1964, and from time to time report to the President his recommendations as to the suitability or non-suitability of each area for preservation as wilderness. The USGS and USBM are charged with conducting mineral surveys for areas that have been preliminarily recommended suitable for inclusion into the wilderness system, to determine the mineral values, if any, that may be present in such areas.

To ensure that all available minerals data are considered by the Bureau of Land Management prior to making its final wilderness suitability recommendations to the Secretary of Interior, the State Director, Idaho is providing this public review and comment period. Usually there is a one to two year lag time between actual field work and final printing of a mineral survey report. New information may have been collected by the public during this lag time or the public may have a new interpretation of the data presented in the mineral survey reports. Any new data or new interpretations of data in the reports will be screened for its significance and validity by the Bureau of Land Management. Significant new minerals data or new interpretations of the minerals data will be forwarded to the U.S. Geological Survey and U.S. Bureau of Mines for further consideration. Evaluations received by the Bureau of Land Management from the U.S. Geological Survey and U.S. Bureau of Mines will be considered by the State Director in the final wilderness suitability recommendations.

Information requested from the public via this invitation are not limited to any specific energy or mineral resource. Information can be in the form of a letter and should be as specific as possible and include:

1. The name and number of the subject Wilderness Study Area and Mineral Survey Report.

2. Mineral(s) of interest.

3. A map or land description by legal subdivision of the public land surveys or protracted surveys showing the specific parcel(s) of concern within the subject Wilderness Study Area.

VOL
52
ISS
199
OC
15
1987
UMI

4. Information and documents that depict the new data or reinterpretation of data.

5. The name, address, and phone number of the person who may be contacted by technical personnel of the Bureau of Land Management, U.S. Geological Survey or U.S. Bureau of Mines assigned to review the information.

Geologic maps, cross sections, drill hole records and sample analyses, etc., should be included. Published literature and reports may be cited. Each comment should be limited to a specific Wilderness Study Area. All information submitted and marked confidential will be treated as proprietary data and will not be released to the Public without consent.

The following is a list of available Mineral Survey Reports by Wilderness Study Area (WSA) on which new information will be accepted.

WSA No.	Name	Report No
33-15	Hells Half Acre	Bulletin 1718-A
16-40	No. Fork Owyhee River	Bulletin 1719-A
16-49D	Yatahoney Creek	Bulletin 1719-B
16-49E	Battle Creek	Bulletin 1719-B
16-52	Juniper Creek	Bulletin 1719-B
16-48C	Little Owyhee River	Bulletin 1719-C
16-48B	Owyhee River Canyon	Bulletin 1719-D
16-49A	Deep Creek	Bulletin 1719-D
111-6	Little Jacks Creek	Bulletin 1720-A
111-7B	Duncan Creek	Bulletin 1720-A
111-7C	Big Jacks Creek	Bulletin 1720-A

Reports available for review in BLM offices will not be available for sale or removal from the office. Copies of the listed reports may be purchased from: U.S. Geological Survey, Books and Open File Reports, Box 25425, Federal Center, Denver, CO 80225.

Date: October 5, 1987.

Minerals Management Service

[FES 87-49]

Availability of the Final Environmental Impact Statement Regarding Proposed Central, Western, and Eastern Gulf of Mexico Lease Sales 113, 115, and 116

The Minerals Management Service (MMS) has prepared a final Environmental Impact Statement (EIS) relating to proposed 1988 Outer Continental Shelf (OCS) oil and gas lease sales in the Central, Western, and Eastern Gulf of Mexico. Proposed Central Gulf of Mexico Sale 113, Western Gulf of Mexico Sale 115, and Eastern Gulf of Mexico Sale 116 will offer for lease approximately 34.5 million acres, 29.0 million acres, and 71.8 million acres, respectively. Single copies of the final EIS can be obtained from the Minerals Management Service, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123-2394.

Copies of the final EIS are available for review at the following libraries: Austin Public Library, 402 West Ninth Street, Austin, Texas; Houston Public Library, 500 McKinney Street, Houston, Texas; Dallas Public Library, 1513 Young Street, Dallas, Texas; Brazoria County Library, 410 Brazoport Boulevard, Freeport, Texas; LaRatama Library, 505 Mesquite Street, Corpus Christi, Texas; Texas Southmost College Library, 1825 May Street, Brownsville, Texas; Rosenburg Library, 2310 Sealy Street, Galveston, Texas; New Orleans Public Library, 219 Loyola Avenue, New Orleans, Louisiana; Louisiana State Library, 760 Riverside, Baton Rouge, Louisiana; Lafayette Public Library, 301 W. Congress Street, Lafayette, Louisana; Calcasieu Parish Library, Downtown Branch, 411 Pujo Street, Lake Charles, Louisiana; Nicholls State Library, Nicholls State University, Thibodaux, Louisiana; Harrison County Library, 14th and 21st Avenue, Gulfport, Mississippi; Mobile Public Library, 701 Government Street, Mobile, Alabama; Montgomery Public Library, 445 South Lawrence Street, Montgomery, Alabama; St. Petersburg Public Library, 3745 Ninth Avenue North, St. Petersburg, Fla.; West Florida Regional Library, 200 West Gregory Street, Pensacola, Fla.; Northwest Regional Library System, 25 West Government Street, Panama City, Fla.; Leon County Public Library, 127 North Monroe Street, Tallahassee, Florida; Lee County Library, 3355 Fowler Street, Fort Myers, Florida; Charlotte-Glades Regional Library System, 2280 NW. Aaron Street, Port Charlotte, Florida; and Tampa-Hillsborough County Public Library System, 800 North Ashley Street, Tampa, Florida.

William D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 4320-MR-M

INTERNATIONAL TRADE COMMISSION

[332-250]

Harmonized Commodity Description and Coding System; Continuity of Import and Export Trade Statistics After Implementation

AGENCY: International Trade Commission.

ACTION: Institution of investigation.

SUMMARY: Following receipt of a request from the United States Trade Representative (USTR) at the direction of the President, the Commission instituted investigation No. 332-250 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), for the purposes of preparing a cross-reference between the current Tariff Schedules of the United States Annotated (TSUSA) and the proposed Harmonized Tariff Schedule of the United States (HTS) and compiling statistical tables reflecting U.S. import and export trade for the years 1983-1987 in terms of proposed 8-digit HTS subheadings and 10-digit Harmonized System-based Schedule B (Schedule B) numbers, respectively.

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Holm Kappler, Deputy Director (telephone 202-523-0362), or Mr. Lawrence DiRicco, Nomenclature Analyst (telephone 202-523-4953), Office of Tariff Affairs and Trade Agreements, U.S. International Trade Commission, Washington DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal (202) 724-0002.

SUPPLEMENTARY INFORMATION: In order to provide the international trade community with a means to maintain a reasonable degree of continuity in historical statistical data after the transition to HTS and HS-based Schedule B statistical reports, the USTR at the direction of the President requested the Commission to prepare: (1) A cross-reference between the current TSUSA and the proposed HTS, (2) a statistical compilation reflecting the estimated total value of U.S. imports for consumption for the years 1983-1987, both by country and in the aggregate, in terms of proposed 8-digit HTS subheadings, and (3) a statistical compilation reflecting the estimated total value of U.S. exports for the years 1983-1987, both by country of destination and in the aggregate, in terms of the 10-digit Schedule B numbers.

The USTR requested that the Commission report on the TSUSA to proposed HTSUS cross-reference no later than January 31, 1988, and on the trade statistics compilations no later than May 31, 1988, and that the Commission arrange for these reports to be available to the public in printed form and microfiche through the National Technical Information Service and on magnetic media through the Bureau of the Census.

The Commission does not plan to hold a public hearing or seek written statements or other information from interested parties in this matter.

By order of the Commission.

Issued: October 6, 1987.

Kenneth R. Mason,

Secretary.

[FR Doc. 87-23911 Filed 10-14-87; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-253]

Certain Electrically Resistive Monocomponent Toner and "Black Powder" Preparations Therefor; Decision Granting Application for Interlocutory Appeal and Reversing Order Excluding Evidence as to Patent-Based Affirmative Defense

AGENCY: International Trade Commission.

ACTION: Decision to permit an interlocutory appeal of an order excluding evidence pertaining to respondents' patent based affirmative defense to the antitrust allegations of this investigation, and to reverse the order excluding such evidence.

FOR FURTHER INFORMATION CONTACT: Edwin J. Madaj, Jr., Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0148.

SUPPLEMENTARY INFORMATION: On September 4, 1987, the presiding administrative law judge (ALJ) issued Order No. 47 granting the motion *in limine* of complainant Aunyx Corp. to exclude all evidence to be offered by respondents Canon, Inc. and Canon, U.S.A., Inc., in furtherance of their patent-based affirmative defense to the allegations of antitrust law violations. The Commission investigative attorney (IA) supported Aunyx's motion and respondents opposed the motion. The ALJ found that the patents at issue would not constitute a defense to the antitrust allegations and were irrelevant to the investigation. The ALJ also found that respondents' delay in asserting their patent rights constituted bad faith sufficient to bar the defense.

On September 9, 1987, the Canon respondents filed a petition with the ALJ for leave to file an interlocutory appeal with the Commission of Order No. 47. On September 9, 1987, the ALJ issued Order No. 48 granting leave to file an application for interlocutory appeal.

An application for interlocutory appeal was filed by respondents on September 14, 1987. On September 21, 1987, Aunyx filed an answer to respondent's application for interlocutory appeal. On September 22, 1987 the IA filed an answer to the application for interlocutory appeal.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 210.70 of the Commission rules (19 CFR 210.70).

Copies of the Commission's Action and Order, Opinon, and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

Issued: October 5, 1987.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-277]

Certain Marine Automatic Pilots; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on September 9, 1987, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Electro-Mechanical Products Inc. d/b/a First-Mate Marine Auto Pilots, 41 Kindred Avenue, Stuart, Florida 34994 and John F. Cyr, 2002 NE. Felicita Place, Jensen Beach, Florida 33457. The complaint was supplemented on September 15, 1987 and again on September 28, 1987. The complaint, as supplemented, alleges unfair methods of competition and unfair acts in the importation into the United States of certain marine automatic pilots and components thereof; and in their sale, by reason of alleged direct, induced and contributory infringement of claims 1-4 of U.S. Letters Patent 4,681,055. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to substantially injure an industry, efficiently and economically operated, in the United States.

The complaint requests that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

FOR FURTHER INFORMATION CONTACT: Jeffrey L. Gertler, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202-523-0115.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of investigation: Having considered the complaint, the U.S. International Trade Commission, on October 5, 1987, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation into the United States of certain marine automatic pilots, or in their sale, by reason of alleged direct or induced infringement of claims 1-4 of U.S. Letters Patent 4,681,055, the effect or tendency of

which is to substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complaintants are—

Electro-Mechanical Products Inc., d/b/a First-Mate Marine Auto Pilots, Stuart, Florida 34994

John F. Cyr, 2002 NE. Felicita Place, Jensen Beach, Florida 33457

(b) The respondent is the following company, alleged to be in violation of section 337, and is the party upon which the complaint is to be served: King Marine Electronics, Inc., 5300 140th Avenue North, Clearwater, Florida 33520

(c) Jeffrey L. Gertler, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 701 E Street NW., Room 125, Washington, DC 20436, shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Response to the complaint and the notice of investigation must be submitted by the named respondent in accordance with § 210.21 or the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules (19 CFR 201.16(d) and 210.21(a)), such response will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, DC 20436, telephone 202–523–0471. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Issued: October 6, 1987.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–267]

Certain Minoxidil Power, Salts and Compositions for use in Hair Treatment; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: Tulsa Intertrade.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, on October 9, 1987.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC, 20436, telephone 202–523–0161. Hearing impaired individuals are advised that information on this matter can be obtained by contracting the Commission's TDD terminal on 202–724–0002.

Written Comments: Interested persons may file written comments with the commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street NW., Washington, DC, 20436, no later than 10 days after publication of this notice in the **Federal Register.** Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

Issued: October 9, 1987.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–267]

Certain Minoxidil Powder, Salts, and Compositions for use in Hair Treatment; Prehearing Conference

Notice is hereby given that the prehearing conference in this matter will commence at 9:00 a.m. on October 19, 1987, in Hearing Room 6311 at the Interstate Commerce Commission Building at 12th Street and Constitution Avenue NW., Washington, DC, and the hearing will commence immediately thereafter.

The Secretary shall publish this notice in the **Federal Register.**

Issued: October 5, 1987.

Janet D. Saxon,

Chief Administrative Law Judge.

[FR Doc. 87–23909 Filed 10–14–87; 8:45 am]

BILLING CODE 7020–02–M

[Investigation No. 337–TA–266]

Certain Reclosable Plastic Bags and Tubing; Determination Not To Review Initial Determination and Schedule for Filing of Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: International Trade Commission.

ACTION: The U.S. International Trade Commission has determined not to review an initial determination (ID) granting in part a motion for temporary relief in the above-captioned investigation. The parties to the investigation are requested to file written submissions on the issues of remedy, the public interest, and bonding.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff

Act of 1930 (19 U.S.C. 1337) and 19 U.S.C. 1337a, and in §§ 210.53–210.58 of the Commission's Rules of Practice and Procedure (19 CFR 210.53–210.58).

FOR FURTHER INFORMATION CONTACT: Paul R. Bardos, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–525–0375.

SUMMARY: On August 31, 1987, the presiding administrative law judge (ALJ) issued an ID granting in part complainant's motion for temporary relief under subsections (e) and (f) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337 (e) and (f)). Complainant Minigrip, Inc. and respondents Meditech International Company, Euroweld Distributing, and Polycraft Corporation filed petitions for review of the ID on the issues of patent infringement, trademark validity and infringement, domestic industry, harm to complainant, and harm to respondents. No agency comments were received.

Having examined the record, including the petitions for review and the responses thereto, the Commission has concluded that the ID does not warrant review. However, we do not adopt portions of the ALJ's reasoning with regard to the issues of: (1) Trademark validity, (2) domestic industry, and (3) effect or tendency to substantially injure the domestic industry. As to those portions, we waive, pursuant to rule 201.4(b), the provisions of rule 210.53(h) which states that a nonreviewed ID becomes the determination of the Commission. With regard to the issue of trademark validity, we note that some judicial decisions suggest that an incontestable trademark may not be challenged as *de jure* functional. With regard to the other issues, prior Commission decisions suggest that it might be appropriate in this investigation to find one domestic industry rather than two. We have determined not to review the ID on these issues since they are not outcome determining, but we will reexamine them if necessary in the final relief phase of this investigation.

SUPPLEMENTARY INFORMATION: Since the Commission finds that there is reason to believe that a violation of section 337 has occured, the Commission may issue (1) an order which could result in the temporary exclusion, except under bond, of the subject articles from entry into the United States and/or (2) temporary cease and desist orders which could result in one or more respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions which address the form of temporary relief, if any, which should be ordered.

If the Commission concludes that temporary relief is appropriate, it must also consider the effect of that relief upon (1) the public health and welfare, (4) competitive conditions in the U.S. economy, (3) the U.S. production of articles which are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submission concerning the effect, if any, that granting temporary relief would have on the enumerated public interest factors.

If the Commission orders temporary relief, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond in an amount determined by the Commission and prescribed by the Secretary of the Treasury. After the expiration of this period, the subject articles would also be entitled to enter the United States under bond pending completion of the Commission's investigation. The Commission is therefore interested in receiving written submissions concerning the amount of the bond or bonds which should be imposed.

Written submissions: The parties to the investigation and interested government agencies are requested to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit proposed temporary remedial orders for the Commission's consideration. The written submissions on the issues of remedy, the public interest, and bonding must be filed no later than the close of business on Tuesday, October 13, 1987. Reply submissions on these issues must be filed no later than the close of business on Monday, October 19, 1987. Persons other than the parties and government agencies may file written submissions addressing the issues of remedy, the public interest, and bonding. Such submissions must be filed not later than the close of business on Thursday, October 15, 1987. No further submissions will be permitted.

Commission hearing: The Commission does not plan to hold a public hearing in connection with the disposition of this matter.

Additional information: Persons filing written submissions must file the original document and 14 true copies thereof with the Office of the Secretary on or before the deadlines stated above. Any person desiring to submit a document (or a portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the investigation. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential submissions will be available for public inspection at the Secretary's Office.

Notice of this investigation was published in the **Federal Register** on April 28, 1987 (52 FR 15568).

Copies of the nonconfidential version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Issued: October 5, 1987.

Kennethy R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[No. MC–F–18328]

Leonard Green and Edward Gibbons; Continuance In Control Exemption; Foodmaker, Inc., and Trailways Lines, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Leonard Green and Edward Gibbons, noncarrier individuals, have filed a petition under 49 U.S.C. 11343(e) seeking an exemption from the requirement of prior regulatory approval for their continuance in control of motor property carrier Foodmaker, Inc. (Foodmaker) (MC–174021) and motor passenger carrier Trailways Lines, Inc.

(Trailways) (MC–109780). Messrs. Green and Gibbons each own 5.7 percent of the outstanding shares of The Trailways Corporation, whose wholly owned subsidiary, Trailways, holds authority to operate as a motor carrier of passengers and express throughout major portions of the country. Mr. Gibbons is also a director of The Trailways Corporation. On February 22, 1985, Messers. Green and Gibbons became members of the board of directors of Foodmaker.

Under 49 U.S.C. 11343(a)(5), the Commission's prior approval is required for the acquisition of control of a carrier by a person that is not a carrier but that controls any number of carriers. Thus, the involved transaction is subject to our jurisdiction and can be carried out only under our regulation or an exemption from regulation. Petitioners readily acknowledge that a common control relationship commenced on February 22, 1985, when Messrs. Green and Gibbons, then shareholders of the Trailways Corporation, assumed membership on Foodmaker's board of directors. Further, petitioners acknowledge that a petition seeking exemption from prior approval of the transaction should have been filed prior to petitioners' election to Foodmaker's board. However, petitioners assert lack of awareness of the need to seek an exemption or approval of control because Foodmaker is engaged primarily in the fast food restaurant business, with only incidental regulated motor carrier operations. Thus, the common control issue was not recognized until the filing by Foodmaker of its recent application for an extension of its operating authority.

Petitioners argue that the subject transaction is of limited scope, inasmuch as Trailways and Foodmaker serve totally different markets. Likewise, petitioners argue that the disparate business focus of Trailways and Foodmaker assures that the transactions will have no adverse effect on national transportation policy objectives, and will not result in any possible abuse of market power.

In No. MC–F–18505, *GLI Acquisition Company—Purchase—Trailways Lines, Inc; and GLI Holding Company—Control—Continental Panhandle Lines, Inc.*, GLI Acquisition Company (GLI) seeks authority: (1) To purchase all of trailways's intrastate and interstate operating authority and certain other assets, including contractual interests, buses and real estate properties; and (2) to acquire Trailways' 50 percent stock interest in motor passenger carrier Continental Panhandle Lines, Inc. (Panhandle) (MC–8742). GLI's corresponding application for temporary authority to lease Trailways' operating rights, control Panhandle through management, and purchases certain of Trailways' assets has been approved by the Commission. Because of GLI transaction is pending approval, this control proceeding is not moot.

DATES: Comments must be received by November 16, 1987.

ADDRESSES: Send comments (an original and 10 copies), referring to Docket No. MC–F–18328, to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

and

(2) Petitioner's representative: Miles L. Kavaller Suite 315, 315 South Beverly Drive Beverly Hills, CA 90212.

FOR FURTHER INFORMATION CONTACT:

Marion E. Guyton, (202) 275–7965
TDD for hearing impaired, (202) 275–1721.

SUPPLEMENTARY INFORMATION:

Petitioner seeks an exemption under 49 U.S.C. 11343(e) and the Commission's regulations in *Procedures—Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982).

A copy of the petition may be obtained from petitioner's representative, or it may be inspected at the Washington, DC office of the Interstate Commerce Commission during normal business hours.

Decided: Octoer 6, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

[FR Doc. 87–23824 Filed 10–14–87; 8:45 am]

BILLING CODE 7035–01–M

[Docket No. AB–167; Sub–1086X]

Consolidated Rail Corp.; Exemption; Discontinuance of Service in Crawford, Marion, Delaware, and Franklin Counties, OH

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to discontinue its operation by trackage rights over a 61.8-mile line of railroad owned and operated by Norfolk and Western Railway Company (N&W), as follows: from N&W milepost 62.5±, where it connects with the privately owned Bucyrus Yard lead track in Bucyrus, OH, to the southern terminus of applicant's trackage rights at milepost 0.7±, approximately 600 feet east of the east right of way line of applicant's Mount Vernon Secondary, west of Joyce Avenue in Columbus, OH.

Applicant has certified that (1) no local traffic has moved over the line for at least 2 years and that overhead traffic may be rerouted over other lines, and (2) no formal complaint, filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line, either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from the discontinuance.

As a condition to use of this exemption, any employee affected by the discontinuance of service shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective November 14, 1987 (unless stayed pending reconsideration). Petitions to stay must be filed by October 26, 1987, and petitions for reconsideration, including environmental, energy and public use concerns, must be filed by November 4, 1987 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Lilton R. Taliaferro, Jr., Consolidated Rail Corporation, Room 1138, Six Penn Center Plaza, Philadelphia, PA 19103.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: October 5, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Lodging a Final Judgment by Consent; Farmers Grain and Feed Co., et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on *September 29, 1987* a proposed Consent Decree in *United States* v. *Farmers Grain and Feed*

Company and Oshkosh Grain, Inc., Civil Action No. 85–0–933, was lodged with the United States District Court for the District of Nebraska.

The Complaint filed by the United States alleged that the defendants had violated the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA"), 7 U.S.C. 136, seeking a civil penalty of $1,500 assessed in an administrative action by EPA. Oshkosh Grain, Inc. is the successor corporation to Farmers Grain and Feed Company. Defendant Oshkosh Grain, Inc. has signed the decree agreeing to pay $1,000 plus costs and interest. In the decree, defendants admit all allegations of the Amended Complaint and agree to the entry of the Final Judgment. Judgment will be entered by the District Court against defendants in the amount of $1,000 plus interest at the rate of 9% per annum from June 6, 1985 to the date of this Order, plus costs of this action.

The Department of Justice will receive for a period of thirty days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Farmers Grain and Feed Company and Oshkosh Grain, Inc.*, DOJ# Ref. 1–45–61. The propose Consent Decree may be examined at the office of the United States Attorney, District of Nebraska, P.O. Box 1228–DTS, Omaha, Nebraska 68101. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 87–23803 Filed 10–14–87; 8:45 am]

BILLING CODE 4410–01–M

Consent Decree in Action To Enjoin Discharge of Water Pollutants; Henry Nelkin, Inc.

In accordance with Departmental Policy, 28 CFR 50.7, 38 F.R. 19029, notice is hereby given that a consent decree in *United States* v. *Henry Nelkin, Inc.*, Civil Action No. 85–4478, was lodged with the United States District Court for the Eastern District of New York on September 29, 1987. The Decree requires payment of a civil penalty of $25,000. As Nelkin has ceased operations, the Decree provides that Nelkin shall conduct any future operations in compliance with any standards in effect at that time.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States* v. *Henry Nelkin, Inc.*, D.J. Ref. No. 90–5–1–1–2468.

The consent decee may be examined at the Office of the United States Attorney, Eastern District of New York, U.S. Courthouse, 225 Cadman Plaza East, Brooklyn, New York 11201; at the Region II office of the Environmental Protection Agency, 27 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.20 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 87–23804 Filed 10–14–87; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Clean Air Act; State University of New York

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a consent decree in *United States* v. *State University of New York ("SUNY")*, Civil Action No. 87–CV–1317, was lodged with the United States District Court for the Northern District of New York on 9/29/87.

The proposed consent decree concerns alleged violations of the National Emission Standard for Hazardous Air Pollutants ("NESHAP") for asbestos, codified at 40 CFR 61.20, *et seq.*, (1983), and the Clean Air Act, 42 U.S.C. 7401, *et seq.*, in connection with various renovation and demolition projects at the Oswego campus of SUNY. The proposed decree requires SUNY to comply with the Clean Air Act and the asbestos NESHAP regulations. The proposed decree also requires payment of a $20,000 civil penalty.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *State University of New York*, D.J. Ref. No. 90–5–2–1–1049.

The proposed consent decree may be examined at the office of the United States Attorney, Northern District of New York, 369 Federal Bldg., 100 S. Clinton St., Syracuse, NY 13260; at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, NY 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth St. and Pennsylvania Ave. NW., Washington, DC 20530.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Claude J. Phillippe, d/b/a/ Erie Drugs Revocation of Registration

On April 3, 1987, the Deputy Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Claude J. Phillippe, d/b/a/ Erie Drugs, of 376 East 61st Street, Chicago, Illinois, seeking to revoke DEA Certificate of Registration AC3850105, and to deny any pending applications for renewal of said registration as a retail pharmacy. The statutory basis for the issuance of the Order to Show Cause was the recent controlled substance felony conviction of Claude J. Phillippe, the owner and registered pharmacist of Erie Drugs.

The Order to Show Cause was sent by way of registered mail to the pharmacy's registered location. The return-receipt indicates that the Order to Show Cause was received on June 6, 1987. There has been no response to the Order to Show Cause. Based upon Mr. Phillippe's failure to respond to the Order to Show Cause, the Administration finds that he has waived his opportunity for a hearing on the issue raised in the Order to Show Cause, and enters this final order based upon the information contained in the investigative file. 21 CFR 1301.54(d) and 1301.54(e).

The Administrator finds that on May 22, 1986, in the Circuit Court of Cook County, Illinois, Claude J. Phillippe was convicted, after entering a plea of guilty,

of two counts of unlawful delivery of controlled substances, in violation of I.S. Chap. 38, Sec. 56½, Subsec. 1401(d); both constitute felony convictions relating to controlled substances.

The investigation which led to Mr. Phillippe's conviction revealed that on July 2, 1985, an undercover agent for the Illinois Department of Law Enforcement visited Mr. Phillippe at Erie Drugs. During her visit, she proposed to give certain legend drugs to Mr. Phillippe in exchange for Valium, a Schedule IV controlled substance, and Tylenol #3 with codeine, a Schedule III controlled substance. Mr. Phillippe readily acquiesced to the exchange and provided the agent with 15 dosage units of Valium 5 mg. and 30 dosage units of Tylenol #3 with codeine. Mr. Phillippe gave the controlled substances to the agent in the original manufacturers' bottles.

On July 5, 1985, the same undercover agent returned to Erie Drugs in an attempt to exchange legend drugs for controlled substances with Mr. Phillippe. Again, Mr. Phillippe readily agreed to the arrangement and gave the agent 10 dosage units of Valium 5 mg. and 13 dosage units of Tylenol #3 with codeine; both were given to the agent in the original manufacturers' bottles.

On July 16, 1985, the agent visited Erie Drugs in a third attempt to exchange legend drugs for controlled substances. During that visit, Mr. Phillippe gave the agent 30 dosage units of Tylenol #3 with codeine and 13 dosage units of Valium 5 mg. As in the other instances, the drugs were given to the agent in the original manufacturers' bottles.

During each of the three exchanges, the agent never presented any orders purporting to be valid prescriptions for the controlled substances she received from Mr. Phillippe. Based upon the information provided, the Administrator determines that Mr. Phillippe clearly was dispensing controlled substances for other than legitimate medical purposes and outside the scope of his professional practice.

The Administrator has consistently held that a finding that a registrant has been convicted of a felony offense relating to controlled substances is sufficient to warrant the revocation of that registrant's DEA Certificate of Registration. See 21 U.S.C. 824(a)(2) and 21 U.S.C. 823(f)(3); see also *Fairbanks T. Chua, M.D.*, 51 FR 41676 (1986).

In this matter, the Administrator concludes that DEA Certificate of Registration AC3850105, previously issued to Claude J. Phillippe, d/b/a Erie Drugs, should be revoked, based upon his felony conviction of two counts of unlawfully distributing controlled substances. The facts underlying Mr. Phillippe's conviction demonstrate his total disregard for his responsibilities as a DEA registrant. Therefore, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), the Administrator of the Drug Enforcement Administration orders that DEA Certificate of Registration AC3850105 be, and it hereby is, revoked. It is further ordered that any pending applications for renewal of said registration be, and they hereby are, denied.

This order is effective October 15, 1987.

Dated: October 8, 1987.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

Job Corps Center Assessment Advisory Committee; Meeting

A public meeting of the Job Corps Advisory Committee will be held on Thursday and Friday, November 5 and 6, 1987, commencing at 9:00 a.m., in Room N-3437 B and C, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC.

The purpose of the meeting is to initiate consideration of the Job Corps Center Assessment system developed in 1986 to rank centers for closing in the event capacity reductions in the program are necessary. This effort is in response to requests by the Congress to review the system developed and presented in 1986. The agenda will be comprised of discussions about the purpose and background of the Committee, consideration of the methodologies and rationales previously used for center assessment purposes, and to identify potential improvements.

Individuals or organizations wishing to submit written statements pertaining to Job Corps center assessment should send 20 copies to Peter E. Rell, Director, Office of Job Corps, U.S. Department of Labor, Room N-4508, Washington, DC 20210. Telephone (202) 535-0550. Papers will be accepted and included in the record of the meeting if received on or before October 30, 1987.

Signed at Washington, DC, this 7th day of October 1987.

Roger D. Semerad,

Assistant Secretary of Labor.

[FR Doc. 87-23831 Filed 10-14-87; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-87-203-C]

Rayscott Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Rayscott Coal Company, Inc., HC 81, Box 858, Barbourville, Kentucky 40906 has filed a petition to modify the application of 30 CFR 75.313 (methane monitors) to its Mine No. 1 (I.D. No. 15-15880) located in Knox County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous monitor, longwall face equipment and loading machine and shall be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitors in lieu of methane monitors on three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration in the atmosphere. The air quality will be monitored continuously after each trip, provided the elapse time betweens trips does not exceed 20 minutes. This will provide continuous monitoring of the mine atmosphere for methane to assure any undetected methane buildup between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and will not resume until the methane level is lower than one percent;

(d) A spare continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will

be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations or modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 16, 1987. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Acting Associate Assistant Secretary for Mine Safety and Health.

Date: October 5, 1987.

BILLING CODE 4510-43-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules

AGENCY: Office of Records Administration, NARA.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that: (1) Propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATE: Requests for copies must be received in writing on or before November 30, 1987. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of the Air Force, Directorate of Administration (N1-AFU-87-18). Records relating to environmental planning and management.

2. Department of the Air Force (N1-AFU-87-37). Copies of travel records.

3. Department of the Air Force (N1-AFU-87-38). Facilitative records pertaining to Communications-Electronics.

4. Department of the Air Force (N1-AFU-87-39). Facilitative records pertaining to Autodin Switching Center Operations.

5. Department of the Air Force (N1-AFU-87-43). Records relating to child care centers and child care providers.

6. Department of Commerce, Office of the Secretary (N1-40-87-4). Comprehensive schedule for records of the Office of Management and Information Systems.

7. Department of Commerce, International Trade Administration (N1-151-87-16). General administrative records common to all offices of the International Trade Administration.

8. Environmental Protection Agency, Office of Policy, Planning, and Evaluation (N1-412-87-4). Records relating to the policy planning and evaluation programs in the agency.

9. Environmental Protection Agency, Office of Public Affairs (N1-412-87-5). Records relating to the administration of EPA's public affairs programs.

10. Federal Communications Commission, Common Carrier Bureau (N1-173-87-5). Records relating to informal complaints, carrier licenses, uniform settlement policy, and other administrative matters.

11. Federal Communications Commission, Minute Division (N1-173-87-7). Duplicate Federal Communications Commission agendas and minutes.

12. General Services Administration, Office of Administration, Office of Administrative Services (N1-269-87-4). Revision of schedule relating to General Management Program Records.

13. Department of Justice, Office of Liaison Services (N1-60-87-4). Program subject files.

14. Department of Justice, Federal Bureau of Investigation, Records Management Division (N1-65-87-12, -13, -14, and -15). Documentation containing personal information of insufficient historical or other value to warrant archival retention. Expunction of the information has been requested by the individual to whom it relates.

15. Department of Justice, Federal Bureau of Investigation, Records Management Division (N1-65-87-18). Correspondence relating to court orders to expunge/destroy criminal records.

16. Department of Justice, Federal Bureau of Investigation, Records Management Division (N1-65-87-19). Pen Register tapes (slips) containing telephone numbers collected during the course of official business.

PENSION BENEFIT GUARANTY CORPORATION

Distress Terminations of Single-Employer Plans; Special Procedures Relating to the Reorganization Distress Test

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice.

SUMMARY: This Notice clarifies certain aspects of the distress termination process established in the Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") as they relate to bankruptcy proceedings. SEPPAA creates several alternative distress tests, any one of which must be satisfied by each contributing sponsor and each substantial member of the contributing sponsor's controlled group in order for a plan maintained by the contributing sponsor to be terminated in a distress termination. In certain situations, both the bankruptcy court and the Pension Benefit Guaranty Corporation ("PBGC") may be called upon to evaluate whether to permit a distress termination. In making these determinations, the PBGC and the bankruptcy court are likely to consider many of the same factors. This creates a possibility that the PBGC and the bankruptcy court could make conflicting findings. This Notice adopts procedures to prevent such a conflict.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: Steven A. Weiss, Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006–1806; 202–778–8820 [202–778–8859 for TTY and TDD].

SUPPLEMENTARY INFORMATION: Under the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1001–1461, as amended by the Single-Employer Pension Plan Amendments Act of 1986, Pub. L. No. 99–272, 100 Stat. 237 (1986) ("ERISA"), a plan may teminate in a distress termination only if each "person" who is a contributing sponsor or a substantial member of the contributing sponsor's controlled group, as defined in the statute, can demonstrate that it meets the requirements of any of the following criteria:

(1) Liquidation in bankruptcy—as of the termination date, the person has filed a petition seeking liquidation in a case under Title 11, United States Code, or under any similar law, and the case has not been dismissed;

(2) Reorganization in bankruptcy—as of the termination date, the person has filed a petition seeking reorganization under Title 11, United States Code, or under any similar law, and the case has not been dismissed and, thereafter, the bankruptcy court approves the termination;

(3) Inability to pay debts when due—without a distress termination, the person will be unable to pay debts when due and to continue in business; or

(4) Unreasonably burdensome pension costs—the costs of providing pension coverage have become unreasonably burdensome due solely to a decine in the person's covered workforce. [ERISA section 4041(c)(2)(B)] (Cases begun as liquidations and converted to reorganizations, or vice versa, as of the termination date, are included within the first two criteria.)

Under certain circumstances, the contributing sponsor or a substantial member of its controlled group may seek to qualify under more than one of the distress termination tests. One of these circumstances is presented when the contributing sponsor or a substantial member of its controlled group has filed or has filed against it a petition seeking a reorganization under Title 11 of the United States Code, or under any similar law. In such a case, this person may request approval of the termination from the bankruptcy court under the second test, or apply to the PBGC for a determination that it satisfies either the third or fourth test.

With respect to the second test, ERISA does not delineate the factors that bankruptcy courts should use in deciding whether to approve a plan termination in the context of a reorganization proceeding. The legislative history, however, indicates that the standards under sections 365 and 1113 of the Bankruptcy Code (dealing with the rejection of executory contracts and collective bargaining agreements, respectively) are applicable to the court's decision on whether to approve the termination of a pension plan. (*See* H.R. Report No. 99–453, 99th Cong., 1st Sess. 575 (1985)) Bankruptcy courts typically utilize a "balancing of the equities" test in making determinations under these sections.

The third test (inability to pay debts when due and continue in business) is a financial test that requires the PBGC to make an analysis of a number of the same factors that bankruptcy courts are likely to consider as part of their "balancing of the equities" determination. This is particularly true when the contributing sponsor is in a reorganization proceeding, because in such a case the "ability to continue in business" is essentially measured by the ability to successfully reorganize. This creates a possibility that the PBGC and a bankruptcy court could make conflicting findings as to the debtor's financial condition. The PBGC has, therefore, adopted the procedures described below in order to prevent such a conflict between it and a bankruptcy court.[1]

When a contributing sponsor or a substantial member of the contributing sponsor's controlled group requests approval of the plan termination from a bankruptcy court under the reorganization test, the PBGC normally will enter an appearance in that

[1] The fourth test (unreasonably burdensome pension costs) does not involve factors that are closely related to the factors considered by the bankruptcy courts. Accordingly, this test does not present the same possibility of conflicting results.

proceeding to request the bankruptcy court to make certain specific findings. The PBGC will ask the court either to make a finding as to whether, but for distress termination, the contributing sponsor or substantial member of its control group will be unable to pay debts when due and continue in business, or to state that it is unable to make any such findings. In these proceedings, the PBGC will provide the court with any information it has that may be germane to the court's ruling. If the bankruptcy court makes a finding as to the debtor's ability or inability to pay debts when due, and upon the bankruptcy court's order becoming final and non-appealable, the PBGC commits itself to be found by the finding.

If the contributing sponsor or a substantial member of the contributing sponsor's controlled group requests a determination from the PBGC under the third test and also requests (either prior thereto or after) approval of the termination by the bankruptcy court, the PBGC will defer action on the request until the bankruptcy court makes its determination. If the contributing sponsor applies to the PBGC under the third test and the PBGC determines that the distress test is not met, and the contributing sponsor thereafter requests the bankruptcy court's approval of the termination, the PBGC will advise the court of its determination and make its administrative record available to the court for its analysis.

By adopting these procedures, the PBGC hopes to minimize duplicative efforts and expedite the analysis of the financial information submitted to justify plan termination. Moreover, the PBGC anticipates that these procedures will facilitate the development of consistent decision making in this area and better promote the policies behind Title IV of ERISA.

Issued at Washington, DC, this 7th day of October, 1987.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25000; Filed No. SR-CBOE-87-42]

Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Addition of Options at a Strike Price up to 100 Points Below the Current Index Value of the Standard & Poor's 500 Stock Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), notice is hereby given that on September 14, 1987, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of the Proposed Rule Change

Additions are italicized; there are no deletions.

Terms of Option Cotnracts

Rule 24.9 No change

. . . Interpretation and Policies:

.01 No change

a.–e. No change

f. In the options on the Standard & Poor's 500 Stock Index (SPX or NSX), the Exchange may add one or more series of option contracts at a strike price up to 100 points below the current index price. Such series may only be added on the expiration cycles of March, June, September and December.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the palces specified in Item IV below and is set forth in sections (A), (B), and (C) below.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The proposed rule change allows the Exchange to open for trading options at a strike price up to 100 points below the current index value of the Standard & Poor's 500 STock Index ("SPX" and "NSX", hereinafter collectively referred to as "SPX"). The Exchange believes that this will enable market participants to have a greater range of trading and hedging opportunities in SPX.

SPX is a market with a high degree of institutional activity and these sophisticated market participants believe that they can use a greater range of strike prices than can the typical retail investor. For example, the deep-in-the-money calls will provide a way for a buyer or seller to participate point-for-point in a very substantial market move, as has occurred in the past six months. Because SPX has a European exercise provision, a seller of a deep-in-the-money call also avoids the risk of early exercise.

The Exchange also recognizes that this will make available far out of the money puts, which have a relatively lower possibility of coming into the money before expiration. To that extent, the Exchange has cautioned its member firms that these options, particularly the far out-of-the money puts, are being made available to allow sophisticated market participants a greater range of trading and hedging strategies and that trading activity for customer accounts in the far out-of-the money puts will be closely scrutinized by the Exchange as to the suitability and propriety of the trades for the customers in question.[1]

The Exchange believes that the proposed rule change is consistent with the provisions of the Act and, in particular, section 6(b)(5) thereof, in that the rule change is intended to increase

VOL
52
ISS
199
OC
15
1987
UMI

market liquidity by providing sophisticated market participants with a greater range of availability options series for trading.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that this proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by November 5, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 7, 1987.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-23886 Filed 10-14-87 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-25001; File No. SR-CBOE-87-45]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Filing and Immediate Effectiveness of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 24, 1987 the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Exchange proposes to make effective, pursuant to CBOE Rule 2.22, a revenue-neutral trade match fee system to encourage clearing firms to provide timely and accurate input to the Exchange's trade match process. To encourage timely input, the Exchange will use the input cutoff times based on daily reported volume in order to define categories of early and late input for a particular day. For each clearing firm, the type [1] and number of transactions will be recorded by time slot. A weighting factor will be applied to each time slot, and a formula will be applied to determine each firm's monthly bill based on its performance. To encourage accurate input, a firm causing an outtrade will have to submit a correction, which will incur a charge.

The Exchange states that the purpose of this trade match fee system is to improve clearing firm performance by encouraging: (1). Early submission to all trade match passes, (2) use of corrective transactions instead of combinations of deletes plus adds, (3) strict adherence by member firms to the second pass schedule of the Exchange's trade match process, which is critical to starting the Options Clearing Corporation process, and (4) accurate input.

As the foregoing rule is concerned solely with Exchange fees, it has become effective immediately pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[1] *E.g.*, adds, deletes or changes.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in caption above and should be submitted by November 5, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 7, 1987.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-23887 Filed 10-14-87; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-25002; File No. SR-DTC-87-9]

Self-Regulatory Organizations; Depository Trust Co.; Filing of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78(b)(1), notice is hereby given that on June 2, 1987, the Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described below. On September 15, 1987, DTC amended the rule change by submitting procedures relating to the proposed rule change. The proposal would enable DTC Participants to change, by automated means, the frequency with which they receive future dividend payments on Variable Mode Preferred (VMP) and

Unit Investment Trust Securities (UIT). The Commission is publishing this notice to solicit comment on the proposed rule change.

The new service is called a Change of Mode Payment ("CMOP") Service. DTC states in its filing that CMOP will enable Participants to change, during specific periods, the frequency with which they receive dividend payments. In accordance with the terms of the security, dividend payments may be made monthly, quarterly, semi-annually, annually, or on another regular frequency. Only certain UIT and VMP stock issues are eligible for the CMOP Service. Fees for the CMOP service will be the same as fees for conversions.

In order to use the CMOP Service, a Participant would communicate the CMOP instructions to DTC by automated means through DTC's Participant Terminal System (PTS). Due to provisions in the documents which created the UITS and VMPs, participants may submit CMOP changes only during certain specified time periods. If a participant attempts to make a change outside of the permissible time periods, PTS will reject the transaction and display an error message. Participants receive an additional notification of transactions not completed by comparing the transactions they submitted with the completed transactions reported on their daily activity statement.

In addition to instructing DTC about a VMP change, a participant who wants to make a VMP change must directly notify the VMP remarketing agent of the change two business days before the dividend payment date. Each afternoon DTC submits that day's CMOP VMP changes to the appropriate VMP remarketing agents. The VMP remarketing agents have until the close of business to inform DTC of changes that must be reversed because the participant failed to notify it of the change at the appropriate time. If a change must be reversed, or is rejected for another reason DTC will notify the participant's coordinator by telephone, and send the participant a written notice of the adjustment.

After a participant has completed a valid CMOP instruction, DTC will begin processing in accordance with the instruction. Because UITs and VMPs are FAST issues, DTC transmits the instructions to the FAST transfer agent via DTC's Computer-to-Computer Facility.[1]

DTC believes the rule change is consistent with the requirements of the Act because it will eliminate the need for Participants to withdraw certificates from DTC, exchange them at the transfer agent's office for certificates with the new payment frequency, and then deposit new certificates at DTC. In addition, DTC believes the proposed rule change would facilitate the timely settlement of these transactions, reduce fails, and decrease financing costs.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, all written communications relating to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public under 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of DTC. All submissions should refer to file number SR–DTC–87–09 and should be submitted by November 5, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 7, 1987.

Jonathan G. Katz,

Secretary.

[FR Doc. 87–23888 Filed 10–14–87; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–25003; Filed No. SR–MSTC–87–5]

Self-Regulatory Organizations; Midwest Securities Trust Co., Order Approving Proposed Rule Change

The Midwest Securities Trust Company ("MSTC") on March 27, 1987, filed a proposed rule change with the Securities and Exchange Commission ("Commission") under section 19(b) of the Securities Exchange Act of 1934 ("Act"). MSTC filed an amendment to the proposal on August 11, 1987. The proposal, as amended, would authorize MSTC to charge a Participant for the failure to eliminate any negative balance remaining in such Participant's securities account 24 hours after notification by MSTC of the existence of the negative balance. The Commission published notice of the proposal in the **Federal Register** on September 8, 1987, to solicit public comment.[1] No public comment was received. This order approves the proposal.

I. Description

The proposal amends MSTC Article II, Rule 1, Section 1 to authorize MSTC to charge a Participant for the failure to eliminate any negative balance remaining in the Participant's securities account. Under the proposal, if a negative balance remains 24 hours after MSTC has notified a Participant of its existence, MSTC will be authorized to charge the Participant 130% of the market value of equity, or face value of debt (municipal or corporate) securities which constitutes the negative balance. The amount will be placed in a separate escrow account and will be returned to the Participant after the Participant delivers substitute securities to its MSTC account (by deposit or book-entry movement).

II. MSTC's Rationale

MSTC states that the proposed rule change is consistent with the Act in that it facilitates the prompt and accurate clearance and settlement of securities transactions, as well as the safeguarding of securities and funds within MSTC's control. MSTC states that when faced with an unpaid negative balance, MSTC's current rules authorize MSTC only to buy-in securities to eliminate the negative balance. While in some instances the procedure is adequate to limit MSTC's exposure, the procedure is inappropriate in other instances, for example, when a limited market exists for a security which is the subject of a negative balance. MSTC believes that the proposal will encourage Participants to take steps to eliminate a negative balance, even in instances where a limited market for the security exists, and will further protect MSTC should the Participant become insolvent before it eliminates the negative balance.

---

[1] FAST, which stands for Fast Automated Securities Transfer, provides an expeditious method for transferring certificates. Under the FAST program, DTC leaves certificates with the appropriate transfer agents (TA). When a FAST issue is transferred, DTC does not need to withdraw it from its vault, submit it to the TA for processing, receive a new issue from the TA, and place the new issue in the vault. Instead, DTC merely notifies the TA of the change which is to be made; processing occurs more quickly because the FAST certificates are already in the TA's custody.

1987
UMI

III. Discussion

The Commission believes that MSTC's proposal is consistent with Section 17A of the Act in that it promotes the prompt and accurate clearance and settlement of securities transactions while ensuring the safeguarding of funds and securities in MSTC's custody and control. For the reasons discussed below, the Commission is approving MSTC's proposal.

MSTC's proposed outstanding negative balance charge will provide protection to MSTC and it Participants. Most outstanding negative balances develop primarily as a result of deposit rejects (securities submitted to MSTC for deposit which are not in good deliverable form), partial calls in redemption processing and miscellaneous account position adjustments. The existing buy-in procedures protect MSTC only to the extent that the same or similar securities are available for purchase. In certain situations, however, a buy-in of securities may entail significant delays. For example, a Participant depositing securities in a thinly traded issue into its account at MSTC is immediately credited with the securities and may use the position. If the securities, when presented by MSTC to the transfer agent for transfer into MSTC's nominee name, do not clear transfer and MSTC subsequently rejects the deposit, the Participant's account will incur a negative balance. The Participant (and MSTC) may not be able immediately to replace the securities by buying-in because the issue is thinly traded. The negative balance charge is designed to increase MSTC's protection in the event the Participant becomes insolvent after the negative balance charge is made and before the Participant eliminates the negative balance.

The proposed 130% negative balance charge will induce Participants to eliminate the negative balance as quickly as possible. The Commission believes that the negative balance charge also will encourage Participants to examine their procedures and maintain a higher quality control to prevent or reduce deposit rejects and therefore avoid creating outstanding negative balances.

IV. Conclusion

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act, that MSTC's rule change (File No. SR MSTC 87–5) be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: October 7, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. 34–24997; File No. SR–NSCC–87–8]

National Securities Clearing Corp.; Proposed Rule Change; Mutual Fund Settlement, Entry and Registration Verification ("Fund/SERV") Service

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on September 16, 1987 NSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would adopt NSCC's Fund/SERV Service as a permanent service of NSCC at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

NSCC originally filed a rule change with the Securities and Exchange Commission ("Commission") in December, 1985, in order to operate Fund/SERV. By order dated February 20, 1986, the Commission granted temporary approval to the Fund/SERV rules, allowing NSCC to establish the service on a pilot basis. In April, 1986, after having experience operating Fund/SERV on a pilot basis, NSCC filed an additional rule change making various modifications to the procedures and membership standards for Fund/SERV. By order dated February 10, 1987, the Commission approved that filing and authorized the continuation of Fund/SERV through January 31, 1988. The purpose of this proposed rule change is to adopt Fund/SERV as a permanent service of NSCC.

Since the inception of Fund/SERV in March, 1986, with one mutual fund and two broker-dealers, Fund/SERV has expanded to where there currently are 18 funds participating and 27 broker-dealers participating. The volume of transactions processed by the system also has grown. At its peak, in April, 1987, volume averaged over 7,500 confirmed trades a day. Even with a general downturn in the mutual fund industry, Fund/SERV currently is averaging over 4,000 transactions a day. Similarly, average daily dollar value of confirmed trades has increased to a current average of approximately $100 million, with a monthly high average of over $190 million a day in April, 1987.

As shown by its growth, Fund/SERV has achieved widespread industry acceptance as the central processing system for mutual fund transactions. There have been no operational problems in providing the service; indeed, NSCC has been developing enhancements to Fund/SERV as the service grows (*See* SR-NSCC–87–7). NSCC has been developing enhancements to Fund/SERV as the service grows (*See* SR-NSCC–87–7). NSCC currently is developing plans to increase participation in Fund/SERV by making it more attractive for smaller broker-dealers who currently are not members of NSCC. In addition, NSCC is developing plans to offer additional services with respect to mutual funds. In light of these developments, NSCC believes that it would be appropriate for the Commission to approve Fund/SERV as a permanent service of NSCC.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

NSCC has worked with the mutual fund industry and NSCC's participants in developing Fund/SERV. Formal comments on the proposed rule change, however, have not been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW. Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by November 5, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: October 6, 1987.

BILLING CODE 8010-01-M

[Release No. 34-24999; File No. SR-NASD-87-37]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Implementing a Late Fee for Certain Subscribers

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on October 2, 1987, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The self-regulatory organization has designated this proposal as one establishing or changing a fee under section 19(b)(3)(A)(ii) of the Securities Exchange Act of 1934 and corresponding Rule 19b-4(e), which renders the fee effective upon the Commission's receipt of this filing. The Commission is publishing this notice to solicit comments on the rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The National Association of Securities Dealers, Inc. ("NASD") hereby files a proposed rule change, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to establish a late fee that would be levied against delinquent subscribers receiving NASDAQ/National Market System Last Sale Information ("NASDAQ/NMS Last Sale Service") through an authorized vendor. The late fee will equal one and one-half percent (1½%) per month of the unpaid balance commencing forty-five (45) days after the invoice date. Prior to this filing, no late fee had ever been authorized respecting subscribers delinquent in paying for NASDAQ/NMS Last Sale Service. The NASD will implement the late fee prospectively in accord with the existing subscriber agreement for NASDAQ/NMS Last Sale Service.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

This filing is intended to effect the Market Services, Inc., Board's determination to impose a late fee against subscribers delinquent in paying for NASDAQ/NMS last sale information obtained through authorized vendors. To the extent that vendors have assumed contractual responsibility for collection and remittance of subscriber fees, such late fee would also apply. Historically, no late fee had ever been levied in connection with this or any other service provided by MSI. The new fee will apply equally to delinquent fees attributable to professional subscribers serviced by vendors. Lastly, the late fee's application is limited to MSI's provision of the NASDAQ/NMS Last Sale Service.

The NASD anticipates that adoption of the late fee will curb the incidence of delinquencies. In this regard, it should be noted that timely receipt of subscriber fees is a contractual precondition to obtaining the last sale information. It is also important to the NASD's funding of the facilities and operations needed to provide this service as well as various automation enhancements that ultimately benefit subscribers and the investing public. Hence, sound business practice and public policy considerations both support the adoption of this late fee.

Section 15A(b)(5) of the Act requires the equitable allocation of reasonable fees among persons accessing data services offered by the NASD. Although related to the NASDAQ/NMS Last Sale Service, the late fee becomes due only when the subscriber is dilatory in paying the prescribed rate for this service. Hence, it is entirely within a subscriber's control to avoid incurrence of the late fee. However, every subscriber who becomes delinquent incurs the identical pecuniary obligation. This result is consistent with the equitable allocation standard articulated in section 15A(b)(5) of the Act.

The NASD believes that the magnitude of the late fee is reasonable, and that its imposition will offset certain additional costs traceable to collection of delinquent payments from the affected universe of subscribers. Further, the late fee's magnitude is believed sufficient to provide an economic incentive for subscribers to pay NASDAQ/NMS Last Sale Service fees in a timely fashion. Based on this rationale, the NASD submits that this

VOL
52
ISS
1
99
OC
15
1987
UMI

late fee satisfies the reasonableness requirement of section 15A(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD asserts that no competitive burden will result from the imposition of a late fee on subscribers delinquent in paying the established rates for NASDAQ/NMS Last Sale Service. The late fee will apply uniformly to all delinquent subscribers receiving this service through vendors. Incurrence of the late fee is a matter entirely within each subscriber's control and timely payment obviates liability for the fee. Hence, the fee's application will not unfairly burden a subscriber's continued access to NASDAQ/NMS last sale information. Finally, because the proposed fee addresses delinquent payments by a specific class of subscribers, it has no adverse effect upon any vendor's access to NASDAQ/NMS last sale information nor upon a vendor's ability to service a particular subscriber.

C. Self-Regulatory Organization's Statement on Comments On the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing For Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 under the Act. At any time within sixty (60) days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number SR–NASD–87–37 and should be submitted by November 5, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority: 17 CFR 200.30–3(a)(12).

Dated: October 7, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–24985; File No. SR–NYSE–86–21]

Self-Regulatory Organizations; Order Approving Proposing Rule Change by the New York Stock Exchange, Inc. Relating to a Revision of the List of Exchange Rule Violations and Applicable Fines

The New York Stock Exchange, Inc. ("NYSE") submitted, on July 10, 1986, copies of a proposed rule change pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 [2] thereunder, to revise the list of NYSE rules eligible to be considered pursuant to the NYSE's minor rule violation plan.[3] In particular, the purpose of the NYSE proposal is to include, within the minor rule violation plan, certain rules which are administered by the NYSE's Member Firm Regulation and Enforcment and Regulatory Standards Divisions.

In 1984, the Commission adopted amendments to paragraph (c) of Rule 19d–1 to allow self-regulatory organizations ("SROs") to submit, for Commission approval, plans for the abbreviated reporting of minor rule violations.[4] The Commission previously approved such a plan filed by the NYSE.[5] The approved plan relieves the NYSE of the current reporting requirement imposed under section 19(d)(1) for violations listed in NYSE Rule 476A. The NYSE plan, as embodied by Rule 476A, provides that the Exchange may designate violations of certain rules as minor rule violations. The Exchange may impose a fine, not to exceed $5,000, on any member, member organization, allied member, or member approved person, or registered or non-registered employee of a member organization for a violation of the delineated rules by issuing a citation with the specified penalty. The respondent can either accept the penalty, or force a full disciplinary hearing on the matter. Fines assessed pursuant to Rule 476A in excess of $2,500 are not considered pursuant to the plan and must be reported in a manner consistent with the current reporting requirements of section 19(d)(1).

The five remaining proposed NYSE rules [6] are different in nature from the list of rules already included under Rule 476A and the above-mentioned rules in that these rules generally relate to the member's relationship with its customers and directly relate to important investor safeguards. In particular, Rules 451 and 452 require NYSE members to transmit proxy materials to beneficial owners of stock and establish procedures for delivery proxies by a member organization for stock registered in its name. Strict compliance with these two rules is necessary to ensure that the member organization is in compliance with Section 14 of the Act and the rules and regulations promulgated thereunder.[9] Likewise, failure to adhere to the requirements contained in Rule 726, mandating delivery to a customer of the current Options Disclosure Document at or prior to approval of the customer's account, also effects compliance with Rule 9b–1 under the Act.[10] Further, the

[2] 17 CFR 240.19b–4 (986)

[3] *See* NYSE Rule 476A ("Imposition of Fines for Minor Violations of Rules"). Included within Rule 476A is the list of Exchange rules whose violations may be reported pursuant to the NYSE's minor rule violation plan. The Commission notes that it simultaneously is approving amendments to the NYSE minor rule violation plan. *See* Securities Exchange Act Release No. 24986.

[4] *See* Securities Exchange Act Release No. 21013 (June 1, 1984), 409 FR 23838. Pursuant to paragraph (c)(1) of Rule 19d–1, an SRO is required to file promptly with the Commission notice of any "final" disciplinary action taken by the SRO. Pursuant to paragraph (c)(2), of Rule 19d–1, any disciplinary acton taken by the SRO for violation of an SRO rule that has been designated a minor rule pursuant to the plan shall not considered "final" for purposes of Section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2,500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies. By deeming unadjudicated, minor violations as not final, the Commission permits the SRO to report violations on a periodic, as opposed to immediate, basis. *See* note 7 *infra* (detailing content of quarterly reports filed pursuant to the NYSE plan).

[5] Securities Exchange Act Release No. 22415 (September 14, 1985), 50 FR 38600.

[9] 15 U.S.C. 78m (1976).

[10] 17 CFR 240.9b–1 (1986).

requirements contained in Rule 408(a) represent essential customer protection safeguards against unauthorized trading, and the requirements of Rule 432(a) serve as part of an overall scheme of margin regulation designed to protect the markets, and specifically the margin purchaser, by preventing the purchase of securities with insufficient margin.[11]

In adopting Rule 19d-1, the Commission noted that the rule was an attempt to balance the informational needs of the Commission against the reporting burdens of the SROs.[12] In promulgating paragraph (c) of the rule,[13] the Commission was attempting further to reduce those reporting burdens by permitting, where immediate reporting was unnecessary, quarterly reporting of minor rule violations. The various SROs have since realized that the inclusion of rules under a minor rule violation plan not only can reduce reporting burdens but also can make their disciplinary systems more efficient. The Commission however, expressed concern, when promulgating the rule, that the SROs would use that provision for the disposition of increasingly more significant violations. Indeed, the Commission specifically rejected a recommendation, made by the Chicago Board Options Exchange ("CBOE"), to raise the fine ceiling to $10,000, in an attempt to limit the use of these plans to "matters of minimal regulatory concern."[14] To ensure further that plans pursuant to Rule 19d–1(c) would be used for intended purposes only, the Commission retained the authority to restrict the categories of violations and impose any terms or conditions that it saw necessary.[15] Specifically, the Commission remains unconvinced that the inclusion of rules that are not basically technical or objective in nature are appropriate for a minor rule violation plan.

The Commission, therefore, is concerned that violations of the above cited five rules may present more than "minimal regulatory concern." At the same time, however, the Commission recognizes that the inclusion of such rules under the NYSE's 19d–1 plan could have positive results, especially in the area of compliance. According to the NYSE, inclusion of these rules will provide an effective alternative response to a rule violation when the initiative of full disciplinary proceedings is unsuitable because such a proceeding would be more costly and time-consuming in view of the minor nature of the particular violation if not the category of violation. The NYSE claims that, presently, members are aware that lesser violations of the five rules probably will result only in a verbal warning or letter of caution and not full disciplinary proceedings. Accordingly, the NYSE believes that its ability to enforce compliance with these rules will increase with the ability to issue summary fines for these violations.[16]

In effect, the NYSE argues that, even though the categories of requirements covered by the five rules provide important investor safeguards, any particular violation of such a rule may or may not rise to the level which would justify a full discipinary proceeding. Thus, in the NYSE's view, because it retains the discretion to bring such a full disciplinary proceeding, adding these rules to its minor disciplinary plan only will enhance, rather than reduce, its enforcement capabilities regarding such rules.

While the Commission is not persuaded the residual availability of full disciplinary proceeding always will justify placing a rule within the minor disciplinary plan, it recognizes that the issue of whether the inclusion of these rules within the minor disciplinary plan will provide a net benefit to the NYSE's enforcement efforts is ultimately a question of how the program is implemented. If the minor disciplinary characterization is used in a manner which is sensitive to the underlying goal of Rule 19d–1, including these rules within the plan may enhance the NYSE's compliance effects. The Commission therefore has determined that, in order to balance the regulatory needs and reqirements of the Commission as set forth in section 19(d), and the compliance goals and reporting burdens of the NYSE, inclusion of these rules under the NYSE's minor rule violation plan should be approved for a pilot period of two years. During that time, the Commission will examine whether summary disposition and quarterly reporting of such vilations allows respondents sufficient due process protections and the Commission sufficient information by which to carry out its oversight responsibilities concerning the enforcement and disciplinary activities of the SROs.[17] To aid in that examination, the NYSE has agreed to submit two reports to the Commission on compliance activities concerning these five rules: one report submitted at the midpoint of the pilot and the other prior to the pilot's expiration.[18]

The two reports submitted by the NYSE concerning these five rules will include considerably more detail than the quarterly reports presently submitted by the NYSE. First, these reports should include statistics on the number of violations of the five rules handled pursuant to the NYSE's minor rule plan. Second, the following information in connection with each violation must be reported, although it should be noted that the Commission may, from time to time, request additional information: (1) The name of each violator; (2) a description of the circumstances under which the violation occurred; (3) the resulting sanction; (4) whether this is a first or repeat offense in this category by the respondent; (5) whether the violation led to any further investigation or violations; and (6) an analysis by the NYSE of how these cases might have been treated if not for the pilot program (*i.e.*, verbal or written caution or full disciplinary proceeing). Third, these reports must include statistics and descriptions of those cases that the NYSE attempted to bring under its minor rule plan, but the respondent requested a hearing. Fourth, these reports must contain an analysis of the overall compliance process for these five rules. Moreover, as the Commission plans to monitor this pilot program through its inspections program and the Rule 19d–1 reporting requirement, the NYSE should retain, consistent with section 17(a) of the Act,[19] in connection with any violation of these five rules, all back-up documentation and analysis leading to either a Rule 19d–1 filing or a more detailed exchange investigation in any compliance capacity.[20]

ISS
199
OC
15
1987
UMI

Based on the above, the Commission finds that the proposed amendments, with the inclusion of the pilot program, are consistent with the requirements of the Act, and specifically Sections 6 and 19 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) under the Act, that the proposed rule change be, and hereby is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Release No. 34-24986; File No. 4-284]

Self-Regulatory Organizations; Order Approving Amendment to Plan Filed by New York Stock Exchange for Reporting Minor Disciplinary Rule Violations

The New York Stock Exchange, Inc. ("NYSE") submitted, on July 10, 1986, copies of a proposed amendment to its minor rule violation plan, pursuant to section 19(d)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19d-1(c)(2) thereunder.[1] The Commission previous by approved a minor rule violation plan filed by the NYSE, which relieves the Exchange of the prompt reporting requirements of Rule 19d-1 for violations of rules listed pursuant to the plan.[2]

The amendment adds violations of a variety of NYSE rules to the list of rules subject to the plan.[3] Specifically, the NYSE has proposed to add the following rules, administered by the Exchange's Member Firm Regulation/Enforcement and Regulatory Standards Divisions, to its minor rule violation plan: Rules 312(a), 312(b), 312(c), 313, 345.13, 346(c) 351, 421, 440F, 440G, 440H, and 706 (rules concerning violations of Exchange reporting requirements); Rules 312(h), 312(i), 342(c), 342.10, 382(a), and 791(c) (rules concerning violations of Exchange approval requirements); Rules 345.18, 410, 432(a) and 440 (rules concerning violations of record retention requirements); Rules 343 (violations relating to member organization office-sharing arrangements); Rule 387 (violations of COD/POD transaction requirements); Rules 407 (violations of requirements for transactions of employees of the Exchange, member organizations, and certain non-member organizations); Rule 408(a) (violations of requirement that written authorization be obtained for discretionary power over customer accounts); Rules 451 and 452 (violations of requirement relating to transmission of proxy material and authorizing the giving of proxies); Rule 726 (violations of option disclosure document and prospectus delivery requirement); and Rule 781 (violations of allocation of exercise assignment notices). In approving the amendments to the plan, the Commission has determined that the inclusion of five of these rules [4] should be approved conditionally, subject to a two-year pilot program.[5]

Violations of the above-cited rules will be reported to the Commission in a manner identical to all other violations subject to the minor rule violation plan. Such reports include: (1) A quarterly report listing the NYSE internal file number for the case; (2) the SEC file number; (3) the name of the individual or member organization; (4) the nature of the violation; (5) the specific rule provision violated; (6) the date of violation; (7) the fine imposed; (8) an indication of whether the fine is joint and several; (9) the number of times the violation has occurred; and (10) the date of disposition.[6] The five conditionally approved rules will have additional reporting requirements during the course of the pilot program.[7]

Notice of the proposed amendment was given by the issuance of a Commission release (Securities Exchange Act Release No. 24483, May 19, 1987) and by publication in the **Federal Register** (52 FR 20182, May 29, 1987). No comments were received regarding the proposal.

The Commission finds that the proposed amendments to the NYSE minor rule violation plan are consistent with the requirements of sections 6 and 19 of the Act, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Rule 19d-1(c)(2) under the Act, that the proposed amendments, with the inclusion of the pilot program, are hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 5, 1987.

Jonathan G. Katz,

Secretary.

[Release No. 34-25004; File No. SR-PSE-86-10]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change

On June 12, 1986, the Pacific Stock Exchange, Inc., ("PSE") submitted a proposed rule change to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 [2] thereunder, which would permit Order Book Officials ("OBO") to disclose to exchange members the price and number of contracts on the limit order book ("Book") that are bid below and offered above the displayed market quote.

The proposed rule change was noticed in Securities Exchange Act Release No. 23603, September 9, 1986. No comments were received on the proposed rule change.

The proposed rule change will permit a PSE Member to request from an OBO the price and number of contracts which are bid below and/or offered above the Book information displayed pursuant to PSE Rule VI, section 69. In order to receive the information from the OBO, however, the Member must openly disclose to the trading crowd the identity of the Member or Member

---

[1] *See* Securities Exchange Act Release No. 21013 (June 1, 1984), 49 FR 23838. The Commission adopted amendments to paragraph (c) of Rule 19d-1 to allow self-regulatory organizations ("SROs") to submit, for Commission approval, plans for the abbreviated reporting of minor rule violations. Under the amendments, any disciplinary action taken by the SRO for violation of an SRO rule that has been designated a minor rule violation pursuant to the plan shall not be considered "final" for purposes of section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2,500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies.

[2] *See* Securities Exchange Act Release No. 22415 (September 15, 1985).

[3] The list of rules subject to the plan is contained in NYSE Rule 476A ("Imposition of Fines for Minor Violations of Rules"); Securities Exchange Act Release No. 21688 (January 25, 1985) (approving NYSE Rule 476A).

[4] NYSE Rules 408(a), 432(a), 451, 452 and 726.

[5] *See* Securities Exchange Act Release No. 24985.

[6] The fine schedule under Rule 476A is as follows: (1) First offense, $500 for an individual and $1,000 for a member organization; (2) $1,000 for an individual and $2,500 for a member organization; and (3) $2,500 for an individual and $5,000 for a member organization for subsequent offenses. Fines in excess of $2,500 are not covered by the plan and must be reported promptly to the Commission.

[7] These reporting requirements are described in detail in Securities Exchange Act Release No. 34-24985.

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1985).

Organization for whom he requests the information.

The PSE states that the proposed rule change is designed to provide additional information to crowd participants and/or their clients and customers so they can better handle large orders and facilitate liquidity. The PSE also notes that while most interest probably will focus on Book size and price information nearest to the present bid and offer, price and aggregate size of Book orders further away from the current Book quote may prove useful to market participants. The PSE proposal also will permit the same access to Book information that is provided for in the Chicago Board Options Exchange ("CBOE") Rules, approved by the Commission in October, 1985 (SR-CBOE-85-30, Release No. 34-22582). Unlike the CBOE provision, however, the PSE proposal would require the member seeking information from the OBO to give up to the trading crowd the name of the firm for which the request is being made. The proposal also allows the PSE to limit crowd access to the Book where appropriate. For example, in circumstances where fast market conditions exist and where the Exchange is aware of a possibility that the information could be misused, access to Book information may be limited.

The Commission finds that the proposed rule change is consistent with the Act and in particular the requirements of Section 6 and the Rules and Regulations thereunder in that the proposed rule change will provide additional information to crowd participants and/or their clients and customers which will help them to establish the best available price for handling large orders. In addition, accessibility to information relating to the size and price of book orders (supply and demand information involving public customers) should assist market makers in determining price levels to buy and sell options. Similarly, the Commission believes that this knowledge should be useful to market participants handling large customer orders and will facilitate hedging and other trading strategies, thereby increasing overall market liquidity. The Commission also believes it is necessary and appropriate for the PSE to have the authority to limit crowd access to the Book in order to limit possible disclosure difficulties and information abuse.

The Commission also believes that the requirement that an OBO not disclose requested information until the requesting member supplies the name of the member or member organization for whom the request is being made is acceptable. The PSE has determined that, in return for receiving Book information, a member should cause more market information (i.e., the identity of an entity interested in buying or selling a specific series) to be made public. Thus, a member that did not want to disclose the identity of a customer would only be prohibited from requesting Book information that has heretofore been non-public. The Commission also notes that this is similar to a rule of the PSE's Options Floor Procedure Committee adopted in 1976 providing for the disclosure, by a floor broker, of the name of the member organization for whom he is acting when he requests the size of the market (See Options Floor Procedure Advice Rule D-9(1)).

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[3] that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Dated: October 8, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16042; 813-81]

Elfun Global Fund; Application for Exemption

October 8, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: Elfun Global Fund ("Applicant" or "Fund").

Relevant 1940 Act Sections: Exemption requested under Section 6(b) from the provisions of sections 10(a), 13(a)(4), 15(a), 15(c), 16(a), 30(d) and 32(a).

Summary of Application: Applicant seeks an order exempting it from certain shareholder voting requirements, permitting annual reports to unitholders and permitting all of its trustees to be officers or employees of General Electric Company ("GE").

Filing Date: The application was filed on July 8, 1987 and amended on October 6, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 292 Long Ridge Road, Stamford, Connecticut 06904.

FOR FURTHER INFORMATION CONTACT: Joyce M. Pickholz, Staff Attorney, (202) 272-3048, or Curtis R. Hilliard, Special Counsel (202) 272-3030 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. The Fund is a trust created pursuant to an agreement among the Fund's trustees ("Trustees") dated May 15, 1987. It is a diversified, open-end, management investment company, and is so organized as to meet the requirements for an "employees' securities company" within the meaning of section 2(a)(13) of the Act. The Fund has not yet commenced operations.

2. Purchase of units of the Fund ("Fund Units") may be made by regular and senior members of the Elfun Society, on behalf of trusts established for the exlusive benefit of such members and by General Electric Company ("GE") and its subsidiary and controlled companies. Regular members of the Elfun Society are selected from among the higher level exempt-salaried employees of GE and its subsidiary and controlled companies and senior members are former regular members who have retired from these companies. Fund Units may also be purchased by the spouse and children of any eligible living Elfun Society member or by the unremarried surviving spouse of a former Elfun Society member and by the trustees of certain profit-sharing trusts

---

[3] 15 U.S.C. 78s(b)(2) (1982).

[4] 17 CFR 200.30-3(a)(12) (1985).

hereafter created by GE and by members of the GE Board of Directors. As of May 1, 1987, there were approximately 18,096 regular members and 8,964 senior members of the Elfun Society.

3. The objective of the Fund is to seek as high a level of long-term growth and future income as is available through investment in foreign and domestic securities over a long-term period consistent with a degree of risk determined by the Trustees to be acceptable and consistent with prudent investment management and preservation of capital. The fund may enter into forward foreign currency exchange contracts, foreign currency futures contracts and options on foreign currency for hedging purposes in order to minimize the risk from adverse changes in the relationship between the U.S. dollar and foreign currencies. The Fund may also, for hedging purposes, purchase foreign currencies in the form of bank deposits as well as other foreign money market instruments, and employ stock index futures and options and interest rate options and futures to protect its foreign and domestic portfolios.

4. The Trustees have contracted for investment management services with General Electric Investment Corporation ("GEI"), a wholly-owned subsidiary of GE which is registered as an Investment Adviser with the Securities and Exchange Commission. GEI is subject to removal by the Trustees at any time, without peanlty, on sixty days written notice. The contract for investment management provies that the appointment of the investment manager is subject to annual review by the Trustees.

5. The Fund's five Trustees are all officers or employees of GE who have been assigned to the operations of GEI. The Trustees do not receive any compensation from the Fund for serving as Trustees, although the Fund will be required to reimburse GEI for the portion of the remuneration such persons receive from GE which is allocable to the time they spend on Fund matters in their capacity as GEI employees. Although GEI and GE provide various services to the Fund and are reimbursed for the reasonable costs of providing such services, no element of profit is included in such charges.

6. The Trustees, GEI, and GE all have a very strong interest in assuring that the Fund is well managed. While GE does not sponsor the Fund, the Fund is being established to offer an additional investing opportunity which is open solely to certain GE employees, former employees, and their immediate relatives. GE and its subsidiaries may also invest in the Fund. Thus, the success of the Fund has a strong bearing on employee morale and satisfactory employee relations, a matter, in which GE is vitally interested. It is also clear form the extensive experience and knowledge of the persons who have been selected to act as Trustees of the Fund that the addition of outside persons as trustees is not necessary in order to bring the Fund the needed skills for its operation. Also, the fund has estimated that the addition of two disinterested trustees would add approximately $25,000 of annual operating expenses. For these reasons, the Fund requests exemption from section 10(a) of the 1940 Act.

7. The Trustees have retained the right to terminate the Fund. In the case of such termination, the Unitholders will receive the net asset value of the Units held by them. Since all participants in the Fund will be aware of this right of termination prior to purchasing Fund Units, an exemption is requested from section 13(a)(4) of the 1940 Act to the extent required to permit the Fund to be terminated without a vote of the Unitholders.

8. Exemption is requested from that portion of section 15(a) which would require that the contract between the Fund and GEI be approved by persons holding a majority of the outstanding Fund Units. Since all of the Trustees are interested persons of GEI, exemption is also requested from the requirements of section 15(c) which provide for approval by a majority of disinterested trustees of any renewal of an investment advisory contract. The investment advisory services to be furnished to the Fund will be furnished at cost. Thus, it is highly unlikely that such a contract could be placed with any entity other than one, such as GEI, which is uniquely related to the needs and welfare of the participants in the Fund. Furthermore, were the Fund required to make solicitation of its Unitholders for this purpose or add disinterested trustees so as to meet the renewal approval requirements, a substantial increased cost burden would be placed on the Fund. Moreover, GE's interest in the success of the Fund is so fundmaental that any risk of the retention of unsatisfactory investment advisers would seem remote.

9. Exemption is requested from section 16(a) because the Fund does not plan to have the Trustees elected by the Unitholders. This is consistent with the Fund's approach to minimizing costs and the burden to the Fund participants.

10. Exemption from section 30(d) is requested to the extent that reports to Unitholders more than once a year would be required. The Fund proposes to make an annual report under section 30(d). In addition, the Fund will also file with the Commission other required reports and will furnish the Commission with any other reports and communications transmitted to Unitholders. It is believed that the foregoing reports should adequately serve the interest both of the Commission and of the investors, and that the requirement of additional reports to Unitholders would not be justified in light of the time and expense which the preparation of such reports would require.

11. Exemption from section 32(a) is being requested since the Fund does not plan to have Unitholders ratify the selection of auditors. A nationally recognized accounting firm has been selected by the Trustees and, it is contemplated that only firms of a similar caliber will be selected in the future.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16044; 811-3001]

MSG Investment Co.; Application for Deregistration

October 9, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 ("the 1940 Act").

Applicant: MSG Investment Company ("Applicant").

Relevant 1940 Act Sections: Deregistration under section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company subject to the 1940 Act.

Filing Date: The application on Form N-8F was filed on January 27, 1987 and amended on May 11, and October 2, 1987.

Hearing or Notification of Hearing. If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 3, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and

the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 5620 Ager Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Staff Attorney Fran Pollack-Matz, (202) 272–3024 or Special Counsel Karen L. Skidmore, (202) 272–3023 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier, (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is organized as a District of Columbia corporation and is registered as a closed-end, diversified, management investment company under the 1940 Act.

2. On February 29, 1980, Applicant filed a Notification of Registration pursuant to section 8(a) of the 1940 Act on Form N–8A. On June 30, 1980, Applicant filed a Registration Statement under the 1940 Act on Form N–2 which was declared effective on June 30, 1980.

3. In connection with its proposed dissolution, Applicant entered into an Agreement and Plan of Reorganization with Putnam Tax Exempt Income Fund and the Putnam Management Company, Inc. under which substantially all of the assets of Applicant were transferred to Putnam Tax Exempt Income Fund in exchange for shares of beneficial interest in Putnam Tax Exempt Income Fund. Such shares of beneficial interest were contemporaneously distributed to the shareholders of Applicant.

4. On October 24, 1986, the Board of Directors of Applicant approved the proposed Agreement and Plan of Reorganization and a Proxy and Proxy Statement by which such Plan would be submitted to Applicant's shareholders for their approval. The Board of Directors also approved the liquidation and dissolution of Applicant after the sale of substantially all of the assets of Applicant to Putnam Tax Exempt Income Fund. On December 10, 1986, the stockholders of Applicant, at a special meeting, approved the sale of substantially all of the assets of Applicant to Putnam Tax Exempt Income Fund and the subsequent liquidation and dissolution of Applicant.

5. Assets retained by Applicant consisted solely of $55,000 in cash which was held by the investment adviser of Applicant in the general account of Applicant. All such cash was used to discharge the remaining liabilities of Applicant, and none was invested in securities.

6. At the time of filing of the application, Applicant had no shareholders or liabilities (but since that time Applicant's investment adviser has billed Applicant and Applicant has paid such adviser $9,000 for services), was not a party to any litigation or administrative proceedings, and was not presently engaged in, nor intended to engage in, any business activities other than those necessary for the winding-up of its affairs.

7. As of the date of Amendment No. 2, October 2, 1987, Applicant is current on all filings required to be made with the SEC under the 1940 Act, as amended.

8. Applicant filed an Intent to Dissolve with the District of Columbia as required by the laws of the District of Columbia on December 23, 1986. Applicant intends to file Articles of Dissolution shortly after the order requested herein becomes effective, as required by the laws of the District of Columbia, which will complete the process of its formal dissolution.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. IC–16043; 812–6677]

Prudential-Bache Financial Asset Funding Corp.; Application

October 8, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: Prudential-Bache Financial Asset Funding Corp. (as depositor of P-B CMO Trust I-III and similar trusts that will issue Collateralized Mortgage Obligations) ("Trusts").

Relevant 1940 Act Sections: Order requested under section 6(c).

Summary of Application: Applicant seeks a conditional order of exemption from all provisions of the 1940 Act in connection with the issuance of collateralized mortgage obligations ("Bonds") by the Trusts and the sale by Applicant of beneficial ownership interests in such Trusts.

Filing Date: The application was filed on April 3, 1987, and amended on September 2, and September 21, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 28, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicant, Prudential Plaza, Sixth Floor, Newark, NJ 07101.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney (202) 272–2190 or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who may be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant, a Delaware corporation, is a direct, wholly-owned, limited purpose subsidiary of Prudential Securities Group Inc. The common stock of the Applicant will not be sold or otherwise transferred to any entity other than The Prudential Insurance Company of America ("Prudential") or one of Prudential's director or indirect majority-owned subsidiaries. Further, no sale or other transfer of any assets of the Applicant will cause control (as defined in Rule 405 under the Securities Act of 1933 ("1933 Act")) of the Applicant to be maintained outside of Prudential or one of its direct or indirect majority-owned subsidiaries.

2. Applicant seeks relief in connection with the organization of Trusts to issue and sell one or more series ("Series") of Bonds and the sale of beneficial interests in such Trusts. Each Trust will be established under a separate trust agreement ("Trust Agreement") between

Applicant, acting as depositor, and a banking institution, which may include The Prudential Bank and Trust Company, a bank affiliated with the Applicant, that will act as owner trustee ("Owner Trusttee") pursuant to the Trust Agreement. Under the terms of each Trust Agreement, the Applicant will convey property to the related Trust in return for certificates or other instruments evidencing beneficial ownership of such Trust ("Trust Certificates"). Each Trust will issue one or more Series of Bonds pursuant to the terms of an indenture ("Indenture") between the Trust and an independent trustee ("Bond Trustee"), as supplemented by one of more supplemental indentures.

3. The Mortgage Certificates collateralizing the Bonds will consist of: (1) "Fully-modified pass-through" mortgage-backed certificates and stripped mortgage-backed securities guaranteed by the Government National Mortgage Association ("GNMA Certificates"), (2) Mortgage Participation Certificates and stripped mortgage-backed securities issued by the Federal Home Loan Mortgage Corporation ("FHLMC Certificates"), (3) Guaranteed Mortgage Pass-Through Certificates and stripped mortgage-backed securities issued by the Federal National Mortgage Association ("FNMA Certificates") and (4) "Stripped Mortgage-Backed Securities" issued by trusts [1] established by the Applicant.

[1] Stripped Mortgage-Backed Securities issued by trusts established by the Applicant will be similar to stripped mortgage-backed securities issued by FHLMC and FNMA in that they are issued in series of two or more classes, with each class representing a specified undivided fractional interest in principal distributions and/or interest distributions on the underlying pool of assets, and the fractional interests of each class are not identical but in the aggregate represent 100% of the principal and interest distributions on the particular pool. Such trusts cannot issue Bonds and are not the subject of this application. In addition, each series of Applicant's Stripped Mortgage-Backed Securities: (a) Will be rated in one of the two highest rating categories by at least one nationally recognized statistical rating agency, (b) will represent an underlying pool of assets consisting entirely of "fully-modified, pass-through" mortgage-backed certificates fully guaranteed by GNMA, Mortgage Participation Certificates issued by FHLMC or Guaranteed Mortgage Pass-Through Certificates issued by FNMA (none of the pool assets will constitute stripped mortgage-backed securities) and (c) will be "mortgage related securities" within the meaning of Section 3(a)(41) of the Securities Exchange Act of 1934 ("1934 Act"). Use of Applicant's Stripped Mortgage-Backed Securities as collateral for Bonds will not reduce the security afforded to Bondholders (as defined herein) nor expose them to a level of risk significantly different from that present in a Series of Bonds directly secured by FNMA Certificates, GNMA Certificates or FHLMC Certificates in which the Applicant's Stripped Mortgage-Backed Securities represent an interest. With respect to a Series of Bonds secured by Mortgage Certificates which are stripped mortgage-backed securities issued by FHLMC, FNMA or a trust established by the Applicant, the Applicant anticipates that less than all of the classes constituting each series of such Mortgage Certificates will secure such Series of Bonds.

4. The Mortgage Certificates securing each Series of Bonds will be owned either: (i) By the Trust issuing such Bonds or (ii) by limited purpose financing entities affiliated with homebuilders, thrifts, commercial banks, mortgage bankers and other entities engaged in mortgage finance and pledged to secure such Series of Bonds pursuant to funding agreements ("Funding Agreements"). Each Series of Bonds may also be secured by a collection account, debt service funds, reserve fund and certain types of eligible investments specified in the Indenture for such Series (any or all of the foregoing together with Mortgage Certificates and Funding Agreements, "Bond Collateral"). The Bond Collateral will not secure any other Series of Bonds or any other obligations of the Trust.

5. Each Series of Bonds to be issued may contain one or more classes of variable or floating interest rate Bonds which will have a fixed maximum rate of interest ("interest rate cap") that will be payable on the Bonds (or the minimum rate of interest, in the case of an inverse-floating rate Bond). Each Series of Bonds will be sold pursuant to a prospectus, offering circular or private placement memorandum in public offerings or private placements through one or more investment banking firms, including Prudential-Bache Securities Inc., an affiliate of the Applicant. Indentures for public offerings will be qualified under the provisions of the Trust Indenture Act of 1939, as amended.

6. The Mortgage Certificates securing each Series of Bonds, together with cash available to be withdrawn from any debt service funds, reserve funds, or other funds, will have scheduled cash flow sufficient, when taken together with reinvestment income thereon at assumed reinvestment rates acceptable to each rating agency rating the Bonds, to make timely payments of principal of and interest on the Bonds in accordance with their terms. The outstanding collateral value of the Mortgage Certificates securing a Series will be at least equal to the unpaid principal balance of such Series on the issue date.

7. The interests of the holders of the Bonds ("Bondholders") will not be compromised or impaired by the ability of the Applicant to sell beneficial interests in each Trust, and there will not be a conflict of interest between the Bondholders and the owners of the beneficial interests in the Trusts ("Owners") for several reasons: (a) The Mortgage Certificates, as well as the mortgage certificates underlying any Funding Agreement and Applicant's Stripped Mortgage-Backed Securities, which initially will be deposited into each Trust and will be pledged to secure the Bonds issued by such Trust, will not be speculative in nature because they will consist solely of GNMA Certificates, FNMA Certificates or FHLMC Certificates, and are guaranteed as to timely payment of interest and timely or ultimate payment of principal by the respective agency; (b) the Bonds will only be issued provided an independent nationally recognized statistical rating agency has rated such Bonds in one of the two highest rating categories; and (c) the relevant Indenture subjects the Bond Collateral pledged to secure the Bonds, all income distributions thereon and all proceeds from a conversion, voluntary or involuntary, of any such Bond Collateral to a first priority perfected security interest in the name of the Bond Trustee on behalf of the Bondholders.[2] Applicant further submits that, for the reasons described fully in the application, the interests of the Owners will not be adversely affected by Applicant's affiliation with the proposed Owner Trustee.[2]

8. Except to the extent permitted by the limited right to substitute Mortgage Certificates, it will not be possible for the Owners to alter the initial Mortgage Certificates relating to a Series. Although it is possible that substitute Mortgage Certificates may have a different payment experience than the replaced Mortgage Certificates, the interests of the Bondholders will not be impaired because: (a) Such prepayment experience of Mortgage Certificates will be determined by market conditions beyond the control of the Owners, which market conditions are likely to affect all Mortgage Certificates with similar payment terms and cash flows in

[2] Each Indenture will further specifically provide that no amounts may be released from the lien of such Indenture to be remitted to the issuing Trust (and any Owner of Trust Certificates thereof) until: (i) The Bond Trustee has made the required payment of principal and interest on the Boards, (ii) the Bond Trustee has received all fees owed to it, (iii) the firm of independent accountants has received all fees owned to it for services rendered under such Indenture, and (iv) to the extent required by such Indenture, deposits have been made to certain reserve funds. Once amounts have been released from the lien of the Indenture, the Trust Agreement for each Trust will provide that the Owner Trustee will have a lien superior to that of the Owners to the remaining cash flow.

a similar fashion; (b) the interests of the Owners will not be different from those of the Bondholders with respect to such prepayment experience, since both the Owners and the Bondholders will have purchased their respective interests based on the same assumption of prepayment experience of the related Mortgage Certificates; and (c) to the extent that Owners may substitute Mortgage Certificates which may have a different prepayment experience than the original Mortgage Certificates, this situation is no different for the Bondholders than the situation in traditional collateralized mortgage obligation structures.

9. Without the consent of each Bondholder to be affected, neither the Trust, the Applicant, the Owner Trustee, the Owners nor the Bond Trustee will be able to: (1) Change the stated maturity on any Bonds; (2) reduce the principal amount of, or the rate of interest on, any fixed rate Bonds or alter the method of determining the interest on any variable rate Bonds (3) change the priority of repayment on any class of any Series of Bonds; (4) impair or adversely affect the Mortgage Certificates securing a Series of Bonds; (5) permit the creation of a lien ranking prior to or on parity with the lien of the related Indenture with respect to the Mortgage Certificates; or (6) otherwise deprive the Bondholders of the security afforded by the lien of the related Indenture. The sale of Trust Certificates will not alter the payment of cash flow to Bondholders, nor affect the amounts required to be deposited in the collection account or any reserve funds.

Applicant's Legal Conclusions

The requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act because: (a) The Applicant and the Trusts are not the type of entities, and their activities are not the type of activities, intended to be regulated by the 1940 Act; (b) the Applicant and the Trusts may be unable to proceed with their proposed activities if the uncertainties concerning the applicability of the 1940 Act are not removed; (c) the Bondholders will be protected during the offering and sale of the Bonds by the registration or exemption provisions of the 1933 Act and thereafter by the Bond Trustee representing their interests under the Indenture; (d) the Applicant's activities are intended to serve a recognized and critical public need in facilitating available funds for residential mortgages; and (e) the disclosures to Owners of a Trust and the limitation of the Owners of each Trust to no more than 100 institutional or accredited investors familiar with mortgage-related investments provide safeguards adequate to assure that such potential Owners do not require the protection of the 1940 Act.

Conditions to Order

Applicant agrees that the requested order may be expressly conditioned upon the following:

A. Conditions Relating to the Bond Collateral

(1) Each Series of Bonds will be registered under the 1933 Act, unless offered in a transaction exempt from registration either pursuant to Section 4(2) of the 1933 Act or because such Series of Bonds is offered and sold outside the United States to non-U.S. persons in reliance upon an opinion of U.S. counsel that registration is not required. No single offering of Bonds sold both within and outside the United States would be made without registration of all such Bonds under the 1933 Act, without obtaining a no-action letter permitting such offering or otherwise complying with applicable standards then governing such offerings. In all cases, Applicant will adopt agreements and procedures reasonably designed to prevent such Bonds from being offered or sold in the United States or to U.S. persons (except as U.S. counsel may then advise is permissible). Disclosure provided to purchasers located outside the United States will be substantially the same as that provided to U.S. investors in United States offerings.

(2) The Bonds will be "mortgage related securities" within the meaning of section 3(a)(41) fo the 1943 Act. In addition, the Mortgage Certificates underlying the Bonds, and any Funding Agreements securing the Bonds, will be limited to GNMA Certificates, FNMA Certificates, FHLMC Certificates or Stripped Mortgage-Backed Securities as described herein.

(3) If new Mortgage Certificates are substituted, the substitute Mortgage Certificates must: (i) Be of equal or better quality than the Mortgage Certificates replaced; (ii) have similar payment terms and cash flow as the Mortgage Certificates replaced; (iii) be insured or guaranteed to the same extent as the Mortgage Certificates replaced; and (iv) meet the conditions set forth in Conditions A (2) and (4). In addition, new Mortgage Certificates may not be substituted for more than 40% of the aggregate face amount of the Mortgage Certificates initially pledged to the Bond Trustee as a security for a Series of Bonds. In no event may any new Mortgage Certificates be substituted for any substitute Mortgage Certificates. New Funding Agreements may be substituted for the initial Funding Agreements only if the substitution of the Mortgage Certificates securing such Funding Agreements would be permitted under this condition.

(4) All Mortgage Certificates, funds, accounts or other collateral securing a Series of Bonds (collectively, the "Bond Collateral") will be held by the Bond Trustee or on behalf of the Bond Trustee by an independent custodian. The custodian or Bond Trustee may not be an affiliate (as the term "affiliate" is defined in Rule 405 under the 1933 Act) of the Applicant, any Trust or the Owner Trustee. The Bond Trustee will be provided with a first priority perfected security or lien interest in and to all Bond Collateral.

(5) Each Series of Bonds will be rated in one of the two highest bond rating categories by at least one nationally recognized statistical rating organization that is not affiliated with any of the Trusts or the Applicant. The Bonds will not be considered redeemable securities within the meaning of section 2(a)(32) of the 1940 Act.

(6) So long as applicable law requires, no less often than annually, an independent public accountant will audit the books and records of each Trust. In addition, as long as any Bonds are outstanding, such accountant will report at least annually on whether the anticipated payments of principal of and interest on the Bond Collateral of each Series of Bonds issued by such Trust continue to be adequate to pay the principal of and interest on the Bonds in accordance with their terms. Upon completion, copies of the accountant's report(s) will be provided to the Bond Trustee.

B. Conditions Relating to Variable-Rate Bonds

(1) Each class of variable rate Bonds will have set maximum interest rates (interest rate caps) which may vary from period to period as specified in the related prospectus.

(2) The Bond Collateral pledged to secure the Bonds will be sufficient to provide for the full and timely payment of the Bonds then outstanding, assuming the maximum applicable interest rates for each specified period on variable rate Bonds.[3] Specifically, reduction of

[3] In the case of a Series of Bonds that contains a class or classes of variable rate Bonds, a number of mechanisms exist to ensure that this representation

UMI

interest payments due on a Series of Bonds that contains a class or classes of variable rate Bonds will not result in the release of any of the Bond Collateral (except as aforesaid) from the lien of the Indenture prior to the payment in full of the Bonds.

C. Conditions Relating to the Sale of Trust Certificates

(1) Trust Certificates in each Trust will be sold only after all Series of Bonds to be issued by such Trust have been issued or concurrently with the fianl issuance of all Bonds to be issued by such Trust.

(2) The Owners of the Trust Certificates will agree to be bond by the terms of the applicable Trust Agreement.

(3) Trust Certificates will be offered and sold only to (a) Eligible Institutions as defined herein, or (b) certain non-institutinal "accredited investors" as defined in Rule 501(a) of the 1933 Act who will each purchase at least $200,000 of such Trust Certificates and have a net worth at the time of purchase that exceeds $1,000,000 (exclusive of their primary residence). Eligible Institutions will have such knowledge and experience in financial and business matters as to be capable of evaluating risks and volatility of interest rate fluctuations as they affect the value of mortgages, mortgage-related securities and residual interest in mortgage-related securities, such as those represented by the Trust Certificates. Non-institutional accredited investors will have such knowledge and experience in financial and business matters, specifically in the field of mortgage-related securities, as to be able to evaluate the risk of purchasing Trust Certificates and will have direct, personal and significant experience in making investments in mortgage-related securities and because of such knowledge and experience, will be abe to understand the volatility of interest rate flunctuations as they affect the value of mortgage-related securities and residual interests therein. Eligible Institutions include mortgage lenders, thrift institutions, commercial and investment banks, savings and loan associations, pension funds, employee benefit plans, insurance companies, real estate investment trusts or other institutions that customarily engage in the purchase of mortgages and other types of mortgage collateral.

(4) Each sale of Trust Certificates will qualify as a transaction not involving a public offering within the meaning of section 4(2) of the 1933 Act.

(5) Initially, the Applicant intends to sell the Trust Certificates of each Trust to no more than 25 investors. In no event will Applicant sell to more than 100 investors, of which no more than 15 will be noninstitutional accredited investors. The Trust Agreement relating to each Trust will prohibit the transfer of any Trust Certificate of such Trust if there would be more than 100 beneficial owners of such Trust Certificates at any time.

(6) Each purchaser of a Trust Certificate will represent that it is purchasing the Trust Certificate for investment purposes only and that it will hold such Trust Certificate in its own name and not as nominee for undisclosed investors.

(7) No owner of a Trust Certificate will be affiliated with the Bond Trustee; no holders of a controlling (as that term is defined in Rule 405 under the 1933 Act) equity interest in the Trust will be affiliated with either the custodian of the Bond Collateral or the ageny rating the Bonds; and the Owner Trustee will not purchase any Trust Certificate, but will function as a legal stakeholder for the assets of the Trust.

D. Condition Relating to REMICs

The election by a Trust to be treated as a REMIC will have no effect on the level of the expenes that will be incurred by such Trust. Any Trust that elects to be treated as a REMIC will provide for the timely payment of all anticipated fees and expenses to be incurred in connection with the administration of the Trustee in a manner satisfactory to the agency or agencies that initially rate the Bonds. Either the Owners of the Trust Certificates of any such Trust will be personally liable pursuant to the Trust Agreement for such fees and expenses, or payment of such fees and expenses will be provided for any one or more of the methods set forth in the application.

E. Special Conditions

1. Applicant undertakes to secure from each Trust its consent to comply with all of the applicable representations and conditions set forth above and more specifically described in the application.

2. Applicant undertakes to obtain from Prudential its consent to the representation that the common stock of the Applicant will not be sold or transferred to any entity other than Prudential or one of its direct or indirect majority-owned subsidiaries.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-23884 Filed 10-14-87; 8:45 am]

BILLING CODE 8010-01-M

---

will be valid notwithstanding subsequent potential increases in the interest rate applicable to the variable rate Bonds. Procedures that have been identified to date for achieving this result include the use of: (i) Interest rate caps for the Variable Rate Bonds; (ii) "inverse" Variable Rate Bonds (which pay a lower rate of interest as the rate increases on corresponding "normal" Variable Rate Bonds); (iii) variable rate collateral to secure the Bonds; and (iv) interest rate swap agreements (under which a Trust would make periodic payments to the counterparty at a fixed rate of interest based on a stated principal amount, such as the principal amount of Bonds in the variable rate class, in exchange for receiving corresponding periodic payments from the counterparty at a variable rate of interest based on the same principal amount). It is expected that other mechanisms may be identified in the future. Applicant will give the SEC notice by letter of any such additional mechanisms before they are utilized in order to give the SEC an opportunity to raise any questions as to the appropriateness of their use. In addition, sufficient mechanisms will be placed to ensure the payment of principal of and interest on Variable Rate Bonds secured by stripped mortgage-backed securities issued or guaranteed by GMA, FNMA, FHLMC or trusts established by the Applicant. In all cases, these mechanisms will be adequate to ensure the accuracy of the representation and will be adequate to meet the standards required for a rating of the Bonds in one of the two highest bond rating categories, and no Bonds will be issued for which this is not the case.

[Rel. No. IC-16040; 811-3765]

Cardinal Tax-Exempt Bond Trust, Selective Trusts Program, First Series (and Subsequent Series); Application

October 7, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregulation under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Cardinal Tax-Exempt Bond Trust, Selective Trusts Program, First Series (and subsequent series) ("Applicant").

Relevant 1940 Act Section: Section 8(f) and Rule 8f-1 thereunder.

Summary of Application: Applicant seeks an order declaring that it has ceased to be an invesment company.

Filing Date: The application on Form N-8F was filed on June 30, 1987, and an amendment thereto on October 7, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either

personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicant, 155 East Broad Street, Columbus, Ohio 43215.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272–2847 or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application on Form N–8F is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who may be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations: 1. On June 16, 1983, Applicant filed a registration statement on Form N–8B–2, thereby registering under the 1940 Act as a unit investment trust. On June 16, 1983, Applicant filed Form S–6 to register under the Securities Act of 1933, and such registration statement was subsequently withdrawn on April 4, 1984. Applicant never made a public offering of its securities and is not a party to any litigation or administrative proceeding. Applicant does not have any assets or liabilities. Applicant has no shareholders and is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 35–24471]

Filings Under the Public Utility Holding Company Act of 1935 ("Act"); National Fuel Gas Supply Corp., et al.

October 8, 1987.

Notice is hereby given that following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application and/or declaration(s) should submit their views in writing by November 2, 1987 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the adresses specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall idenfity specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

National Fuel Gas Supply Corporation, et al. (70–6991)

National Fuel Gas Company ("National"), 30 Rockefeller Plaza, New York, New York 10112, a registered holding company, and it subsidiaries, National Fuel Gas Supply Corporation ("Supply"), Seneca Resources Corporation ("Seneca"), and Empire Exploration, Inc. ("Empire"), all located at 10 Lafeyette Square, Buffalo, New York 14203, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 7, 9(a), 10, 12(f), and 13 of the Act and Rules 45, 86, 87, 90, and 91 thereunder.

By authority granted in three prior orders in this matter, the National system undertook a series of intra-system property transfers, including the granting or retention of incidental property rights relating to mineral, coal, timber, and gas storage interests, and rights-of-way. All such conveyances were part of National's overall functional reorganization plan (HCAR Nos. 23465, 23585 and 23856, November 1, 1984, January 30, 1985 and October 4, 1985, respectively).

Supply and Seneca now proposes to modify the reorganization plan, prior to September 30, 1989, by effecting certain property transfers, which will result in the consolidation of the National system's Appalachian coal, mineral and timber resources, and unused storage rights in Seneca, and the National system's transmission rights in Supply. Supply proposes to transfer to Seneca certain land containing coal, mineral, timber and/or gas storage rights in properties located primarily in New York and Pennsylvania, and certain separate coal, mineral, timber and/gas storage rights, some of which were reserved or retained by Supply in connection with transferring oil and gas rights or interests to Empire. Supply will retain rights respecting existing and future pipelines relative to those properties. These properties will not exceed approximately 150,000 acres in the aggregate. Seneca proposes to convey to Supply rights for existing and future pipelines on land it owns. All transfers will be made at net book value, as of the previous September 30, unless no book value has been recorded. In those instances, the conveyances will be made for nominal consideration.

Monongehela Power Company, et al. (70–7300)

Monongehela Power Company ("Monongehela"), 1310 Fairmont Avenue, Fairmont, West Virginia 26554, The Potomac Edison Company ("Potomac") Downsville Pike, Hagerstown, Maryland 21740, and West Penn Power Company ("West Penn"), 800 Cabin Hill Drive, Greensburg, Pennsylvania 15601, wholly owned electric utility subsidiaries of Allegheny Power System, Inc., a registered holding company, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 6(b), and 7 of the Act and Rule 50 thereunder.

A notice was issued on September 24, 1987 (HCAR No. 24464) concerning a proposal to extend through December 31, 1988 the period during which Monongehela and West Penn may issue and sell up to $75 million and $35 million, respectively, of first mortgage bonds remaining to be sold, as previously authorized by order of the Commission dated June 12, 1987 (HCAR No. 24410). This supplemental notice adds Potomac's proposal to issue and sell, for refunding purposes, up to $70 million of first mortgage bonds remaining to be sold, as previously authorized, through December 31, 1988.

N.W. Electric Power Cooperative, Inc. (70–7445)

N.W. Electric Power Cooperative, Inc. ("Cooperative"), West Grand Avenue, P.O. Box 312, Cameron, Missouri 64429, has filed an application for exemption from the provisions of the Act pursuant to section 3(a)(1) thereof.

Cooperative, a Missouri corporation incorporated under the Missouri Rural Electric Cooperative Act, is a nonprofit, rural electric distribution cooperative. Its operations are confined to 28 counties in northwest Missouri and two

VOL

199
OC
15
1987
UMI

counties in southwest Iowa. It is a generation-and-transmission-type cooperative financed by the Rural Electrification Administration of the United States Department of Agriculture ("REA") and is designated MISSOURI 72, GENTRY. It sells electric energy at wholesale to its eight member/owner rural electric distribution cooperatives. Cooperative nominates two representatives to sit on Cooperative's bond board of directors. Cooperative elects the persons who serve on the board of directors of Service. It is stated the election of directors and the management of the affairs of Cooperative are effectively audited and regulated by REA.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Johathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Order Adjusting International Cargo Rate Flexibility Level

Policy statements PS-109, implemented by Regulation ER-1322 of the Civil Aeronautics Board and adopted by the Department, established geographic zones of cargo pricing flexibility within which cargo rate tariffs filed by carriers would be subject to suspension only in extraordinary circumstances.

The SFRL for a particular market is the rate in effect on April 1, 1982, adjusted for the cost experience of the carriers in the relevant ratemaking entity. The first adjustment was effective April 1, 1983. By Order 87-4-2, the Department established the currently effective SFRL adjustments.

In establishing the SFRL for the six-month period starting October 1, 1987, we have projected nonfuel costs based on the year ended June 30, 1987, data and have determined fuel prices on the basis of the latest experienced monthly fuel cost levels as reported to the Department by the carriers.

By Order 87-10-18 cargo rates may be adjusted by the following adjustment factors over the April 1, 1982, level:

Atlantic	1.1190
Western Hemiphere	.9279
Pacific	1.2674

FOR FURTHER INFORMATION CONTACT: Julien Schrenk, (202) 366-2441.

By the Department of Transportation:

Dated: October 9, 1987.

Philip W. Haseltine,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Federal Highway Administration

[Georgia Project EDS-460(1)]

Environmental Impact Statement; Newton, Rockdale, Walton and Gwinnett Counties, GA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Newton, Rockdale, Walton and Gwinnett Counties, Georgia.

FOR FURTHER INFORMATION CONTACT: Thomas D. Myers, District Engineer, Federal Highway Administration, Suite 300, 1720 Peachtree Road, NW., Atlanta, Geogia 30367, telephone (404) 347-4751, or Peter Malphurs, State Environmental/Location Engineer, Georgia Department of Transportation, Office of Environment/Location, 3993 Aviation Circle, Atlanta, Georgia 30336, telephone (404) 696-4634.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Georgia Department of Transportation (GDOT) will prepare an Environmental Impact Statement (EIS) on a proposal to construct a new location, four-lane divided highway from Interstate 20 in Newton County to I-85 in Gwinnett County. The project length is approximately 31 miles. The proposed work is necessary to accommodate existing and future traffic demand resulting from the continued growth in the Metropolitan Atlanta area. Alternatives under consideration include (1) taking no action; (2) using alternate travel modes; and (3) constructing a four-lane, limited access highway on new location.

Letters describing the proposed action and soliciting comment will be sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. A public information meeting has been held for the proposed action and a public hearing is planned for early in 1988. Public notice will be given of the time and place of the hearing. The draft EIS will be available for public and agency review and comment. No formal scoping meeting is planned at this time. To ensure that the full range of issues related to this proposed project are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action on the EIS should be directed to the FHWA at the address provided above.

(The Catalog of Federal Domestic Asssitance Program Number is 20.205, *Highway Research, Planning and Construction.* Georgia's approved clearinghouse review procedures apply to this program.)

Issued on: October 1, 1987.

Thomas D. Myers,

District Engineer, Federal Highway Administration, Atlanta, GA.

[FR Doc. 87-23826 Filed 10-14-87; 8:45 am]

BILLING CODE 4910-22-M

Federal Railroad Administration

[FRA Waiver Petition Docket Number RSOR-87-1]

Petition for Relief From Requirements of Blue Signal Protection of Workmen; Union Pacific Railroad Co.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that Union Pacific Railroad Company (UP) has petitioned the Federal Railroad Administration (FRA), for permanent relief from the requirements of 49 CFR 218.25. This section establishes minimum requirements for the protection of railroad employees engaged in the inspection, testing, repair, and servicing of rolling equipment, on main tracks, whose activities require them to work on, under, or between such equipment and subject them to the danger of personal injury posed by any movement of such equipment. Train and yard crews are excluded from such protection except when assigned to work on rolling equipment that is not part of the train or yard movement they have been called to operate.

The UP requests a waiver of the requirement for blue signal protection at the rear end of trains being serviced at the Rawlins, Wyoming, fueling facility on main tracks 1 and 2 and both passing tracks between control points 680 and 685, milepost 680 to milepost 685. Train movements over these main and passing tracks are governed by a Centralized Traffic Control signal system which provides automatic signal protection for the rear of the trains by displaying a "stop" aspect in the block behind the train that is stopped. The UP asserts that this alternative protection does not

compromise safety and requests this waiver in order to avoid significant train delays.

Interested person are invited to participate in this proceeding by submitting written views and comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the appropriate Docket Number (Docket Number RSOR–87–1) and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Communications received before November 30, 1987, will be considered by FRA before final action is taken. Comments received after that will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 8201, Nassif building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on October 5, 1987.

J.W. Walsh,

Associate Administrotor for Safety.

MARINE MAMMAL COMMISSION

TIME AND DATE: The Marine Mammal Commission and its Committee of Scientific Advisors on Marine Mammals will meet in executive session on Thursday, December 10, 1987, from 8:30 a.m. to 10:00 a.m. Public sessions of the Commission and the Committee meetings will be held on Thursday, December 10, from 10:00 a.m. to 5:30 p.m., on Friday, December 11, from 9:00 a.m. to 5:30 p.m., and on Saturday, December 12, from 9:00 a.m. to 12:30 p.m.

PLACE: Hyatt Regency, 400 SE. Second Avenue, Miami, Florida 33131–2197, Telephone 305/358–1234.

STATUS: The executive session will be closed to the public. All other portions of the meeting will be open to public observation. Public participation will be allowed if time permits and it is determined to be desirable by the Chairman.

MATTERS TO BE CONSIDERED: The Commission and Committee will meet in public session to discuss a broad range of marine mammal issues. Major emphasis will be on the West Indian manatee. In addition, the Hawaiian monk seal, habitat protection, the die-off of bottlenose dolphins (*Tursiops truncatus*) along the Atlantic coast,

certain international activities affecting marine mammals, marine debris, permits, and re-authorization of the Marine Mammal Protection Act will be discussed.

SUPPLEMENTARY INFORMATION: This is a second notice of the Commission's December meeting and does not constitute any change in the scheduling, location, or agenda. The matters to be considered are those which were originally published in the August 19, 1987 (52 FR 31121) Notice.

CONTACT PERSON FOR MORE INFORMATION: John R. Twiss, Jr., Executive Director, Marine Mammal Commission, 1625 I Street NW., Washington, DC 20006, 202/653–6237.

Date: October 8, 1987.

John R. Twiss, Jr.,

Executive Director.

BILLING CODE 6820–31–M

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [52 FR 37398 October 6, 1987].

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Tuesday, September 29, 1987.

CHANGE IN THE MEETING: Additional item.

The following additional item was considered at a closed meeting on Thursday, October 8, 1987, at 10:30 a.m.

Formal order of investigation.

Commissioner Cox, as duty officer, determined that Commission business required the above change.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Brent Taylor at (202) 272–2014.

Shirley E. Hollis,

Assistant Secretary.

October 9, 1987.

[FR Doc. 87–23934 Filed 10–13–87; 2:06 pm]

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of October 12, 1987:

A closed meeting will be held on Wednesday, October 14, 1987, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Wednesday, October 14, 1987, at 2:30 p.m., will be:

Consideration of *amicus* participation.

Opinion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Douglas Michael at (202) 272–2467.

Shirley E. Hollis,

Assistant Secretary.

October 9, 1987.

Trade Secret Claims for Emergency Planning and Community Right-to-Know Information; and Trade Secret Disclosures to Health Professionals; Proposed Rule

VOL 52 ISS 199 OC 15 1987 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 350

[FRL-3261-5]

Trade Secret Claims for Emergency Planning and Community Right-to-Know Information; and Trade Secret Disclosures to Health Professionals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This proposed rule publishes the procedures for claims of trade secrecy for facilities reporting under sections 303 (d)(2) and (d)(3), 311, 312 and 313 of Title III, and for EPA's handling of such claims, under the Superfund Amendments and Reauthorization Act of 1986, for submission and handling of petitions requesting disclosure of chemical identities claimed as trade secret, and for disclosure to health professionals of Title III information claimed as trade secret. The proposed rule published today will not become effective until promulgated in final form following opportunity for comment. Until then, the proposed rule may be used as guidance by affected parties.

DATES: Written comments on the proposed rule must be received on or before December 14, 1987. A series of public meetings will be scheduled about mid-November to receive comment. For further information contact the Chemical Emergency Preparedness Hotline at 1-800-535-0202 (in Washington, DC at (202) 479-2449) or look for notice in the **Federal Register** in mid-October.

ADDRESS: Written comments should be submitted in triplicate to Preparedness Staff, Superfund Docket Clerk, Attention: Docket Number 300 PQ-TS, Superfund Docket Room LG-100, U.S. Environmental Protection Agency, Mail Stop WH 548D, 401 M Street SW., Washington, DC 20460.

Copies of materials relevant to this rulemaking are contained in the Superfund Docket located in Room LG-100, at the U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The docket is available for inspection by appointment only between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday, excluding Federal holidays. The docket phone number is (202) 382-3046. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Beverly D. Horn, Attorney-Advisor, Office of General Counsel, Contracts and Information Law Branch, LE-132G, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-5460, or the Chemical Emergency Preparedness Program Hotline at 1-800-535-0202 (in Washington, DC at (202) 479-2449).

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Introduction
  A. Authority
  B. Background of this Rulemaking
II. Trade Secret Claim Procedure
  A. Definition of Trade Secret
  B. Methods of Claiming Trade Secrecy
  C. Claims Under Sections 303(d)(2) and 303(d)(3)
  D. Claims Under Section 311
  E. Claims under Section 312
  F. Claims Under Section 313
  G. Initial Substantiation
  H. Claims of Confidentiality in the Substantiation
  I. Submissions to State and Local Authorities
III. Petition Requesting Disclosure of Chemical Identity Claims as Trade Secret
IV. EPA Review of Trade Secrecy Claims
  A. Overview of the Process
  B. Determination of Sufficiency
  C. Determination of Insufficiency
  D. Determination of Trade Secrecy
  E. Enforcement
V. Relation of Section 322 to Other Statutes
  A. Relationship to State Confidentiality Statutes
  B. Overlap with Other EPA-Administered Statutes
  C. Relationship to Freedom of Information Act
VI. Release of Trade Secret Information
  A. Releases to States
  B. Releases to Authorized Representatives of EPA
VII. Disclosure to Health Professionals
  A. Non-emergency Diagnosis or Treatment
  B. Emergency Situations
  C. Preventive and Treatment Measures
  D. Statement of Need
  E. Confidentiality Agreement
  F. Related Issues
VIII. Summary of Supporting Analyses
  A. Regulatory Impact Analysis
  B. Regulatory Flexibility Analysis
  C. Paperwork Reduction Act

I. Introduction

A. Authority

EPA is proposing this rule pursuant to sections 322 and 323 of Title III of the Superfund Amendments and Reauthorization Act of 1986, Pub. L. 99-499. Title III is also cited as "The Emergency Planning and Community Right-To-Know Act of 1986." Section 322 of Title III provides the procedures for claiming trade secrecy for information submitted under sections 303 (d)(2) and (d)(3), 311, 312 and 313. It also provides a process whereby members of the public can file petitions requesting the disclosure of chemical identities claims as trade secret. Section 323 provides procedures for access to chemical identities, including those claimed as trade secret, by health professionals who need the information for diagnosis, treatment or research.

B. Background of this Rulemaking

The Superfund Amendments and Reauthorization Act of 1986 (SARA), Pub. L. 99-499, signed into law on October 17, 1986, amends and reauthorizes portions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601 *et seq.* Title III of SARA is a free-standing statute known as "The Emergency Planning and Community Right-to-Know Act of 1986." It contains provisions requiring facilities to report to State and local authorities, and EPA, the presence, use and release of extremely hazardous substances (described in sections 302 and 304), and hazardous and toxic chemicals (described in sections 311, 312, and 313 respectively). For the reporting required in sections 303, 311, 312, and 313, a submitter may claim the chemical reported as trade secret.

1. *Section 303.* Section 303 involves the formulation of comprehensive emergency reponse plans for extremely hazardous substances. These are any of 406 substances on a list published by EPA under section 302. The regulations for sections 302, 303, and 304 were published on April 22, 1987, at 52 FR 13378.

Any facility where an extremely hazardous substance under section 302 is present in excess of the threshold quantity (as determined by EPA) must report to the State emergency response commission, established under section 301 of Title III. The local emergency planning committee, also established under section 301 of Title III, will contact any facility that has identified itself, in order to formulate a local emergency contingency plan. In this planning process, a facility is required to provide the local emergency planning committee with information the committee requests, except that the facility may withhold trade secret chemical identity from the committee. The facility must also inform the committee of any relevant changes which occur or are expected to occur which may affect the contingency plan. When informing the committee of these changes, the facility may also withhold trade secret chemical identity from the committee.

2. *Sections 311 and 312.* Section 311 requires the owner or operator of facilities subject to the Occupational Safety and Health Act of 1970 (OSHA) and regulations promulgated under that Act (15 U.S.C. 651 *et seq.* as amended, 52 FR 31852 [August 24, 1987]) to submit material safety data sheet (MSDS), or a list of the chemicals for which the facility is required to have an MSDS, to the local emergency planning committees, State emergency response commissions, and local fire departments. The facilities are required to submit the MSDS or alternative list by October 17, 1987, or three months after the facility is required to prepare or have an MSDS for a hazardous chemical under OSHA regulations, whichever is later. Any trade secret chemical identity may be withheld from the MSDS or list of chemicals, provided the submitter follows the trade secret claims procedures under the section 322 regulation.

Under Section 312, owners and operators of facilities that must submit an MSDS under section 311 area also required to submit additional information on the hazardous chemicals present at the facility. Beginning March 1, 1988, and annually thereafter, the owner or operator of such a facility must submit an inventory form containing an estimate of the maximum amount of hazardous chemicals present at the facility during the preceding year, an estimate of the average daily amount of hazardous chemicals at the facility, and the location of these chemicals at the facility. Section 312(a) requires owners or operators of such facilities to submit the inventory form to the appropriate local emergency planning committee, State emergency response commission, and local fire department on or before March 1, 1988, (or March 1 of the first year after the facility first become subject to the OSHA MSDS requirements for a hazardous chemical) and annually thereafter on March 1.

Section 312 specifies that there be two reporting "tiers" containing information on hazardous chemicals at the facility in different levels of detail. "Tier I," containing general information on the amount and location of hazardous chemicals by category, is submitted annually. "Tier II," containing more detailed information on individual chemicals, is submitted upon request. There will be no trade secret claims for Tier I reporting since no specific chemical identity is given. However, submitters may withhold trade secret chemical identity from the Tier II form.

OSHA recently published a final rulemaking at 52 FR 31852, on August 24, 1987, expanding coverage of the facilities required to maintain MSDSs. The number of facilities thereby subject to reporting under sections 311 and 312 will have expended from 350,000 to over 4 million, starting in 1988.

The proposed regulation for sections 311 and 312 was published at 52 FR 2836 on January 27, 1987. The final regulation will be published in the near future.

3. *Section 313.* Section 313 is the last reporting requirement in Title III in which trade secret claims can be made. Under section 313, a toxic chemical release inventory form (published by EPA) must be filed with a designated State agency, and EPA. This form must be filed for any toxic chemical (on a list published by EPA) which is manufactured, processed or otherwise used in amounts exceeding the threshold quantity at a covered facility. The form also indicates the total annual releases of the chemical to the environment. A covered facility is any facility with 10 or more employees in SIC Codes 20–39. The list of toxic chemicals was published in the section 313 proposed rule on June 4, 1987 at 52 FR 21152. As with other sections of Title III, trade secret chemical identity may be withheld from the toxic chemical release inventory form.

4. *Section 322.* The section 322 regulations contain the procedures which a submitter must follow in order to file a trade secret claim. These claims are submitted to EPA only, by submitting an unsanitized version of the document containing the Title III information. This version will contain the chemical identity claimed as trade secret. The submitter must also submit a santitized version, which is identical to the unsanitized version in all respects except that the trade secret chemical identity is deleted, and instead a generic class or category is included. This is the version which is submitted to the State or local authorities, as appropriate.

Section 322(b) of Title III requires that a submitter file a substantiation of its trade secret claim with the filing containing the chemical identity claimed as trade secret. This up-front substantiation will consist of the answers to seven questions which are intended to elicit sufficient factual support to indicate whether the claim will meet the criteria set forth in the statute for a claim of trade secrecy.

That statute also allows submitters to claim as trade secret any trade secret or confidential business information which the submitter must include in the substantiation in order to fully answer the seven questions. This claim of trade secrecy is more expansive in scope than that allowed under the reporting requirements of Title III, because it it not limited solely to chemical identity, and includes any trade secret or confidential business information. A detailed explanation on how to make a trade secrecy claim is found under section II.G. below.

The regulation contains the procedures for filing petitions by the public to request disclosure of chemical identity claimed as trade secret. (The public petition process does not cover requests for public disclosure of information claimed as trade secret other than chemical identity. These requests for disclosure must be submitted under EPA's Freedom of Information Act regulations at 40 CFR Part 2.) The section 322 regulation also sets forth procedures the Agency must follow in making a determination as to whether any chemical identity claimed as trade secret is in fact a trade secret. These determinations will be made by the program designated to receive and handle trade secret claims for that particular reporting section in Title III. The Office of General Counsel will hear intra-agency appeals from the determinations of trade secrecy.

5. *Section 323.* The section 323 regulation contains provisions allowing health professionals to gain access to chemical identities, including those claimed as trade secret, in three different situations. The first situation is for non-emergency treatment and diagnosis of an exposed individual. Second, access is permited for emergency diagnosis and treatment. Finally, health professionals employed by the local government may receive access to a trade secret chemical identity to conduct preventive research studies and to render medical treatment. In all situations but the medical emergency, the health professionals must submit a written request and a statement of need, as well as a confidentiality agreement, to the facility holding the trade secret. The statement of need verifies that the health professional will be using the trade secret information only for the needs permitted in the statute, and the confidentiality agreement ensures that the health professional will not make any unauthorized disclosures of the trade secret.

II. Trade Secret Claim Procedure

A. Definition of Trade Secret

In accordance with section 322(c) of Title III, the definition of a trade secret in this regulation is equivalent to that in the Restatement of Torts, section 757.

and the regulation developd by the Occupational Safety and Health Administration to implement its Hazard Communication Standard. The OSHA Hazard Communication Standard requires disclosures of the specific chemical identity of chemicals to which employees are exposed in the workplace, except in those cases in which the identity of the chemical in question is determined to be a bona fide trade secret. The U.S. Court of Appeals ruling in *United Steelworkers of America* v. *Auchter*, 763 F.2d 728 (3d Cir. 1985), required that OSHA amend its Hazard Communication Standard to adopt a definition from common law, the Restatement of Torts, section 757, Comment b. (1939), which reads: " 'trade secret' may consist of any formula, pattern, device, or compilation of information which is used in one's business, and which gives [the employer] an opportunity to obtain an advantage over competitors who do not know or use it." The court concluded in the *Auchter* case that the term "trade secret" is not intended to provide protection for chemical identities which are readily determinable by reverse engineering.

Title III, however, only allows trade secrecy claims for a subset of the material which is traditionally covered under trade secrecy law. Section 322(a) specifically states that submitters under Title III may withhold only the "specific chemical identity (including the chemical name and other specific identification)" as a trade secret. The "specific chemical identity" means either the chemical name or other specific identification such as the Chemical Abstract Services Registry Number (CASRN).

The statute is unclear as to the permissible scope for claims of trade secrecy for chemical identity. The most narrow interpretation would be to limit a claim of trade secrecy solely to the mere presence of the particular chemical at the facility, or the chemical composition of the chemical itself. Congress stated in the Conference Report that, "the knowledge of [the] presence [of a specific chemical] at the purchasing facility could effectively define for its competitors the process and/or products being made there." H.R. CONF. REP. NO. 99–962, 99th Cong., 2d Sess. 304 (1986).

Throughout the Conference Report, however, Congress also displayed general concern for the protection of all legitimate trade secrets. For instance, in discussing the reporting requirements under section 313, it was noted, "[t]he conference substitute provides for reporting categories of use and ranges of chemical present because the exact [identity] of identified chemical[s] at a facility or the exact amount present may disclose secret processes." *Id.* at 298. Similarily, in discussing the reporting requirements under section 312, Congress stated, "[i]n order to protect chemical process trade secret information, reporting ranges may need to be broad." *Id.* at 290. Congress likely anticipated that it would be possible for the required reporting on the forms under Title III to be structured broadly enough to avoid compromising legitimate trade secrets. EPA has made every effort to do this. EPA believes that even with the use of broad ranges and reporting categories, however, the amount of detail requested under Title III may in some cases still allow cross-referencing of information which could reveal valuable trade secret information.

For these reasons, EPA believes that the statute allows trade secrecy claims for chemical identity to be made for the linkage between chemical identity and other information reported on Title III submissions (e.g., specific process information and special handling procedures), in addition to claims relating to the presence of a chemical at a facility or the chemical composition of the chemical, through claiming chemical identity to be a trade secret. Submitters will be required to meet the four criteria for supporting a claim of trade secrecy set forth in section 322(b) of the statute, and discussed in greater detail in section II.G. below, for all such claims.

As a practical matter, EPA believes that this interpretation of the scope of trade secrecy will not involve great numbers of additional claims, because EPA expects that submitters will be unable to meet the four statutory criteria for trade secret linkages other than the presence of the chemical, or its chemical composition. As an example, EPA does not expect linkages between the chemical identity and the amount on site to meet all the section 322(b) requirements. Where the identity of a chemical that a company uses in a particular product is publicly known but the amount on site is not known, the Agency considers it unlikely that a submitter will be able to show that the chemical identity is not readily discoverable through reverse engineering (section 322(b)(4)), since the chemical identity is already a matter of public knowledge.

EPA also believes that this interpretation does not run counter to the other major public policy thrust in Title III—that of public disclosure—because the requirement of an up-front substantiation, which will cause submitters to justify their claims, will limit spurious claims. Further, EPA's intention is to randomly evaluate trade secret claims and to prosecute vigorously those submitting frivolous claims. The $25,000 fine per frivolous claim under such circumstances is evidence of Congress's intent to deter such claims. All submitters should be aware that supplemental information submitted to EPA after the initial substantiation should clearly confirm the validity of their claim as set out in the initial substantiation, or they may be subject to the penalty for frivolous claims. EPA requests public comment on the scope of the trade secrecy claim.

The question has been raised as to whether information which may qualify as emissions or effluent data, respectively, under section 114(c) of the Clean Air Act and section 308(b) of the Clean Water Act, may be claimed as trade secret under section 322. The second criterion of the four which a trade secret claimant must meet, under section 322(b), requires that information claimed as trade secret "is not required to be disclosed, or otherwise made available, to the public under any other Federal or State law." EPA's position is that this language in section 322(b) refers to specific information previously submitted to a Federal or State authority and determined to be publicly disclosable, or information previously submitted to a Federal or State authority under a law or regulation which does not allow a claim of confidentiality.

Information which has been determined administratively or judicially to constitute emissions or effluent data within the meaning of section 114(c) of the Clean Air Act, or section 308(b) of the Clean Water Act is required to be disclosed to the public and could not be withheld from disclosure under section 322. A company could not claim as trade secret information as to which a trade secrecy claim has been categorically disallowed, such as information required in NPDES permit applications (40 CFR 122.7(c)). Also, a company could not claim as trade secret data already collected by EPA where the Agency has decided that the data presented no valid claim of trade secrecy, either because it was emissions or effluent data or for other reasons.

A further question has been raised concerning the status of information which EPA could obtain, but has not requested, under the Clean Air Act or Clean Water Act and of information in EPA's possession which could constitute emissions or effluent data, but as to which no determination has been made

whether it is trade secret, or, if it is, whether it is emissions or effluent data. There is no discussion of this issue in the Conference Report or elsewhere. Congress likely intended to leave undisturbed the status of information as to which no claim of confidentiality was permitted under State or Federal law, or as to which a decision had been made that no valid claim was presented. However, a trade secret claimant should not be required to show that the chemical identity submitted to the Agency and claimed confidential would not constitute emissions or effluent data required to be made public by EPA if it had been submitted under section 114(c) of the Clean Air Act or section 308(b) of the Clean Water Act. On the other hand, a successful claim that information is trade secret under Title III would not be determinative of the status of the information under the Clean Water Act of Clean Air Act, where no determination had been made whether it constituted emissions or effluent data. EPA requests comment on this issue.

B. Methods of Claiming Trade Secrecy

There are five separate submissions that can be made under Title III which may include a claim of trade secrecy. These are: (1) The notification of any changes at the facility which would affect emergency plans, under section 303(d)(2); (2) answers to questions posed by local emergency planning committees under section 303(d)(3); (3) material safety data sheets or chemical lists submitted under section 311; (4) Tier Two emergency and hazardous chemical inventory forms submitted under section 312; and (5) the toxic release inventory form submitted under section 313.

The basic requirements for making a claim are similar, although there are some differences among the different sections. These differences will not affect the validity of a submitter's claim, provided the submitter adheres to all of the requirements. The basic requirements are as follows. First, EPA must receive a copy of the document required to be submitted under sections 303(d)(2) and (d)(3), 311, 312, or 313, which includes the specific chemical identity claimed as trade secret. Second, EPA must receive a sanitized copy of this same document in which the chemical identity claimed as trade secret is deleted and in its place is included the generic class or category of the chemical claimed trade secret. This sanitized copy should be identical to the original in all respects except that it does not contain the chemical identity. Third, EPA must receive a substantiation for each chemical claimed as trade secret, as explained in Second II.G. below. Although these three items are the minimum required for a claim of trade secrecy under all sections, EPA suggests that submitters carefully review the requirements under each section before filing a trade secrecy claim.

In some cases, a facility may not know the identity of a chemical that it uses under a trade name or in a proprietary mixture, but might want to file a trade secret claim for the trade name or mixture. The user will be allowed to file for trade secrecy, using the trade name as chemical identity and filling out those parts of the Title III submittal sent to EPA that it can supply without knowing the specific chemical identity. The user would still be required to file a complete substantiation. However, some users making trade secret claims for trade name products or mixtures may feel that some portions of the substantiation questions do not apply to their trade secret claim. If so, the user must answer the question to the best of its ability by explaining why it believes the question to be inapplicable.

Users who do not wish to make a trade secret claim for the trade name or mixture, and have not been provided with the specific chemical identity in the trade name or mixture, are not considered to be withholding specific chemical identity for purposes of submitting trade secret claims and substantiations.

EPA considered imposing more extensive requirements on users. One approach would require the supplier to inform EPA of the chemical identity and complete the substantiation questions for the user. Another option considered was the "best efforts" approach proposed in the preamble to the section 313 rule, published on June 4, 1987 (52 FR 21151, 21155), which would require the user to make multiple attempts to obtain the chemical identity from the supplier, including offering to enter into a confidentiality agreement with the supplier.

The Agency decided in favor of the more pragmatic approach taken in this proposal. In general, the Agency is concerned with lessening the burden on users who wish to file for trade secret status, especially since suppliers are unlikely to divulge information to users under a wide variety of circumstances even if the users are repeatedly persistent. EPA requests comment on this issue.

As provided in the final 311 and 312 regulation with regard to reporting mixtures, owners or operators of facilities can make trade secret claims for mixtures on their sections 311 and 312 submittals by either claiming an element or compound in the mixture as trade secret or claiming the entire mixture as trade secret. If the mixture is reported as a whole, a substantiation should be provided for the entire mixture; if the individual elements are reported, then a substantiation should be submitted for each element.

All trade secret claims and petitions requesting disclosure of identities claimed as trade secret should be sent to the following address: U.S. Environmental Protection Agency, P.O. Box 70266, Washington, DC 20024–0266. The Agency will be examining claims processing issues and may need to establish an alternate address for section 313 claims in the future.

C. Claims Under Sections 303(d)(2) and 303(d)(3)

Section 303 concerns the formulation of contingency plans by local emergency planning committees. Section 303(d)(2) states that owners or operators of facilities must promptly inform committees of any relevant changes occurring at the facilities as the changes occur or are expected to occur. Section 303(d)(3) states that owners or operators of facilities must promptly provide information to committees when committees request information from facilities necessary for the development and implementation of emergency plans.

A trade secret claim under section 303(d)(2) must include a copy of the notification of changes in the facility. This notification may be in the form of a letter. The document must include the name and address of the submitter. Chemical identity claimed as trade secret must be clearly marked "CONFIDENTIAL" or "TRADE SECRET." A trade secret claim under section 303(d)(3) must include a copy of the information requested by the local emergency planning committee and the information provided by the facility in response to the request. A letter containing this information is sufficient. The document must include the name and address of the submitter. Chemical identity claimed as trade secret must be clearly marked "CONFIDENTIAL" or "TRADE SECRET."

In both of these submittals, the generic class or category of each chemical ("class" is synonymous with "category") claimed as trade secret should be indicated in parentheses directly after the claimed chemical identity. The generic class or category for chemicals subject to section 303 reporting is discussed below in this section.

EPA must also be provided with a sanitized copy of this document. The sanitized copy should be a duplicate of the original except that the submitter must delete any chemical identity claimed as trade secret, leaving in its place the generic class or category for each claimed chemical. This sanitized copy is the copy which is to be sent to the local emergency planning committee. Finally, for each chemical identity claimed as trade secret, a complete substantiation must be submitted. The substantiation will be discussed in greater detail in Section II.G. below.

Generic Class or Category. When a committee develops its contingency plan, identification of the specific chemicals that are present in its jurisdiction is vital to the negotiation of the plan and is the first issue to be resolved in the initial preparation of the plan. As stated above, if a facility does not wish to reveal the specific chemical identity to the committee in the context of section 303(d)(2) and (d)(3), the section 303 submittal must include in the place of chemical identity, the generic class or category of the chemical claimed as trade secret.

EPA is proposing three options regarding the choice of generic class or category for section 303(d)(2) and (d)(3) submittals. For purposes of reporting prior to promulgation of the final rule, the Agency suggests that submitters choose an appropriate generic class or category based upon any of the three alternatives presented. The purpose of using generic classes or categories when chemical identity is requested by the committee during the contingency planning process and is not disclosed by facilities is to aid the public by providing relevant information about the chemical as a substitute for knowledge which could be gained from the specific chemical identity. We invite comment from the public on each of the alternatives presented below in terms of which option does, in fact, best aid the public. All of the alternatives are based on the concept of an example list of generic classes or categories.

The purpose of a contingency plan is to provide effective, expedient emergency response to aid response workers and community residents in the event of a chemical release. In order to prepare an effective contingency plan, the hazards involved with the specific chemicals such as explosivity or flammability, adverse health effects associated with the release, and special safety equipment needed to contain the release must be known. Only by knowing this information, can proper equipment and procedures be used to contain the release. If chemical identity is claimed as trade secret by a facility, such information can still be obtained through the determination of a generic class or category that reflects the information, as well as by other questions posed to the facility by the local emergency planning committee.

EPA recognizes that each individual committee across the country will have its own unique safety needs to consider when developing its contingency plan. For example, a committee must take into account various factors relating to risk management and assessment such as distance of the affected community from the facility, type of land use near the facility, and level of sophistication of the first responder. These factors vary greatly from one committee to the next. Likewise, facilities across the country also differ widely in terms of potential hazards arising from releases, adverse health effects associated with the releases, and prevention techniques employed to guard against the hazards.

Because of this wide variation of factors for both committees and facilities, the Agency believes it inappropriate to designate specific generic classes or categories which must be used by each committee and facility in all cases where specific chemical identity is claimed as trade secret. To devise such a list, taking into account the variety of important safety factors described above, would be impossible. Instead, the Agency believes that committees and facilities should engage in discussion with each other in order to jointly arrive at generic classes or categories that accurately and suitably reflect the hazards of specific chemical releases, prevention techniques to guard against the releases, adverse health effects associated with the chemical releases and any other safety information, as described above, considered significant.

a. *Alternative A.* This alternative allows committees and facilities to arrive at their own choices of generic classes or categories with no example classes offered by the Agency. In suggesting this approach, however, EPA strongly encourages committees and facilities to arrive at classes or categories that incorporate the safety information discussed above. In this way, class or category determination can be a meaningful substitute for chemical identity and can serve as the vehicle in which important safety facts for contingency planning purposes can be shared and put to good use.

b. *Alternative B.* This alternative differs from Alternative A in that the hazard categories set forth in the final sections 311 and 312 regulation are provided as examples that can be chosen by committees and facilities in arriving at generic classes or categories after discussions. Under this option, either one of the five categories set forth below can be chosen to be the generic class or category, or another hazard-based class can be chosen.

The following is the example list of hazard-based classes or categories:

1. Acute (Immediate)
2. Chronic
3. Fire
4. Sudden Release of Pressure
5. Reactivity

Hazard categories are proposed in this option because, as noted above, contingency planning should have as its goal hazard identification, prevention techniques to guard against the hazards, adverse health effects associated with the releases, and any other safety information the committee and facility consider significant. A generic class or category based on these factors will in most cases be more beneficial for contingency planning purposes than a generic class or category based on chemical structure.

c. *Alternative C.* This alternative differs from the other two options in that the Agency suggests that the determination of class or category by committees and facilities generic be based on chemical structure. It will at times be appropriate for contingency planning purposes to have chemical structure be the basis of the class or category. The important consideration is that hazard identification, hazard prevention techniques, adverse health effects, and any other safety information the committee and facility consider significant be included in the determination of the class or category. These factors are essential to the formulation of an effective contingency plan.

D. Claims Under Section 311

Section 311 concerns the provisions for submissions of material safety data sheets. A trade secret claim submitted under section 311 to EPA must include a copy of the MSDS or chemical list, whichever is submitted by the facility under this section. Chemical identities claimed as trade secret must be clearly marked as "CONFIDENTIAL" or "TRADE SECRET." The generic class or category (the word "class" is synonymous with "category") of the claimed chemical should be inserted directly below the chemical identity. The generic class or category for chemicals claimed as trade secret under sections 311 and 312 is explained below

in this section. This is the unsanitized version of the MSDS.

EPA must also receive a sanitized copy of the MSDS or chemical list, which should be a duplicate of the original in all respects except that the chemical identity claimed as trade secret is deleted and in its place is included the generic class or category of the chemical claimed as trade secret. This is the copy that should be sent to the State emergency response commission, the local emergency planning committee and the local fire department. When sending copies to EPA, the unsanitized copy should be stapled to the sanitized copy, the unsanitized copy on top. In addition, a substantiation for each trade secret chemical identity must be included. An explanation of a sustantiation is set forth in Section II.G. below.

Generic Class or Category. The chemicals covered by sections 311 and 312 are the same as those covered by the Occupational Safety and Health Act of 1970 and its regulations. It is not possible to write a finite list of generic classes or categories for sections 311 and 312 because there is no finite list of chemicals required to be reported under the sections. Therefore, the choice of generic class or category should follow the same process as proposed for section 303 submittals above.

E. Claims Under Section 312

Section 312 requires the submission of emergency and hazardous chemical inventory forms. Information filed on the Tier I emergency and hazardous chemical inventory form will not involve claims of trade secrecy since chemical identity is not requested on the form. Trade secrecy claims under section 312 involve only Tier II inventory forms.

On the Federal section 312 Tier II inventory form, a trade secret box appears to the right of the space for chemical identity. Instructions in the sections 311, 312 final rule, to be published in the near future, direct that if chemical identity is claimed as trade secret, the trade secret box should be checked. As with section 311, EPA must receive an unsanitized copy of the form, i.e., the copy just described with chemical identity included and the trade secret box checked. EPA must also receive a sanitized version of the form which must be a duplicate of the original except that the chemical identity will be deleted and in its place the generic class or category of that chemical will be inserted. The two copies should be stapled to each other, the unsanitized version on top and the sanitized version on the bottom. In order to ensure accurate determination of a trade secret claim, the order of chemical names found on the unsanitized version of the Tier II form (the top page) must match the order of generic classes or categories found on the sanitized version. This sanitized copy of the original form should be sent to the requesting State emergency response commission, local emergency planning committee, or fire department.

In addition, a substantiation must be included for each chemical claimed as trade secret. Explanation of the substantiation is found in Section II.G. below.

Claims of confidentiality regarding the location of chemicals in facilities are not covered by Title III trade secrecy protection. The confidential location information should not be sent to EPA, but only to the requesting entity. This information will be kept confidential by that entity under section 312(d)(2)(F) which refers to section 324. Section 324(a) states that upon request by a facility owner or operator subject to the requirements of section 312, the State emergency response commission and the appropriate local emergency planning committee must withhold from disclosure the location of any specific chemical required by section 312(d)(2) to be contained in a Tier II inventory form.

A few states have expressed an interest in using State-designed Tier II inventory forms rather than the Federal inventory form. Under § 370.40 of the final sections 311, 312 regulation, to be published in the near future, facilities will meet section 312 requirements if they submit the Federal form, an identical State form, or an identical State form with supplemental questions authorized under State law. If a submitter wishes to make a trade secrecy claim, however, he must use the Federal form as his section 312 Tier II submittal. Trade secrecy can be more easily determined by EPA by using the Federal form. State forms that collect information under State right-to-know laws are covered under State confidentiality laws.

F. Claims Under Section 313

Trade secrecy claims under section 313 must include a copy of the toxic release inventory form. This proposed form is published at 52 FR 21152. Under the proposal, the submitter must check the box on the form indicating a trade secrecy claim and include the generic classification and code preassigned to the chemical identity in § 372.42 of the regulation. EPA is reexamining the use of preassigned generic codes for its final section 313 reporting rule.

EPA must also receive a sanitized copy of the toxic release inventory form which is identical to the original except that the chemical identity will be deleted, leaving the generic class or category. A substantiation for each claimed chemical identity must also be submitted, as described in section II.G. below.

G. Initial Substantiation

All claims of trade secrecy for chemical identity must be accompanied by a substantiation for each claim. EPA is planning to use a form for this substantiation. (Section 350.27.) EPA believes this form will assist those persons filing substantiations because the substantiation questions which must be answered are preprinted on the form. These questions are identical to those contained in the regulation.

The substantiation must contain an answer to each of the seven questions posed in the regulation, or an explanation as to why that question is not applicable. These seven questions are based on the four statutory criteria in section 322(b) of Title III. EPA received comment on the proposed sections 311 and 312 regulation that substantiations should only be required after an inquiry as to the specific chemical identity has been received by EPA. EPA considers section 322(a)(2)(A)(ii) of the statute to require an up-front substantiation with each submission. The Conference Report states, "[A] claim [must] be documented at the time the claim is made * * * the claimant must support a claim of trade secrecy with assertions of fact concerning the criteria described below sufficient to show, if such assertions are true, that the specific identity is a trade secret based on those criteria." H.R. CONF. REP. 99–962, 99th Cong., 2d Sess. 303–304 (1986).

More than a short conclusory statement must be made in the substantiation. This is so because EPA is required, under section 322(d) of the statute, to make a determination of "sufficiency" based upon the information submitted in the substantiation. To determine statutory sufficiency, EPA must decide whether, assuming all the information presented in the substantiation is true, it is sufficient to support a claim of trade secrecy. Descriptive factual statements are necessary for this purpose. Also, even though submitters are permitted to submit further detailed information after a petition for disclosure is received or if EPA decides to review a claim on its own, and EPA has found the initial claim sufficient, EPA does not believe that this mitigates the requirement for up-front detailed substantiation. This

UMI

submission of additional information, permitted after EPA determines the initial claim is sufficient, is intended to support the truth of the initial assertions and may consist of information in even greater detail than that originally submitted, such as marketing information.

The substantiation questions are designed to elicit specific factual information from the submitter which will support the following section 322(b) statutory requirements for trade secret protection:

(1) The submitter has not disclosed the information to any other person, other than a member of a local emergency planning committee, an officer or employee of the United States or a State or local government, an employee of such person, or a person who is bound by a confidentiality agreement, and such person has taken reasonable measures to protect the confidentiality of such information and intends to continue to take such measures;

(2) The information is not required to be disclosed, or otherwise made available, to the public under any other Federal or State law;

(3) Disclosure of the information is likely to cause substantial harm to the competitive position of such person; and

(4) The chemical identity is not readily discoverable through reverse engineering.

Information submitted in response to these questions should be as complete as possible. EPA's initial determination as to whether the substantiation is sufficient to support a claim of trade secrecy will be based solely on the information contained in the substantiation. Only if the initial substantiation includes specific information regarding the four factors listed above, will EPA consider the substantiation to be sufficient and allow the submitter to submit further information to show the truth of the assertions in the substantiation, as required by section 322(d) of the statute. The specific criteria for determining whether the substantiation meets the four statutory requirements are set forth in § 350.13.

There are currently seven substantiation questions in § 350.7(a) of this regulation. EPA considered the alternatives of (a) requiring more detailed initial substantiations and (b) requiring no more than a statement of the four factors listed above.

Under the first alternative, the Agency considered initially requiring detailed substantiation like that which must be provided for chemical identity claims for TSCA section 5 Notices of Commencement of Manufacture or Import. 40 CFR 720.85(b). However, this was considered to be overly burdensome to the submitter; moreover, under section 322(d), the Agency may later obtain more detailed information from a submitter to show the truth of the assertions in the initial substantiation.

The second alternative would neither meet the requirements of section 322(a) nor provide EPA with the necessary information to make the determination of sufficiency required by section 322(b). EPA cannot determine the sufficiency of a claim based upon conclusory statements that, for example, disclosure of the chemical identity would cause substantial harm to the competitive position of the submitter. In order for EPA to evaluate such a claim, the Agency would need more information such as the specific use of the substance claimed as trade secret and the value to competitors of knowledge of the presence of the chemical at the facility. If the submitter provided only conclusory statements, this would require the Agency to make further inquiries of each submitter to gain further detail, a time-consuming and costly effort.

Submitters must include a certification with the substantiation, signed by an officer of the submitter, that the information included in the substantiation is true, accurate and complete to the best knowledge and belief of the submitter. This certification is printed on the substantiation form.

Trade secrecy claims with missing substantiations or those lacking a response to each question will be rejected without notice to the submitter, and the chemical identity will be made available to the public. Failure to submit a substantiation with a trade secret claim could make a submitter liable for a fine of up to $10,000 per violation, under section 325(c).

H. Claims of Confidentiality in the Substantiation

Sometimes the submitter may need to refer to the chemical identity claimed as trade secret in the substantiation for that chemical. Also, in order to supply a complete explanation of its claim of trade secrecy, the submitter may include other trade secret or confidential business information in the explanation.

Section 322(f) allows submitters to claim as confidential in the substantiation any information which falls within 18 U.S.C. 1905, the Trade Secrets Act. This includes not only trade secret chemical identity but other trade secret information, as well as any confidential business information. To do this, the submitter must clearly label what information it considers to be trade secret or confidential. This copy of the substantiation is to be submitted to EPA, along with a sanitized copy. In the sanitized copy of the substantiation, the submitter will delete all of the claimed trade secret or confidential business information. If any of the information claimed as trade secret on the substantiation is the chemical identity of a claimed chemical, then the submitter should include the appropriate generic class or category of that chemical on the sanitized version of the substantiation.

No substantiation needs to be submitted for information that the submitter includes in the substantiation and claims as trade secret or confidential. The submitter need only include a certification at the bottom of the substantiation, signed by an officer of the submitter, that the information claimed confidential in the substantiation would, if disclosed, reveal other reveal other business or trade secret information. This statement is included in the certification on the substantiation form. The claims of trade secrecy and confidentiality for information submitted in the substantiation are not subject to the petition process described below because this process applies only to claims of trade secrecy for the chemical identity made under Title III. Instead, requests for disclosure of other trade secret or confidential material must be submitted pursuant to the Freedom of Information Act regulations under 40 CFR Part 2.

I. Submissions to State and Local Authorities

If a trade secrecy claim is made with respect to a particular submission, only the sanitized version of the submission should be sent to the appropriate State or local authorities. Section 322(a)(2)(ii) also requires that a substantiation be included with the Title III submittal. Therefore, only the sanitized version of the accompanying substantiation should be sent to the appropriate State and local authorities. If a version of a form or a substantiation containing trade secret information is sent to a State or local authority by the submitter, it will constitute public disclosure of the information, and the claim will be considered invalid.

III. Petition Requesting Disclosure of Chemical Identity Claimed as Trade Secret

Section 322 provides for a public petition process to request the disclosure of chemical identity claimed as trade secret. This petition process is

applicable only to a chemical identity claimed as trade secret. If requesters desire access to items other than chemical identity claimed as trade secret or confidential in Title III submissions (that is, items claimed as confidential in the substantiation), such requests for disclosure must be made pursuant to EPA's Freedom of Information Act regulations under 40 CFR Part 2.

The petition requesting disclosure must include the petitioner's name, address, and telephone number. It must also include the sanitized copy of the submission (e.g., the MSDS, toxic chemical release form) in which the chemical is claimed as trade secret, and the petitioner must clearly indicate on the form which chemical identity is requested for disclosure. Copies of the sections 303 (d)(2) and (d)(3) filings are available at a location designated by the local emergency planning committee. Copies of the sections 311 and 312 filings are available at locations designated by the State emergency response commission and the local emergency planning committee. Copies of the section 313 filings are available from the public data base maintained by EPA and from the designated State agency.

EPA is requiring a copy of the submission in the proposed rule but has also considered requesting only a reference to the submission. The Agency prefers to require a copy in order to prevent any confusion about what disclosure the petitioner is requesting. Public comment is invited on this issue.

As soon as the petition is filed, EPA will begin the process of reviewing the trade secrecy claim. The time for processing the petition may vary, but the statute requires EPA to reach a decision within 9 months.

IV. EPA Review of Trade Secrecy Claims

Section 322 defines the process by which EPA determines whether a claimed chemical identity is entitled to trade secrecy. First, EPA must decide whether the answers to the substantiation questions are, if true, sufficient to support the conclusion that the chemical identity is a trade secret. This is the determination of sufficiency referred to in the statute and is made prior to any determination on the validity of the trade secrecy claim. The statute requires EPA to follow different procedures depending on whether EPA decides the answers to the substantiation questions are sufficient or insufficient.

A. Overview of the Process

After receiving a petition requesting disclosure of chemical identity, EPA has 30 days to make a determination of sufficiency. If the claim meets EPA's criteria of sufficiency, EPA will notify the submitter that he has 30 days from the date of receipt of the notice to submit supplemental material in writing, supporting the truth of the assertions made in the substantiation. If this additional information is not forthcoming, EPA will make its determination based only upon information previously submitted in the substantiation. Also, failure to provide such additional material may make the submitter liable for a fine of up to $10,000 per violation, under section 325(c).

If the claim does not meet the criteria of sufficiency, EPA will notify the submitter, who may either file an appeal within 30 days to the Office of General Counsel or, for good cause shown, amend the substantiation in support of its claim.

Once a claim has been determined to be sufficient, EPA must decide whether the claim is entitled to trade secrecy. If EPA determines that the facts support the claim of trade secrecy, the petitioner will be notified. If the chemical identity is determined not to warrant trade secrecy, the submitter will be notified.

The statute provides for intra-agency appeal by the submitter to appeal adverse decisions and for U.S. District Court review after intra-agency appeal. This process is explained below in more detail.

B. Determination of Sufficiency

A person withholding specific chemical identity from a submission under Title III must make specific factual assertions that are sufficient to support a conclusion that the chemical identity is a trade secret. These assertions are made by completely answering all of the questions listed in § 350.7 of the regulation. These questions will provide answers to the four requirements set forth in section 322(b) of the statute for claims of trade secrecy.

Section 350.13 of the regulation sets forth criteria for use by EPA in determining whether the answers in the substantiation fully meet the requirements for section 322(b). The criteria listed in § 350.13 can also serve as a guideline for persons preparing substantiations.

To support the first criterion, the facts must show that reasonable safeguards have been taken against unauthorized disclosure of the specific identity, and that the specific chemical identity has not been disclosed to any person not bound by a written confidentiality agreement including local, State or Federal government entities.

In support of the second criterion, the submitter must show that the chemical identity claimed as trade secret is not required to be released: (1) Under a determination by a State or Federal agency that the chemical identity in question is not a trade secret, or (2) under a State or Federal statute which does not allow the chemical identity to be claimed as trade secret.

To show that disclosure of the information is likely to cause substantial competitive harm, under the third criterion, the facts must show that either competitors do not know that the substance can be used in the fashion used by the submitter and that duplication of the specific use cannot be determined by competitors' own research activities or that competitors are unaware that the submitter is using the substance in this manner.

Finally, it must also be shown that competitors cannot reasonably learn the specific chemical identity through reverse engineering analysis of the submitter's products or environmental releases. For this criterion, EPA will be relying on changes made to OSHA's Hazard Communication Standard in response to the case of *United Steelworker's v. Auchter*, 763 F. 2d 728 (3d Cir. 1985). These regulations are set forth at 50 FR 48750 (November 27, 1985), and 51 FR 34590 (September 30, 1986). In these regulations, OSHA made clear that it was adopting the definition of trade secrecy set forth in the Restatement of Torts, section 757. The Restatement definition of trade secrecy does not include chemical identities which are readily determinable by reverse engineering. The OSHA preamble states, "If the specific chemical identity of a component can be readily determined, it does not qualify as a legitimate trade secret. If the product is a complex mixture, and extensive analysis would be required to determine its ingredients, it is more likely that the product would qualify for some trade secret status." 51 FR at 48753 (November 27, 1985).

If the substantiation does contain sufficient answers, EPA will notify the submitter by certified mail. Under the statute, a finding of sufficiency automatically entitles the submitter to submit supplemental information to support the truth of the answers contained in the substantiation. This could include any information or documents which would demonstrate

the veracity of the submitter's substantiation, or provide even greater detail in support of the submitter's claim. Upon receiving EPA's request for supplemental information, the submitter will have 30 calendar days to submit the information. If EPA does not receive the supplemental information within this time, it will make a trade secret determination based upon the information already submitted. Failure to submit such information, however, may make the submitter liable for a fine of up to $10,000 per violation, under section 325(c).

C. Determination of Insufficiency

If a substantiation does not contain answers sufficient to support the four requirements of section 322(b), then EPA will find that the trade secret claim is insufficient. The submitter will be notified by certified mail of EPA's finding of insufficiency. The submitter may either appeal EPA finding to EPA's Office of General Counsel or may amend his original substantiation if it demonstrates good cause to do so.

Good cause is limited to the following:

(1) The submitter was not aware of the facts underlying the additional information at the time the original substantiation was submitted, and could not reasonably have known the facts at that time; or

(2) Neither EPA regulations nor other EPA guidance called for such information at the time the original substantiation was submitted.

The submitter must notify EPA by letter of his contention (1 or 2) as to good cause and should include in that letter the additional supporting material. EPA will notify the submitter by certified mail if the good cause standard has not been met and the additional supporting material will not be accepted. The submitter may then seek review in U.S. District Court. If after acceptance of additional supporting material for good cause, EPA decides the claim is still insufficient, the submitter will be notified by certified mail and may seek review in U.S. District Court.

If EPA reverses itself on appeal or after accepting additional assertions for good cause, and decides that the trade secret claim is sufficient, then the claim will be processed as though it had been initially found to be sufficient. If upon appeal, EPA makes a final determination that the original answers in the substantiation were insufficient, the submitter may request review in U.S. District Court within 30 days of notification of the final determination.

The Small Business Administration has commented that the good cause standard should include the circumstance where a submitter mistakenly does not provide information but otherwise acts in good faith to comply with the rule. EPA believes this is a valid point although it has not included this circumstance as one of the good cause exceptions in the proposed rule. EPA requests comment as to whether this exception should be included in the final rule.

D. Determination of Trade Secrecy

All claims determined to be sufficient either initially, after appeal, or after acceptance of additional material for good cause, will be examined in order to determine whether a valid claim of trade secrecy is presented. In making a determination of trade secrecy, EPA will examine all four factors under section 322(b).

If EPA decides that the chemical identity is a trade secret, the petitioner shall be notified by certified mail and may seek review in U.S. District Court. If EPA decides that the chemical identity is not a trade secret, the submitter shall be notified by certified mail and may appeal this determination to EPA's Office of General Counsel within 30 days. If EPA does not reverse its decision on appeal, the submitter may seek review in U.S. District Court within 30 days of notification of the final determination.

E. Enforcement

Section 325(d) authorizes the Administrator to assess a civil penalty of $25,000 per claim against a trade secret claimant if the Administrator determines that a trade secret claim is frivolous. Section 325(c) authorizes the assessment of a civil penalty of $10,000 per violation for any person who fails to furnish a substantiation or supplemental information requested by the Agency. These penalties can be assessed by either administrative order or through the appropriate U.S. District Court.

V. Relation of Section 322 to Other Statutes

A. Relationship to State Confidentiality Statutes

Section 321 of Title III provides that nothing in Title III "shall preempt any State or local law." This means that the confidentiality requirements of Title III are not to displace state confidentiality requirements under State Right-To-Know Acts. A State can still prescribe the type of information it will classify as confidential when it gathers information for its own use under a State law, such as a Right-To-Know Act.

A question has been raised as to what effect State confidentiality statutes will have on information submitted under Title III to State and local authorities. State confidentiality statutes do not govern information gathered under Federal law, here Title III. State confidentiality statutes only apply to information collected pursuant to State law for State use. When information is gathered under Title III, the Federal confidentiality requirements of section 322 apply regardless of whether the information is sent to a State or Federal agency because the information is being gathered pursuant to a Federal statute. In stating this, EPA is assuming that local emergency planning committees will be asking facilities only for information properly falling under Title III. EPA has published guidance to aid committees in gathering this information. This guidance is entitled the Hazardous Materials Emergency Planning Guide. It is available by writing to the Hazardous Materials Emergency Planning Guide, 401 M Street SW., Mail Code WH 562–A, Washington, DC 20460. Additional site-specific technical guidance for hazards analysis will be available this fall. A notice announcing this availability will appear in the **Federal Register**.

State confidentiality statutes may affect Title III information, however, in that if State trade secrecy regulations prohibit claims of trade secrecy under State law for information that a submitter must also report under Title III, then under the substantiation provisions of Title III, a facility will not be able to justify withholding the information under Title III.

B. Overlap with Other EPA-Administered Statutes

Information collected pursuant to EPA regulations under statutes other than Title III may be similar to that collected under Title III. For purposes of confidentiality, information should be claimed as confidential and will be treated by EPA as is required by the statute under which it is collected. However, the mandatory release of information under one statute may affect its trade secret status under another statute.

C. Relationship to Freedom of Information Act

The procedures set out in section 322 apply only to claims of trade secrecy for chemical identity made under Title III. Pursuant to section 322(f), however, submitters may claim as trade secret any other confidential business or trade secret information which is included in

the substantiation, or supplemental information submitted in the petition process. Requests for disclosure of this material must be submitted under the Freedom of Information Act regulations at 40 CFR Part 2. EPA will make determinations regarding the disclosure of this material under those regulations.

VI. Release of Trade Secret Information

A. Releases to States

Under section 322(h), the States, either the governors or the State emergency response commissions, must provide to any requesting person the adverse health effects associated with extremely hazardous substances (section 303) and hazardous chemicals (sections 311 and 312) claimed as trade secret. The States will not have direct access to the identities of chemicals claimed as trade secret in preparing adverse health effects descriptions. However, the States have information on health effects in the MSDSs submitted under section 311 for this purpose. The MSDS is required to include such information for any substance claimed as trade secret. Thus, governors or State commissions should not be hindered in meeting their responsibilities to provide descriptions of adverse health effects.

Under Title III, EPA is required to provide to the States, upon request by the governor, any trade secret information submitted to EPA. Thus, if a State wished to request the chemical identities of any or all chemicals claimed as trade secret in the State, EPA will provide this information to the State governor, upon request.

This proposed regulation contains certain requirements intended to safeguard the disclosure of trade secret information released to the States. The Agency is concerned that there is a potential for leakage of Title III information used by various State agencies unless information is carefully guarded.

The proposed regulation specifies that the State governor can release trade secret information only to State employees. This requirement has the effect of preventing disclosure of trade secret information to State emergency response commissions (SERCs), although the SERCs are allowed by statute to identify adverse health effects. The SERCs are appointed by the governors and are comprised of members who have technical experience in the emergency response field, including industry representatives that meet this qualification. Rather than impose restrictions on SERC membership or jeopardize the confidentiality of trade secrets, the regulation confines the disclosure of trade secret information to State employees. Also, State employees who knowingly and willfully disclose trade secret information are subject to a fine and possible conviction under section 325(d)(2).

The Agency is requiring that States treat all trade secret information as limited access information to be used by the States only by staff observing security procedures equivalent to those of EPA. The Agency feels that this approach is appropriate to adequately protect trade secret information. EPA will publish information on security procedures in the future.

The Agency is requesting comments on all aspects of disclosure of trade secret information to State governors.

B. Releases to Authorized Representatives of EPA

In addition to contractors and subcontractors, EPA has recently begun to use grantee personnel to perform Agency functions. The Agency believes it is appropriate to designate them as "authorized representatives," along with Federal contractors and subcontractors, as that term is used in this regulation. Full confidentiality protection would be required, as with contractors. Comment is requested on this issue.

VII. Disclosure to Health Professionals

Section 323 of Title III consists of three provisions regarding access to chemical identity information by health professionals. These provisions require the facility owner or operator to disclose chemical identity, including trade secret chemical identity, to a health professional for diagnosis or treatment in both non-emergency and emergency situations, and for purposes of conducting preventive research studies and providing medical treatment by a health professional who is a local government employee. The health professional must sign a statement regarding his need for the chemical identity, and a confidentiality agreement, prior to disclosure, except in emergency situations, when these two documents may be delivered later.

A. Non-emergency Diagnosis or Treatment

The first provision, part (a) of section 323, requires that in non-emergency situations, an owner or operator of a facility which is subject to the requirements of sections 311, 312 or 313, shall provide the specific chemical identity, if known, of a hazardous chemical, extremely hazardous substance, or a toxic chemical to a health professional who requests the identity in writing and describes a reasonable basis for suspecting that the specific chemical identity is needed for diagnosis or treatment of an individual or individuals who have been exposed to the chemical concerned. The health professional must also state that knowledge of the specific chemical identity will assist in diagnosis or treatment of the exposed individual(s). The health professional must certify that the information contained in the statement of need is true and accurate. The health professional must also provide a signed confidentiality agreement to the facility prior to gaining access to trade secret chemical identity. Any health professional performing diagnosis or treatment, not solely doctors or nurses, is permitted access to trade secret chemical identity in a non-emergency situation. The request for and safeguarding of trade secrets is a serious responsibility and EPA urges health professionals to use other available information about a chemical for diagnosis, treatment, or research studies if possible.

B. Emergency Situations

The second provision of section 323 deals with medical emergencies and requires an owner or operator of a facility subject to the requirements of sections 311, 312 or 313 to immediately provide a copy of an MSDS, an inventory form, or a toxic chemical release form, including the specific chemical identity, if known, of a hazardous chemical, extremely hazardous substance, or a toxic chemical, to any treating physician or nurse who requests the information and has determined that a medical emergency exists and that the specific chemical identity of the chemical is necessary for emergency or first-aid diagnosis or treatment of an exposed individual or individuals. Only a treating physician or nurse can gain access to a trade secret chemical under this provision; these health professionals must use their professional judgment to determine whether a medical emergency exists. The requesting physician or nurse in such an emergency does not need to submit a written confidentiality agreement or statement of need prior to receiving the trade secret chemical identity. The owner or operator disclosing such information may, however, require a written confidentiality agreement and a statement of need as soon as circumstances permit. The fact that a treating physician or nurse does not need to submit a confidentiality agreement or statement of need before

VOL
52
ISS

OC
15
1987
UMI

receiving the requested information does not imply that the information received may be used in any manner other than the proper treatment and diagnosis of a chemically related injury or illness. The chemical identity absolutely may not be disclosed or used for any other purpose.

C. Preventive and Treatment Measures

The third provision of section 323 deals with preventive and treatment measures by local health professionals. This subsection is intended to allow local health professionals access to information on chemicals in order to facilitate epidemiological and toxicological research and to render medical treatment for the effects of chemical exposures. This subsection requires an owner or operator of a facility to promptly provide the specific chemical identity, if known, of a hazardous chemical, an extremely hazardous substance, or a toxic chemical to any health professional who is a local government employee or under contract with a local government who submits a request in writing and provides a written statement of need and a confidentiality agreement. The statement of need must describe one or more of the needs set forth in the regulations.

Under this section of the statute, EPA interprets the term health professional to be any health professional with the professional expertise to perform the types of research and treatment set forth in the statute, and who is employed by the local government. Under this section, such health professionals as physicians, toxicologists and epidemiologists may gain access to trade secret chemical identity.

D. Statement of Need

Unlike the Occupational Safety and Health Act Hazard Communication Standard, the health professional providing medical treatment will not be required to explain in detail in the statement of need why the disclosure of the specific chemical identity is essential, and that in lieu thereof, the disclosure of the following information would not enable the health professional to provide the medical services: (a) The properties and effects of the chemical, (b) measures for controlling the public's exposure to the chemical, (c) methods of monitoring and analyzing the public's exposure to the chemical, and (d) methods of diagnosing and treating harmful exposure to the chemical. EPA requests comment on whether this information should be included in the statement of need.

EPA decided to require certification in the statement of need in order to encourage requesters to understand the serious responsibility involved in handling trade secret material. The certification must be signed by the health professional and must state that the information contained in the statement of need is true.

E. Confidentiality Agreement

The confidentiality agreement required of the health professional must state that the health professional will not use the trade secret chemical identity for any purpose other than the health needs asserted in the statement of need, or as may otherwise be authorized by the terms of the agreement itself. This agreement may be negotiated between the health professional and the facility.

At a minimum, the written confidentiality agreement shall include a description of the procedures to be used to maintain the confidentiality of the disclosed information and a statement by the health professional that he will not use the information for any purpose other than the health needs asserted in the statement of need. Also, the health professional must agree not to release the information under any circumstances, except as authorized by the terms of the agreement. For example, the terms of the agreement could specify that the health professional may release the trade secret chemical identity to other health professionals if the professionals work on a daily basis with each other and routinely rely on each other's expertise for needed advice. The agreement could also specify that the first health professional may disclose the trade secret chemical identity to other health professionals if such disclosure is necessary in order for the first professional to learn necessary information in order to render a professional opinion. Except in those instances specified in the confidentiality agreement, the health professional may not be permitted to release the information to other health professionals. The health professional may not be permitted to write articles for medical journals or to go on speaking tours discussing the chemical involved if such activity could result in the disclosure of the identity of the chemical and the facility's relationship to that chemical. Such activities could be permitted, however, if the link between the facility and the chemical identity would not be revealed.

The agreement may provide for appropriate legal remedies in the event of a breach, including a reasonable pre-estimate of damages. However, the agreement cannot include a requirement that a penalty bond be posted. This would have a chilling effect on the health professional community. The Agency believes that the underlying purpose of the confidentiality agreement is to protect a facility's trade secret chemical identity from unlimited and unbridled disclosure, not to make it overly burdensome or difficult for the health professional to obtain the specific identity of a chemical.

This confidentiality agreement is subject to State law and State contractual remedies. The agreement can specify the law of the State that will apply. Also, nothing in this regulation precludes the facility or health professional from pursuing non-contractual remedies to the extent permitted by law.

F. Related Issues

Following the receipt of a written request, the facility owner or operator to whom such request is made shall promptly provide the requested information to the health professional. EPA has considered specifically defining "promptly" and "immediately" to mean a particular number of days. However, EPA is concerned that defined times will limit the speed of response. Comment is requested on this issue. The statute requires "immediate" provision of data in the case of medical emergencies and EPA interprets this to mean that the owner or operator will provide the data over the telephone, without requiring a written statement of need or a confidentiality agreement in advance. Comment is also requested on this issue.

The Agency is aware of the possible situation where the owner or operator of a facility is unable to provide the chemical identity because the manufacturer of the chemical has kept the identity confidential. In these situations, EPA suggests that the owner or operator of the facility put the requester in touch with the supplier of the chemical, but the facility is not responsible for supplying information which it cannot obtain for itself. EPA requests comment on this approach.

The regulation authorizes health professionals to refer to trade secret chemical identity in discussions with EPA personnel, who themselves are authorized to have access to Title III trade secret information. This is based on a provision of the OSHA Hazard Communication Standard. If this provision was not included in the regulation and the confidentiality agreement does not so provide, the health professional would not be permitted to reveal or refer to any trade secret identity information in

discussions with EPA. EPA requests comment on this issue.

EPA construes section 323 to mean that a facility is not permitted to deny disclosure of a specific chemical identity to a health professional under any circumstances provided there is a written statement of need and a confidentiality agreement. Section 325(c) empowers EPA to assess civil penalties of up to $10,000 for failure to disclose the trade secret chemical identity to health professionals in emergency situations, as required by Section 323(b). Health professionals may also sue under section 325(e) in U.S. District Court to obtain the information.

VIII. Summary of Supporting Analyses

A. Regulatory Impact Analysis

1. *Purpose.* Executive Order No. 12291 requires each Federal agency to determine if a regulation is a "major" rule as defined by the Order and to prepare and consider a Regulatory Impact Analysis (RIA) in connection with each major rule. EPA has determined that the requirements and procedures for treatment of chemical data considered to be trade secret by facilities reporting under other sections of Title III in this rulemaking does not constitute a major rule under Executive Order No. 12291. However, the Agency has prepared an RIA to assess the economic impact of the final regulation on affected industry and government entities. The following results are presented in detail in the analysis documented in *Regulatory Impact Analysis in Support of Proposed Rulemaking Under Sections 322–323 of the Superfund Amendments and Reauthorization Act of 1986,* which is available for review in the public docket for this rulemaking. This regulation was submitted to the Office of Management and Budget (OMB) for review as required by E.O. No. 12291.

2. *Methodology and Data Sources.* EPA conducted an assessment of the costs, benefits, and economic impacts associated with the final rule and the primary provisions of sections 322 and 323, including: Preparation of trade secrecy claims by facilities; processing and storage of trade secret reports by EPA; provisions by EPA and the States of health effects information for chemicals whose identities are withheld as trade secrets; and special access procedures under which facilities must promptly provide chemical data to members of the health profession. Both industry and government are required by sections 322 and 323 of title III to undertake certain activities, and thus, both types of entities will incur costs to comply with this regulation implementing these sections.

Benefits for both facilities and government may also arise in conjunction with trade secret activities. In addition, industry, government, and other groups may, as a result of this regulation, undertake additional voluntary activities that generate benefits both for these groups as well as the general community. Interrelationships among the activities undertaken by the various affected groups, the provisions of Title III, and potential consequences for health and the environment are complex. Thus, time constraints did not permit EPA to perform a quantitative evaluation of the benefits of these provisions; a qualitative discussion of the benefits is provided in the RIA.

Costs of complying with sections 322 and 323 of Title III are incurred by facilities and the Agency in terms of the following major activities: protection of trade secrets for facilities complying with sections 303(d)(2), 303(d)(3), 311, 312, and 313; the petition and review process designed to ensure that the public obtains access to reported information that is found to not warrant trade secrecy protection; provision of adverse health effects information in lieu of chemical identities where facilities have disclosed only generic or category information on the materials involved; and, special access, as needed, for members of the health profession for diagnosis, treatment, medical emergency, and health study purposes. Total costs of these activities are highly sensitive to assumptions concerning: The number of reports submitted by facilities under sections 303, 311, 312, 313; the number of reports for which facilities claim trade secrets; the number of petitions submitted by the public to challenge facility claims of trade secrecy; the number of health officials requesting trade secret information; and the unit costs associated with each of the activities.

Both the industry and government analyses assume that reporting and receiving entities undertake the minimum activities that they must perform to comply with Title III. The anlaysis, therefore, does not take into account the costs associated with voluntary activities, alterations in chemical usage patterns that may arise at facilities as a result of other sections of Title III, or other activities or effects.

Several supplemental analyses were performed to provide evidence on the sensitivity of the results to changes in various assumptions of the methodology. In particular, a sensitivity model was performed of the potential variability of substantiation costs reflecting EPA's list of questions that it feels are necessary to establish the sufficiency and validity of a claim for trade secrecy; and, the assumption that facilities will answer the questions with reasonably detailed research and responses. Also included is an analysis of the effects of sections 322 and 323 on small businesses and the analytical factors affecting whether a Regulatory Flexibility Analysis would be required for the proposed regulation. In particular, a definition of small businesses or entity sizes was set forth and a determination as to whether the regulation will have a significant impact upon a substantial number of small entities was considered.

3. *Results.* The RIA analyzes the specific requirements of sections 322 and 323 as established by the statute and the proposed regulation implementing these sections of the Act. The RIA analyzes four activity areas under sections 322 and 323 for facilities and EPA, in particular: Preparation, processing and storage of trade secret reports, petition and review process, provision of adverse health effects information, and disclosure of information to health professionals.

a. *Preparation, Processing and Storage of Trade Secret Reports.* A facility must prepare a trade secret copy of a given Title III report and send it to EPA with an accompanying trade secrecy substantiation. A trade secrecy substantiation (based upon the proposed form) costs approximately from $380 to $1,040 for the first chemical that a facility claims as trade secret, depending upon the level of effort a firm puts into responding to questions on the proposed form. Given certain possibilities for economies of scale where a facility provides substantiations for more than one chemical, each additional substantiation is estimated to cost $220 to $560 for the facility to prepare (these costs do not include the costs of preparing the non-trade secret copy of a Title III report).

EPA will incur costs for processing and storing each of the reports containing trade secret information. EPA will treat as confidential any information properly claimed as trade secret until a review is conducted demonstrating otherwise. The cost to EPA of processing (logging in) and storing (filming, microfilming) trade secret reports is estimated to be less than $10 per report.

b. *Petition and Review Process.* A major provision of section 322 is the opportunity for members of the public to

challenge a facility's claim to the trade secrecy of a chemical's identity through a petition and review process administered by EPA. The estimated costs of the three most likely scenarios of the petition and review process include cases where a facility is found to have a claimed trade secret without a valid basis; a case where the facility has a valid basis; and, a case with many complications in the petition and review process.

In the cases where a facility claims a trade secret without a valid basis, petitioner costs are estimated to be $75 per petition, EPA costs are $593 per petition, and, facility costs are $222 per petition. In the cases where a facility has a valid basis, petitioner costs and facility costs remain the same with an EPA cost of $368 per petition. In cases with many complications in the petition and review process, the petitioner cost are $75 per petition, but EPA costs could be $1,325 per petition, and facility costs are $1,048 per petition.

c. *Provision of Adverse Health Effects Information.* A responsibility is created under section 322 to provide requesters with information on the health hazards of chemicals where specific chemical identity is withheld as trade secret. There is no additional cost to the Agency here; the States will be able to use the MSDSs to provide the public with adverse health effects for chemicals claimed as trade secret under sections 303, 311 and 312. The Agency will already have a listing on the section 313 database of adverse effects for chemicals claimed as trade secret under section 313.

d. *Disclosure of Information to Health Professionals.* Section 323 provides for special access to reported data for health professionals. There are three circumstances for which section 323 sets up special access for health professionals to specific chemical identities or reports: diagnosis or treatment, medical emergencies, and preventive studies of exposure or treatment by local health professionals.

e. *Aggregate Costs.* Total costs (both for facilities and for EPA) are largely related to the number of trade secret claims made in any time period. These are expected to total about $48 million in the first year, drop to $13 million in the second, rise to $169 million in the third, and level off at $23 million for each succeeding year.

The total cost picture is dominated by trade secret claims associated with the submission of MSDSs under section 311. Over the first ten years of the program, these trade secret claims are estimated to account for over 90 percent of all Title III trade secret claims.

The aggregate cost of preparation, petition and review, health effects descriptions, and disclosure of information to health professionals of Title III reports in this medium case projection in present value terms over 10 years, at a 10 percent real discount rate will be $263 million to facilities, and $3.8 million for EPA.

The aggregate cost of the preparation, petition and review process, health effects descriptions, and disclosure of information to health professionals in present value terms over 10 years, at a 4 percent real discount rate will be $329 million to facilities, and $4.8 million for EPA.

With the section 311 and 312 rules so recently published by EPA, and with the publication on August 24, 1987, of the OSHA rulemaking expanding coverage of facilities required to report under sections 311 and 312, EPA has not been able to estimate accurately the added costs of the trade secret provisions. However, analysis conducted for the sections 311/312 rulemaking estimates that the total number of reports to be filed would roughly double, as compared with the coverage prior to the OSHA expansion. EPA intends to look further into the effects of the OSHA expansion prior to promulgation of this rule and requests information from commentors on how unit costs might differ for the newly covered facilities and the likely frequency of trade secret claims.

f. *Benefits.* Section 322 fosters benefits both directly and indirectly. Direct benefits include the following: Facilities are given protection of trade secrets involving their chemicals, which by definition involve information that allows particular firms competitive advantages over others; the public is given a petition and review process that allows them to challenge the validity of trade secrecy claims through an administrative review process; the substantiation requirements will limit the number of trade secrecy claims to cases where firms believe that they have a bona fide basis for trade secrecy; and, information on the health hazards of chemicals is made available to the public while the specific chemical identities are kept from disclosure where facilities have established valid trade secrecy claims. The first two benefits serve to reduce the costs that are incurred by virtue of the other Title III sections (i.e., costs that were not accounted for in the other RIA's). Indirectly, section 322 has benefits as an auxiliary section that makes detailed reporting under sections 303(d)(2), 303(d)(3), 311, 312, and 313 practical, given the competing interests of facilities with a need for protection of trade secrets and the public with a need to know about exposure to chemical health hazards. Without the protections of section 322, many facilities would be reluctant to fully disclose the information required under Title III and as a result, the efficacy of the entire program would be compromised. Allowing trade secrecy claims effectively encourages complete reporting and thus increases the benefits of the entire Title III program.

Section 323 offers specific benefits in the case of medical emergencies, where exposure to chemicals can lead to debilitating or fatal consequences for workers, residents, and others. Prompt disclosure of information by facilities to health professionals will accelerate their ability to diagnose incidents properly and bring the necessary type of treatment into effect.

B. Regulatory Flexibility Analysis

1. *Purpose.* Under the Regulatory Flexibility Act, whenever an Agency is required to issue for publication in the **Federal Register** any proposed or final rule, it must prepare and make available a Regualtory Flexibility Analysis that describes the impact of the rule on small entities (small businesses, small organizations and small governmental jurisdictions), unless the Agency's administrator certifies that the rule will not have a significant impact on a substantial number of small entities. The analysis contained in the RIA addresses the impact of this rule on small entities. Based on this analysis, EPA has concluded that while a large number of small businesses reporting under Title III could be affected, costs will generally be low per facility and significant impacts will not occur.

2. *Methodology and Results.* To examine the impacts on small businesses, EPA compared average costs for small facilities (defined to be those with fewer than 20 employees) to average and median sales for those facilities, and by two digit SIC code.

There are a substantial number of small businesses under this definition; 2,794,400 facilities (the universe of facilities in categories covered by section 303, the broadest of the sections associated with trade secrecy claims). The number of projected trade secret claims—37,000 to 1,114,600—is large enough to affect over 20 percent of small businesses if evenly distributed across facilities.

In order to assess the impacts on small businesses, several guidelines were used. The first criterion is the ratio of annual costs of facilities engaged in manufacturing, with production costs

represented by sales. A worst case scenario is provided by assuming an average in the high projection of 3 chemicals per facility and assuming detailed responses to the proposed substantiation questions. Average first year reporting per facility costs of industry for small businesses, by SIC code, is $885. Average annual costs are significantly lower. As a percent of average sales, the range is between 0.00 to 0.40 percent of sales, which is well below EPA's guideline criterion of 5 percent of production costs in order to avoid significant impact.

3. *Certification.* On the basis of the analyses contained in the RIA with respect to the impact of this rule on small entities, I hereby certify that this rule will not have a significant impact on a substantial number of small entities. This rule, therefore, does not require a Regulatory Flexibility Analysis.

C. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Comments on these requirements can be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, marked "Attention: Desk Officer for EPA". The final rule will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 350

Chemicals, Hazardous substances, Extremely hazardous substances, Community right-to-know, Superfund Amendments and Reauthorization Act, Trade secrets, Trade secrecy claims, Intergovernmental relations.

Dated: October 6, 1987.

Lee M. Thomas,

Administrator.

Therefore, it is proposed that Title 40 of the Code of Federal Regulations be amended by adding a new Part 350 to read as follows:

PART 350—TRADE SECRET CLAIMS FOR EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW INFORMATION: AND TRADE SECRET DISCLOSURES TO HEALTH PROFESSIONALS

Subpart A—Trade Secret Claims

350.1 Definitions.
350.3 Applicability of subpart; priority where provisions conflict; interaction with 40 CFR Part 2.
350.5 Assertion of claims of trade secrecy.
350.7 Substantiating claims of trade secrecy.
350.9 Initial action by EPA.
350.11 Review of claim.
350.13 Sufficiency of assertions.
350.15 Public petitions requesting disclosure of chemical identity claimed as trade secret.
350.16 Address to send trade secret claims and petitions requesting disclosure.
350.17 Appeals.
350.18 Release of chemical identity determined to be non-trade secret; notice of intent to release chemical identity.
350.19 Provision of information to States.
350.21 Adverse health effects.
350.23 Disclosure to authorized representatives.
350.25 Disclosure in special circumstances.
350.27 Substantiation form to accompany claims of trade secrecy.

Subpart B—Disclosure of Trade Secret Information to Health Professionals

350.40 Disclosure to health professionals.

Authority: 42 U.S.C. 11042 and 11043 Pub. L. 99–499, 100 Stat. 1747. Subpart A—Trade Secret Claims

§ 350.1 Definitions.

"Administrator" and "General Counsel" mean the EPA officers or employees occupying the positions so titled.

"Business confidentiality" includes the concept of trade secrecy and other related legal concepts which give (or may give) a business the right to preserve the confidentiality of business information and to limit its use or disclosure by others in order that the business may obtain or retain business advantages it derives from its right in the information. The definition is meant to encompass any concept which authorizes a Federal agency to withhold business information under 5 U.S.C. 552(b)(4), as well as any concept which requires EPA to withhold information from the public for the benefit of a business under 18 U.S.C. 1905.

"Petitioner" is any person who submits a petition under this regulation requesting disclosure of a chemical identity claimed as trade secret.

"Specific chemical identity" means the chemical name, Chemical Abstracts Service (CAS) Registry Number, or any other information that reveals the precise chemical designation of the substance. Where the trade name is reported in lieu of the specific chemical identity, the trade name will be treated as the specific chemical identity for purposes of this part.

"Submitter" means any person submitting a trade secret claim under sections 303(d)(2) and (d)(3), 311, 312 and 313 of Title III.

"Substantiation" means the written answers submitted to EPA by a submitter to the specific questions set forth in this regulation in support of a claim that chemical identity is a trade secret.

"Trade secrecy claim" is a submittal under sections 303(d)(2) or (d)(3), 311, 312 or 313 in which a chemcial identity is claimed as trade secret, and is accompanied by a substantiation in support of the claim of trade secrecy for chemical identity.

"Trade secret" means any confidential formula, pattern, process, device, information or compilation of information that is used in a submitter's business, and that gives the submitter an opportunity to obtain an advantage over competitors who do not know or use it.

"Working day" is any day on which Federal government offices are open for normal business. Saturdays, Sundays, and official Federal holidays are not working days; all other days are.

§ 350.3 Applicability of subpart; priority where provisions conflict; interaction with 40 CFR Part 2.

(a) *Applicability of subpart.* Sections 350.1 through 350.40 establish rules governing assertion of trade secrecy claims for chemical identity information collected under the authority of sections 303(d)(2) and (d)(3), 311, 312 and 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986, and for trade secrecy or business confidentiality claims for information submitted in a substantiation under sections 303(d)(2) and (d)(3), 311, 312, and 313. This subpart also establishes rules governing petitions from the public requesting the disclosure of chemical identity claimed as trade secret, and determinations by EPA of whether this information is entitled to trade secret treatment. Claims for confidentiality of the location of a hazardous chemical under section 312(d)(2)(F) of Title III are not subject to the requirements of this subpart.

(b) *Priority where provisions conflict.* Where information subject to the requirements of this subpart is also collected under another statutory authority, the confidentiality provisions of that authority shall be used to claim that information as trade secret or confidential when submitting it to EPA under that statutory authority.

(c) *Interaction with Freedom of Information Act procedures.* (1) No trade secrecy or business confidentiality claims other than those allowed in this subpart are permitted for information collected under sections 303(d)(2) and (d)(3), 311, 312, and 313.

(2) Request for access to chemical identities withheld as trade secret under this regulation is solely through this regulation and procedures hereunder,

not through EPA's Freedom of Information Act procedures, set forth at 40 CFR Part 2.

(3) Request for access to information other than chemical identity submitted to EPA under this regulation is through EPA's Freedom of Information Act regulations at 40 CFR Part 2.

§ 350.5 Assertion of claims of trade secrecy.

(a) A claim of trade secrecy may be made only for the specific chemical identity (and other specific identifier) of an extremely hazardous substance under sections 303(d)(2) and (d)(3), a hazardous chemical under sections 311 and 312, and a toxic chemical under section 313.

(b) Method of asserting claims of trade secrecy for information submitted under sections 303(d)(2) and (d)(3).

(1) In submitting information to the local emergency planning committee under sections 303(d)(2) or (d)(3), the submitter may claim as trade secret the specific chemical name (and other specific identifier) of any chemical subject to section 303 reporting.

(2) To make a claim, the submitter shall submit to EPA the following:

(i) A copy of the information which is being submitted under sections 303(d)(2) or (d)(3) to the local emergency planning committee with the chemical identity or identities claimed trade secret clearly labeled "TRADE SECRET." In parentheses after each chemical identity claimed as trade secret should be included the generic class or category of the chemical. The generic class or category for section 303 chemicals is set forth in paragraph (f) of this section.

(ii) A sanitized copy of the document described in paragraph (b)(2)(i) of this section, which is to be identical to that document except that the submitter shall delete the chemical identity or identities claimed as trade secret, leaving the generic class or category of the chemical or chemicals. This copy shall be sent by the submitter to the local emergency planning committee, which shall make it available to the public.

(iii) A substantiation in accordance with § 350.7 for each chemical identity claimed as trade secret.

(3) If the submitter wishes to claim information in the substantiation as trade secret or business confidential, it shall do so in accordance with § 350.7(d).

(4) Section 303 claims shall be sent to the address specified in § 350.16 of this regulation.

(c) Method of asserting claims of trade secrecy for information submitted under section 311.

(1) Submitters may claim as trade secret the chemical identity (and other specific identifier) of any chemical subject to reporting under section 311 in the material safety data sheet or chemical list under section 311.

(2) To assert a claim the submitter shall submit to EPA the following:

(i) A copy of the material safety data sheet or chemical list under section 311. The submitter shall clearly indicate the specific chemical identity claimed as trade secret, and shall label it "TRADE SECRET." The generic class or category of the chemical claimed as trade secret shall be inserted directly below the claimed chemical identity. The generic class or category for chemicals subject to section 311 is set forth in paragraph (f) of this section.

(ii) A sanitized copy of the material safety data sheet or chemical list under section 311. This copy shall be identical to the document in paragraph (c)(2)(i) of this section except that the submitter shall delete the chemical identity claimed as trade secret, leaving in place the generic class or category of the chemical claimed as trade secret. This copy shall be sent by the submitter to the State emergency response commission, the local emergency planning committee and the local fire department, which shall make it available to the public.

(iii) A substantiation in accordance with § 350.7 for every chemical identity claimed as trade secret.

(3) If the submitter wishes to claim information in the substantiation as trade secret or business confidential, it shall do so in accordance with § 350.7(d).

(4) Section 311 claims shall be sent to the address specified in § 350.16 of this regulation.

(d) Method of asserting claims of trade secrecy for information submitted under section 312.

(1) Submitters may claim as trade secret the chemical identity (and other specific identifier) of any chemical subject to reporting under section 312.

(2) To assert a claim the submitter shall submit to EPA the following:

(i) A copy of the Tier II emergency and hazardous chemical inventory form under section 312. (The Tier I emergency and hazardous chemical inventory form does not require the reporting of specific chemical identity and therefore no trade secrecy claims may be made with respect to that form.) The submitter shall clearly indicate the specific chemical identity claimed as trade secret by checking the box marked "trade secret" next to the claimed chemical identity.

(ii) A sanitized copy of the Tier II emergency and hazardous chemical inventory form. This copy shall be identical to the document in paragraph (d)(2)(i) of this section except that the submitter shall delete the chemical identity or identities claimed as trade secret and include instead the generic class or category of the chemical claimed as trade secret. The generic class or category for chemicals subject to section 312 is set forth in paragraph (f) of this section. The sanitized copy shall be sent by the submitter to the State emergency response commission, local emergency planning committee or the local fire department, whichever entity requested the information.

(iii) A substantiation in accordance with § 350.7 for every chemical identity claimed as trade secret.

(3) If the submitter wishes to claim information in the substantiation as trade secret or business confidential, it shall do so in accordance with § 350.7(d).

(4) Section 312 claims shall be sent to the address specified in § 350.16 of this regulation.

(e) Method of asserting claims of trade secrecy for information submitted under section 313.

(1) Submitters may claim as trade secret the chemical identity (and other specific identifier) of any chemical subject to reporting under section 313.

(2) To make a claim, the submitter shall submit to EPA the following:

(i) A copy of the toxic release inventory form under section 313 with the information claimed as trade secret clearly identified. To do this, the submitter shall check the box on the form indicating that the chemical identity is being claimed as trade secret. The submitter shall enter the generic classification name and code that is preassigned by 40 CFR 372.42 to that specific toxic chemical.

(ii) A sanitized copy of the toxic release inventory form. This copy shall be identical to the document in paragraph (e)(2)(i) of this section except that the submitter shall delete the chemical identity claimed as trade secret. This copy shall be submitted to the State official or officials designated to receive this information.

(iii) A substantiation in accordance with § 350.7 for every chemical identity claimed as trade secret.

(3) If the submitter wishes to claim information in the substantiation as trade secret or business confidential, it shall do so in accordance with § 350.7(d).

(4) Section 313 claims shall be sent to the address specified in § 350.16 of this regulation.

(f)(1) Method of choosing generic class or category for sections 303, 311 and 312. A facility owner or operator claiming chemical identity as trade secret under sections 303, 311, or 312 should engage in discussion with the state emergency response commission, local emergency planning committee, or local fire department to choose an appropriate generic class or category which suitably reflects the hazards of the release, preventive techniques to guard against the release, adverse health effects associated with the release, and any other significant safety information.

(2) Method of choosing generic class or category for section 313. A facility owner or operator claiming chemical identity as trade secret should choose the generic class or category of the chemical preassigned to the chemical identity in 40 CFR 372.42.

(g) No trade secrecy claim shall be considered to be asserted unless the submittal in which it is made is accompanied by a substantiation under § 350.7. A submittal containing a trade secrecy claim and unaccompanied by a substantiation shall be summarily rejected without further notice to the submitter.

(h) If a specific chemical identity is submitted under Title III to EPA, or to a State emergency response commission, designated State agency, local emergency planning committee or local fire department, without asserting a trade secrecy claim, the chemical identity shall be considered non-trade secret and may be disclosed without notice to the submitter.

(i) A submitter making a trade secrecy claim under this section shall submit to entities other than EPA (e.g., a designated State agency, local emergency planning committee and local fire department) only the sanitized copy of the submission and substantiation.

§ 350.7 Substantiating claims of trade secrecy.

(a) Claims of trade secrecy must be substantiated by providing a specific answer to each of the following questions with the submission to which the trade secrecy claim pertains. Submitters must answer these questions on the form entitled "Substantiation to Accompany Claims of Trade Secrecy" in § 350.27 of this subpart.

(1) Describe the specific measures you have taken to safeguard the confidentiality of the chemical identity claimed as trade secret.

(2) Have you disclosed this chemical identity to any person not an employee of your company or of a local, State or Federal government entity, who has not signed a confidentiality agreement requiring the person to refrain from disclosing the chemical identity to others?

(3) List all local, State, and Federal government entities to which you have disclosed the specific chemical identity. For each, indicate whether you asserted a confidentiality claim for the chemical identity and whether the government entity denied that claim.

(4) In order to show the validity of a trade secrecy claim, you must identify your specific use of the substance claimed as trade secret and explain why it is a secret of interest to competitors. Therefore:

(i) Describe the specific use of the chemical substance, identifying the product or process in which it is used. (If you use the substance other than as a component of a product or in a manufacturing process, identify the activity where the substance is used.)

(ii) Has your company or facility identity been linked to the specific chemical identity of the substance in publications or other information available to the public (of which you are aware)? Is this linkage known to your competitors? If the answer to either question is yes, explain why this knowledge does not eliminate the justification for trade secrecy.

(iii) If this use of the substance is unknown outside your company, explain how your competitors could deduce this use from disclosure of the chemical identity together with other information on the Title III submittal form.

(iv) Explain why your use of the substance would be valuable information to your competitors.

(5) Indicate the nature of the harm to your competitive position that would likely result from disclosure of the specific chemical identity, including an estimate of the potential loss in sales or profitability.

(6) To what extent is the substance available to the public or your competitors in products, articles, or environmental releases? Describe the factors which influence the cost of determining the identity of the substance by chemical analysis of the product, article, or waste which contains the substance (e.g., whether the substance is in pure form or is mixed with other substances), and provide a rough estimate of that cost.

(7) Is the substance, or your use of it, subject to any U.S. patent of which you are aware? If so, identify the patent and explain why—

(i) It does not connect you with the substance, and

(ii) Why it does not protect you from competitive harm.

(b) The answers to the substantiation questions listed in paragraph (a) of this section are to be included with a claimant's trade secret claim, on the form in § 350.27 of this subpart.

(c) An officer of the submitter shall sign the certification on the bottom of the form contained in § 350.27, stating that the information included in the substantiation is true, accurate and complete to the best knowledge and belief of the submitter.

(d) Claims of confidentiality in the substantiation. (1) The submitter may claim as confidential any trade secret or confidential business information contained in the substantiation. Such claims for material in the substantiation are not limited to claims of trade secrecy for chemical identity, but may also include claims of confidentiality for any confidential business information. To claim this material as confidential, the submitter shall clearly designate those portions of the substantiation to be claimed as confidential by marking those portions "CONFIDENTIAL," "PROPRIETARY," or "TRADE SECRET." Information not so marked will be treated as public and may be disclosed without notice to the submitter.

(2) An officer of the submitter shall sign the certification stating that those portions of the substantiation claimed as confidential would, if disclosed, reveal the chemical identity being claimed as a trade secret, or would reveal other confidential business or trade secret information. This certification is combined on the substantiation form in § 350.27 with the certification described in paragraph (c) of this section.

(3) The submitter shall submit to EPA two copies of the substantiation, one of which shall be the unsanitized version, and the other shall be the sanitized version.

(i) The unsanitized copy shall contain all of the information claimed as trade secret or business confidential, marked as indicated in paragraph (d)(1) of this section.

(ii) The second copy shall be identical to the first copy of the substantiation except that it will be a sanitized version, in which all of the information claimed as trade secret or confidential shall be deleted. If any of the information claimed as trade secret in the substantiation is the chemical identity which is the subject of the substantiation, the submitter shall include the appropriate generic class or

VOL 52 ISS 199 OCT 15 1987 UMI

category of the chemical claimed as trade secret. This sanitized copy shall be submitted to the State emergency response commission, a designated State agency, the local emergency planning committee and the local fire department, as appropriate.

(e) Supplemental information. (1) EPA may request supplemental information from the requester in support of its trade secret claim, pursuant to § 350.11(a)(i). EPA may specify the kind of information to be submitted, or the submitter may submit any additional detailed information which further supports the information previously supplied to EPA in its initial substantiation, under § 350.7.

(2) The submitter may claim as confidential any trade secret or confidential business information contained in the supplemental information. To claim this material as confidential, the submitter shall clearly designate those portions of the supplemental information to be claimed as confidential by marking those portions "CONFIDENTIAL," "PROPRIETARY," or "TRADE SECRET." Information not so marked will be treated as public and may be disclosed without notice to the submitter.

(3) If portions of the supplementary information are claimed confidential, an officer of the submitter shall certify that those portions of the supplemental information claimed as confidential would, if disclosed, reveal the chemical identity being claimed as confidential or would reveal other confidential business or trade secret information.

(4) If supplemental information is requested by EPA and the submitter claims portions of it as trade secret or confidential, then the submitter shall submit to EPA two copies of the supplemental information, an unsanitized and a sanitized version.

(i) The unsanitized version shall contain all of the information claimed as trade secret or business confidential, marked as indicated above in paragraph (e)(2) of this section.

(ii) The sanitized version shall be identical to the unsanitized version except that all of the information claimed as trade secret or confidential shall be deleted.

§ 350.9 Initial action by EPA.

(a) When a claim of trade secrecy, made in accordance with § 350.5 above, is received by EPA, that information is treated as confidential until a contrary determination is made.

(b) A determination as to the validity of a trade secrecy claim shall be initiated upon receipt by EPA of a petition under § 350.15 or may be initiated at any time by EPA if EPA desires to determine whether chemical identity information claimed as trade secret is entitled to trade secret treatment, even though no request for release of the information has been received.

(c) If EPA initiates a determination as to the validity of a trade secrecy claim, the procedures set forth in §§ 350.11, 350.15, and 350.17 shall be followed in making the determination.

(d) When EPA receives a petition requesting disclosure of trade secret chemical identity or if EPA decides to initiate a determination of the validity of a trade secret claim for chemical identity, EPA shall first make a determination that the chemical identity claimed as trade secret is not the subject of a prior trade secret determination by EPA concerning the same facility, or if it is, that the determination upheld the facility's claim of trade secrecy for that chemical identity. If such a prior determination held that the facility's claim for the chemical identity is invalid, EPA shall notify the petitioner that the chemical identity claimed trade secret is the subject of a prior determination concerning the same facility in which it was held that such a claim was invalid, and EPA shall release the claimed chemical identity to the public.

§ 350.11 Review of claim.

(a) *Determination of sufficiency.* When EPA receives a petition submitted pursuant to § 350.15, or if EPA initiates a determination of the validity of a trade secret claim for chemical identity, and EPA has made the determination required in paragraph (d) of § 350.9, then EPA shall determine whether the submitter has presented sufficient support for its claim of trade secrecy in its substantiation. EPA must make such a determination within 30 days of receipt of a petition. A claim of trade secrecy for chemical identity will be considered sufficient if, assuming all of the information presented in the substantiation is true, this supporting information could support a valid claim of trade secrecy. A claim is sufficient if it meets the criteria set forth in § 350.13.

(1) *Sufficient claim.* If the claim meets the criteria of sufficiency set forth in § 350.13, EPA shall notify the submitter in writing, by certified mail (return receipt requested), that it has 30 days from the date of receipt of the notice to submit supplemental information in writing in accordance with § 350.7(e), to support the truth of the facts asserted in the substantiation. EPA will not accept any supplemental information, in response to this notification, submitted after the 30-day period has expired. The notification required by this section shall include the address to which supplemental information must be sent. The notification may specifically request supplemental information in particular areas relating to the submitter's claim. The notification must inform the submitter of his right to claim any trade secret or confidential business information as confidential, and shall include a reference to § 350.7(e) of this regulation as the source for the proper procedure for claiming trade secrecy for trade secret or confidential business information submitted in the supplemental information requested by EPA.

(2) *Insufficient claim.* If the claim does not meet the criteria of sufficiency set forth in § 350.13, EPA shall notify the submitter in writing of this fact by certified mail (return receipt requested). Upon receipt of this notice, the submitter may either file an appeal of the matter to the Office of General Counsel under paragraph (a)(2)(i) of this section, or, for good cause shown, submit additional material in support of its claim of trade secrecy to EPA under paragraph (a)(2)(ii) of this section. The notification required by this section shall include the reasons for EPA's decision that the submitter's claim is insufficient, and shall inform the submitter of its rights within 30 days of receiving notification to file an appeal with EPA's Office of General Counsel or to amend its original substantiation for good cause shown. The notification shall include the address of the Office of General Counsel, and the address of the office to which an amendment for good cause shown should be sent. The notification shall also include a reference to §§ 350.11(a)(2) (i)–(iv) of this regulation as the source on the proper procedures for filing an appeal or for amending the original substantiation.

(i) *Appeal.* The submittal may file an appeal of a determination of insufficiency with the Office of General Counsel within 30 days of notification of insufficiency, in accordance with the procedures set forth in § 350.15.

(ii) *Good cause.* In lieu of an appeal, the submitter may send additional material in support of its trade secret claim, for good cause shown, within 30 days of receipt of the notification of insufficiency. To do so, the submitter shall notify EPA by letter of its contentions as to good cause, and shall include in that letter the additional supporting material. EPA shall notify the submitter by certified mail if the good cause standard has not been met and

the additional material will not be accepted. The submitter may then seek review in U.S. District Court.

(iii) Good cause is limited to the following:

(A) The submitter was not aware of the facts underlying the additional information at the time the substantiation was submitted, and could not reasonably have known the facts at that time; or

(B) Neither EPA regulations nor other EPA guidance called for such information at the time the substantiation was submitted.

(iv) If EPA determines that the submitter has met the standard for good cause, then EPA shall decide whether the submitter's claim meets the Agency's standards of sufficiency set forth in § 350.13.

(A) If after receipt of additional material for good cause, EPA decides the claim is sufficient, EPA will determine whether the claim presents a valid claim of trade secrecy according to the procedures set forth in paragraph (b) of this section.

(B) If after receipt of additional material for good cause, EPA decides the claim is still insufficient, EPA will notify the submitter by certified mail (return receipt requested) and the submitter may seek review in U.S. District Court within 30 days of notification. The notification required by this paragraph shall include EPA's reasons for its determination, and shall inform the submitter of its right to seek review in U.S. District Court within 30 days of receipt of notification.

(v) If EPA determines that the submitter has not met the standard for good cause, then EPA shall notify the submitter by certified mail (return receipt requested). The submitter may seek review of EPA's decision within 30 days of receipt of notification in U.S. District Court. The notification required in this paragraph shall include EPA's reasons for its determination, and shall inform the submitter of its right to seek review in U.S. District Court within 30 days of receipt of the notification.

(b) *Determination of trade secrecy.* Once a claim has been determined to be sufficient under paragraph (a) of this section, EPA must decide whether the claim is entitled to trade secrecy.

(1) If EPA determines that the information submitted in support of the trade secret claim is true and that the chemical identity is a trade secret, the petitioner shall be notified by certified mail (return receipt requested) of EPA's determination and may bring an action in U.S. District Court within 30 days of receipt of such notice. The notification required in this paragraph shall include the reasons why EPA has determined that the chemical identity is a trade secret and shall inform the petitioner of its right to seek review in U.S. District Court within 30 days of receipt of notification. The submitter shall be notified of EPA's decision by regular mail.

(2) If EPA decides that the information submitted in support of the trade secret claim is not true and that the chemical identity is not a trade secret:

(i) The submitter shall be notified by certified mail (return receipt requested) of EPA's determination and may appeal to the Office of General Counsel within 30 days of receipt of such notice, in accordance with the procedures set forth in § 350.17. The notification required by this paragraph shall include the reasons why EPA has determined that the chemical identity is not a trade secret and shall inform the submitter of its appeal rights to EPA's Office of General Counsel. The notification shall include the address to which an appeal should be sent and the procedure for filing an appeal, as set forth in § 350.17(a) of this regulation.

(ii) The General Counsel shall notify the submitter by certified mail (return receipt requested) of its decision on appeal pursuant to the requirements in § 350.17. If the General Counsel affirms the decision that the chemical identity is not a trade secret, then the submitter shall have 30 days from the date it receives notification of the General Counsel's decision to bring an action in U.S. District Court. If the General Counsel decides that the chemical identity is a trade secret, then EPA shall follow the procedure set forth in paragraph (b)(1) of this section.

§ 350.13 Sufficiency of assertions.

(a) A substantiation submitted under § 350.7 will be determined to be insufficient to support a claim of trade secrecy unless the answers to the questions in the substantiation submitted under § 350.7 assert specific facts to support all of the following conclusions:

(1) The submitter has not disclosed the information to any other person, other than a member of a local emergency planning committee, an officer or employee of the United States or a State or local government, an employee of such person, or a person who is bound by a confidentiality agreement, and such person has taken reasonable measures to protect the confidentiality of such information and intends to continue to take such measures. To support this conclusion, the facts asserted must show all of the following:

(i) The submitter has taken reasonable safeguards to prevent unauthorized disclosure of the specific chemical identity.

(ii) The submitter has not disclosed the specific chemical identity to any person who is not bound by an agreement to refrain from disclosing the information.

(iii) The submitter has not previously disclosed the specific chemical identity to a local, State, or Federal government entity without asserting a confidentiality claim.

(2) The information is not required to be disclosed, or otherwise made available, to the public under any other Federal or State law.

(3) Disclosure of the information is likely to cause substantial harm to the competitive position of such person. To support this conclusion, the facts asserted must show all of the following:

(i) *Either:*

(A) Competitors do not know that the substance can be used in the fashion that the submitter uses it, and competitors cannot easily duplicate the specific use of this substance through their own research and development activities; or

(B) Competitors are not aware that the submitter is using the substance in this fashion.

(ii) The fact that the submitter manufactures, imports or otherwise uses the substance in a particular fashion is not contained in any publication or other information source available to competitors or the public.

(iii) The non-confidential version of the submission under this title does not contain sufficient information to enable competitors to determine the specific chemical identity withheld therefrom.

(iv) The information referred to in (a)(3)(i)(A) is of value to competitors.

(v) Competitors are likely to use this information to the economic detriment of the submitter and are not precluded from doing so by a United States patent.

(vi) The resulting harm to submitter's competitive position would be substantial.

(4) The chemical identity is not readily discoverable through reverse engineering. To support this conclusion, the facts asserted must show that competitors cannot reasonably learn the specific chemical identity by analysis of the submitter's products or environmental releases.

(b) The sufficiency of the trade secrecy claim shall be decided entirely upon the information submitted under § 350.7.

BEST COPY AVAILABLE

§ 350.15 Public petitions requesting disclosure of chemical identity claimed as trade secret.

(a) The public may request the disclosure of chemical identity claimed as trade secret by submitting a written petition requesting such disclosure to the address specified in § 350.16.

(b) The petition shall include:

(1) The name, address, and telephone number of the petitioner;

(2) The name, and address of the company claiming the chemical identity as trade secret; and

(3) A copy of the submission in which the submitter claimed chemical identity as trade secret, with a specific indication as to which chemical identity the petitioner seeks disclosed.

(c) EPA shall acknowledge to the petitioner the receipt of the petition by letter.

(d) Incomplete petitions. If the information contained in the petition is not sufficient to allow EPA to identify which chemical identity the petitioner is seeking to have released, EPA shall notify the petitioner that the petition cannot be further processed until additional information is furnished. EPA will make every reasonable effort to assist a petitioner in providing sufficient information for EPA to identify the chemical identity the petitioner is seeking to have released.

(e) EPA shall make a determination on a petition requesting disclosure, in accordance with section 350.11, and within nine months of receipts of such petition.

§ 350.16 Address to send trade secret claims and petitions requesting disclosure.

All claims of trade secrecy under sections 303(d)(2), (d)(3), 311, 312, and 313 and all public petitions requesting disclosure of chemical identities claimed as trade secret should be sent to the following address:

U.S. Environmental Protection Agency
P.O. Box 70266
Washington, DC 20024–0266

§ 350.17 Appeals.

(a) *Procedure for filing appeal.* A submitter may appeal an EPA determination under § 350.11(a)(2) or (b)(2)(i), by filing an appeal with the Office of General Counsel. The appeal shall be addressed to the Office of General Counsel, Environmental Protection Agency, Contracts and Information Law Branch, Room 3600M, LE–132G, 401 M Street, SW., Washington, DC 20460, and shall contain the following:

(1) A letter requesting review of the appealed decision; and

(2) A copy of the letter containing EPA's decision upon which appeal is requested.

(b) *Appeal from determination of insufficient claim.*

(1) Where a submitter appeals from a finding by EPA under § 350.11(a)(2) that the trade secrecy claim presents insufficient support for a finding of trade secrecy, the Office of General Counsel shall make one of the following determinations:

(i) The trade secrecy claim at issue meets the standards of sufficiency set forth in § 350.13; or

(ii) The trade secrecy claim at issue does not meet the standards of sufficiency set forth in § 350.13.

(2) If the General Counsel reverses the decision made by the EPA office handling the claim, the claim shall be processed according to § 350.11(a)(1). The General Counsel shall notify the submitter of its determination on appeal in writing, by certified mail. The appeal determination shall include the date the appeal was received by the General Counsel, a statement of the decision appealed from, and a statement of the decision on appeal.

(3) If the General Counsel upholds the decision made by the EPA office handling the claim, the submitter may seek review within 30 days in U.S. District Court. The General Counsel shall notify the submitter of its determination on appeal in writing, by certified mail. The appeal determination shall include the date the appeal was received by the General Counsel, a statement of the decision appealed from, a statement of the decision on appeal, and a statement of the submitter's right to seek review in U.S. District Court.

(c) *Finding of no trade secret.* (1) If a submitter appeals from a finding by EPA under § 350.11(b)(ii) that the specific chemical identity at issue is not a trade secret, the Office of General Counsel shall make one of the following determinations:

(i) The assertions supporting the claim of trade secrecy are true and the chemical identity is a trade secret; or

(ii) The assertions supporting the claim of trade secrecy are not true and the chemical identity is not a trade secret.

(2) If the General Counsel reverses the decision made by the EPA office handling the claim, the General Counsel shall notify the submitter of its determination on appeal in writing, by certified mail (return receipt requested). The appeal determination shall include the date the appeal was received by the General Counsel, a statement of the decision appealed from, a statement of the decision on appeal. The Office of General Counsel shall send the petitioner the notification required in § 350.11(b)(1).

(3) If the General Counsel upholds the decision of the EPA office which made the trade secret determination, the submitter may seek review in U.S. District Court within 30 days. The General Counsel shall notify the submitter of its determination on appeal in writing, by certified mail (return receipt requested). This notification shall be written, and shall be furnished by certified mail (return receipt requested). The notice shall include the date the appeal was received by the General Counsel, a statement of the decision appealed from, the basis for the appeal determination, that it constitutes final Agency action concerning the chemical identity trade secret claim, and that such final Agency action may be subject to review in U.S. District Court. With respect to the release of the trade secret chemical identity EPA shall include in this notification notice of intent to release chemical identity, as required by § 350.18.

§ 350.18 Release of chemical identity determined to be non-trade secret; notice of intent to release chemical identity.

(a) Where EPA's Office of General Counsel makes a determination under § 350.17(c)(3), that chemical identity claimed as trade secret is not entitled to trade secret protection, EPA shall furnish the notice set forth in paragraph (c) of this section to the submitter claiming the chemical identity as trade secret.

(b) Where a submitter fails to seek review within Federal District Court within 20 days of receiving notification of an EPA determination under §§ 350.11(a)(iv)(B), or 350.11(a)(2)(v) of this regulation, EPA may furnish notice of intent to disclose the claimed trade secret chemical identity within 10 days by furnishing the submitter with the notice set forth in paragraph (c) of this section by certified mail (return receipt requested).

(c) EPA shall furnish notice of intent to release chemical identity claimed trade secret by sending the following notification to submitters, under the circumstances set forth in paragraphs (a) and (b) of this section. The notification shall state that EPA will make the chemical identity available to the public on the tenth working day after the date of the submitter's receipt of written notice (or on such later date as the Office of General Counsel may establish), unless the Office of General Counsel has first been notified of the submitter's commencement of an action

in Federal court to obtain judicial review of the determination at issue, and to obtain preliminary injunctive relief against disclosure. The notice shall further state that if such an action is timely commenced, EPA may nonetheless make the information available to the public (in the absence of an order by the court to the contrary), once the court has denied a motion for a preliminary injunction in the action or has otherwise upheld the EPA determination, or whenever it appears to Office of General Counsel, after reasonable notice to the business, that the business is not taking appropriate measures to obtain a speedy resolution of the action.

§ 350.19 Provision of information to States.

(a) Any State may request access to trade secrecy claims, substantiations, supplemental substantiations, and additional information submitted to EPA for good cause. EPA shall release this information, even if claimed confidential, to any State requesting access if:

(1) The request is in writing;

(2) The request is from the Governor of the State; and

(3) The State agrees to safeguard the information with procedures equivalent to those which EPA uses to safeguard the information.

(b) The Governor of a State which receives access to trade secret information under this section may disclose such information only to State employees.

§ 350.21 Adverse health effects.

The Governor or State emergency response commission shall identify the adverse health effects associated with each of the chemicals claimed as trade secret and shall make this information available to the public. The material safety data sheets submitted to the State emergency response commissions may be used for this purpose.

§ 350.23 Disclosure to authorized representatives.

(a) Under section 322(f) of the Act, EPA possesses the authority to disclose to any authorized representative of the United States any information to which this section applies, notwithstanding the fact that the information might otherwise be entitled to trade secret or confidential treatment under this part. Such authority may be exercised only in accordance with paragraph (b) of this section.

(b) (1) A person under contract or subcontract to EPA or a grantee who performs work for EPA in connection with Title III or regulations which implement Title III may be considered an authorized representative of the United States for purposes of this § 350.23. Subject to the limitations in this § 350.23(b), information to which this section applies may be disclosed to such a person if the EPA program office managing the contract, subcontract, or grant first determines in writing that such disclosure is necessary in order that the contractor, subcontractor or grantee may carry out the work required by the contract, subcontract or grant.

(2) No information shall be disclosed under this § 350.23(b) unless this contract, subcontract, or grant in question provides:

(i) That the contractor, subcontractor or the grantee and the contractor's or subcontractor's employees shall use the information only for the purpose of carrying out the work required by the contract, subcontract, or grant, and shall refrain from disclosing the information to anyone other than EPA without the prior written approval of each affected business or of an EPA legal office, and shall return to EPA all copies of the information (and any abstracts or extracts therefrom) upon request by the EPA program office, whenever the information is no longer required by the contractor, subcontractor or grantee for the performance of the work required under the contract, subcontract or grant, or upon completion of the contract, subcontract or grant;

(ii) That the contractor or subcontractor shall obtain a written agreement to honor such terms of the contract or subcontract from each of the contractor's or subcontractor's employees who will have access to the information, before such employee is allowed such access; or that the grantee who has access to the information will sign a written agreement to honor the terms of the grant; and

(iii) That the contractor, subcontractor or grantee acknowledges and agrees that the contract, subcontract or grant provisions concerning the use and disclosure of business information are included for the benefit of, and shall be enforceable by, both EPA and any covered facility having an interest in information concerning it supplied to the contractor, subcontractor or grantee by EPA under the contract or subcontract or grant.

(3) No information shall be disclosed under this § 350.23(b) until each covered facility has been furnished notice of the contemplated disclosure by the EPA program office and has been afforded a period found reasonable by that office (not less than 5 working days) to submit its comments. Such notice shall include a description of the information to be disclosed, the identity of the contractor, subcontractor or grantee, the contract, subcontract or grant number, if any, and the purposes to be served by the disclosure. This notice may be published in the **Federal Register** or may be sent to individual facilities.

(4) The EPA program office shall prepare a record of disclosures under this 350.23(b). The EPA program office shall maintain the record of disclosure and the determination of necessity prepared under paragraph (b)(1) of this section for a period of not less than 36 months after the date of the disclosure.

§ 350.25 Disclosure in special circumstances.

Other disclosure of specific chemical identity may be made in accordance with 40 CFR 2.209.

§ 350.27 Substantiation form to accompany claims of trade secrecy.

(a) The form in paragraph (b) of this section must be completed and submitted as required in § 350.7(a).

(b) Substantiation form to accompany claims of trade secrecy.

BILLING CODE 6560-50-M

EPA	Substantiation to Accompany Claims of Trade Secrecy Under Title III	Form Approved OMB No. xxxx-xxxx Approval Expires xx-xx-xx

Instructions: Please answer the following questions in the space provided. Type all responses. If you need more space to answer a particular question, please use additional sheets. If you use additional sheets, be sure to include the number and (if applicable) subpart of the question being answered and to write your facility's Dun & Bradstreet Number on the lower right-hand corner of each sheet.

You must submit this form to EPA in sanitized and unsanitized versions, along with sanitized and unsanitized copies of the submittal that gives rise to this trade secret claim. The unsanitized version of this form contains specific chemical identity and CAS number and may contain other trade secret or confidential business information, which should be clearly labeled as such. Failure to claim other information trade secret or confidential will make that information publicly available. In the sanitized version of this form, the specific chemical identity and CAS number must be replaced with the chemical's generic class or category and any other trade secret or confidential business information deleted. You should also send sanitized copies of the submittal and this form to relevant State and local authorities. Failure to answer each question on this form will make your submittal publicly available.

Is this form sanitized or unsanitized? ☐ Sanitized ☐ Unsanitized

(1) Describe the specific measures taken to safeguard the confidentiality of the chemical identity claimed as trade secret.

(2) Have you disclosed this chemical identity to any person not an employee of your company or of a local, State or Federal government entity, who has not signed a confidentiality agreement requiring them to refrain from disclosing the chemical identity to others?

☐ Yes ☐ No

VOL 52 ISS 199 OCT 15 1987 UMI

EPA	Substantiation to Accompany Claims of Trade Secrecy Under Title III	Form Approved OMB No. xxxx-xxxx Approval Expires xx-xx-xx

(3) List all local, State, and Federal government entities to which you have disclosed the specific chemical identity. For each, indicate whether you asserted a confidentiality claim for the chemical identity and whether the government entity denied that claim.

Government Entity	Confidentiality Claim Asserted		Confidentiality Claim Denied	
	Yes	No	Yes	No

(4) In order to show the validity of a trade secrecy claim, you must identify your specific use of the substance claimed as trade secret and explain why it is a secret of interest to competitors. Therefore:

(a) Describe the specific use of the chemical substance, identifying the product or process in which it is used. (If you use the substance other than as a component of a product or in a manufacturing process, identify the activity where the substance is used.)

(b) Has your company or facility identity been linked to the specific chemical identity of the substance in publications or other information available to the public (of which you are aware)? ☐ Yes ☐ No

Is this linkage known to your competitors? ☐ Yes ☐ No or Not Applicable

If the answer to either question is yes, explain why this knowledge does not eliminate the justification for trade secrecy.

EPA Form xxxx (xx-xx)

EPA	Substantiation to Accompany Claims of Trade Secrecy Under Title III	Form Approved OMB No. xxxx-xxxx Approval Expires xx-xx-xx

(c) If this use of the substance is unknown outside your company, explain how your competitors could deduce this use from disclosure of the chemical identity together with other information on the form.

(d) Explain why your use of the substance would be valuable information to your competitors.

(5) Indicate the nature of the harm to your competitive position that would likely result from disclosure of the specific chemical identity, including an estimate of the potential loss of sales or profitability.

VOL 52 ISS 199 OC 15 1987 UMI

EPA	Substantiation to Accompany Claims of Trade Secrecy Under Title III	Form Approved OMB No. xxxx-xxxx Approval Expires xx-xx-xx

(6) To what extent is the substance available to the public or your competitors in products, articles, or environmental releases?

Describe the factors which influence the cost of determining the identity of the substance by chemical analysis of the product, article, or waste which contains the substance (e.g., whether the substance is in pure form or is mixed with other substances), and provide a rough estimate of that cost.

(7) Is your use of this substance subject to any U.S. patent? ☐ Yes ☐ No

If so, identify the patent and explain why (A) it does not connect you with the substance and (B) why it does not protect you from competitive harm.

Patent Number: _____

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents. Based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete, and that those portions of the substantiation claimed as confidential (if any) would, if disclosed, reveal the chemical identity being claimed as a trade secret, or would reveal other confidential business or trade secret information. I acknowledge that I may be asked by the Environmental Protection Agency to provide further detailed factual substantiation relating to this claim of trade secrecy, and certify that to the best of my knowledge and belief such information is available. I understand that if it is determined by the Administrator of E.P.A. that this trade secret claim is frivolous, I may be liable for a penalty of up to $25,000 per claim.

VOL 52 ISS 199 OCT 15 1987 UMI

Subpart B—Disclosure of Trade Secret Information to Health Professionals

§ 350.40 Disclosure to health professionals.

(a) *Definitions.* "Medical emergency" means any unforeseen condition which a health professional would judge to require urgent and unscheduled medical attention. Such a condition is one which results in sudden and/or serious symptom(s) constituting a threat to a person's physical or psychological well-being and which requires immediate medical attention to prevent possible deterioration, disability, or death.

(b) The specific chemical identity, including the chemical name of a hazardous chemical, extremely hazardous substance, or a toxic chemical, is made available to health professionals, in accordance with the applicable provisions of this section.

(c) *Diagnosis or Treatment by Health Professionals.* In non-emergency situations, an owner or operator of a facility which is subject to the requirements of sections 311, 312, and 313, shall, upon request, provide the specific chemical identity, if known, of a hazardous chemical, extremely hazardous substance, or a toxic chemical to a health professional if:

(1) The request is in writing;

(2) The request describes why the health professional has a reasonable basis to suspect that:

(i) The specific chemical identity is needed for purposes of diagnosis or treatment of an individual,

(ii) The individual or individuals being diagnosed or treated have been exposed to the chemical concerned, and

(iii) Knowledge of the specific chemical identity of such chemical will assist in diagnosis or treatment.

(3) The request contains a confidentiality agreement which includes:

(i) A description of the procedures to be used to maintain the confidentiality of the disclosed information; and

(ii) A statement by the health professional that he will not use the information for any purpose other than the health needs asserted in the statement of need authorized in paragraph (c)(2) of this section and will not release the information under any circumstances, except as authorized by the terms of the confidentiality agreement or by the owner or operator of the facility providing such information.

(4) The request includes a certification signed by the health professional stating that the information contained in the statement of need is true.

(5) Following receipt of a written request, the facility owner or operator to whom such request is made shall provide the requested information to the health professional promptly.

(d) *Preventive Measures and Treatment by Local Health Professionals.* An owner or operator of a facility subject to the requirements of sections 311, 312, or 313 shall provide the specific chemical identity, if known, of a hazardous chemical, an extremely hazardous substance, or a toxic chemical to any health professional (such as a physician, toxicologist, epidemiologist, or nurse) if:

(1) The requester is a local government employee or a person under contract with the local government;

(2) The request is in writing;

(3) The request describes with reasonable detail one or more of the following health needs for the information:

(i) To assess exposure of persons living in a local community to the hazards of the chemical concerned.

(ii) To conduct or assess sampling to determine exposure levels of various population groups.

(iii) To conduct periodic medical surveillance of exposed population groups.

(iv) To provide medical treatment to exposed individuals or population groups.

(v) To conduct studies to determine the health effects of exposure.

(vi) To conduct studies to aid in the identification of chemicals that may reasonably be anticipated to cause an observed health effect.

(4) The request contains a confidentiality agreement which includes:

(i) A description of the procedures to be used to maintain the confidentiality of the disclosed information; and

(ii) A statement by the health professional that he will not use the information for any purpose other than the health needs asserted in the statement of need authorized in paragraph (d)(3) of this section and will not release the information under any circumstances except as may otherwise be authorized by the terms of such agreement or by the person providing such information.

(5) The request includes a certification signed by the health professional stating that the information contained in the statement of need is true.

(6) Following receipt of a written request, the facility owner or operator to whom such request is made shall promptly provide the requested information to the local health professional.

(e) *Medical Emergency.* (1) An owner or operator of a facility which is subject to the requirements of sections 311, 312, or 313 must provide a copy of a material safety data sheet, an inventory form, or a toxic chemical release form, including the specific chemical identity, if known, of a hazardous chemical, extremely hazardous substance, or a toxic chemical, to any treating physician or nurse who requests such information if the treating physician or nurse determines that:

(i) A medical emergency exists as to the individual or individuals being diagnosed or treated;

(ii) The specific chemical identity of the chemical concerned is necessary for or will assist in emergency or first-aid diagnosis or treatment; and,

(iii) The individual or individuals being diagnosed or treated have been exposed to the chemical concerned.

(2) Owners or operators of facilities must provide the specific chemical identity to the requesting treating physician or nurse immediately following the request, without requiring a written statement of need or a confidentiality agreement in advance.

(3) The owner or operator may require a written statement of need and a written confidentiality agreement as soon as circumstances permit. The written statement of need shall describe in reasonable detail the factors set forth in paragraph (e)(1) of this section. The written confidentiality agreement shall be in accordance with paragraphs (c)(3) and (f) of this section.

(f) *Confidentiality agreement.* The confidentiality agreement authorized in paragraphs (c)(3), (d)(4) and (e)(3) of this section:

(1) May restrict the use of the information to the health purposes indicated in the written statement of need;

(2) May provide for appropriate legal remedies in the event of a breach of the agreement, including stipulation of a reasonable pre-estimate of likely damages; and

(3) May not include requirements for the posting of a penalty bond.

(g) Nothing in this regulation is meant

to preclude the parties from pursuing any non-contractual remedies to the extent permitted by law, or from pursuing the enforcement remedy provided in section 325(e) of Title III.

(h) The health professional receiving the trade secret information may disclose it to EPA only under the following circumstance: the health professional must believe that such disclosure is necessary in order to learn from the Agency additional information about the chemical necessary to assist him in carrying out the responsibilities set forth in paragraphs (c), (d), and (e) of this section. Such information comprises facts regarding adverse health and environmental effects.

Environmental Protection Agency

Department of Health and Human Services

Agency for Toxic Substances and Disease Registry

Availability of Toxicological Profiles; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency For Toxic Substances and Disease Registry

ENVIRONMENTAL PROTECTION AGENCY

[ATSDR-2; FRL-3269-7]

Availability of Toxicological Profiles

AGENCIES: Department of Health and Human Services (DHHS): Agency for Toxic Substances and Disease Registry (ATSDR); and Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Superfund Amendments and Reauthorization Act (SARA) (Pub. L. 99-499) amends the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) (42 U.S.C. 9601 *et seq.*) by establishing certain requirements for the Agency for Toxic Substances and Disease Registry (ATSDR) of DHHS and EPA with regard to hazardous substances which are most commonly found at facilities on the CERCLA National Priorities List (NPL). Among these statutory requirements is a mandate for the Administrator of ATSDR to prepare toxicological profiles for each substance previously included on the first priority list of 100 chemicals. The list identified the first 100 chemicals which both Agencies determined posed the most significant potential threat to human health. This list was published in the **Federal Register** on April 17th, 1987 (52 FR 12866) as required by SARA section 110.

This notice announces the expected availability dates of the first 25 draft toxicological profiles for review and comment.

Availability

The following draft toxicological profiles are expected to be publicly available by the date indicated:

Date/Profile	CAS number
October 17, 1987	
Benzo(a)anthracene	56-55-3
Benzo(a)pyrene	50-32-8
Beryllium	7440-41-7
Chloroform	67-66-3
Chromium	7440-47-3
Chrysene	218-01-9
Dibenzo(a,h)anthracene	53-70-3
Heptachlor/Heptachlor epoxide	76-44-8/1024-57-3
Nickel	7440-02-0
N-Nitrosodiphenylamine	86-30-6
October 29, 1987	
Aldrin/dieldrin	309-00-2/60-57-1
Arsenic	7440-38-2
Benzo(b)fluoranthene	205-99-2
PCBs—Aroclor 1260, 1254, 1248, 1242, 1232, 1221, 1016	11096-82-5, 11097-69-1, 12672-29-6, 53469-21-9, 11141-16-5, 11104-28-2, 12674-11-2
2,3,7,8-Tetrachlorodibenzo-p-dioxin	1746-01-6
November 5, 1987	
Benzene	71-43-2
Bis(2-ethylhexyl)phthalate	117-81-7
Cadmium	7440-43-9
1,4-Dichlorobenzene	106-46-7
Methylene chloride	75-09-2
November 30, 1987	
Cyanide	57-12-5
Lead	7439-92-1
Tetrachloroethylene	127-18-4
Trichloroethylene	79-01-6
Vinyl chloride	75-01-4

A full 90-day public comment period will be provided for each profile, starting from the actual release date. The close of the comment period for each draft profile will be indicated on the front of each profile.

Requests for draft toxicological profiles should be sent to: Ms. Georgi Jones, Director, Office of External Affairs, Agency for Toxic Substances and Disease Registry, Chamblee 28 South, 1600 Clifton Rd., Atlanta, GA 30333.

Specify the profiles you wish to review. One copy of each profile requested will be forwarded, free of charge, as they become available. In the case of undue delays, requestors will be notified.

Five copies of all comments should be sent to Ms. Jones at the above address by the end of the comment period. All written comments and the draft profiles will be available for public inspection at the Agency for Toxic Substances and Disease Registry (ATSDR), Building 28 South, Room 1103, 4770 Buford Highway, NE., Chamblee, GA, from 8 am to 4:30 pm, Monday through Friday, except legal holidays. Written comments and other data submitted in response to this notice and the draft toxicological profiles should bear the docket control number ATSDR-2.

SUPPLEMENTARY INFORMATION:

I. Background

On October 17, 1986, the President signed the Superfund Amendments and Reauthorization Act of 1986 (Pub. L. 99-499), which extends and amends the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA or Superfund, 42 U.S.C. 9601 *et seq.).*

Section 110 of SARA amends section 104(i) of CERCLA by establishing requirements for the preparation of: (1) Lists of hazardous substances in order of priority, (2) toxicological profiles of those substances, and (3) a research program to fill data gaps associated with the substances.

In compliance with section 104(i)(2)(A) of CERCLA, ATSDR and EPA published on April 17, 1987 (52 FR 12866) the first priority list of 100 hazardous substances. This priority list of 100 was further broken down into four groups of 25 chemicals. The first group of 25 was to be the subject of the second phase of the requirements, i.e., the development of the first set of toxicological profiles. Section 104(i)(3) of CERCLA spells out the content of these profiles and the timetable by which they must be developed. Profiles on at least substances on the first priority list were to be completed within one year of the enactment of SARA (by October 17, 1987). The remaining seventy-five are to be completed at a rate of at least twenty-five per year with the total 100 completed within four years after the enactment of the SARA amendments. Revision and republication is mandated as necessary but no less often than once every three years.

Each profile is required to include an examination, summary and interpretation of available toxicological information and epidemiologic evaluations. This information and data are to be used to ascertain the levels of significant human exposure for the substance and the associated health effects. The profiles must also include a determination of whether adequate information on the health effects of each substance is available or in the process of development. The Agencies' intention is that this information be used to identify the key toxicological testing needs that when filled will improve our ability to define significant human exposure levels.

The toxicological profiles are to be provided to the States and made available to the public. The profiles are to be prepared in accordance with the guidelines developed by ATSDR and EPA. These guidelines were published along with the priority list of 100 in the April 17, 1987 **Federal Register** Notice (52 FR 12870).

This current notice announces the projected availability dates of the first 25 draft toxicological profiles. The documents have undergone extensive internal review and have been subject to scientific and technical peer review by outside experts. We are now announcing their availability and encouraging public participation and comment on the further development of these profiles. Although the profiles will not be completed by the October 17, 1987 deadline, we believe that the extra time given to peer review and public

review and comment is important to the development of quality profiles of scientific merit.

Although we are reasonably confident that the key studies for each of the 25 substances were considered during the profile development process, this **Federal Register** notice solicits any significant studies, including unpublished data, which may aid in the revision of these draft profiles.

II. Levels of Significant Human Exposure

The setting of specific levels of significant human exposure has presented a unique set of problems. The significance of a specific level of a hazardous substance depends on the context in which that level is evaluated. For example, a low level that may be insignificant with respect to causing acute, immediately debilitating symptoms may be highly significant with respect to causing gradual, chronic effects over a longer term. Since these profiles are intended for use by a diverse group of people who have different sutiations in which to interpret the significance of specific levels, it was considered appropriate at this time to describe the range of exposures over which effects may occur (where date are available), and to allow the user to make determinations as to which type of effect is significant in any particular instance. A format for graphically displaying the levels of significant human exposure has been developed and is used in the profiles to present the ranges over which effects may be observed.

We encourage public comment and recommendations on this specific issue.

III. Solicitation of Public Comment

We are soliciting public comment on all phases of the development of the toxicological profiles. A previous **Federal Register** notice, published on April 17, 1987 (52 FR 12866) solicited comment on the first priority list of hazardous substance. We are currently reviewing those comments and are evaluating the impact that those comments may have on the priority list and the methods used in its development.

As the first 25 toxicological profiles become available in draft form, we are eager to provide them to the States, industry, public health professionals, scientists and the general public. We welcome comment and feedback on the content of the profiles; the format and scope of the documents; the process used in the development of the levels of significant human exposure and the overall process used in the development of the profiles.

These are specific items that we would like to draw to the attention of the reader and would strongly encourage as candidates for close attention during the comment period.

A. Public Health Statement

The draft profiles include a public health statement which is intended to provide the lay public with a concise statement of the general health risks associated with the chemical of concern. The summary as originally planned should be able to stand alone. If removed from the rest of the document, it should still be capable of conveying to the public the substantive health concerns associated with the substance. We are also considering the development of more abbreviated versions of the public health statements and are evaluating a number of different formats. This notice specifically invites comments on the existing public health effects statements in the draft profiles and solicits recommendations for alternative approaches.

B. Data/Studies Used in the Development of the Profiles

In general, and for each chemical-specific profile, have the appropriate studies been used in the development of these documents? Our concern here is that we capture the critical, or "key", studies but not miss other data that may be important in the valid evaluation of the toxicological profile chemicals.

C. Format and Content of the Profiles

The draft profiles represent our best effort to provide the information required by section 104(i)(3) of CERCLA in the most useful format for the various identified users of the profiles, given the constraints of the tight timeframe. Every effort has been made to define sections clearly and to format the documents in such a way that they can be used as resource documents by many different audiences. We specifically request comment on the format and content of the initial set of profiles, including how the format might be modified for subsequent sets of profiles.

D. Levels of Significant Human Exposure

What is the most useful way of presenting this type of information? For this first generation of profiles we have selected a graphic presentation that reflects a "range" of values that covers both upper and lower bounds of effect levels. Is this more useful than a single number? Are there other ways of presenting this type of information that would be more useful to the eventual user?

E. Identification of Significant Data Gaps

The process used to develop the draft profiles has resulted in the identification of the full range of health effects data gaps associated with each chemical. However, depending on individual circumstances some subset of the identified data gaps may be essential in determining levels of significant exposure, while other data gaps may be less immediate. ATSDR, EPA, and the National Toxicology Program (NTP) have been exploring ways to identify the critical data elements that are needed to establish significant human exposure levels. This notice specifically requests comment and suggestions for approaching this phase of the toxicological profile process.

Emergency and Hazardous Chemical Inventory Forms and Community Right-to-Know Reporting Requirements; Final Rule

VOL 52 ISS 199 OCT 15 1987 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 370

[FRL 3251-9]

Emergency and Hazardous Chemical Inventory Forms and Community Right-to-Know Reporting Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Section 312 of the Superfund Amendments and Reauthorization Act of 1986 (SARA), signed into law on October 17, 1986, required the Administrator to publish a uniform format for emergency and hazardous chemical inventory forms within three months. Under sections 311 and 312 of SARA, facilities required to prepare or have available a material safety data sheet (MSDS) under the Occupational Safety and Health Act (OSHA) and its implementing regulations must submit the MSDS and the inventory forms to local and State officials. These reporting provisions give public access to information on hazardous chemicals present in the local community for a wide variety of uses including emergency response and environmental and public health planning priorities. Today, EPA publishes a revision of the form for inventory reporting based on public comment received on the January 27, 1987, proposal and the July 14, 1987, notice reopening the comment period on several issues. EPA is also publishing the final rules for reporting under sections 311 and 312.

EFFECTIVE DATES: This rule becomes effective on October 15, 1987. Other dates relevant to this rule include the following:

1. Initial submission of material safety data sheets or alternative list: October 17, 1987 (or 90 days after the owner or operator of a facility is required to prepare or have available an MSDS for a hazardous chemical under OSHA regulations, whichever is later: For facilities newly subject to OSHA MSDS requirements in May 1988, MSDS or alternative lists will be due in August 1988).

2. Initial submission of the inventory form containing Tier I information: March 1, 1988 (or March 1 of the first year after a facility is required to prepare or have available an MSDS for that hazardous chemical under OSHA regulations, whichever is later: For facilities newly subject to OSHA MSDS requirements in May 1988, Tier I information must be submitted annually beginning March 1, 1989).

ADDRESS: The record supporting this rulemaking is contained in the Superfund Docket located in Room Lower Garage at the U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The docket is available for inspection by appointment only between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, excluding federal holidays. The docket phone number is (202) 382-3046. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Kathleen Brody, Program Analyst, Preparedness Staff, Office of Solid Waste and Emergency Response, WH-562A, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, or the Chemical Emergency Preparedeness Program Hotline at 1-(800) 535-0202, or in Washington, DC at (202) 479-2449.

VIII. Submission of Reports

I. Introduction

A. Statutory Authority

These regulations are issued under Title III of the Superfund Amendments and Reauthorization Act of 1986 (Pub. L. 99-499), ("SARA" or "the Act"). Title III of SARA is known as the Emergency Planning and Community Right-to-Know Act of 1986.

B. Background

1. Superfund Amendments and Reauthorization Act of 1986 (SARA)

On October 17, 1986, the President signed into law the Superfund Amendments and Reauthorization Act of 1986 (SARA), which revises and extends the authorities established under the Comprehensive Environmental Response, Compensation and Libility Act of 1980 (CERCLA). Commonly known as "Superfund," CERCLA provides authority for federal clean-up of sites where hazardous materials have been deposited or released and for response to releases of hazardous substances or other contaminants. Title III of SARA establishes new authorities for emergency planning and preparedness, community right-to-know reporting, and toxic chemical release reporting.

2. Title III

Title III of SARA, also known as the Emergency Planning and Community Right-to-Know Act of 1986, is intended to encourage and support emergency planning efforts at the State and local levels and to provide citizens and local governments with information concerning potential chemical hazards present in their communities.

Title III is organized into three subtitles. Subtitle A establishes the framework for State and local emergency planning. Final rules for facilities subject to Subtitle A requirements were published on April 22, 1987. 52 FR 13378. Subtitle B provides the mechanism for community awareness concerning hazardous chemicals present in the locality. This information is critical for effective local contingency planning. Subtitle B includes requirements for the submission of material safety data sheets and emergency and hazardous chemical inventory forms to State and local governments as well as the submission of toxic chemical release forms to the States and EPA. Subtitle C contains general provisions concerning trade secret protection, enforcement, citizen suits, and public availability of information.

3. Subtitle B

Subtitle B of Title III is primarily concerned with providing information to appropriate local, State, and federal officials on the type, amount, location, use, disposal, and release of chemicals at certain facilities.

Subtitle B contains three reporting provisions. Section 311 requires the owner or operator of facilities subject to the Occupational Safety and Health Act of 1970 (OSHA) and regulations promulgated under that Act (15 U.S.C. 651 *et seq.* as amended, 52 FR 31852 (August 24, 1987)) to submit material safety data sheets (MSDS), or a list of the chemicals for which the facility is required to have an MSDS, to the local emergency planning committees, State emergency response commissions, and local fire departments. The facilities are required to submit the MSDS or alternative list by October 17, 1987, or three months after the facility is required to prepare or have an MSDS for a hazardous chemical under OSHA regulations, whichever is later. Information collection requirements are approved by Office of Management and Budget under control number 2050–0072.)

Under section 312, owners and operators of facilities that must submit an MSDS under section 311 are also required to submit additional information on the hazardous chemicals present at the facility. Beginning March 1, 1988, and annually thereafter, the owner or operator of such a facility must submit an inventory form containing an estimate of the maximum amount of hazardous chemicals present at the facility during the preceding year, an estimate of the average daily amount of hazardous chemicals at the facility, and the location of these chemicals at the facility. Section 312(a) requires owners or operators of such facilities to submit the inventory form to the appropriate local emergency planning committee, State emergency response commission, and local fire department on or before March 1, 1988 (or March 1 of the first year after the facility first becomes subject to the OSHA MSDS requirements for a hazardous chemical) and annually thereafter on March 1.

Section 312 specifies that there be two reporting "tiers" containing information on hazardous chemicals at the facility in different levels of detail. "Tier I," containing general information on the amount and location of hazardous chemicals by category, is submitted annually. "Tier II," containing more detailed information on individual chemicals, is submitted upon request.

A proposed rule setting forth sections 311 and 312 reporting requirements and forms for inventory reporting under section 312 was published on January 27, 1987. 52 FR 2836. Additionally, on July 14, 1987, EPA announced reopening of the comment period on three issues raised during the initial rulemaking and held a public meeting on those issues. 52 FR 26357 (July 14, 1987). Today's rule finalizes the reporting requirements and the inventory forms, which have been revised based on public comment.

Section 313 requires that certain facilities with ten or more employees that manufacture, process, or use a "toxic chemical" in excess of a statutorily-prescribed quantity submit annual information on the chemical and releases of the chemical into the environment. This information must be submitted to EPA and to the appropriate State offices annually beginning on July 1, 1988. EPA is required under section 313(i) to establish a national toxic chemical inventory database for the management of these data. A proposed rule setting forth section 313 reporting requirements and a form for submission of such reports was published on June 4, 1987, 52 FR 21152.

The public has access to most Title III information at locations designated by the Administrator, the State emergency response commission, or local emergency planning committee, as appropriate.

II. Summary of the Public Comments on the Proposed Rule

A total of 241 letters was received on the proposed rule setting forth sections 311 and 312 requirements and an additional 94 letters following the notice of the reopening of the comment period on July 14, 1987. There were a number of comments requesting clarification of terms and exemptions provided in the rule. Specific comments focused on the definition of "facility" and the need for clarification of the exemptions that are applicable to the definition of "hazardous chemical," particularly the exemptions related to research laboratories, household products, and solids.

There were numerous comments on the proposed reporting threshold; these focused on the appropriate length of phase-in, appropriate reporting threshold quantities in each year, and the threshold for the extremely hazardous substance list. Many related comments identified the need for funds to implement these reporting requirements.

Another issue commonly addressed by commenters was the need to reduce the number of physical and health hazard categories by which the MSDS list and Tier I and Tier II submissions are compiled. There were also comments on the design and content of the reporting forms.

Other major issues were the need for integration of the federal reporting requirements into existing State and local programs and flexibility for effective implementation by State and local governments.

Other comments addressed information management, the economic analysis and small business analysis, confidentiality of information, and enforcement and penalties.

III. Summary of Revisions to the Proposed Rule

This section describes the significant changes that EPA has made to sections 311 and 312 reporting regulations based upon the public comments on the proposed rule. The following summary, which is organized according to the sections of the rule, describes each of the changes.

Section 370.2 Definitions

Under section 311, an alternative to submitting the actual MSDS for each "hazardous chemical" at a facility is the submission of a list of such chemicals, grouped in "categories of health and physical hazards" as set forth under OSHA or its implementing regulations. Section 312 specifies that these categories should also be used in Tier I inventory reporting. EPA is authorized under these sections to alter these hazard categories.

The proposed rule required use of the OSHA hazard classification but solicited comment on several other options for establishing hazard categories. Based on the numerous comments requesting modifications of the categories in the proposed rule, EPA has consolidated the 23 OSHA hazard categories into five categories, as discussed in more detail in Section IV.D. of this preamble.

A definition for "hazard category" has been added to indicate the hazard classification to be used for Tier I and Tier II reporting and when the alternative list of chemicals rather than MSDS is submitted under § 370.21 of the rule.

Definitions of "extremely hazardous substance" and "threshold planning quantity" (TPQ) have also been added because of the reference to these terms in the minimum threshold regulation. Additionally, "present in the same form and concentration as a product packaged for distribution and use by the general public" is defined to help clarify

VOL

ISS
199
OC
15
1987
UMI

the "household product" exemption. EPA also eliminated the reference to 40 CFR Part 300 for additional definition of terms, since all necessary terms are now defined in Parts 350 and 370. Finally, EPA eliminated the definition on "Act" because that term does not appear elsewhere in the regulations.

Section 370.20 Applicability

Several changes were made to this section based on public comment. First, EPA has revised the threshold levels for reporting, as discussed in more detail in Section IV.B. of this preamble. EPA has revised the rule to raise the threshold in the second year and to establish a threshold of 500 pounds or the TPQ, whichever is less, for extremely hazardous substances. (For list of extremely hazardous substances, see 52 FR 13378 (April 22, 1987), to be codified at 49 CFR Part 355.) Section 370.20 of the final rule has been revised to reflect these changes.

Several commenters requested clarification on whether the threshold applies to the calendar year or to the year preceding October 17. The final rule was modified to delete reference to year in order to make clear that MSDS reporting on October 17, 1987, is to be made for chemicals present at or above the threshold on that date. With regard to inventory reporting, § 370.25 has been modified to make clear that reporting is for the preceding calendar year as specified under Section 312. In addition, the rule has been clarified by setting out the threshold as they apply to MSDS reporting, inventory reporting, and facilities that become subject to these requirements after October 17, 1987.

Section 370.21 MSDS Reporting

In response to a request for clarification regarding reporting of mixtures under the MSDS list reporting, § 370.21(b)(iii) has been modified to indicate that the hazardous components of mixtures do not need to be reported on the list if the mixture itself is reported.

The title of subsection (c) of § 370.21 has been changed from "update reporting" to "supplemental reporting" to reflect more accurately the content. This paragraph has also been modified to require that revised MSDS be submitted not only to the committee as indicated in the proposed rule, but also to the commission and the fire department. This change was made to ensure accuracy of the files held by these entities.

Section 370.21(d) has been revised to clarify that facilities must respond to all requests for MSDS, including requests for MSDS below the threshold and MSDS for listed chemicals.

Section 370.25(c) of the final rule indicates that the Tier II form must be submitted to the commission, the committee, and the fire department upon the request of such entities. In the proposed rule, the commission was omitted erroneously.

Section 370.28 Mixtures

Section (a) has been modified to indicate that reporting of mixtures under §§ 370.21 and 370.25 should be consistent "where practicable." This was done because one commenter pointed out that consistency in reporting may not always be possible; e.g., the percentage of the hazardous components may not be known.

A new section (b) was added to describe the calculation of the quantity of mixtures. If the reporting is on each component that is a hazardous chemical, then the concentration of the hazardous chemical, in weight percent (greater than 1% or 0.1% if carcinogenic) must be multiplied by the mass (in pounds) of the mixture to determine the quantity of the hazardous chemical therein. If the reporting is on the mixture itself, the total quantity of the mixture must be reported.

Sections 370.40 and 370.41 Inventory Forms

As discussed in Section IV.I. of this preamble, several commenters sought clarification on the extent to which State or local forms similar in purpose and content could be used in lieu of the form published under section 312. Because facilities will need some certainty in meeting their reporting obligations, EPA is clarifying the rule to indicate that the forms published today are to be considered uniform formats for reporting. However, State or local governments may add supplemental questions. New §§ 370.40(a) and 370.41(a) address this issue in the final rule. This section has also been revised to correct an error in the proposed rulemaking that indicated that the Tier II form must be submitted to EPA. Section 370.41 in today's rule correctly indicates that the Tier II form must be submitted to the SERC, LEPC, and fire department as required in § 370.25(c).

In response to several comments concerning the average daily amount, EPA has changed the method of calculating this figure. The commenters' primary concern was the EPA's proposed method of calculation would create misleadingly low figures for chemicals that are present on-site for only short periods of time. On the final form, average daily amount is to be calculated by dividing the total of all daily weights by the number of days and chemical was present on the site. To reflect the amount more accurately, however, EPA will require facilities to report the number of days used in the calculation.

Although several commenters requested that EPA eliminate the requirement for a 24-hour emergency contact, the Agency has retained this requirement with minor changes, as discussed in Section IV.H. of this preamble. The final forms for both Tier I and Tier II have space for two emergency contacts and contain amended instructions that allow the naming of an office, instead of an individual, as a contact.

After considering numerous comments about the certification statement, EPA has deleted the word "immediately" from the proposed Tier I and Tier II certification statements. In its present form, the statement indicates that the person signing has read all the information in the inventory and has been responsible in a supervisory capacity—directly or indirectly—for the gathering of the information.

EPA made several other minor changes in both the Tier I and Tier II forms. The revised forms include the correct 6–2–1 block format for CAS numbers and a 4-block format for SIC codes. The revised instructions include an explanation of where a facility can find its Dun & Bradstreet number, a clarification of the reporting of CAS numbers of mixtures, a statement of the thresholds promulgated by the regulations, and a clarification that those thresholds apply to the calendar year preceding the reporting deadline. Additionally, the instructions for the forms have been modified to differentiate between Title III and OSHA exemption, including the supplementary OSHA exemptions that apply under the newly revised hazard communication standard.

In response to numerous comments regarding the location identification system on the Tier II form, the Agency has clarified that the building and lot be indicated, at a minimum, and has added the option of providing a brief narrative statement of location to the site plan and site co-ordinates options. EPA has removed the 3-space site co-ordinate abbreviation and added a blank line to provide more space for this narrative description. Minor changes made to the Tier II form also include more space for the chemical name. In addition, code 6 of the temperature and pressure codes ("less than ambient temperature") was revised slightly to avoid overlap

between code 6 and code 7 ("cryogenic conditions").

IV. Reponses to Major Public Comments

A document summarizing the comments and providing EPA's responses to all the public comments is available in the public docket to this final rule. The major issues raised by the commenters and the Agency's response to them are described below.

A. Definitions

1. "Facility"

Several commenters requested a clarification of the general definition of "facility" for purposes of Title III. Commenters requested that the term be limited to manufacturing, distribution, and storage facilities, or to operations required to prepare or have available an MSDS rather than the whole site. Other commenters asked the Agency to clarify whether the term excludes motor vehicles, rolling stock, and aircraft. Additional comments questioned whether the term "facility" includes non-adjacent warehouses and contractors who bring hazardous materials onto a plant site.

In both the proposed and final rules, EPA has codified the definition of "facility" provided in section 329 of SARA. Section 370.2 provides that, for the purposes of these regulations, "facility" means all buildings and other stationary items located on contiguous property under common ownership or control. Certain non-stationary items (motor vehicles, rolling stock, and aircraft) are also considered facilities, but only for the purposes of emergency release notification under section 304 of the Act (codified at 40 CFR 355.40). Thus, transportation vehicles are not "facilities" for purposes of this rule. ("Transportation-related facilities" under Title III are further defined in 40 CFR 355.20.)

In response to comments requesting EPA to limit "facility" to manufacturing, distribution, and storage, under Section 329, the term "facility" is not limited to manufacturing, distribution, and storage facilities, or operations required to prepare or have available an MSDS. However, sections 311 and 312 requirements are applicable only to facilities required to comply with the OSHA hazard communication standard, which is currently limited to facilities in SIC codes 20–39. OSHA has recently expanded the application of the hazard communication standard to facilities in the non-manufacturing sector, to be effective over the next nine months. 52 FR 51852 (August 24, 1987). With respect to the non-adjacent warehouses, any offsite storage would be considered a separate facility because the definition of "facility" includes only adjacent or contiguous property.

With respect to contractors bringing hazardous material on-site, the hazardous material brought to a facility is subject to sections 311 and 312 requirements if the facility is required to prepare or have available an MSDS for the material. Off-site contractors, if subject to OSHA MSDS requirements, will be required to submit MSDS and inventory forms for the material.

2. "Hazardous Chemical" Issues

Several commenters believed that federal agencies should develop a common definition of "hazardous substance" and "hazardous chemical."

Title III uses several different terms to describe related groups of substances. "Hazardous substances" are substances subject to CERCLA provisions and are defined in section 101(14) of that Act. "Extremely hazardous substances" are substances subject to the emergency planning provisions of Title III and are defined in section 302 of SARA. "Hazardous chemical" comprises the group of substances subject to sections 311 and 312 and is defined as all "hazardous chemicals" as defined under OSHA and its implementing regulations, but with five additional exclusions under section 311(e) of Title III. Because all of these groups of substances are specifically defined by statute, EPA is not able to revise the definitions to eliminate all differences among them. However, EPA is attempting to clarify the requirements pertaining to these different types of substances both through the Title III rulemakings and in future rulemakings concerning CERCLA hazardous substances so that any confusion generated by the different definitions is minimized.

EPA received numerous requests for clarification of the OSHA definition of "hazardous chemical."

Under OSHA's hazard communication standard, "hazardous chemical" is defined as any element, chemical compound, or mixture of elements and compounds that is a physical or health hazard. 29 CFR 1910.1200(c). OSHA does not specifically list all of the substances that may be "hazardous chemicals" but provides definitions of hazards, criteria for evaluating hazard information, and sources of information to determine the physical and health hazards of each chemical. Section 311(e) provides five exclusions from this definition. These exclusions are listed under the definition of "hazardous chemical" under § 370.2 of this regulation.

OSHA regulations also exempt other substances and products from the MSDS requirements, including Resource Conservation and Recovery Act (RCRA) hazardous wastes, tobacco products, wood, and manufactured articles. Because these are not exclusions from the definition of "hazardous chemical" but rather from the applicability of the MSDS requirements, these exclusions are not listed under § 370.2 of the final rule, as requested by a commenter, but are provided in the instructions on the Tier I and Tier II forms.

3. "Research Laboratory"

The Agency received numerous comments requesting clarification of the exemption under section 311(e) for chemicals used in research or medical facilities.

Section 311(e)(4) of SARA and § 370.2 of the regulations exclude from the definition of "hazardous chemical" any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual. EPA believes that this exclusion is designed to exempt facilities where small amounts of many types of chemicals are used, or stored for short periods, that are not hazardous to the general public when administered or used under appropriate supervision.

In addition, it is important to recognize that the exemption applies to the substance used, rather than to the entire facility. Thus, research and medical facilities are not exempted from reporting requirements under sections 311 and 312; rather, they will not need to provide information on many of their chemicals.

With respect to research laboratories, EPA interprets the exclusion to apply to research facilities as well as quality control laboratory operations located within manufacturing facilities. However, laboratories that produce chemical specialty products or full-scale pilot plant operations are considered to be part of manufacturing rather than research operations and would not be a "research laboratory." EPA has adopted this interpretation of "research laboratories" because it is consistent with the interpretation of "laboratory operations" used by OSHA in enforcing its limited requirements under the hazard communication standard for such facilities. In addition, the Agency believes this definition is consistent with the purpose of this exemption because it confines the exclusion to operations where small quantities of hazardous substances are used for short periods of time under the supervision of highly trained individuals.

With respect to medical facilities, commenters requested that EPA exempt veterinary and dental operations and portions of facilities dedicated to medical or first-aid purposes. In contrast, one commenter requested that EPA eliminate the exclusion for medical facilities.

EPA does not believe that it has the authority to expand the definition of "hazardous chemical" beyond that provided by Congress in section 311(e) and therefore cannot eliminate the exclusion for substances used in medical facilities. However, as noted earlier, the exclusion is not for medical facilities but is limited to substances used in the facility for medical purposes. In addition, such substances must be used under the direct supervision of a technically qualified individual. A medical facility might also use or store hazardous chemicals that are not used for medical purposes under the supervision of a "technically qualified individual." Such chemicals would be subject to sections 311 and 312 requirements unless excluded under another exemption under section 311 or OSHA.

With respect to the scope of the definition of "medical facility," EPA believes that the term includes veterinary and dental operations and any portion of a facility devoted to medical treatment, including first-aid.

4. "Household Products"

Several commenters requested clarification of the household product exemption. One commenter specifically requested clarification about petroleum products.

Section 311(e) exempts from the definition of "hazardous chemical" any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public. EPA interprets this exclusion to apply to household or consumer products, either in use by the general public or in commercial or industrial use when in the same form and concentration as the product intended for use by the public. Because the public is generally familiar with such substances, their hazards, and their likely locations, the disclosure of such substances is unnecessary for right-to-know purposes.

This exemption is for general household and domestic products, and thus the clearest example of its application is ordinary household products stored in a home or located on a retailer's shelf. However, EPA believes that this exemption also applies to such products prior to distribution to the consumer when in the same form and concentration, and to such products when not intended for use by the general public. Thus, the exemption also applies to any substance packaged in the same form and concentration as a consumer product whether or not it is used for the same purpose as the consumer product. In addition, the exemption applies to such products when purchased in larger quantities by industrial facilities if packaged in substantially the same form as the consumer product and present in the same concentration. The exemption will not apply to substances present in different concentrations from the consumer products even if the substance is only used in small quantities.

In the July 14, 1987, notice, EPA requested comment on the scope of the exemption from the definition of "hazardous chemical" under section 311(e) for consumer or household products. EPA specifically requested comment on whether the term "form" in the phrase "present in the same form and concentration as a product packaged for distribution and use by the general public" should refer to the packaging of the product or only the physical state.

Most commenters on the notice supported EPA's interpretation that this exemption would apply to a substance in the same concentration as the analogous consumer product whether or not it is used for the same purpose or intended for use or distribution to the general public. Thus, a product labelled "for industrial use only" would qualify for this exemption if it was in the same form and concentration as the analogous product used by the general public.

However, several commenters disagreed with EPA's proposed interpretation that the term "form" refer to the packaging, rather than the physical state, of the substance. One commenter argued that the packaging of a product does not usually affect its hazardous properties. EPA disagrees; the packaging of the product not only may affect the hazard presented by a particular substance but also will affect the degree to which the public will be generally familiar with the substance, its hazards, and its likely locations. For instance, if "form" refers only to physical state, then the amount of the product present in a container is irrelevant. Thus, a substance may be packaged in small containers when distributed as a household product but transported or stored in bulk quantities when used for other purposes. Even though in the same concentration as the household product, a substance may pose much greater hazards when present in significantly larger quantities. In addition, while the general public may be familiar with the hazards posed by small packages of hazardous materials, they may not be as aware of the hazards posed by or likely locations of the same substances when transported or stored in bulk. As a result, EPA has retained the proposed interpretation of the consumer product exemption as more consistent with the community right-to-know purpose of section 311 and the section 311(e) exemptions. EPA has also added a definition of this exemption to the regulation.

One commenter stated that the reference to this exemption as the "household product exemption" implies that products used for personal or family purposes but that would not normally be considered "household products" are not exempted. However, section 311(e) explicitly refers to substances used for "personal, family, or household purposes," and EPA did not intend to imply any limitation on this exemption that would exclude only substances used for household purposes.

Concerning the effect of the exemption, EPA agrees with commenters who suggested that the exemption for consumer products applies even if the owner or operator of the facility must prepare or have available an MSDS for the substance. The requirements for MSDS submission, both in the statute and under the regulation, apply only to a facility that is required to prepare or have available an MSDS for a hazardous chemical. Because Title III contains exemptions from the definition of hazardous chemical that do not occur under the OSHA hazard communication standard, not all MSDS are subject to the MSDS reporting requirement under Title III. This is true of all exemptions under section 311(e), not just the household product exemption.

With respect to petroleum products, a petroleum product is excluded from the definition of hazardous chemical only when used for personal, family, or household purposes, such as gasoline in a family motor vehicle, or when the petroleum product is packaged in the same manner as a product available to the general public, such as a can of motor oil. Certain petroleum products or petroleum-derived materials may also be excluded under section 311(e)(5) when they are used as part of routine agricultural operations or are fertilizers held for sale by retailers.

5. Other Exemptions

A number of comments dealt with exemptions of specific substances or facility types.

With respect to questions concerning the exemption of radioactive sources, non-isolated intermediates, and scrap steel or steel and metal components, MSDS for these substances are required under Title III only if MSDS are necessary for them under OSHA and they meet the definition of "hazardous chemical" under section 311(e). For example, OSHA requires MSDS for non-isolated intermediates, and EPA does not see the need to exempt these substances from reporting.

OSHA has not included radioactivity as a hazard to be covered under the HCS. Such hazards would generally be covered under rules of the Nuclear Regulatory Commission or OSHA's radiation rule. Thus, radioactive substances are not subject to reporting under sections 311 and 312.

Steel and other similar non-reactive solids are generally exempt from MSDS requirement under OSHA (and thus from sections 311 and 312) when they are articles shaped during manufacture whose end use depends upon that shape. (See 29 CFR 1910.1200(b).) Even if subject to the OSHA MSDS requirements, steel and other manufactured solids are excluded from sections 311 and 312 reporting under section 311(e)(2).

Other comments concerning exemptions touched on the applicability of these requirements to newspaper producers, general merchandise retailers, and suppliers, dealers, or wholesalers who are not involved in the manufacture, repackaging, or use of hazardous chemicals.

Contrary to the commenters' suggestions that reporting by such facilities would be unnecessary, the Agency does not believe that exemptions for these facilities would be justified at this time. The basis of community right-to-know is not simply the risk that the specific facility may pose to a community by virtue of its manufacture, processing, or direct use of a chemical, but rather, the availability of information to the surrounding community concerning the amounts and location of certain substances that are present at a facility. Thus, if newspaper producers or merchandise suppliers, retailers, or dealers use, handle, or store "hazardous chemicals" for which an MSDS is required under OSHA, the public should have access to that information.

One commenter sought clarification of whether "storage" includes materials in pipelines and similar transportation systems.

Pipelines are part of the transportation exclusion under section 327, which excludes transportation-related facilities from all requirements under Title III except Section 304 release notification. Thus, materials on pipelines are not subject to the Section 311 and 312 reporting requirements.

Several commenters offered recommendations on exemptions in the agricultural area. Section 311(e)(5) is a 2-part exemption that excludes retailers of fertilizer from reporting requirements for the fertilizer and also excludes any substance when used in routine agricultural operations. EPA believes that this exemption is designed to eliminate reporting of fertilizers, pesticides, and other chemical substances when applied, administered, or otherwise used as part of routine agricultural activities. Fertilizers handled by retailers, even though not directly utilized by such persons for agricultural purposes, are also excluded. Because the general public is familiar with the application of agricultural chemicals as part of common farm, nursery, or livestock production activities, and the retail sale of fertilizers, there is no community need for reporting of the presence of these chemicals.

EPA agrees with the commenter who requested that the agricultural exemption be applied to horticultural growers. The term "agricultural" is a broad term encompassing a wide range of growing operations, not just farms, and includes nurseries and other horticultural operations. In addition, the general public is likely to expect pesticides and fertilizers to be used in such operations.

Another commenter would exempt farm supply co-operatives and other retail distributors of agricultural chemicals.

Under section 311(e)(5), substances sold as fertilizers would not need to be reported under sections 311 and 312 by retail sellers because such substances are not "hazardous chemicals." However, other agricultural chemicals, such as pesticides, would need to be reported by retailers and suppliers of such chemicals if and when they become subject to the OSHA hazard communication standard. The exemption for substances used in routine agricultural operations applies only to substances stored or used by the agricultural user.

Thus, agricultural chemical retail and storage operations not now covered by the OSHA hazard communication standard will also become subject to reporting under sections 311 and 312 of Title III when the OSHA MSDS requirements for such businesses become effective.

B. Thresholds

1. Threshold Quantities for the Hazardous Chemicals in Each Year and the Appropriate Phase-in

Section 370.20 of the proposed rule was designed to allow facilities and State and local governments to phase in the receipt and submission of reports under sections 311 and 312 over three years. In the first year, only chemicals stored in excess of 10,000 pounds were to be reported; in the second year, the threshold was to drop to 500 pounds, triggering reporting on chemicals stored between 500 and 10,000 pounds; in the third year, there was no threshold, so that all remaining hazardous chemicals were to be reported. EPA solicited comments in the proposed rule on the appropriate length of the phase-in period and threshold levels for each year. After receiving and considering the comments concerning the phase-in threshold, EPA reopened the comment period on those issues in the July 14, 1987, notice. EPA requested comment on an option under which the first-year threshold would be 10,000 pounds, maintained at 10,000 pounds in the second year, and dropped to 500 pounds in the third and final year of the phase-in.

a. *Length of phase-in.* Numerous commenters addressed the issues of the number of years for phase-in of reporting and the appropriate threshold levels for each year. By far, most comments on the phase-in approach viewed it favorably, either stating specifically that the commenter was in favor of a phase-in approach, or suggesting alternative phase-in schemes ranging from two to ten years in length. The general reasons given in favor of phasing-in the reporting were: alleviating the administrative burden on government and industry and allowing time for information management planning and for the development of information management systems.

Fewer than ten of the more than 90 comments dealing with the phase-in opposed the approach. Some of these comments questioned whether or not EPA had statutory authority to use the phase-in approach; others said that the information should be immediately available or suggested that a phase-in would not alleviate the burdens on government and industry but simply spread the burdens out over time.

Most of the commenters who favored the phase-in approach supported a 3-year phase-in schedule. Some commenters, however, suggested that

BEST COPY AVAILABLE

the phase-in be lengthened, in order to provide more time for proper evaluation and management of incoming data, as well as to give industry time to set up appropriate data management systems.

Comments suggesting a phase-in longer than three years fell into three categories. About half of these used EPA's proposed initial threshold but maintained at least one initial or intermediate threshold for two or more years, allowing for more gradual adjustment to the final threshold level. Approximately one-quarter of the comments requested higher initial threshold quantities (ranging from 20,000 up to 100,000 pounds) and suggested reasonable extension to the phase-in period. The third group requested a longer phase-in, without specific quantity suggestions. Several individuals favored a "wait and see" approach, suggesting that EPA should re-evaluate the final threshold decision in the second or third year. Nearly all commenters on the July 14 notice supported the 3-year phase-in.

EPA disagrees with commenters who questioned EPA's statutory authority to establish phase-in thresholds. Section 311(b) provides very broad authority to the Administrator to establish threshold quantities below which a facility may be exempted from reporting under sections 311 and 312. Given the serious concerns raised in the legislative history over the paperwork burden that may be created for State and local governments under these provisions, EPA believes that Congress intended EPA to use this broad authority to establish thresholds that would appropriately balance the public right-to-know with the potentially overwhelming flood of information to State and local governments, especially in the first years of the program. EPA has thus used its authority to fashion the thresholds to meet this Congressional objective. EPA has found no indication in the statutory language or legislative history that the establishment of thresholds based on time as well as amounts of chemicals would be inconsistent with Congressional intent.

EPA agrees with the majority of commenters, who stressed the importance of providing time for local and State governments to set up data management systems by reducing the volume of information being processed initially. Because EPA continues to believe that the phase-in of information is crucial to the development of effective Title III right-to-know programs and that there is no specific limitation on the type of threshold EPA may establish under the statute, EPA has decided to retain the 3-year phase-in approach in the final rule with some modifications.

EPA recognizes the concern expressed by some commenters over the immediate need to have access to valuable information on chemicals stored below the threshold level. In response, EPA believes that the rule reduces the potential loss of important information due to the threshold in several ways. First, as discussed below, § 370.20 provides no phase-in of thresholds for extremely hazardous substances, which are substances identified by Title III as significant for emergency planning. Second, the public retains access, by request, to MSDS for chemicals stored below the threshold. Third, EPA has retained a relatively short, 3-year phase-in schedule so that the baseline threshold is achieved quickly.

EPA recognizes that extending the phase-in beyond three years would provide government and industry with additional time to adjust and thus might be beneficial. There is, however, some burden potentially associated with extending the phase-in period, since it delays the date at which full reporting above the permanent threshold is mandatory. In doing so, it prolongs the uncertainty over how much and what information may be generated and may increase the number of requests during that time. In addition, as discussed below, EPA is not raising the initial threshold above the proposed threshold level (10,000 pounds), thus obviating the need to prolong the phase-in on that ground.

b. *Threshold Quantities*—i. *Final Threshold Level.* One of the most significant issues in the rulemaking was the issue of whether or not EPA should establish a non-zero threshold in the last year of the phase-in.

Approximately 100 commenters addressed the issue of whether or not zero was an appropriate permanent reporting threshold, with or without the phase-in approach. Of these, few favored the proposed reduction of the threshold to zero in the final year.

Arguments made by those favoring the zero threshold emphasized (a) the volume of information that would be lost through establishment of a non-zero threshold, (b) the difficulty of requesting desired information below the threshold without the chemical-specific information in section 311 for all volumes of chemicals, and (c) the potential hazards posed by small quantities of chemicals.

The points raised by proponents of non-zero thresholds fall into several general groups. First, because there are numerous chemicals stored in very small quantities, the data management burden created by zero thresholds could be overwhelming for the recipients of the data, thus jeopardizing public access to the information. Second, they argued that non-zero threshold levels could be established that would capture all substances of concern to the community or emergency response personnel and fire departments. Finally, a large majority of those arguing for non-zero thresholds also suggested that the same threshold should not apply to the extremely hazardous substance list; thus, they argued that information on chemicals of concern at lower levels could be made available without requiring reporting at those levels for all chemicals.

Although several commenters requested that the final threshold be non-zero without specifying the amount, the majority of comments contained suggestions for a final threshold, ranging from de minimis or one-pound quantities up to 50,000 pounds. However, few commenters provided a justification for the numbers they suggested.

EPA believes that there are several competing concerns that must be weighed in determining an appropriate final threshold level. First, information on chemicals of most concern to planners and communities must be readily available. In addition, enough information should be available for members of the public and public officials to be able to ascertain what additional information they want to request. Third, the burden generated for government recipients of the reports should be manageable.

After considering the arguments both supporting and opposing the establishment of a non-zero threshold in the final year of the phase-in, and after considering the comments on the 500-pound permanent threshold that EPA suggested in the July 14 notice, EPA believes that the balance of these concerns weighs in favor of a non-zero threshold.

However, at this time the Agency is not setting a final threshold, but will propose one after conducting a study of alternative thresholds. The Agency has considered 500 pounds (approximately the weight of a 55-gallon drum) as the final threshold beginning in the third year of reporting. Five hundred pounds thus will be the point of departure for discussion of a final threshold. This threshold would eliminate automatic reporting of numerous chemicals that are stored in smaller quantities. As discussed in more detail below, estimates based on available evidence

suggest that 35 to 57 percent of MSDS would be subject to sections 311 and 312 reporting, except upon request, as a result of the 500-pound threshold.

While a 500-pound threshold would eliminate numerous reports of de minimis levels of hazardous chemicals, a substantial volume of information would still be provided to State and local governments. The 500-pound level is also the most common non-zero threshold in effect in States with community right-to-know laws. Over half of all States have community right-to-know laws. Almost one-third of these have a threshold of 500 pounds; the remaining States have thresholds ranging from zero to 500 pounds. This is important since EPA's primary concern in establishing thresholds under sections 311 and 312 is to prevent State and local governments from being so overwhelmed with submissions under this program that effective public access and government use of the information are not possible. A significant number of commenters also supported the 500-pound threshold.

Finally, the expansion of OSHA's hazard communication standard to non-manufacturing employers and the consequent changes in both the number of MSDS and the number of facilities covered by Title III magnify the difficulties associated with a lower, or zero threshold. Because the community right-to-know laws in some of the States described above provide broader coverage than is currently provided under sections 311 and 312 (i.e., they include non-manufacturing facilities that will not be subject to sections 311 and 312 requirements until May, 1988), they provide a significant measure of the continued appropriateness of this threshold when these requirements become applicable concurrently with the expanded hazard communication standard.

Even if EPA were to establish such a 500-pound threshold, this would not suggest that no chemicals of interest to emergency responders, planners, fire departments, or the public are stored in quantities less than 500 pounds, or that all chemicals stored above 500 pounds pose a hazard to the community. Rather, this threshold would attempt to establish a balance between setting the level high enough to avoid an overwhelming paper burden for State and local governments and low enough to avoid a loss of substantial amounts of information. Similarly, a threshold less than 500 pounds would likely present an unmanageable administrative burden. Thus, States or local governments could request information on substances below the threshold, or a State could require reporting at lower thresholds under State law.

EPA has also considered higher final threshold levels. As part of the Regulatory Impact Analysis (RIA) in support of the proposed rulemaking, EPA estimated the percentage of chemicals and facilities that would be covered at different threshold levels. This analysis was revised and expanded for the RIA in support of final rulemaking. The analysis is the final RIA of the effects of thresholds on reporting is based on data sets provided by three States (New Jersey, New York, and Michigan) on the quantity of chemicals stored at a substantial number of manufacturing facilities, for limited lists of hazardous substances. Although the data from each State were adjusted so that the results would be representative of the effects of thresholds nationwide, the limited numbers of facilities reporting, the restrictive chemical lists, and other limitations of the data suggest that the results be viewed with caution.

EPA analyzed four alternatives for the final threshold. Estimates indicate that a 500-pound threshold would lead to reporting by between 50 and 82 percent of the facilities covered by current OSHA requirements, and submissions of between 35 and 57 percent of the MSDS for these chemicals. At this level, the cost to industry in the third year is estimated to be $348 million. At higher thresholds, reporting would be further reduced; a 2,000-pound threshold could result in between 35 and 47 percent of facilities reporting and 22 to 32 percent of chemicals being reported. At the 2,000 pound level, the cost to industry in the third year is estimated to be $225 million. In addition, a threshold that reduces reporting significantly could place substantial burdens on all parties by increasing the numbers of requests made by government and the public for additional information from facilities. On the other hand, a 50-pound threshold could result in between 77 and 90 percent of facilities reporting and between 64 and 79 percent of chemicals reported. At this level, the cost to industry in the third year is estimated to be $387 million. At a zero threshold level, the cost to industry in the third year is estimated to be $500 million. Although information indicates that the 500-pound threshold may represent the most appropriate balance between the broad right-to-know information submission objectives of these provisions and the need to avoid overwhelming State and local governments with the submission of vast amounts of information on de minimis amounts of chemicals, EPA is deferring the establishment of a threshold in the third year of the phase-in. The substantial number and variation of comments received on this issue and the great uncertainty over the impact of these requirements on the recipients of this information, and ultimately on the effectiveness of this program, create a need for further study prior to establishing a permanent threshold level.

After the initial submission of the Section 312 inventory forms in March, 1988, EPA will have more information about the effectiveness of the regulatory thresholds under the federal right-to-know program. During this evaluation, EPA will examine compliance experience with both State and federal right-to-know programs, the completeness of information generated under these programs, the ability of State and local officials to manage and provide public access to this information, the number and source of requests for additional facility information, and volumes of hazardous chemicals covered at a range of thresholds. As stated above, following such review, EPA will initiate another rulemaking to establish the final year thresholds.

ii. *Initial Threshold Levels.* Approximately 50 comments on the proposal addressed the issue of the threshold level in the initial year of a phase-in, either by proposing a specific phase-in schedule of quantities or by registering support of the EPA proposal but suggesting a modification for the final year. Over half of these comments favored 10,000 pounds. The remaining suggestions ranged between 15,000 and 100,000 pounds (one comment suggested up to 500,000 pounds for some chemicals), with a substantial number favoring 50,000 pounds.

In general, arguments that supported raising the first-year threshold emphasized the consequent decrease in the reporting burden and the belief that adequate information on large volume chemicals would still be available with a higher threshold.

After considering comments on the proposal and the July 14 notice, EPA has decided to retain 10,000 pounds as the initial threshold because that level provides the appropriate balance between ensuring that the public has access to information on large volume chemicals and reducing the number of reports to manageable levels in the first years of the program. EPA has rejected establishing higher initial thresholds because it believes that a threshold greater than 10,000 pounds might not

UMI

provide sufficient information in the first year of reporting; the best estimates available to EPA indicate that a threshold equal to 10,000 pounds may reduce reporting to less than 13 to 22 percent of facilities or 8 to 13 percent of chemicals. EPA believes that a reduction in reporting below these levels would not be consistent with the community right-to-know purpose of these provisions and would provide marginal benefits in terms of information management, in comparison with a 10,000-pound reporting threshold.

iii. *Thresholds for Non-manufacturing Facilities.* As indicated in the January 27 proposal and in the July 14 notice, EPA believes that section 311 and 312 reporting requirements apply to any facilities subject to OSHA's MSDS requirements for any Title III "hazardous chemical." Because these requirements are self-implementing under the statute, EPA does not need to promulgate a rule in order for these reporting requirements to become effective. Under section 311(d), facilities must submit an MSDS for each hazardous chemical (or a list of such chemicals) to the appropriate State and local authorities by October 17, 1987, or within three months after they are required to have or prepare such an MSDS. Thus, under the statute, facilities newly covered by the OSHA MSDS requirements must submit those MSDS within three months after they are required to comply with the MSDS requirements. Because OSHA's MSDS requirements will become effective for the non-manufacturing sector in May, 1988 (see 52 FR 31852, (August 24, 1987)), such facilities will be required to submit these MSDS under section 311 in August, 1988. Similarly, inventory forms under section 312 for these facilities must be submitted annually beginning March 1, 1989.

However, although the section 311 and 312 requirements take effect without any regulatory action on the part of EPA, the Agency may, by exercising its discretion under the statute to establish minimum thresholds for reporting, limit the facilities or number of MSDS to be submitted under these provisions. EPA has, under this rule, established such thresholds and amended the proposed threshold regulation specifically to provide analogous thresholds to facilities newly subject to these requirements after October 17, 1987.

Some commenters have suggested that EPA limit this rule to facilities currently subject to the OSHA MSDS requirements, i.e., facilities in SIC codes 20–39. However, the effect of such limitation would not be to limit the scope of the section 311 and 312 reporting requirements since such requirements are effective without regulation, but rather to limit the thresholds established by this rule to manufacturing facilities. A zero threshold would thus be in effect for facilities in the non-manufacturing sector that become subject to the MSDS requirements in May, 1988, and would result in precisely the paperwork burden that the thresholds in this rule are intended to avoid.

Moreover, EPA solicited comment on the appropriateness of the thresholds in today's rule as they would apply to the expected OSHA expansion universe. Based on information currently available, EPA believes that the thresholds applicable to the manufacturing sector currently subject to sections 311 and 312 would be equally applicable to the non-manufacturing facilities that will soon be subject to the MSDS requirements. However, as a result of concerns raised over the possible need to provide different thresholds for the facilities newly subject to these requirements as a result of OSHA's expanded MSDS requirements, EPA is undertaking additional analysis of the universe newly-covered by the OSHA MSDS requirements. This analysis will include a more detailed analysis of small business impacts, a review of some current State right-to-know programs that cover non-manufacturing, and the need for different thresholds for such facilities. Following such review and prior to the time that this rule requires actions by the newly covered non-manufacturing universe, EPA will make the analysis public, receive comment, and, if appropriate, revise the relevant thresholds.

2. Thresholds for the Extremely Hazardous Substances and Other Chemical Lists

In the proposed rule, EPA provided an exception to the phase-in for substances on the list of extremely hazardous substances under section 302 of Title III. The threshold for reporting of such substances was zero in the first year. EPA requested comments on whether the threshold provision should contain this exception and whether there should be additional exceptions for other special chemical lists.

A majority of the over 60 comments on this issue suggested that thresholds should be lower for some classes of hazardous chemicals (than for hazardous chemicals in general), but that the threshold for such substance should still be non-zero. Several comments requested that there be no "special chemical exception" to the reporting thresholds on the basis that it complicated the process. A few commenters suggested zero or very low thresholds for varying lists of chemicals (e.g., SARA section 302 Extremely Hazardous Substances (EHS), carcinogens on the IARC list, other known human carcinogens, or SARA section 313 chemicals). Those comments that addressed the EHS list were split between suggesting thresholds equal to the "reportable quantities" (RQs) and thresholds equal to the "threshold planning quantities" (TPQs) for the EHS. (See the April 22, 1987, final rule for further discussion of RQs and TPQs. 52 FR 13378.)

Of the comments favoring thresholds that are lower for the EHS than for hazardous substances in general, most favored a non-zero threshold and argued that the burden of accounting for and reporting de minimis quantities far outweighs the risk posed by the EHS in very small quantities. Several commenters argued that reporting of minute quantities of these chemicals creates an unnecessary burden on local and State governments and on emergency response groups who receive the information.

Several arguments were made concerning the appropriateness of the TPQs or the RQs for EHS thresholds. The risk of off-site hazard posed by these chemicals either for emergency planning or for emergency response purposes has already been explicitly taken into account in determining the TPQs and RQs. Thus, several comments argued, quantities stored below these amounts are unimportant for planning, response, or other purposes of sections 311 and 312.

After consideration of the several arguments and approaches suggested by commenters, EPA suggested a one-pound de minimis threshold for the EHS list in the July 14 notice. Based on the additional comments received on the notice, EPA has decided to revise the rule to establish a reporting threshold for each EHS of 500 pounds or the TPQ, whichever is less. This threshold will be effective from the first year of reporting onward.

There are several reasons for establishing these thresholds. First, EPA continues to believe that reporting on the EHS should not be subject to the phase-in. Because, based on the information available to date, EPA believes that the 500-pound level represents an appropriate permanent threshold, the Agency is requiring reporting of EHS at a 500-pound threshold during the first year of

reporting, so that information on these chemicals can be made available to the community, while initial planning efforts under section 303 are underway.

In addition, the EHS list represents chemicals that are of particular interest to the community; the TPQs have been established as representing quantities of these chemicals that may pose risks to the community and, thus, are of interest to emergency planners. The Agency has decided, therefore, that for each EHS for which the TPQ is less than 500 pounds, the threshold in the first year and in subsequent years should be the TPQ. This will ensure that information concerning these chemicals will be available not only to emergency planners, but to emergency responders and the general community as well.

EPA is not expanding the list of chemicals subject to the "special chemical threshold" beyond the EHS list. EPA has singled out the EHS list as an exception to the phase-in for several reasons. Although there are numerous chemical lists referenced in Title III, the Agency believes that information concerning EHS will be critical for States and local governments during the next year when emergency planning efforts are under way. Under section 303 of Title III, local committees must prepare an emergency response plan by October, 1988. Because the EHS list developed under section 302 of Title III is intended to be the basis of initial emergency planning efforts under section 303, information concerning all EHS present at facilities will be critical in the first year of section 311 reporting. EPA believes that such information should be made easily accessible to the local planning committee through mandatory reporting under sections 311 and 312, rather than burdening the committee in the first year of its organization with the need to request information on EHS from each facility under section 303(d) or section 311(c).

C. Submission of Material Safety Data Sheets

1. Material Safety Data Sheet (MSDS) or List Option

A facility may meet the requirements of section 311 either through submission of MSDS or a list of chemicals for which an MSDS is required. In the preamble to the proposed rule, the Agency encouraged facilities to exercise the list option whenever possible.

With one exception, the commenters indicated unqualified support of the list option. In addition, many commenters inquired whether use of MSDS for routine reporting of potential community hazards is actually productive and cost-effective. However, numerous commenters indicated that the lists would be difficult to prepare because of the difficulty in using the 23 hazard categories.

As discussed in more detail in Section III. D. EPA has reduced the number of hazard categories in this final rulemaking in order to facilitate list reporting. EPA is continuing to encourage list reporting because it reduces the information management burden on recipients of the information without substantially reducing the amount of information provided.

One commenter requested clarification regarding the right of a State emergency response commission or local emergency planning committee to mandate the submission of a list rather than the actual MSDS. Because the federal law expressly provides that facilities may choose whether to submit a chemical list or each MSDS, EPA has also provided this option in today's final rule. However, State or local governments may effectively limit this choice by establishing reporting requirements pursuant to their own authority.

2. Format and Content of Material Data Sheets

Several commenters requested various changes to the MSDS format, such as the inclusion of the hazard categories on the MSDS.

EPA agrees that the addition of hazard categories on the MSDS would be useful and encourages chemical manufacturers to include this information. However, EPA does not believe that modification of the MSDS can be required in this rule; the content of the MSDS is subject to the regulatory authority of OSHA, not EPA.

A number of commenters raised concerns about the responsibility for accuracy of MSDS information on the part of manufacturers and chemical users who pass on an MSDS received from other manufacturers.

"Downstream" recipients of an MSDS are not generally responsible for its content. However, EPA believes that if an owner or operator is aware of inaccurate or inconsistent information, he should take reasonable steps to clarify the information or alert the recipients of the information when it is distributed that it may be inaccurate.

3. Revisions and Updates

Two commenters requested clarification of the requirement to submit revised material safety data sheets as applied to a facility that had exercised the list option. Further clarification was also requested regarding any obligation to submit a revised MSDS if the original was submitted as a result of a public request.

Section 311(d) requires a facility to submit an MSDS or list by October 17, 1987, or within three months after the owner or operator is required to prepare or have available an MSDS for the chemical, whichever is later. An owner or operator is also required to submit a revised MSDS within three months of the discovery of significant new information concerning a chemical for which an MSDS was submitted. If a facility has submitted only a list of chemicals rather than the actual MSDS, the facility does not need to file a revised MSDS upon discovery of new information. However, after October 17, 1987, if additional hazardous chemicals become present at such facility, a list of these (or the MSDS) must be submitted to the State commission, local committee, and fire department within three months.

Once an MSDS is submitted, even as a result of a request, a revised MSDS must be submitted if the owner or operator receives significant new information concerning the substance. Because the OSHA regulations require MSDS to be revised within three months after a chemical manufacturer or employer becomes aware of significant new information concerning the hazards of a chemical, the Title III regulations merely require that such revised MSDS also be submitted to the agencies that have the original MSDS.

D. Categories for Reporting

Section 311 list reporting and section 312 Tier I reporting requirements were initially based on the 23 physical and health hazards identified under OSHA regulations. To facilitate reporting under sections 311 and 312, Title III permits the Administrator to modify the categories of health and physical hazards set forth under OSHA regulations by requiring information to be reported in terms of "groups of hazardous chemicals which present similar hazards in an emergency." Additionally, for Tier I reporting, the Administrator may require reporting on individual hazardous chemicals of special concern to emergency response personnel.

In the January 27 proposal, the Agency proposed the use of the 23 OSHA categories for reporting but solicited comments on approaches for modification of the reporting categories. EPA recognized that a smaller number of reporting categories might facilitate the manageability of the information and enhance its usefulness, particularly since information on chemicals that

present more than one hazard must be provided in all applicable categories. EPA specifically requested comment on two approaches for modification: Use of the eight DOT hazard labeling categories and use of a 5-category scheme with two health hazard categories and three physical hazard categories. The July 14, 1987, **Federal Register** notice specifically requested comment on the proposed use of the 5-category scheme.

In response to the January 27 proposed rule, EPA received over 100 comments that disagreed with the use of the 23 OHSA categories, while only four commenters supported their use. Many of those commenters that disagreed provided alternative categorization schemes. Many comments supported the Department of Transportation (DOT) categorization scheme in combination with additional health hazard categories. The main advantage to using the DOT categorization would be that emergency response personnel are already familiar with these categories. However, it was designed for hazardous material transportation and reflects an emphasis primarily on immediate health and physical hazards. Thus, the Agency believes that the DOT categories would have to be revised to address delayed (chronic) hazards adequately before this option could be used for Sections 311 and 312. EPA believes that altering the DOT categorization scheme would result in some confusion and reduce the effectiveness of this option.

EPA received several additional proposals for the modification of the reporting categories. However, all of these alternatives were rejected because they either did not adequately encompass the OSHA hazard classes, did not sufficiently reduce multiple reporting, or did not sufficiently reduce the burden of reporting and interpreting data by decreasing the number of reporting categories.

After consideration of these comments, the suggested alternatives, and the burden of using the proposed 23 categories, EPA has revised the rule to reduce the number of reporting categories. Today's rule contains the 5-category scheme described by EPA in the Preamble to the proposal and in the July 14 notice: two health hazard categories (immediate or acute hazards and delayed or chronic hazards) and three physical hazard categories (fire hazards, sudden release of pressure hazards, and reactivity hazards). This scheme was supported by a substantial number of commenters.

A number of other commenters disagreed with the use of the 5-category scheme because they thought the categories were too general and did not represent groups of hazardous chemicals that present similar hazards in an emergency. EPA disagrees with these commenters. Although the categories could be subdivided further, the Agency believes this could complicate the categorization process and could result in inconsistencies in reporting. EPA believes the 5-category scheme will be useful to emergency response personnel by conveying general information on the types of hazards a chemical may present in an emergency response situation and by supplementing other sources of information commonly used by emergency response personnel.

EPA agrees with the numerous commenters who noted that this categorization scheme should significantly reduce the paperwork burden of reporting, minimize multiple reporting and double counting, and enhance the clarity and usefulness of the information reported. The five categories have several advantages over the other proposed alternatives because they encompass all of the OSHA categories as well as all of the DOT categories, and they address delayed (chronic) health hazards as well as immediate (acute) health hazards. The Agency plans to provide written guidance to help facilitiate reporting so that this categorization scheme can be easily used by both large and small reporting entities.

E. Mixtures

EPA received several comments regarding the reporting of mixtures. One commenter requested clarification of the term "mixture." Another desired guidance in applying threshold levels to mixtures. Several commenters stated their belief that reporting of mixtures would be difficult since many mixtures have unknown compositions.

In response to the request for clarification of the term "mixture," EPA has revised § 370.28 of the rule to include the definition of mixture used by OSHA in the hazard communications standard. 29 CFR 1910.1200. In addition, § 370.28 has been revised to indicate how the threshold levels apply to mixtures. The rule now states that if the reporting is on each component of the mixture that is a hazardous chemical, then the concentration of the hazardous chemical, in weight percent (greater than 1% or 0.1% if carcinogenic) should be multiplied by the mass (in pounds) of the mixture to determine the quantity of the hazardous chemical in the mixture. If a mixture is reported as whole, the threshold applies to the total weight of the mixture.

Finally, where mixtures have unknown composition, facilities should report the mixture as a whole.

F. Public Access to Information

Title III contains a number of provisions relating to public access to information submitted under sections 311 and 312, many of which were codified in today's final rule. Section 324 of Title III, which is not codified in the final rule, requires SERCs and LEPCs to make all MSDS, lists, and inventory forms that are submitted under sections 311 and 312 available to the public during normal working hours. This is the only source of Tier I information for the general public, and there is no access to Tier I below the regulatory threshold.

Section 370.30(a) of the regulation codifies section 311(c) of Title III and provides that any person may request an MSDS through the LEPC. If the MSDS is not in the possession of the LEPC (because a facility had the hazardous chemical only in amounts below the threshold or a facility had submitted only the list of chemicals), the LEPC must request the MSDS from the facility and the facility must, under § 370.21(d), submit the MSDS within 30 days. Under § 370.31, the LEPC must provide the requested information to the requester.

Section 370.30(b) codifies section 312(e) of Title III and provides that any person may request Tier II information concerning a specific chemical at a facility through the LEPC or SERC. If the Tier II information is not in their possession, the SERC or LEPC must request it from the facility if the chemical is stored at the facility in quantities above 10,000 pounds or if the requester is a public official. If the chemical is present in quantities below 10,000 pounds, the response by the SERC or LEPC is discretionary. Under § 370.25(c) of the final rule, a facility must submit requested Tier II information within 30 days. Under § 370.31, the LEPC or SERC must then provide the Tier II information to the requester.

1. Information below Thresholds

In the proposed rule EPA established temporary thresholds below which facilities would not be required to report under sections 311 and 312. However, those thresholds were not applicable to public requests for information on hazardous chemicals. Thus, facilities would need to report on hazardous chemicals below the thresholds, but only upon request. Although EPA codified the requirement that below-threshold requests be justified for Tier II information under section 312, no such

justification was proposed for below-threshold requests for MSDS. EPA solicited comment on its approach to thresholds and public access.

Commenters were split over the issue of public access to information below thresholds through the LEPC. In addition, some commenters believed that requests for below-threshold MSDS information should be justified, and some asked EPA to set guidelines for demonstrating adequate justification.

With respect to issues concerning request justification, section 312 is explicit about the justification of need required in public requests for Tier II information below 10,000 pounds if such information is not already in the possession of the SERC or LEPC but is silent on the issue of what should be included in the statement of need. EPA believes that the task of defining appropriate criteria for the justification of need should be left to the SERCs and LEPCs, who must ultimately decide whether to remit such a request. With regard to MSDS information below the threshold, neither the statute nor this regulation requires that the need underlying a request be justified. Congress specified in section 311(c)(2) that MSDS be submitted upon request by any person. The Agency thus believes that the preservation of access to all MSDS information by the public is most consistent with the intent of section 311.

2. Justification of Need

A number of commenters posed more specific questions on the necessity of justifying requests for Tier II information. One felt "need" should relate to the potential of a hazardous chemical directly to affect either person or property. Others noted that facilities should be able to review requests for Tier II information and be allowed to comment on sensitivity of information.

As indicated above, however, the LEPC and SERC have ultimate responsibility for setting guidelines in this area since the statute and today's final rule give them the decision-making authority in granting requests for Tier II information. Therefore, EPA believes that issues concerning the statement of need should be left to local and State officials.

A few commenters requested that a strategy be developed to assist the SERC and LEPC in fulfilling their responsibilities for public availability. Several other commenters felt programs should be developed to help the general public interpret and use the information. EPA intends to provide such guidance in the form of brochures and pamphlets to be published and distributed through the regional offices to SERCs and LEPCs at a later date. EPA recently used a series of workshops and other presentations to provide information on Title III to the public.

3. Other Clarification

Several commenters requested changes in the time frames for providing information to the public. Some commenters had general questions about how the public would have access to MSDS and inventory information. The public may request Tier II information through either the SERC or the LEPC. For quantities below 10,000 pounds, the SERC or LEPC may exercise discretion in forwarding these requests to a specific facility. Concerning MSDS requests, section 311 and today's final rule place the responsibility for handling requests only in the LEPC. States may, however, under their own authority, also require provision of such MSDS to the SERC.

One commenter requested that the rule clarify that any person may request Tier II information. Although the rule explicitly states that any person may request Tier II information, there are certain instances in which it is not automatically provided. For instance, a facility may opt to withhold chemical location information from the Tier II form, and the public would not have access to this location information. A person may request Tier II information for chemicals stored at a facility in quantities less than 10,000 pounds, but if the SERC or LEPC does not already possess the information, the requester would be required to give a written statement of need. Based on the statement, the LEPC or SERC may, where appropriate, request the information from the facility. A facility may also withhold chemical identity from disclosure by submitting a trade secret claim under section 322. Where a facility withholds chemical identity by virtue of trade secret provisions, the public may challenge the withholding by submitting a petition to EPA pursuant to section 322.

G. Trade Secrets and Confidentiality

EPA received several comments in support of the provision for withholding location information from the public at the facility's request. While a few commenters indicated a need for criteria for determining a confidential location, EPA agreed with other commenters that a request on the part of a facility owner or operator is sufficient. Section 324 allows a facility to request withholding of location information without any determination that such location would be confidential.

The Agency also received numerous comments regarding the protection of trade secret information under sections 322 and 323 of SARA. These will be addressed as part of EPA's rulemaking on trade secrets under sections 322 and 323, to be proposed later this year. It should be noted, though, that if a facility wishes to make a trade secret claim, it is required to submit the federal Tier II inventory form to EPA, rather than any alternative State form, with appropriate substantiation. Such trade secret claims should be sent to: U.S. Environmental Protection Agency, Emergency Planning and Community Right-to-Know, P.O. Box 70266, Washington, DC 20024-0266.

H. Design and Content of Forms

The most significant comments on the design and content of the Tier I and Tier II forms concerned the calculation of the average daily amount and the reporting format for storage location. Other significant comments concerned the emergency contact, the certification statement, and the Dun & Bradstreet number. In response to these comments, as well as comments on the general layout and graphic design of the forms, EPA has revised the section 312 reporting forms. Following is a discussion of these comments and EPA's response.

On the proposed Tier I and Tier II forms, EPA required facilities to report maximum daily amount and average daily amount in prescribed ranges. Several commenters approved of the proposed reporting ranges on the Tier I and Tier II forms, but several more believed the ranges were too broad. EPA received suggestions to narrow the ranges, add a range category of 0–9 pounds, combine the two lowest ranges, or devise ranges that correspond to powers of ten. A few commenters favored broader ranges.

Upon consideration of these comments, EPA has chosen to retain the ranges set forth in the proposed rule. The Agency believes that the ranges adequately balance the trade-off between protection of confidential information and provision of useful data. In addition, the present ranges are consistent with those proposed for use on the section 313 reporting form and those used on the Toxic Substances Control Act (TSCA) inventory form.

Several commenters favored EPA's proposed method of calculating average daily amount; that is, by totaling all daily weights and dividing by 365, or totaling all monthly weights and dividing by 12. Several other commenters, however were concerned that the results obtained by the

proposed method would be misleading because it would produce artificially low amounts for those chemicals present on site during only short periods of time throughout the year.

The Agency has decided to revise the method of calculating average daily amount so that the figure is based upon the number of days the chemical is actually on site. Thus, facilities should total all daily weights and divide by the number of days the chemical was on site. This method of calculation produces a more accurate figure for average daily amount, particularly for those chemicals that are on site for only a short time each year. To reflect the amount more accurately, however, EPA believes that it will be necessary to report the number of days used in the calculation and has revised the form to require reporting of this information.

The Agency received several comments concerning the maximum daily amount. As many commenters favored the method of calculation as expressed doubts concerning its ultimate usefulness. One commenter suggested that EPA require facilities to report maximum storage capacity instead of maximum daily amount.

Because the maximum daily amount describes a "worst case" scenario, it is useful to both emergency planners and emergency responders. It is important for them to know the maximum amount of hazardous chemicals that they might actually encounter at any time. Because storage capacity may not be an accurate reflection of the amount of hazardous chemicals actually on site at any one time, EPA believes that the reporting of maximum storage capacity is not an appropriate substitute for the maximum daily amount. Thus, EPA has not required reporting of maximum storage capacity instead of maximum daily amount. However, EPA is aware that maximum storage capacity may be the best information available to some facilities in calculating the maximum daily amount.

EPA received numerous comments regarding the "location" section of the Tier II form. Several commenters requested the use of any site identification procedure acceptable to local emergency response agencies; others suggested that EPA design the location coding system solely for ease of data entry. Several commenters gave specific suggestions for revision of the location identification system—namely, grid or quadrant systems. Several other commenters suggested that EPA allow facilities to report that chemicals are unbiquitous at the plant. Based on these comments, EPA has revised the Tier II form to provide for reporting of the building or lot, at a minimum, and to allow facilities to describe briefly on the form itself the location of hazardous chemicals, rather than requiring them to provide a site plan or site co-ordinates. EPA believes that the narrative approach will provide more flexibility for a facility, in conjunction with its SERC, LEPC, and fire department, to identify the method of providing the most useful chemical location information for specific emergency response and information management needs and capabilities of the community in which the facility is located.

EPA believes that additional requirements for location information, such as site plans or quadrants or grid systems, may be useful on a site-by-site basis, but are not necessary for each facility. If a State or local government desires such additional information, it may require it to be submitted under State or local law as a supplement to the federal form. However, the Agency encourages State and local governments to co-ordinate reporting formats so that facilities are not subject to duplicate or inconsistent reporting requirements.

Some commenters requested EPA to state the exceptions to reporting on the inventory forms. Another inquired about the correct number of exemptions.

The exemptions from reporting under both the OSHA hazard communication standard and section 311 of Title III are set out in the instructions to the form. The instructions on the proposed forms included eight reporting exemptions because EPA merged the OSHA and Title III exemptions where there appeared to be substantial overlap. In this final rule, the instructions to the inventory forms state the OSHA and Title III exemptions separately for clarity and accuracy.

EPA received numerous comments regarding the certification statement on the Tier I and Tier II forms. Several commenters raised concerns that the statement implied the owner's or operator's first-hand knowledge of the conditions at the facility relevant to Title III. In response to these concerns, EPA has modified the certification on the final form by deleting the word "immediately," to make clear that the signatory is responsible for the data on the form but has not personally interviewed those principally responsible for performing the calculations. The certification on the final form now reads: "I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate and complete."

A number of commenters wanted EPA to eliminate or revise the requirement for a 24-hour contact and telephone number. One commenter suggested that EPA require the same number of emergency contacts on Tier II as on Tier I.

The emergency contact is a person, or office at which persons will be available, who can aid responders in the event of an emergency at the facility. The emergency contact need not be a person with expertise concerning the chemical hazards at the facility, but he or she must be available to act as a referral if emergency responders need assistance in responding to a chemical accident at the facility. Although the Agency requires facilities to supply the name of only one emergency contact, both the Tier I and Tier II forms will have space for two. A facility may supply two emergency contacts as necessary to ensure 24-hour availability.

Numerous commenters inquired about the extent to which they could use their computers for reporting. The majority of the comments focused on the acceptability of computer-generated facsimiles of the forms; others dealt with electronic transmittal of data.

To the extent possible, EPA has designed the Tier I and Tier II forms to accommodate computer output. Since EPA will not receive the information, however, the issues regarding computer facsimiles and electronic transmittal are more appropriately addressed to the recipients of the information at the State and local levels. However, EPA does not believe that any provisions of section 312 would prohibit computer generated facsimile forms or electronic transmittal of data.

Several commenters stated that EPA should not require hazard category information on the Tier II form. Although the legislation requires hazard category information only on the Tier I form, EPA has designed Tier II as a worksheet for the preparation of Tier I. For this reason, and because the hazards may provide helpful data to the users of chemical-specific information, EPA believes that hazard categories are an essential element of the Tier II form and has retained this requirement in the final form.

Although several commenters questioned the necessity for the Dun & Bradstreet identification number, the Agency has opted to retain this requirement because of its general usefulness as a widely known and accessible identifier, unique for each

facility. In response to commenters who stated that Dun & Bradstreet numbers should not be required because they did not have such a number, EPA has revised the instructions to the form to indicate where facilities can obtain the number. (Information collection requirements are approved by Office of Management and Budget under control number 2050-0072.)

I. Integration of Title III Federal Requirements With State and Local Programs

A large number of commenters registered concern about the potential for duplication in data collection, since Title III requirements overlap with reporting provisions under some State and/or local laws. Some commenters would prefer to comply with Title III through equivalent State programs; others suggested that the reporting rules be flexible enough to allow integration with existing programs.

Although section 321 states that Title III generally does not pre-empt State or local laws, including similar community right-to-know reporting, the Agency strongly discourages duplicative reporting systems that would increase the community right-to-know paperwork burden and thus potentially reduce the effectiveness of the program and of public access to information. EPA encourages States to modify their community right-to-know requirements to accommodate Title III without eliminating additional requirements that are beneficial to State or local needs. The Agency also advises States to consider reporting requirements that are applicable to local emergency planning committees and fire departments. To the extent possible in this final rule, the Agency has attempted to provide flexibility for State and local implementation and integration with their existing programs.

Several commenters recommended that State and local jurisdictions be allowed to determine the method of reporting.

In the final rule, EPA has tried to provide as much flexibility as possible to the local and State officials who must implement this program, while at the same time provide a degree of standardization to the regulated community and ensure that statutory requirements are met. EPA has thus revised the regulations to specify the circumstances under which a State or local form can be used in lieu of the Tier I and Tier II forms published today. Revised §§ 370.40 and 370.41 of the final rule state that facilities will meet the Section 312 requirements if they submit the published form, or any State or local form that contains identical content. "Identical content" means that, at a minimum, the same information requested on the form published in today's final rule must be requested in some portion of the State form. States may, in addition, use the form as published today but add supplemental questions, either interspersed throughout the form or attached at the end.

J. Information Management

With respect to data management issues, commenters focused on two principal points. First, the majority of commenters on this issue strongly expressed the conviction that the entire program can be made workable only if the information is handled by computer systems. The second principal issue raised by commenters was the need for assistance in organizing the material; designing and selecting systems; co-ordinating the use of the material among SERCs, LEPCs, and fire departments; and ultimately making the information available to the general public.

Specific comments concerned the need to allow information submission in computer-readable media and for guidance from the federal government to aid information management at the State and local levels. A recurring message in the comments was the need for the federal government to play an active role in solving the extensive data management problems triggered by Title III. Suggestions were for EPA, alone or with OSHA, to develop model MSDS databases, to design or develop effective data management and communications techniques for information systems, to convene a high level workgroup to draft a plan for solving the problems, and to provide seed money to each SERC for development of its own MSDS information system. Commenters also raised general concerns about the sources for financial support to implement the legislation and the time necessary to prepare for implementation.

In response to the general information management concerns raised by commenters, the Agency agrees that the data resulting from Title III compliance would best be managed through a computerized system. EPA recommends that the LEPCs and fire departments work closely with the SERCs to develop flexible systems that address the particular requirements of each planning district. However, because most of Title III is carried out through State and local organizations, it is not appropriate for the Agency itself to recommend or design data management systems, to establish a national database under sections 311 and 312, to specify data collection points, or to make any other information management decisions that belong to the State and local authorities implementing the community right-to-know program. Thus, although EPA shares commenters' concerns over the critical data management needs generated by Title III, EPA believes that the most appropriate role for the Agency in information management under sections 311 and 312 will be one of technical assistance to State and local entities in developing effective information management systems. The Agency is reviewing such systems in an effort to identify useful systems that could meet State and local needs and also intends to publish technical guidance regarding the development of such systems by States.

EPA acknowledges that the provisions of Title III concerning hazardous chemicals and community right-to-know present information management problems that are difficult to implement, given the statutory time-frames and governmental budget constraints. Of all the sections of Title III, sections 311 and 312 present by far the largest information management burden for State and local governments. EPA's concern over this issue has been the principal basis for several key regulatory decisions during this rulemaking. For instance, to permit time to work out information management systems and to ensure that State and local capabilities are not overwhelmed during initial implementation, EPA is establishing a 3-year phase-in schedule with high initial reporting thresholds for both sections 311 and 312.

State and local governments also need time to obtain funding and to establish the organizations and processes to implement this legislation. In order to provide as much flexibility as possible to State and local governments in establishing their Title III programs, EPA is leaving decision-making concerning the medium to be used in reporting (e.g., paper, magnetic tape, telecommunication lines) to States and local governments.

Some State and local governments already receive information required under sections 311 and 312 from facilities in their jurisdictions, and some make this information available to the public. To the extent that these submissions under State or local law meet the requirements of sections 311 and 312 regarding the content of submission, timing, and recipients of the information, facilities submitting such information will be in compliance with the federal requirements. Duplicate

submissions under the federal community right-to-know program are unnecessary. Also, in some instances, it may be permissible for fire departments to designate such State systems as the address for their MSDS submissions, provided that these systems will support the emergency response needs.

K. Regulatory Impact Analysis

A number of comments addressed various aspects of the Regulatory Impact Analysis. Comments ranged from general concerns that estimated costs for industry or government were too low to specific comments on the time, personnel, or equipment attributed to individual compliance activities. The comments also addressed the methodology used in the RIA, including compliance activities they felt had been omitted by government, the inclusion of costs for requests and trade secrets in aggregate costs, estimating costs for facilities covered by the OSHA expansion, and expanding the treatment of small business costs.

A number of commenters stated that the time estimated for industry to fill out the forms, or the estimates of the time and space required by government to maintain MSDS, were too low. Other commenters argued generally that estimates of industry costs were too low and gave estimates ranging from one and one-half to ten times the EPA estimates.

EPA has revised the analysis to reflect variations in costs for sections 311 and 312 by facility size and number of MSDS. EPA has also modified the section 312 inventory forms and clarified the instructions in this final rulemaking, which should reduce the amount of time it will take industry to comply with these requirements. Wage rates used in the RIA have also been increased to reflect growth in wages and the technical personnel being used to comply with regulations. EPA believes that the costs imputed to the final rule reasonably estimate, on average, the time and other costs that will be incurred by facilities complying with the requirements of the regulation.

Several commenters addressed government costs, stating that estimated costs were too low, that not all necessary government activities were considered, or that additional personnel would be required to comply with sections 311 and 312. One commenter stated that EPA's estimated costs were too low by as much as an order of magnitude.

In response to these comments, EPA has revised the time requirements to include additional time spent, particularly by State and local government, on several activities. Wage rates in the government are assumed equal to those in the private sector; thus, government wage rates have also been revised to reflect the estimated change in private sector wages. It should be noted that the RIA has assumed that government agencies do the minimum activities necessary to comply with the regulations. Costs are intended to reflect, on average, the costs that will be incurred by representative government entities undertaking these activities. However, community right-to-know is essentially a State and local program, and the costs of implementing its provisions will depend on the activities undertaken by each entity. Thus, the costs presented in the RIA may underestimate the actual costs to individual government entities with sufficient funding and the ability, need, or constituency to be proactive in implementing Title III.

Several commenters said that EPA has not included in the RIA the costs of requesting information, responding to requests, or making trade secret claims. EPA has modified its approach and provides additional sensitivity analysis on the possible magnitude of some of the costs associated with information requests. However, it should, again, be stressed that community right-to-know is a State and local program; the number of requests is highly dependent on the extent and nature of the uses to which data are put, both by public officials and by private citizens and organizations. These uses, in turn, depend on the manner and breadth of the implementation and outreach plans of State and local governments, which makes the costs associated with requests for information difficult to predict. Thus, while a sensitivity analysis is provided, the costs of requests are not aggregated into total costs. The costs associated with trade secrets are being addressed in a separate rulemaking that is under way for the Title III trade secret provisions, sections 322 and 323 of SARA.

Numerous comments point out that EPA did not address the costs that may be associated with any forthcoming expansion of the OSHA hazard communication standard. These costs are included in a supplemental analysis, which is part of the final RIA. These costs are not aggregated into total costs of sections 311 and 312; total costs reflect the costs to facilities and government of complying with sections 311 and 312, given the current scope of the OSHA hazard communication standard.

Other commenters said that the costs estimated for small business were too low or that the regulation constituted a significant impact on small business. An additional group of commenters submitted a form letter saying that the regulations would be an immense burden on small business.

EPA has expanded its small business analysis considerably for the final rulemaking. In particular, per facility costs are varied to reflect both facility size and the estimated number of hazardous chemicals that are present, on average, at a facility in a particular SIC code and size class. To determine whether the regulation will have an impact on small business, a small facility is defined as one with fewer than 20 employees. This group is more likely to show an impact than the broader group (50-150 employees) suggested in the comments. The analysis then looks at the impact on small business using several criteria, including the ratio of costs per facility to sales. After consideration of this additional analysis, EPA reached the same conclusion as in the proposed rulemaking; a substantial number of small businesses will be affected, but the impact will not be significant. Thus, the Agency is not performing a Regulatory Flexibility Analysis.

L. Miscellaneous

1. Enforcement/Penalties

The Agency received numerous comments and queries on the subject of enforcement. Some commenters stated that a violation should be treated as a one-time occurrence and not a continuous violation as specified in the proposed rule. Others requested flexibility in determining violations and assessing penalties, especially where the owner or operator makes good faith efforts toward compliance. Still another commenter asked how enforcement would be accomplished.

With regard to one-time versus continuous violations, section 325(c)(3) of Title III provides that each day a violation of section 311 and 312 continues shall constitute a separate violation. EPA has therefore retained this provision in the final rule. With respect to issues concerning how EPA will enforce compliance with these provisions, EPA is preparing a compliance strategy for Title III that will address these issues. Criteria for determining penalties will also be set out in that document.

2. Compliance/Timing

Two dozen commenters addressed questions concerning compliance and scheduling. Their statements ranged

from a view that the 45-day response period for Tier II requests is unrealistic, to a request that EPA stipulate a 15-day period for a SERC or LEPC to respond to a public request for MSDS or Tier II forms and that the same 15-day deadline be placed on the facility.

EPA has retained the 45-day schedule for response to Tier II public requests as specifically provided under section 312. In the regulation, EPA establishes a 30-day schedule for response by an owner or operator to SERC or LEPC requests for MSDS and Tier II information. EPA believes that the 30-day timetable for Tier II information is necessary to ensure adequate time for the SERC and LEPC to meet the statutorily-established response time. The same period was estalished for MSDS responses to avoid confusion over applicable time periods under this rule. However, the Agency has also rejected the establishment of other time limitations in order to preserve flexibility at the State and local levels with respect to timing of responses.

3. Use of Tier I and Tier II Forms

Numerous comments were received indicating that Tier II information is more useful than Tier I information. EPA agrees with these commenters. For this reason, the Tier II form has been designed for potential use as a worksheet and guide for gathering information ultimately to be used in the Tier I aggregate data. Section 312 and § 370.25(b) of the regulations allow facilities to submit the Tier II form in lieu of Tier I.

Several commenters asked whether the Tier II inventory form could be submitted instead of the MSDS or list; others favored the option of submitting the MSDS instead of Tier I and Tier II. Under today's rule, the Tier II inventory form cannot be submitted in lieu of the MSDS; nor can the MSDS submission constitute compliance with inventory form reporting. Title III establishes several distinct reporting requirements under community right-to-know that serve different purposes. The MSDS submission under section 311 allows the public to find out what chemicals are present at facilities and the types of hazards they present. The 312 inventory forms provide more specific location, storage, and quantity information. These requirements are not alternative.

4. Need for Funds

A dozen commenters indicated a need for funding in order to carry out the Title III requirements.

No federal funding has been provided in support of Title III community right-to-know requirements at State and local levels. However, EPA intends to provide technical support to States in carrying out their responsibilities.

The Agency received a number of comments regarding the burden that Title III places on both industry and State and local agencies in terms of costs, manpower, and record-keeping. EPA has made every effort in this rulemaking to minimize this burden, while effectively satisfying the legislative intent of Title III. The Agency has instituted a 3-year phase-in period, encouraged the use of the list option as opposed to the MSDS option, and reduced the number of reporting categories for physical and health hazards. Additionally, the Agency as conducted outreach activities such has teleconferences and workshops targeted at overall Title III implementation.

5. Responsibility for and Appropriateness of Data

EPA received many comments requesting clarification of the submitter's responsibility for the accuracy and completeness of submitted data.

Several commenters felt that only producers, importers, and distributors should be responsible for the accuracy of chemical hazard assessments and that users should not be responsible for initiation or verification of data.

While producers, importers, and distributors are responsible for providing accurate MSDS information, downstream users who submit, or rely upon, such MSDS should make reasonable efforts to correct information that they know to be inaccurate or to inform the recipients of the information of its inaccuracies.

A number of commenters noted that many workplace substances classified as hazardous chemicals under OSHA regulations do not present a danger to communities. Others mentioned cleaning and maintenance products as examples and asked that they be excluded.

Many work-place substances do not, in fact, constitute a hazard to the community. Sections 311 and 312 focus primarily on the presence of hazardous chemicals within the community and the need for public access to information about their existence whether or not they pose a present hazard to the community. However, many cleaning and maintenance products are excluded from the definition of hazardous chemical as consumer products, or need be reported only on request if they are present in quantities below the threshold.

One commenter asked for a clarification of the obligations of facility owners or operators who voluntarily provide MSDS to customers and employees.

If an owner or operator chooses to provide MSDS to customers and employees even though he is not required to do so under OSHA, the owner or operator does not need to submit the MSDS or Tier I and Tier II forms under Title III since these requirements only apply to persons required to prepare or have available MSDS for hazardous chemicals under OSHA regulations.

6. Scope of the Section 311 and 312 Requirements

Several commenters remarked on the transitory nature of some of the information and the necessity of frequent revisions.

Under section 312, the reporting requirement is annual and thus will automatically capture new or revised information. Facilities may, and in most cases should, inform their local or State government or fire department immediately if there is a change in the emergency contact number or other significant information on the inventory forms. Facilities subject to section 303 must provide information on relevant changes at the facility to the LEPC for planning purposes. With respect to MSDS submission under section 311, under today's rule, a revised MSDS must be filed with the LEPC, the SERC, and the local fire department within three months after significant new information is discovered.

EPA received a number of comments on the scope of the reporting requirements. According to one commenter, reporting on all chemicals required to have an MSDS is too broad, because chemical suppliers have interpreted the OSHA hazard communication standard to include the broadest range of chemicals in order to avoid future liability. Another commenter felt that the reporting requirements would be too narrow if only SIC codes 20–39 were covered.

Title III requires that MSDS be submitted for each hazardous chemical for which an MSDS is required under OSHA except where EPA establishes a threshold for reporting. EPA does not believe that sections 311 and 312 requirements can or should be applied to facilities not required to have MSDS under OSHA regulations. However, when OSHA's expansion of the hazard communication standard to non-manufacturing facilities becomes effective, the reporting requirements under sections 311 and 312 will automatically apply to the facilities newly covered by the OSHA

requirements. Also, EPA does not believe that the expansive interpretation of the OSHA hazard communication standard given by members of the regulated community provides a sufficient basis for limiting the scope of section 311 and 312 requirements, especially in light of explicit statutory coverage and specific statutory exclusions.

To the extent possible, EPA has taken into consideration the expansion of the 311 and 312 universe. EPA has limited authority to revise sections 311 and 312 requirements and has in this rule exercised its full authority to ensure an effective community right-to-know program. In this rule, EPA has mitigated impact by setting high initial thresholds to avoid undue burden in early implementation stages, reducing hazard categories, developing outreach programs, and retaining flexibility for local and State governments as much as possible. However, as discussed earlier, EPA will review the minimum thresholds established in this rule when OSHA's expansion of its hazard communication standard becomes effective and will undertake a rulemaking, if necessary, to revise those thresholds to avoid overwhelming MSDS and Tier I submissions to State and local officials as a result of the expansion.

One commenter recommended that all required information, including updates, be submitted to both the State and local organizations to maintain consistency in reporting.

EPA agrees and has exercised its general rulemaking authority under Section 328 to require submission of the updated MSDS to all entities receiving the original MSDS. Otherwise, under the proposed rule, only the LEPC would receive updated information and thus have current information on a facility. A new MSDS at the facility must also be submitted to all three entities (as indicated in § 370.21(c)(2)).

V. Relationship to Other EPA Programs

A. Other Title III Programs

1. Subtitle A—Emergency Planning

Title III of SARA establishes several reporting and notification requirements in addition to sections 311 and 312. Subtitle A of Title III contains several notification provisions that are critical to local emergency planning. In order to facilitate local emergency planning, under section 302 facilities that have present an amount of an extremely hazardous substance in excess of the corresponding threshold planning quantity were required to notify the State emergency response commission by May 17, 1987, or within 60 days of acquisition of such a substance. Section 303 requires that such facilities designate a representative to work with the local emergency planning committees in the Title III planning process and provide information concerning the facility that may be relevant to emergency planning. Section 304 establishes immediate release reporting requirements to enable timely and effective local response to releases of extremely hazardous substances and CERCLA hazardous substances. These emergency planning requirements are set forth in a final rule published on April 22, 1987. 52 FR 13380. These requirements are unaffected by today's rule.

Today's rule sets out the reporting requirements under sections 311 and 312, Subtitle B of Title III. The focus of Subtitle B is public access to information concerning chemicals in their communities rather than emergency response, and thus reporting requirements under Subtitle B are both broader in scope than Subtitle A and, under section 312, continuing in nature. However, the information obtained or made available under sections 311 and 312 of Subtitle B may also be of significant value to emergency responders.

Subtitle B will make available to the local and State emergency planners information on other chemicals and facilities, beyond those identified under Subtitle A, that they may wish to include in their emergency planning efforts. Tier II information under section 312 will provide specific information on the quantities and locations of hazardous chemicals. Thus, sections 311 and 312 provide information beneficial to the emergency planning required under Subtitle A. As discussed in the April 22, 1987, final rule, the facilities identified as a result of that rule are only a "first cut" of the facilities and potential chemical hazards for which emergency planning may be necessary.

2. Subtitle B—Section 313 Toxic Chemical Release Inventory

Subtitle B also establishes reporting requirements under Section 313. Beginning July 1, 1988, certain manufacturing facilities at which there is a "toxic chemical" manufactured, processed, or otherwise used in excess of a statutory quantity must annually report to EPA and the State, with respect to each substance, the maximum amount present at the facility, the treatment or disposal methods used, and the annual quantity released into the environment. These requirements are the subject of a separate rulemaking, proposed for public comment on June 4, 1987. 52 FR 21152.

3. Trade Secrets

Title III also establishes provisions for the protection of trade secrets. Section 322 of Title III entitles persons required to submit information under sections 303, 311, 312, and 313 to withhold the specific chemical identity from disclosure under certain conditions. In order to withhold such information, however, a person must submit the withheld information and an explanation to EPA. Under section 322(c), EPA is required to publish regulations to implement the trade secret provisions as soon as practicable after the enactment of SARA. EPA intends to propose trade secret regulations under Section 322 later this year.

B. CERCLA Reporting Requirements

CERCLA section 103 establishes notification requirements for facilities at which there is a release of a reportable quantity (RQ) of a CERCLA hazardous substance. Such releases must be immediately reported to the National Response Center (800–424–8802, or in the Washington, DC metropolitan area at 202–426–2675). These reporting requirements and the list of hazardous substances and RQs are found in 40 CFR Part 302 and are for the purpose of alerting federal responders to a potentially dangerous release of a hazardous substance so that any necessary response can be made in a timely fashion. These notification requirements are similar to the release notification requirements under section 304 of Title III that must be made to local and State response personnel and are unaffected by today's rule.

VI. Effective Date

Section 553(d) of the Administrative Procedure Act (APA) generally requires that the effective date of substantive rules be no earlier than 30 days after publication in the **Federal Register**. However, section 553(d) also provides exceptions to the 30-day effective date requirement for rules that grant an exemption or relieve a restriction and for other "good cause."

EPA has made this rule immediately effective upon publication for several reasons. First, the submission of MSDS or alternative lists is required under section 311 by October 17, 1987. Providing a 30-day effective date would make this regulation, which implements those requirements, effective after October 17 and thus may cause serious confusion within the regulated

community over how to comply with statutory and regulatory reporting requirements. In addition, this final rule reduces the categories for reporting and establishes minimum thresholds, which relieves the impact of the statutory requirements otherwise effective on October 17, 1987. Finally, the other requirements implemented by this rule relate to section 312 reporting, which is not required until March 1, 1988. Thus, those requirements would not be affected by the 30-day effective date requirement under section 553(d) of the APA.

Because EPA believes that it thus has "good cause" to suspend the 30-day effective date requirement and this rule relieves reporting otherwise required by statute, the Agency has made this rule immediately effective in accordance with section 553(d) of the APA.

VII. Regulatory Analyses

A. Regulatory Impact Analysis

1. Purpose

Executive Order No. 12291 requires each federal agency to determine if a regulation is a "major" rule as defined by the Order and to prepare and consider a Regulatory Impact Analysis (RIA) in connection with each major rule. Because EPA has determined that the reporting requirements for hazardous chemicals in this rulemaking constitute a major rule under Executive Order No. 12291, the Agency has prepared an RIA to assess the economic impact on the final regulation on affected industry and State and local government entities. The following results are presented in detail in the analysis documented in *Regulatory Impact Analysis in Support of Final Rulemaking Under Sections 311 and 312 of the Superfund Amendments and Reauthorization Act of 1986*, which is available for review in the public docket for this rulemaking.

This rule was submitted to the Office of Management and Budget for review as required by E.O. No. 12291.

2. Methodology and Data Sources

EPA conducted an assessment of the costs, benefits, and economic impacts associated with the final rule and the primary regulatory alternatives. The regulation affects employers covered by some provisions of OSHA's hazard communication standard and three types of government entities—State emergency response commissions, local emergency planning committees, and fire departments. Both industry and government are required by sections 311 and 312 of SARA to undertake certain activities, and, thus, both types of entities incur costs to comply with these regulations.

Benefits for both industry and government may also arise in conjunction with compliance activities. In addition, industry, government, and other groups may, as a result of these regulations, undertake additional voluntary activities that generate benefits both for these groups as well as for the general community. The interrrelationships among the activities undertaken by these diverse groups, the provisions of Title III, and the potential consequences for health and the environment are complex. Thus, time constraints did not permit EPA to perform a quantitative evaluation of the benefits of these provisions; a qualitative discussion of the benefits is provided in the RIA.

Costs of complying with sections 311 and 312 of SARA are incurred by covered facilities, State emergency response commissions, local emergency planning committees, and fire departments. Total costs depend on the number of facilites reporting, the total number of MSDS, and the number of government entities receiving the data.

For the industry analysis, EPA analyzed the activities that each facility would have to undertake to comply with sections 311 and 312 and the unit costs associated with each activity. It was assumed that the cost incurred by a facility varied in different years depending on the regulatory alternative being considered, the size of the facility, and the number of chemicals at the facility. Total costs to industry, thus, depend on the number of facilities affected or reporting, the number of chemicals for which MSDS are maintained at these facilities, and the unit costs associated with each of the compliance activities.

OSHA's hazard communication standard (HCS) currently covers facilities in the manufacturing sector (Standard Industrial Classification (SIC) codes 20 through 39), although OSHA has recently expanded the HCS to the non-manufacturing sector, to be effective in May, 1988. The number of facilities in each two-digit manufacturing SIC code nationwide was obtained from the Bureau of the Census (County Business Patterns, U.S. Department of Commerce, 1984) for four facility sizes: (1) 1–19 employees, (2) 20–99 employees, (3) 100–249 employees, and (4) more than 249 employees. Based on census data, there are an estimated 350,740 manufacturing facilities that could potentially be affected by this rule.

The number of MSDS present, on average, at a facility in each SIC code and facility size class was provided by updating OSHA's 1980 estimates of the number of "regulated chemicals" (i.e., MSDS) in each SIC code and size class to 1986. The total number of MSDS maintained at all manufacturing facilities is estimated to be 35,004,503, which implies that an average facility maintains 100 MSDS. On average, the smallest facilities (those with 1–19 employees) are estimated to have 74 MSDS, and the largest facilities (more than 250 employees) have 306 MSDS.

The costs to industry of complying with each of the regulatory alternatives have been estimated as have the costs of complying with the default legislative requirements if EPA had promulgated no regulations. Five regulatory alternatives are identified for analysis in this report. The regulatory options differ from each other with regard to the threshold that is in effect in each year. Raising the threshold in a given year reduces industry costs in that year by reducing the number of chemicals that facilities report under both Sections 311 and 312 and by reducing the number of facilities that report.

Estimates of the numbers of covered facilities and reportable chemicals for each threshold level were obtained from a data set that was compiled as part of an industrial survey conducted by the State of New Jersey in 1979. To perform this analysis, the chemical reports in the New Jersey data set were weighted to make the mix of facilities by SIC code more representative of the mix of facilities nationwide. The effects of different thresholds on the numbers of facilities and chemicals covered were then calculated. The cost methodology assumed that the effect of thresholds on the percent of facilities or chemicals covered is unaffected by SIC code or the size of the facility. At 10,000 pounds, it is estimated that 22 percent of the facilities (78,000) will be required to report, and that 13 percent of the chemicals (4.5 million) will be reported. At 500 pounds, it is estimated that 82 percent of the facilities (288,000) and 57 percent of the chemicals (19.9 million) will be covered.

Similar weighting procedures were followed for data sets obtained from two other states, Michigan and New York. The data from these states did not contradict the New Jersey data; the latter were used in the analysis since they were more complete in several variables and also provided a more conservative view of the extent to which thresholds reduce costs.

In addition to differences in the reporting thresholds, the regulatory alternatives differ from the default statutory requirements in two respects. First, the statutory default for hazard categorization is the OSHA categories, which were defined as 23 categories of health and physical hazards for the proposed rule. EPA is promulgating five

hazard categories; performing hazard categorization should be less costly for industry than under the 23 OSHA categories. Second, EPA is publishing inventory forms for reporting; if no forms exist, the legislation requires that facilities submit section 312 information by letter. Both these factors reduce the estimated cost of the regulatory alternatives in comparison with the legislation.

The analysis of costs to government proceeded along lines similar to the industry analysis. The analysis estimated costs for a representative State commission, local committee, and fire department. It was assumed that the costs incurred by each entity in each year depended on the number of reports received, on the number of facilities reporting, and on the number of government entities. EPA assumed that there would be only one commission per State and estimated the number of local committees and fire departments.

Both the industry and government analyses assume that reporting and receiving entities undertake the minimum activities that they must perform to comply with SARA. The analysis, therefore, does not take into account the costs associated with voluntary activities, such as designing and using computer systems to store and access the data, alterations in chemical usage patterns that may arise at facilities as a result of these sections of SARA, or other activities or effects.

Several supplemental analyses were performed to provide evidence on the sensitivity of the results to changes in various assumptions of the methodology. In particular, present value total costs were computed (a) for two discount rates, 4% and 10%, (b) using an alternative set of results on the effects of thresholds, (c) for the 23 OSHA categories as well as the five categories in the rule, and (d) for the non-manufacturing facilities that will be covered by the OSHA expansion of the HCS.

An analysis of some of the costs potentially associated with requests is also presented. In particular, a sensitivity analysis of the aggregate cost to government of responding to requests for MSDS or Tier I information when the information is already in the files is included. The cost to a facility of responding to an individual request for MSDS or Tier I information is provided as is the cost to a government entity of requesting MSDS or Tier I information if it is not in the files. The cost to a facility of responding to Tier II requests, under alternative assumptions on the number of chemicals for which Tier II information is requested, is also provided.

3. Results

The RIA analyzes five regulatory alternatives as well as the statutory or default baseline. In addition, two alternative hazard categorization schemes are considered. The five threshold options considered are:

Alternative I: No threshold
Alternative II: (Proposed)
  10,000 pounds in year 1
  500 pounds in year 2
  No threshold in year 3 and subsequent years
Alternative III:
  10,000 pounds in year 1
  10,000 pounds in year 2
  500 pounds in year 3 and beyond
Alternative IV:
  10,000 pounds in year 1
  10,000 pounds in year 2
  50 pounds in year 3 and beyond
Alternative V:
  10,000 pounds in year 1
  10,000 pounds in year 2
  2,000 pounds in year 3 and beyond.

In present value (PV) terms, the cost of each of the regulatory alternatives is lower than the cost associated with the statutory requirements. Present value costs for each of these threshold alternatives were computed by discounting annual costs over the first ten years of reporting at ten percent. Assuming the five hazard categories promulgated in the final rule, the PV costs to industry for the five alternatives range between $520 million and just over $1 billion, in comparison with $1.6 billion for the statutory requirements (the baseline).

For government, present value costs range between $120 million and $260 million; the costs of the no-threshold option are the greatest and are identical with the costs of the baseline under the assumptions of the analysis. For both industry and government, Alternative V, which has the highest permanent threshold, has the lowest continuing costs and the lowest present value costs. Alternative I, the no-threshold option, has the highest costs. Alternative III, the preferred alternative for this rulemaking, is towards the low end: $708 million for industry and $178 million for government.

For Alternative III, first-year industry costs equal approximately $162 million, second-year costs drop to $24 million since the threshold is unchanged, third year costs rise to $348 million, since the reduction in the threshold requires many more facilities to report on additional chemicals. Costs level off at $59 million in the fourth and subsequent years. Costs for the other alternatives in the fourth and subsequent years range between $39 million and $66 million, depending on the threshold level in those years.

In the first year of reporting, all system set-up and design costs are attributed to section 311; thus, the costs to industry of complying with section 311 slightly outweight those associated with section 312 for all regulatory alternatives except Alternative I, the no-threshold option. For year three onward, section 312 costs outweigh section 311 costs; for Alternative III in year four, the costs associated with section 312 are approximately 64 percent of the combined costs to industry of sections 311 and 312.

In general, annual government costs for sections 311 and 312 combined are much smaller than those estimated for industry. This reflects the assumption in the analysis that many costs, such as rule familiarization and system design, are incurred by each individual facility or government entity and are not directly related to the number of forms being handled. First-year costs equal $43 million for all alternatives except the no-threshold option; second-year costs drop substantially; third-, fourth- (and subsequent) year costs level off at between $15 million and $32 million. Although costs to an individual State commission far exceed those to a local committee or fire department, there are many more fire departments than commissions or committees so that, in aggregate, costs to fire departments may account for as much as one-third to more than one-half of government costs in any given year.

The above costs do not reflect the costs of the regulatory alternatives if OSHA's 23 hazard categories had been used in the final rule. In present value terms, using the original 23 categories rather than five leads to a 28% to 38% increase in costs over 10 years, depending on the alternative.

Both industry and government will incur costs in conjunction with requests. SERCs, LEPCs and fire departments, as well as other government officials, may have access to the information reported under these sections and may request additional information. In addition, SERCs and LEPCs will, under certain circumstances, have to make available MSDS and inventory forms that they have received from facilities. They will also have to request information that either was not reported or that concerns chemicals below the threshold, and they will need to make determinations on, and possibly request, Tier II

information. Similarly, facilities will need to respond to requests by government. It is difficult to estimate the aggregate costs associated with requests, since the magnitude of these costs depends crucially on the behavior of the public and government and the types of programs that are set up on the threshold level in effect, and on the government's implementation of the Tier II provisions.

An estimate of the potential costs to government of responding to requests for MSDS was obtained assuming that requests for between five and 25 percent of facilities are received by government. If government agencies provide copies of all MSDS that a facility has submitted, estimated costs to government of handling these requests range between less than $400,000 to over $1.8 million.

The number of Tier II requests to which industry must respond will depend on the criteria used by local committees to evaluate public requests, the number of public requests made, the distribution of these requests across chemical volumes, and the number of requests originating with the government. It is thus difficult to estimate the aggregate costs associated with Tier II information; however, the costs to an individual facility of responding to a Tier II request may range between approximately $800 and $6,500, depending on the number of chemicals for which the request is received and the size of the facility.

Similarly, the number of requests that government will make to industry for MSDS stored below the threshold will depend on the number of requests that governments receive, which, in turn, depends on the size of the threshold and the outreach program and policies of government. Further, if facilities choose to submit lists, additional requests for MSDS will be generated.

No aggregate estimates of the costs of complying with requests below the threshold are presented. However, the cost to government of requesting all MSDS from a facility, photocopying, and mailing the information to the requester when the information is not on file is estimated to be $52 per request; the cost to industry of complying with the request is $31. Those activities and associated costs are intended to represent one reasonable method of making information available to the public and may not be used by all government entities.

The analysis also examined the effects of OSHA's expansion of its HCS on industry and government costs. This expansion may affect as many as 3.5 million non-manufacturing facilities with approximately 67 million MSDS. Very rough cost estimates suggest that, for the chosen alternative, present value costs to non-manufacturing facilities of complying with sections 311 and 312 combined may be as high as $3.7 billion; this is approximately five times the costs estimated for manufacturing. For government, incremental costs associated with the expansion are approximately $1.1 billion, which is over six times the costs associated with the current scope of the HCS.

Benefits arise in conjunction with several parts of the reporting requirements of this rule. Potential benefits arise in conjunction with this rule primarily because the information that is reported is used (e.g., more effective planning occurs, which reduces the probability of accidents or chronic exposures). Thus, the provisions of the regulation affect the benefits generated, in comparison with those generated by the statutory requirements, in several ways. First, the reporting thresholds affect the volume of information submitted. Reducing the number of submissions generates benefits if the information is more manageable. However, raising thresholds may reduce benefits if public access to complete information on chemical hazards in the community is reduced or impeded.

Second, simplifying the hazard classification system affects benefits. On the one hand, it promotes efficient use of the information; conversely, it reduces the level of detail available to the government and the public.

Benefits also raise in conjunction with two public access provisions that have been incorporated into the final rule: reporting on the list of EHS at 500 pounds or the TPQ and access by the public, on request, to information on chemicals stored below the threshold. Both these provisions provide benefits to communities with specific needs for complete information.

Finally, use of the published form by industry for Section 312 reporting may provide benefits. Consistently formatted information is easier to process, manage, and use and thus may encourage utilization of the information by the general public and government entities.

B. Regulatory Flexibility Act

1. Purpose

Under the Regulatory Flexibility Act, whenever an agency is required to issue any proposed or final rule for publication in the **Federal Register**, it must prepare and make available a Regulatory Flexibility Analysis that describes the impact of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions), unless the agency's Administrator certifies that the rule will not have a significant impact on a substantial number of small entitles. The analyses contained in the RIA address the impact of this rule on small entities. Based on these analyses, EPA has concluded that, while the rule affects a substantial number of small entities, the impact on each is not significant.

2. Methodology and Results

To examine the impacts on small businesses, EPA compared average costs for small facilities (defined to be those with 1–19 employees) to average and median sales for those facilities, by two-digit SIC code.

There are a substantial number of small businesses under this definition; 225,423 facilities—64 percent of total manufacturing—are estimated to be small. All of these facilities must, at least, incur the cost of becoming familiar with the requirements of these Sections, and thus, incur some costs of complying with sections 311 and 312.

In order to assess the impacts on small businesses, several guidelines were used. The primary criterion, however, is the ratio of annual costs to average or median sales. A worst-case scenario is provided by examining the first year of Alternative I, no threshold. Average costs to industry for small businesses, by SIC code, range between $1,400 and $2,100. As a percentage of average sales, the range is .12 to .71 percent. The range as a percentage of median sales is narrower—.20 to .64 percent. This is well within EPA's guidelines that cost remain below 5 percentage of sales in order to avoid significant impacts.

However, EPA is concerned that it has been unable to provide a complete assessment of the impact of this rule on small businesses in all business sectors that will in the future become subject to these requirements due to OSHA's expanded hazard communication standard. As indicated earlier, EPA is understanding a more detailed review of the appropriateness of these thresholds in this rule as they apply to the expanded coverage of the OSHA MSDS requirements. EPA will also be conducting a further analysis of small businesses newly subject to OSHA and Title III requirements.

3. Certification

On the basis of the analyses contained in the RIA with respect to the impact of this rule on small entities, I hereby certify that this rule will not have a significant impact on a

substantial number of small entities. This rule, therefore, does not require a Regulatory Flexibility Analysis.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. and have been assigned OMB control number 2050.0072.

VIII. Submission of Reports

If necessary to obtain reporting forms, facilities should contact their State emergency response commission. Although EPA intends to provide camera-ready copy of the federal form for use by the SERCs, the commission will be responsible for co-ordinating with the LEPCs and fire departments regarding the printing and distribution of the inventory forms.

To obtain the address of a SERC, an individual or facility should contact their Governor's office or the Chemical Emergency Preparedness Hotline at (800) 535-0202 or (202) 479-2449 (DC and Alaska). The SERC should be able to provide information concerning the LEPCs within the State.

List of Subjects in 40 CFR Part 370

Chemicals, Hazardous substances, Extremely hazardous substances, Intergovernmental relations, Community right-to-know, Superfund Amendments and Reauthorization Act, Chemical accident prevention, Chemical emergency preparedness, Community emergency response plan, Contingency planning, Reporting and recordkeeping requirements.

Date: October 8, 1987

Lee M. Thomas,

Administrator.

For the reasons set out in the Preamble, Subchapter J of Title 40 of the Code of Federal Regulations is amended by adding Part 370 to read as follows:

PART 370—HAZARDOUS CHEMICAL REPORTING: COMMUNITY RIGHT-TO-KNOW

Subpart A—General Provisions

Sec
370.1 Purpose
370.2 Definitions
370.5 Penalties

Subpart B—Reporting Requirements

Sec.
370.20 Applicability
370.21 MSDS Reporting
370.25 Inventory Form Reporting
370.28 Mixtures

Subpart C—Public Access and Availability of Information

Sec.
370.30 Requests for Information
370.31 Provision of Information

Subpart D—Inventory Forms

Sec.
370.40 Tier I Emergency and Hazardous Chemical Inventory Form
370.41 Tier II Emergency and Hazardous Chemical Inventory Form

Authority: Secs. 311, 312, 324, 325, 328, 329 of Pub. L. 99-499, 100 Stat. 1613, 42 U.S.C. 11011, 11012, 11024, 11025, 11028, 11029.

Subpart A—General Provisions

§ 370.1 Purpose.

These regulations establish reporting requirements which provide the public with important information on the hazardous chemicals in their communities for the purpose of enhancing community awareness of chemical hazards and facilitating development of State and local emergency response plans.

§ 370.2 Definitions.

"Commission" means the State emergency response commission, or the Governor if there is no commission, for the State in which the facility is located.

"Committee" means the local emergency planning committee for the emergency planning district in which the facility is located.

"Environment" includes water, air, and land and the interrelationship that exists among and between water, air, and land and all living things.

"Extremely hazardous substance" means a substance listed in the Appendices to 40 CFR Part 355, Emergency Planning and Notification.

"Facility" means all buildings, equipment, structures, and other stationary items that are located on a single site or on contiguous or adjacent sites and that are owned or operated by the same person (or by any person which controls, is controlled by, or under common control with, such person). For purposes of emergency release notification, the term includes motor vehicles, rolling stock, and aircraft.

"Hazard Category" means any of the following:

(1) "Immediate (acute) health hazard," including "highly toxic," "toxic," "irritant," "sensitizer," "corrosive," (as defined under § 1910.1200 of Title 29 of the Code of Federal Regulations) and other hazardous chemicals that cause an adverse effect to a target organ and which effect usually occurs rapidly as a result of short term exposure and is of short duration;

(2) "Delayed (chronic) health hazard," including "carcinogens" (as defined under § 1910.1200 of Title 29 of the Code of Federal Regulations) and other hazardous chemicals that cause an adverse effect to a target organ and which effect generally occurs as a result of long term exposure and is of long duration;

(3) "Fire hazard," including "flammable," combustible liquid," "pyrophoric," and "oxidizer" (as defined under § 1910.1200 of Title 29 of the Code of Federal Regulations);

(4) "Sudden release of pressure," including "explosive" and "compressed gas" (as defined under § 1910.1200 of Title 29 of the Code of Federal Regulations); and

(5) "Reactive," including "unstable reactive," "organic peroxide," and "water reactive" (as defined under § 1910.1200 of Title 29 of the Code of Federal Regulations).

"Hazardous chemical" means any hazardous chemical as defined under § 1910.1200(c) of Title 29 of the Code of Federal Regulations, except that such term does not include the following substances:

(1) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration.

(2) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use.

(3) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public.

(4) Any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual.

(5) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

"Inventory form" means the Tier I and Tier II emergency and hazardous chemical inventory forms set forth in Subpart D of this Part

"Material Safety Data Sheet" or "MSDS" means the sheet required to be developed under § 1910.1200(g) of Title 29 of the Code of Federal Regulations.

"Person" means any individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of State, or interstate body.

"Present in the same form and concentration as a product packaged for

distribution and use by the general public" means a substance packaged in a similar manner and present in the same concentration as the substance when packaged for use by the general public, whether or not it is intended for distribution to the general public or used for the same purpose as when it is packaged for use by the general public.

"State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Northern Mariana Islands, and any other territory or possession over which the United States has jurisdiction.

"TPQ" means the threshold planning quantity for an extremely hazardous substance as defined in 40 CFR Part 355.

§ 370.5 Penalties

(a) *MSDA reporting.* Any person other than a governmental entity who violates any requirement of § 370.21 shall be liable for civil and administrative penalties of not more than $10,000 for each violation.

(b) *Inventory reporting.* Any person other than a governmental entity who violates any requirement of § 370.25 shall be liable for civil and administrative penalties of not more than $25,000 for each violation.

(c) *Continuing violations.* Each day a violation described in paragraphs (a) or (b) of this section continues shall constitute a separate violation.

Subpart B—Reporting Requirements

§ 370.20 Applicability.

(a) *General.* The requirements of this subpart apply to any facility that is required to prepare or have available a material safety data sheet (or MSDS) for a hazardous chemical under the Occupational Safety and Health Act of 1970 and regulations promulgated under that Act.

(b) *Minimum threshold levels.* Except as provided in paragraph (b)(3) of this section, the minimum threshold level for reporting under this subpart shall be according to the following schedule.

(1) The owner or operator of a facility subject to this Subpart shall submit an MSDS:

(i) On or before October 17, 1987 (or 3 months after the facility first becomes subject to this subpart), for all hazardous chemicals present at the facility in amounts equal to or greater than 10,000 pounds, or that are extremely hazardous substances present at the facility in an amount greater than or equal to 500 pounds (or 55 gallons) or the TPQ, whichever is less, and

(ii) On or before October 17, 1989 (or 2 years and 3 months after the facility first becomes subject to this Subpart), for all hazardous chemicals present at the facility between 10,000 and zero pounds for which an MSDS has not yet been submitted.

(2) The owner or operator of a facility subject to this Subpart shall submit the Tier I form:

(i) On or before March 1, 1988 (or March 1 of the first year after the facility first becomes subject to this Subpart), covering all hazardous chemicals present at the facility during the preceding calendar year in amounts equal to or greater than 10,000 pounds, or that are extremely hazardous substances present at the facility in an amount greater than or equal to 500 pounds (or 55 gallons) or the TPQ, whichever is less, and

(ii) On or before March 1, 1989 (or March 1 of the second year after the facility first becomes subject to this Subpart), covering all hazardous chemicals present at the facility during the preceding calendar year in amounts equal to or greater than 10,000 pounds, or that are extremely hazardous substances present at the facility in an amount greater than or equal to 500 pounds (or 55 gallons) or the TPQ, whichever is less, and

(iii) On or before March 1990 (or March 1 of the third year after the facility first becomes subject to this Subpart), and annually thereafter, covering all hazardous chemicals present at the facility during the preceding calendar year in amounts equal to or greater than zero pounds or that are extremely hazardous substances present at the facility in an amount equal to or greater than 500 pounds (or 55 gallons) or the TPQ, whichever is less.

(3) The minimum threshold for reporting in response to requests for submission of an MSDS or a Tier II form pursuant to §§ 370.21(d) and 370.25(c) of this Part shall be zero.

§ 370.21 MSDS reporting.

(a) *Basic requirement.* The owner or operator of a facility subject to this Subpart shall submit an MSDS for each hazardous chemical present at the facility according to the minimum threshold schedule provided in paragraph (b) of § 370.20 to the committee, the commission, and the fire department with jurisdiction over the facility.

(b) *Alternative reporting.* In lieu of the submission of an MSDS for each hazardous chemical under paragraph (a) of this section, the owner or operator may submit the following:

(1) a list of the hazardous chemicals for which the MSDS is required, grouped by hazard category as defined under § 370.2 of this Part;

(2) the chemical or common name of each hazardous chemical as provided on the MSDS; and

(3) except for reporting of mixtures under § 370.28(a)(2), any hazardous component of each hazardous chemical as provided on the MSDS.

(c) *Supplemental reporting.* (1) The owner or operator of a facility that has submitted an MSDS under this section shall provide a revised MSDS to the committee, the commission, and the fire department with jurisdiction over the facility within three months after discovery of significant new information concerning the hazardous chemical for which the MSDS was submitted.

(2) After October 17, 1987, the owner or operator of a facility subject to this section shall submit an MSDS for a hazardous chemical pursuant to paragraph (a) of this section or a list pursuant to paragraph (b) of this section within three months after the owner or operator is first required to prepare or have available the MSDS or after a hazardous chemical requiring an MSDS becomes present in an amount exceeding the threshold established in § 370.20(b).

(d) *Submission of MSDS upon request.* The owner or operator of a facility that has not submitted the MSDS for a hazardous chemical present at the facility shall submit the MSDS for any such hazardous chemical to the committee upon its request. The MSDS shall be submitted within 30 days of the receipt of such request.

§ 370.25 Inventory reporting.

(a) *Basic requirement.* The owner or operator of a facility subject to this Subpart shall submit an inventory form to the commission, the committee, and the fire department with jurisdiction over the facility. The inventory form containing Tier I information on hazardous chemicals present at the facility during the preceding calendar year above the threshold levels established in § 370.20(b) shall be submitted on or before March 1 of each year, beginning in 1988.

(b) *Alternative reporting.* With respect to any specific hazardous chemical at the facility, the owner or operator may submit a Tier II form in lieu of the Tier I information.

(c) *Submission of Tier II information.* The owner or operator of a facility subject to this Section shall submit the Tier II form to the commission, committee, or the fire department having

jurisdiction over the facility upon request of such persons. The Tier II form shall be submitted within 30 days of the receipt of each request.

(d) *Fire department inspection.* The owner or operator of a facility that has submitted an inventory form under this section shall allow on-site inspection by the fire department having jurisdiction over the facility upon request of the department, and shall provide to the department specific location information on hazardous chemicals at the facility.

§ 370.28 Mixtures.

(a) *Basic reporting.* The owner or operator of a facility may meet the reporting requirements of §§ 370.21 (MSDS reporting) and 370.25 (inventory form reporting) of this Subpart for a hazardous chemical that is a mixture of hazardous chemicals by:

(1) Providing the required information on each component in the mixture which is a hazardous chemical, or

(2) Providing the required information on the mixture itself, so long as the reporting of mixtures by a facility under § 370.21 is in the same manner as under § 370.25, where practicable.

(b) *Calculation of the quantity.* (1) if the reporting is on each component of the mixture which is a hazardous chemical, then the concentration of the hazardous chemical, in weight percent (greater than 1% or 0.1% if carcinogenic) shall be multiplied by the mass (in pounds) of the mixture to determine the quantity of the hazardous chemical in the mixture.

(2) If the reporting is on the mixture itself, the total quantity of the mixture shall be reported.

Subpart C—Public Access and Availability of Information

§ 370.30 Requests for information.

(a) *Request for MSDS information.* (1) Any person may obtain an MSDS with respect to a specific facility by submitting a written request to the committee.

(2) If the committee does not have in its possession the MSDS requested in paragraph (a)(1) of this section, it shall request a submission of the MSDS from the owner or operator of the facility that is the subject of the request.

(b) *Requests for Tier II information.* (1) Any person may request Tier II information with respect to a specific facility by submitting a written request to the commission or committee in accordance with the requirements of this section.

(2) If the committee or commission does not have in its possession the Tier II information requested in paragraph (b)(1) of this section, it shall request a submission of the Tier II form from the owner or operator of the facility that is the subject of the request, provided that the request is from a State or local official acting in his or her official capacity or the request is limited to hazardous chemicals stored at the facility in an amount in excess of 10,000 pounds.

(3) If the request under paragraph (b)(1) of this section does not meet the requirements of paragraph (b)(2) of this section, the committee or commission may request submission of the Tier II form from the owner or operator of the facility that is the subject of the request if the request under paragraph (b)(1) of this section includes a general statement of need.

§ 370.31 Provision of information.

All information obtained from an owner or operator in response to a request under this subpart and any requested Tier II form or MSDS otherwise in possession of the commission or the committee shall be made available to the person submitting the request under this Subpart; provided upon request of the owner or operator, the commission or committee shall withhold from disclosure the location of any specific chemical identified in the Tier II form.

Subpart D—Inventory Forms

§ 370.40 Tier I emergency and hazardous chemical inventory form.

(a) The form set out in paragraph (b) of this section shall be completed and submitted as required in § 370.25(a). In lieu of the form set out in paragraph (b) of this section, the facility owner or operator may submit a State or local form that contains identical content.

(b) Tier I Emergency and Hazardous Chemical Inventory Form.

VOL 52 ISS 199 OCT 15 1987 UMI

TIER ONE INSTRUCTIONS

GENERAL INFORMATION

Submission of this form is required by Title III of the Superfund Amendments and Reauthorization Act of 1986, Section 312, Public Law 99-499.

The purpose of this form is to provide State and local officials and the public with information on the general types and locations of hazardous chemicals present at your facility during the past year.

YOU MUST PROVIDE ALL INFORMATION REQUESTED ON THIS FORM.

You may substitute the Tier Two form for this Tier One form. (The Tier Two form provides detailed information and must be submitted in response to a specific request from State or local officials.)

WHO MUST SUBMIT THIS FORM

Section 312 of Title III requires that the owner or operator of a facility submit this form if, under regulations implementing the Occupational Safety and Health Act of 1970, the owner or operator is required to prepare or have available Material Safety Data Sheets (MSDS) for hazardous chemicals present at the facility. MSDS requirements are specified in the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, found in Title 29 of the Code of Federal Regulations at §1910.1200.

WHAT CHEMICALS ARE INCLUDED

You must report the information required on this form for every hazardous chemical for which you are required to prepare or have available an MSDS under the Hazard Communication Standard. However, OSHA regulations and Title III exempt some chemicals from reporting.

Section 1910.1200(b) of the OSHA regulations currently provides the following exemptions:

(i) Any hazardous waste as such term is defined by the Solid Waste Disposal Act, as amended (42 U.S.C. 6901 et seq.) when subject to regulations issued under that Act;

(ii) Tobacco or tobacco products;

(iii) Wood or wood products;

(iv) "Articles"– defined under §1910.1200 (b) as a manufactured item:

- Which is formed to a specific shape or design during manufacture;
- Which has end use function(s) dependent in whole or in part upon the shape or design during end use; and
- Which does not release, or otherwise result in exposure to a hazardous chemical under normal conditions of use.

(v) Food, drugs, cosmetics or alcoholic beverages in a retail establishment which are packaged for sale to consumers;

(vi) Foods, drugs, or cosmetics intended for personal consumption by employees while in the workplace;

(vii) Any consumer product or hazardous substance, as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 1251 *et seq.*) respectively, where the employer can demonstrate it is used in the workplace in the same manner as normal consumer use, and which use results in a duration and frequency of exposure which is not greater than exposures experienced by consumers; and

(viii) Any drug, as that term is defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 *et seq.*), when it is in solid, final form for direct administration to the patient (i.e., tablets or pills).

In addition, Section 311(e) of Title III excludes the following substances:

(i) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration;

(ii) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use;

(iii) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public;

(iv) Any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual;

(v) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

Also, minimum reporting thresholds have been established under Title III, Section 312. You need to report only those hazardous chemicals that were present at your facility at any time during the preceding calendar year at or above the levels listed below:

- January to December 1987 (or first year of reporting) ...10,000 lbs.
- January to December 1988 (or second year of reporting) ...10,000 lbs.
- January to December 1989 (or third year of reporting) ...zero lbs.*

  * EPA will publish the final threshold, effective in the third year, after additional analysis.

- For extremely hazardous substances...500 lbs. or the threshold planning quantity, whichever is less, from the first year of reporting and thereafter.

WHEN TO SUBMIT THIS FORM

Beginning March 1, 1988, owners or operators must submit the Tier One form (or substitute the Tier Two form) on or before March 1 of every year.

INSTRUCTIONS

Please read these instructions carefully. Print or type all responses.

WHERE TO SUBMIT THIS FORM

Send one completed inventory form to each of the following organizations:

1. Your State emergency planning commission
2. Your local emergency planning committee
3. The fire department with jurisdiction over your facility.

PENALTIES

Any owner or operator of a facility who fails to submit or supplies false Tier One information shall be liable to the United States for a civil penalty of up to $25,000 for each such violation. Each day a violation continues shall constitute a separate violation. In addition, any citizen may commence a civil action on his or her own behalf against any owner or operator who fails to submit Tier One information.

You may use the Tier Two form as a worksheet for completing Tier One. Filling in the Tier Two chemical information section should help you assemble your Tier One responses.

If your responses require more than one page, fill in the page number at the top of the form.

REPORTING PERIOD

Enter the appropriate calendar year, beginning January 1 and ending December 31.

FACILITY IDENTIFICATION

Enter the complete name of your facility (and company identifier where appropriate).

Enter the full street address or state road. If a street address is not available, enter other appropriate identifiers that describe the physical location of your facility (e.g., longitude and latitude). Include city, state, and zip code.

Enter the primary Standard Industrial Classification (SIC) code and the Dun & Bradstreet number for your facility. The financial officer of your facility should be able to provide the Dun & Bradstreet number. If your firm does not have this information, contact the state or regional office of Dun & Bradstreet to obtain your facility number or have one assigned.

OWNER/OPERATOR

Enter the owner's or operator's full name, mailing address, and phone number.

EMERGENCY CONTACT

Enter the name, title, and work phone number of at least one local person or office that can act as a referral if emergency responders need assistance in responding to a chemical accident at the facility

Provide an emergency phone number where such emergency information will be available 24 hours a day, every day.

PHYSICAL AND HEALTH HAZARDS

Descriptions, Amounts, and Locations

This section requires aggregate information on chemicals by hazard categories as defined in 40 CFR 370.3. The two health hazard categories and three physical hazard categories are a consolidation of the 23 hazard categories defined in the OSHA Hazard Communication Standard, 29 CFR 1910.1200. For each hazard type, indicate the total amounts and general locations of all applicable chemicals present at your facility during the past year.

- What units should I use?

  Calculate all amounts as *weight in pounds*. To convert gas or liquid volume to weight in pounds, multiply by an appropriate density factor.

- What about mixtures?

  If a chemical is part of a mixture, *you have the option* of reporting either the weight of the entire mixture or only the portion of the mixture that is a particular hazardous chemical (e.g., if a hazardous solution weighs 100 lbs. but is composed of only 5% of a particular hazardous chemical, you can indicate either 100 lbs. of the mixture or 5 lbs. of the chemical).

  Select the option consistent with your Section 311 reporting of the chemical on the MSDS or list of MSDS chemicals.

- Where do I count a chemical that is a fire reactivity physical hazard and an immediate (acute) health hazard?

  Add the chemical's weight to your totals for all three hazard categories and include its location in all three categories. Many chemicals fall into more than one hazard category, which results in double-counting.

MAXIMUM AMOUNT

The amounts of chemicals you have on hand may vary throughout the year. The peak weights — greatest single-day weights during the year — are added together in this column to determine the maximum weight for each hazard type. Since the peaks for different chemicals often occur on different days, this maximum amount will seem artificially high

To complete this and the following sections, you may choose to use the Tier Two form as a worksheet.

To determine the Maximum Amount:

1. List all of your hazardous chemicals individually.
2. For each chemical...
   a. Indicate all physical and health hazards that the chemical presents. Include all chemicals, even if they are present for only a short period of time during the year.

BEST COPY AVAILABLE

b. Estimate the maximum weight in pounds that was present at your facility on any single day of the reporting period.

3. For each hazard type -- beginning with Fire and repeating for all physical and health hazard types...
   a. Add the maximum weights of all chemicals you indicated as the particular hazard type.
   b. Look at the Reporting Ranges at the bottom of the Tier One form. Find the appropriate range value code.
   c. Enter this range value as the Maximum Amount.

EXAMPLE:

You are using the Tier Two form as a worksheet and have listed raw weights in pounds for each of your hazardous chemicals. You have marked an X in the Immediate (acute) hazard column for phenol and sulfuric acid. The maximum amount raw weight you listed were 10,000 lbs. and 50 lbs. respectively. You add these together to reach a total of 10,050 lbs. Then you look at the Reporting Range at the bottom of your Tier One form and find that the value of 03 corresponds to 10,050 lbs. Enter 03 as your Maximum Amount for Immediate (acute) hazards materials.

You also marked an X in the Fire hazard box for phenol. When you calculate your Maximum Amount totals for fire hazards, add the 10,000 lb. weight again.

AVERAGE DAILY AMOUNT

This column should represent the average daily amount of chemicals *of each hazard type* that were present at your facility at any point during the year.

To determine this amount:

1. List all of your hazardous chemicals individually (same as for Maximum Amount).
2. For each chemical...
   a. Indicate all physical and health hazards that the chemical presents (same as for Maximum Amount).
   b. Estimate the average weight in pounds that was present at your facility throughout the year. To do this, total all daily weights and divide by the number of days the chemical was present on the site.
3. For each hazard type -- beginning with Fire and repeating for all physical and health hazards...
   a. Add the average weights of all chemicals you indicated for the particular hazard type.
   b. Look at the Reporting Ranges at the bottom of the Tier One form. Find the appropriate range value code.
   c. Enter this range value as the Average Daily Amount.

EXAMPLE:

You are using the Tier Two form, and have marked an X in the Immediate (acute) hazard column for nicotine and phenol. Nicotine is present at your facility 100 days during the year, and the sum of the daily weights is 100,000 lbs. By dividing 100,000 lbs. by 100 days on-site, you calculate an Average Daily Amount of 1,000 lbs. for nicotine. Phenol is present at your facility 50 days during the year, and the sum of the daily weights is 10,000 lbs. By dividing 10,000 lbs. by 50 days on-site, you calculate an Average Daily Amount of 200 lbs. for phenol. You then add the two average daily amounts together to reach a total of 1,200 lbs. Then you look at the Reporting Range on your Tier One form and find that the value 02 corresponds to 1,200 lbs. Enter 02 as your Average Daily Amount for Immediate (acute) Hazard.

You also marked an X in the Fire hazard column for phenol. When you calculate your Average Daily Amount for fire hazards, use the 200 lb. weight again.

NUMBER OF DAYS ON-SITE

Enter the greatest number of days that a single chemical within that hazard category was present on-site.

EXAMPLE:

At your facility, nicotine is present for 100 days and phosgene is present for 150 days. Enter 150 in the space provided.

GENERAL LOCATION

Enter the general location within your facility where each hazard may be found. General locations should include the names or identifications of buildings, tank fields, lots, sheds, or other such areas.

For each hazard type, list the locations of all applicable chemicals. As an alternative you may also attach a site plan and list the site coordinates related to the appropriate locations. If you do so, check the Site Plan box.

EXAMPLE:

On your worksheet you have marked an X in the Fire hazard column for acetone and butane. You noted that these are kept in steel drums in Room C of the Main Building, and in pressurized cylinders in Storage Shed 13, respectively. You could enter Main Building and Storage Shed 13 as the General Locations of your fire hazards. However, you choose to attach a site plan and list coordinates. Check the Site Plan box at the top of the column and enter site coordinates for the Main Building and Storage Shed 13 under General Locations.

If you need more space to list locations, attach an additional Tier One form and continue your list on the proper line. Number all pages.

CERTIFICATION

This must be completed by the owner or operator or the officially designated representative of the owner or operator. Enter your full name and official title. Sign your name and enter the current date.

VOL 52 ISS 199 OCT 15 1987 UMI

§ 370.41 Tier II emergency and hazardous chemical inventory form.

(a) The form set out in paragraph (b) of this Section must be completed and submitted as required in § 370.25(c). In lieu of the form set out in paragraph (b) of this section, the facility owner or operator may submit a State or local form that contains identical content.

(b) Tier II Emergency and Hazardous Chemical Inventory Form.

TIER TWO INSTRUCTIONS

GENERAL INFORMATION

Submission of this Tier Two form (when requested) is required by Title III of the Superfund Amendments and Reauthorization Act of 1986, Section 312, Public Law 99-499. The purpose of this Tier Two form is to provide State and local officials and the public with specific information on hazardous chemicals present at your facility during the past year.

YOU MUST PROVIDE ALL INFORMATION REQUESTED ON THIS FORM TO FULFILL TIER TWO REPORTING REQUIREMENTS.

This form may also be used as a worksheet for completing the Tier One form or may be submitted in place of the Tier One form.

WHO MUST SUBMIT THIS FORM

Section 312 of Title III requires that the owner or operator of a facility submit this Tier Two form if so requested by a State emergency planning commission, a local emergency planning committee, or a fire department with jurisdiction over the facility.

This request may apply to the owner or operator of any facility that is required, under regulations implementing the Occupational Safety and Health Act of 1970, to prepare or have available a Material Safety Data Sheet (MSDS) for a hazardous chemical present at the facility. MSDS requirements are specified in the Occupational Safety and Health Administration (OSHA) Hazard Communications Standard, found in Title 29 of the Code of Federal Regulations at §1910.1200.

WHAT CHEMICALS ARE INCLUDED

You must report the information required on this form for each hazardous chemical for which Tier Two information is requested. However, OSHA regulations and Title III exempt some chemicals from reporting.

Section 1910.1200(b) of the OSHA regulations currently provides the following exemptions:

(i) Any hazardous waste as such term is defined by the Solid Waste Disposal Act as amended (42 U.S.C. 6901 et seq.) when subject to regulations issued under that Act;

(ii) Tobacco or tobacco products;

(iii) Wood or wood products;

(iv) "Articles"– defined under §1910.1200(b) as a manufactured item:

- Which is formed to a specific shape or design during manufacture;
- Which has end use function(s) dependent in whole or in part upon the shape or design during end use; and
- Which does not release, or otherwise result in exposure to a hazardous chemical under normal conditions of use.

(v) Food, drugs, cosmetics or alcoholic beverages in a retail establishment which are packaged for sale to consumers;

(vi) Foods, drugs, or cosmetics intended for personal consumption by employees while in the workplace.

(vii) Any consumer product or hazardous substance, as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 1251 *et seq.*) respectively, where the employer can demonstrate it is used in the workplace in the same manner as normal consumer use, and which use results in a duration and frequency of exposure which is not greater than exposures experienced by consumers

(viii) Any drug, as that term is defined in the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 *et seq.*), when it is in solid, final form for direct administration to the patient (i.e., tablets or pills).

In addition, Section 311(e) of Title III excludes the following substances:

(i) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration;

(ii) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use;

(iii) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public;

(iv) Any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual;

(v) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

Also, minimum reporting thresholds have been established for Tier One under Title III, Section 312. You need to report only those hazardous chemicals that were present at your facility at any time during the preceding calendar year at or above the levels listed below:

- January to December 1987 (or first year of reporting) ...10,000 lbs.
- January to December 1988 (or second year of reporting) ...10,000 lbs.
- January to December 1989 (or third year of reporting) ...zero lbs.*
  - * EPA will publish the final threshold, effective in the third year, after additional analysis.
- For extremely hazardous substances...500 lbs. or the threshold planning quantity, whichever is less, from the first year of reporting and thereafter.

A requesting official may limit the responses required under Tier Two by specifying particular chemicals or groups of chemicals. Such requests apply to hazardous chemicals regardless of established thresholds.

INSTRUCTIONS

Please read these instructions carefully. Print or type all responses.

WHEN TO SUBMIT THIS FORM

Owners or operators must submit the Tier Two form to the requesting agency within 30 days of receipt of a written request from an authorized official.

WHERE TO SUBMIT THIS FORM

Send the completed Tier Two form to the requesting agency.

PENALTIES

Any owner or operator who violates any Tier Two reporting requirements shall be liable to the United States for a civil penalty of up to $25,000 for each such violation. Each day a violation continues shall constitute a separate violation.

You may use the Tier Two form as a worksheet for completing the Tier One form. Filling in the Tier Two Chemical Information section should help you assemble your Tier One responses.

If your responses require more than one page, fill in the page number at the top of the form.

REPORTING PERIOD

Enter the appropriate calendar year, beginning January 1 and ending December 31.

FACILITY IDENTIFICATION

Enter the full name of your facility (and company identifier where appropriate).

Enter the full street address or state road. If a street address is not available, enter other appropriate identifiers that describe the physical location of your facility (e.g., longitude and latitude). Include city, state, and zip code.

Enter the primary Standard Industrial Classification (SIC) code and the Dun & Bradstreet number for your facility. The financial officer of your facility should be able to provide the Dun & Bradstreet number. If your firm does not have this information, contact the state or regional office of Dun & Bradstreet to obtain your facility number or have one assigned.

OWNER/OPERATOR

Enter the owner's or operator's full name, mailing address, and phone number.

EMERGENCY CONTACT

Enter the name, title, and work phone number of at least one local person or office who can act as a referral if emergency responders need assistance in responding to a chemical accident at the facility.

Provide an emergency phone number where such emergency chemical information will be available 24 hours a day, every day.

CHEMICAL INFORMATION: Description, Hazards, Amounts, and Locations

The main section of the Tier Two form requires specific information on amounts and locations of hazardous chemicals, as defined in the OSHA Hazard Communication Standard.

- What units should I use?

  Calculate all amounts as *weight in pounds*. To convert gas or liquid volume to weight in pounds, multiply by an appropriate density factor.

- What about mixtures?

  If a chemical is part of a mixture, *you have the option* of reporting either the weight of the entire mixture or only the portion of the mixture that is a particular hazardous chemical (e.g., if a hazardous solution weighs 100 lbs. but is composed of only 5% of a particular hazardous chemical, you can indicate either 100 lbs. of the mixture *or* 5 lbs. of the chemical.

  Select the option consistent with your Section 311 reporting of the chemical on the MSDS or list of MSDS chemicals.

CHEMICAL DESCRIPTION

1. Enter the Chemical Abstract Service number (CAS#).

   For mixtures, enter the CAS number of the mixture as a whole if it has been assigned a number distinct from its components. For a mixture that has no CAS number, leave this item blank or report the CAS numbers of as many constituent chemicals as possible.

   If you are withholding the name of a chemical in accordance with criteria specified in Title III, Section 322, enter the generic chemical class (e.g., list toluene diisocynate as organic isocynate) and check the box marked Trade Secret. Trade secret information should be submitted to EPA and must include a substantiation. Please refer to Section 322 of Title III for detailed information on how to comply with trade secret requests.

2. Enter the chemical name or common name of each hazardous chemical.
3. Circle *ALL* applicable descriptors: pure or mixture, *and* solid, liquid, or gas.

EXAMPLE:

You have pure chlorine gas on hand, as well as two mixtures that contain liquid chlorine. You write "chlorine" and enter the CAS#. Then you circle "pure" *and* "mix" — as well as "liq" *and* "gas".

PHYSICAL AND HEALTH HAZARDS

For each chemical you have listed, check all the physical and health hazard boxes that apply. These hazard categories are defined in 40 CFR 370.3. The two health hazard categories and three physical hazard categories are a consolidation of the 23 hazard categories defined in the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

MAXIMUM AMOUNT

1. For each hazardous chemical, estimate the greatest amount present at your facility on any single day during the reporting period.
2. Find the appropriate range value code in Table I.
3. Enter this range value as the Maximum Amount.

Table I REPORTING RANGES

Range Value	Weight Range in Pounds From...	To...
00	0	99
01	100	999
02	1,000	9,999
03	10,000	99,999
04	100,000	999,999
05	1,000,000	9,999,999
06	10,000,000	49,999,999
07	50,000,000	99,999,999
08	100,000,000	499,999,999
09	500,000,000	999,999,999
10	1 billion	higher than 1 billion

If you are using this form as a worksheet for completing Tier One, enter the actual weight in pounds in the shaded space below the response blocks. Do this for both Maximum Amount and Average Daily Amount.

EXAMPLE:

You received one large shipment of a solvent mixture last year. The shipment filled your 5,000-gallon storage tank. You know that the solvent contains 10% benzene, which is a hazardous chemical.

You figure that 10% of 5,000 gallons is 500 gallons. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 500 by 7.29 to get a weight of 3,645 pounds.

Then you look at Table I and find that the range value 02 corresponds to 3,645. You enter 02 as the Maximum Amount.

(If you are using the form as a worksheet for completing a Tier One form, you should write 3,645 in the shaded area.)

AVERAGE DAILY AMOUNT

1. For each hazardous chemical, estimate the average weight in pounds that was present at your facility during the year.

   To do this, total all daily weights and divide by the number of days the chemical was present on the site.
2. Find the appropriate range value in Table I.
3. Enter this range value as the Average Daily Amount.

EXAMPLE:

The 5,000-gallon shipment of solvent you received last year was gradually used up and completely gone in 315 days. The sum of the daily volume levels in the tank is 929,250 gallons. By dividing 929,250 gallons by 315 days on-site, you calculate an average daily amount of 2,950 gallons.

You already know that the solvent contains 10% benzene, which is a hazardous chemical. Since 10% of 2,950 is 295, you figure that you had an average of 295 gallons of benzene. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 295 by 7.29 to get a weight of 2,150 pounds.

Then you look at Table I and find that the range value 02 correponds to 2,150. You enter 02 as the Average Daily Amount.

(If you are using the form as a worksheet for completing a Tier One form, you should write 2,150 in the shaded area.)

NUMBER OF DAYS ON-SITE

Enter the number of days that the hazardous chemical was found on-site.

EXAMPLE:

The solvent composed of 10% benzene was present for 315 days at your facility. Enter 315 in the space provided.

STORAGE CODES AND STORAGE LOCATIONS

List all non-confidential chemical locations in this column, along with storage types/conditions associated with each location.

Storage Codes: Indicate the types and conditions of storage present.

a. *Look at Table II.* For each location, find the appropriate storage type(s). Enter the corresponding code(s) in front of the parentheses.
b. *Look at Table III.* For each storage type, find the temperature and pressure conditions. Enter the applicable pressure code in the first space within the parentheses. Enter the applicable temperature code in the last space within the parentheses.

VOL 52 ISS 199 OCT 15 1987 UMI

Table II – STORAGE TYPES

CODES	Types of Storage
A	Above ground tank
B	Below ground tank
C	Tank inside building
D	Steel drum
E	Plastic or non-metallic drum
F	Can
G	Carboy
H	Silo
I	Fiber drum
J	Bag
K	Box
L	Cylinder
M	Glass bottles or jugs
N	Plastic bottles or jugs
O	Tote bin
P	Tank wagon
Q	Rail car
R	Other

Table III – TEMPERATURE AND PRESSURE CONDITIONS

CODES	Storage Conditions
	(PRESSURE)
1	Ambient pressure
2	Greater than ambient pressure
3	Less than ambient pressure
	(TEMPERATURE)
4	Ambient temperature
5	Greater than ambient temperature
6	Less than ambient temperature but not cryogenic
7	Cryogenic conditions

EXAMPLE:

The benzene in the main building is kept in a tank inside the building, at ambient pressure and less than ambient temperature.

Table II shows you that the code for a tank inside a building is C. Table III shows you that code for ambient pressure is 1, and the code for less than ambient temperature is 6.

You enter: C(1,6)

Storage Locations:

Provide a brief description of the precise location of the chemical, so that emergency responders can locate the area easily. You may find it advantageous to provide the optional site plan or site coordinates as explained below.

For each chemical, indicate at a minimum the building or lot. Additionally, where practical, the room or area may be indicated. You may respond in narrative form with appropriate site coordinates or abbreviations.

If the chemical is present in more than one building, lot, or area location, continue your responses down the page as needed. If the chemical exists everywhere at the plant site simultaneously, you may report that the chemical is ubiquitous at the site.

Optional attachments: If you choose to attach *one* of the following, check the appropriate Attachments box at the bottom of the Tier Two form.

a. *A site plan* with site coordinates indicated for buildings, lots, areas, etc. throughout your facility.
b. *A list of site coordinate abbreviations* that correspond to buildings, lots, areas, etc. throughout your facility.

EXAMPLE:

You have benzene in the main room of the main building, and in tank 2 in tank field 10. You attach a site plan with coordinates as follows: main building = G-2, tank field 10 = B-6. Fill in the Storage Location as follows:

B-6 [Tank 2] G-2 [Main Room]

Under Title III, Section 324, you may elect to withhold location information on a specific chemical from disclosure to the public. If you choose to do so:

- Enter the word "confidential" in the Non-Confidential Location section of the Tier Two form.
- On a separate Tier Two Confidential Location Information Sheet, enter the name and CAS# of each chemical for which you are keeping the location confidential.
- Enter the appropriate location and storage information, as described above for non-confidential locations.
- Attach the Tier Two Confidential Location Information Sheet to the Tier Two form. This separates confidential locations from other information that will be disclosed to the public.

CERTIFICATION.

This must be completed by the owner or operator or the officially designated representative of the owner or operator. Enter your full name and official title. Sign your name and enter the current date.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-87-1743; FR-2390]

Section 8 Moderate Rehabilitation Program for Single Room Occupancy Dwellings for Homeless Individuals; Fund Availability

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of fund availability.

SUMMARY: The purpose of the section 8 Moderate Rehabilitation Program for Single Room Occupany (SRO) Dwellings for Homeless Individuals is to provide rental assistance for homeless individuals in rehabilitated SRO housing. This program is authorized by section 441 of the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100–77, approved July 22, 1987). Under this program, HUD will fund applications from public housing agencies (PHAs) which best demonstrate a need for the assistance and the ability to undertake and carry out the program. HUD will conduct a national competition to select PHAs to participate.

The assistance will be in the form of rental assistance under the section 8 Housing Assistance Payments Program. These payments equal the rent for the unit, including utilities, minus the portion of the rent payable by the tenant under the U.S. Housing Act of 1937. HUD will make the assistance available for 10 years. This Notice informs the public of the requirements that will govern the use of the $35 million appropriated for the program by the Supplemental Appropriations Act, 1987 (Pub L. 100–71, approved July 11, 1987). HUD estimates that this $35 million will assist between 600 and 800 units over the 10-year period.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: Lawrence Goldberger, Director, Office of Elderly and Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755–5720. (This is not a toll-free number.)

B. Waiver of the Limitation and Preference in the Second and Third Sentences of Section 3(b)(3) of the 1937 Act

I. Background

A. Legislative Authority

On July 22, 1987, the President signed into law the Stewart B. McKinney Homeless Assistance Act (the "McKinney Act"), Pub. L. 100–77. Title IV of the McKinney Act contains a number of housing assistance provisions for HUD to administer. This Notice implements section 441, which authorizes the section 8 Moderate Rehabilitation Assistance Program for Single Room Occupancy Dwellings for Homeless Individuals.

B. Summary

Under this program, HUD will enter into annual contributions contracts (ACCs) with public housing agencies (PHAs) in connection with the moderate rehabilitation of residential properties in which some or all of the dwelling units do not contain either food preparation or sanitary facilities. Each of these SRO units is intended for occupancy by one eligible homeless individual. Selection of tenants is not subject to the 15 and 30 percent limitations on the number of units that may be occupied by "other single persons" or to the preference for elderly, handicapped, or displaced single persons over other single persons (see section 3(b)(3) of the 91937 Act and the waiver of these provisions in section VIII.B. of this Notice). If, after appropriate outreach efforts by the PHA and the Owner, there are insufficient eligible homeless individuals to fill all assisted units, the Owner may rent them to eligible non-homeless individuals.

Section 441 requires that the amounts made available be allocated by HUD on the basis of a national competition to the applicants that best demonstrate a need for the assistance and the ability to undertake and carry out a program to be assisted under that section. No single city or urban county is eligible to receive more than 10 percent of the assistance made available (which is $350,000 in contract authority for each year over the 10-year assistance period).

Under this program, the PHAs must submit applications to HUD by November 16, 1987 if they wish to participate in the national competition. Applications will contain an inventory of suitable housing stock available and appropriate for rehabilitation under this program or, if possible, identification of the particular projects proposed for rehabilitation. HUD is not requiring competitive selection of Owners by PHAs because of the special nature of this program. Selected PHAs will execute an ACC with HUD, which will give HUD the option to renew the ACC for an additional 10 years, subject to the availability of appropriations. Before the Owner begins any rehabilitation, but no later than January 4, 1988, the PHA and the Owner must enter into an Agreement to Enter into Housing Assistance Payments Contract (Agreement). After completion of rehabilitation, which must be within six months of execution of the Agreement, the PHA and the Owner will enter into a Housing Assistance Payments (HAP) Contract with a 10-year term. (The

Contract term for the regular Moderate Rehabilitation program is 15 years.)

The total cost of rehabilitation that may be compensated through Contract Rents under a HAP Contract in this program may not exceed $14,000 per SRO unit (including a pro rata share of the cost related to common areas). This limit may be adjusted in certain circumstances. (There is no limitation on the cost of rehabilitation under the regular program.)

This Notice incorporates by reference many of the regulations for the current Moderate Rehabilitation Program in 24 CFR Part 882, Subparts D and E, and refers to other regulations in Title 24. Section references to HUD regulations are to Title 24. The term "family" as used in Title 24 shall be understood to refer to an individual for purposes of this program.

C. Expedited Processing

HUD has set extremely short deadlines for the various processing stages under this program, in an effort to make housing under this program available for the homeless as soon as possible. The Department anticipates that only those PHAs which have already identified specific projects are likely to be able to react quickly enough to submit applications by November 16, 1987, and execute an Agreement by January 4, 1988. We believe this expedited approach is consistent with the Congressional findings in section 102 of the McKinney Act. Among the findings are that "the Nation faces an immediate and unprecedented crisis due to the lack of shelter for a growing number of individuals and families" and that "the problem of homelessness has become more severe and, in the absence of more effective efforts, is expected to become dramatically worse, endangering the lives and safety of the homeless." HUD, PHAs, Owners, local governments, and other entities are called on by this Notice to make extraordinary efforts to respond to the need to house homeless individuals. If insufficient approval applications are submitted in response to this Notice to use all available funds or if additional funding is appropriated for the program, HUD will issue revised instructions. The Department anticipates that these instructions would give PHAs a longer time to develop applications, thereby permitting more PHAs to compete for funding.

II. Project Eligibility and Other Requirements

A. Eligible and Ineligible Properties

(1) Except as provided in paragraphs (2) through (5) of this paragraph A., housing suitable for moderate rehabilitation, as defined in § 882.402, is eligible for inclusion under this program. Existing structures of various types may be appropriate for this program, including single family houses and multifamily structures.

(2) Housing is not eligible for assistance under this program if it:

(a) Is, or has been within 12 months before the Owner submits a proposal to the PHA, subsidized under any Federal housing program, including the Certificate or Housing Voucher program;

(b) Is owned either by the PHA administering the ACC under this program or an entity controlled by that PHA;

(c) Is a project with a HUD-held mortgage or is a HUD-owned project;

(d) Is assisted, or for which a commitment for assistance has been entered into, under the Rental Rehabilitation program, 24 CFR Part 511; or

(e) Would require displacement (involuntary permanent move) of residential tenants or owner-occupants. HUD will not provide assistance under this program the effect of which would be to cause any individual or family permanently to move from real property (or to move its personal property from real property) because of actual or pending acquisition or rehabilitation of real property, in whole or in part, for a project.

(3) Nursing homes; units within the grounds of penal, reformatory, medical, mental, and similar public or private institutions; and facilities providing continual psychiatric, medical, or nursing services are not eligible for assistance under this program.

(4) No section 8 assistance may be provided with respect to any unit occupied by an Owner.

B. Housing Quality Standards

Section 882.04 (including its incorporation by reference of § 882.109) shall apply to this program, except as follows:

(1) The housing quality standards in §§ 882.109(i) and 882.404(c), concerning lead-based paint, shall not apply to this program, since these SRO units will not house children under seven years of age.

(2) In addition to the performance requirements contained in § 882.109(p) concerning SRO units, a sprinkler system that protects all major spaces, hard wired smoke detectors, and such other fire and safety improvements as State or local law may require shall be installed in each building.

(3) Section 882.109(q), concerning shared housing, shall not apply to this program.

(4) Section 882.404(b) concerning site and neighborhood standards, shall not apply to this program, except that § 882.404(b) (1) and (2) shall apply. In addition, the site shall be accessible to social, recreational, educational, commercial, and health facilities, and other appropriate municipal facilities and services.

C. Financing

Section 882.405 shall apply to this program.

D. Temporary Relocation

(1) *Applicability of Uniform Act. Section 882.406(a) shall apply to this program.*

(2) *Displacement Not Subject to the Uniform Act.* The following policies apply to temporary relocation of tenants which is not subject to the requirements of the Uniform Act. The policies apply only to lawful residential tenants (not owner-occupants or businesses) who are temporarily relocated following the date the PHA submits its application to HUD. The following policies do not apply to tenants who commence occupancy after that date if they are provided adequate notice from the Owner of the impending rehabilitation and possible relocation, or whose tenancy is terminated for serious or repeated violation of the terms and conditions of the lease; violation of applicable Federal, State, or local law; or other good cause. (Good cause does not include terminations because of Owner participation in this program.)

(a) Tenants will not be required to move temporarily from the property (building or complex) unless: (i) Tenants have received adequate, advance written notice and appropriate advisory services, (ii) suitable temporary housing is available, (iii) the temporary relocation period will not exceed six months, and (iv) tenants will receive reimbursement for reasonable out-of-pocket expenses incurred in connection with the temporary relocation, including moving costs to and from temporary housing and increases in monthly housing costs.

(b) The PHA is responsible for assuring that all the relocation requirements are met. Reasonable relocation costs incurred by the Owner for the temporary relocation of tenants to be assisted under this program are considered eligible rehabilitation costs for inclusion in the Contract Rents.

(Temporary relocation costs for tenants not to be assisted under this program may not be included in the Contract Rents.) Preliminary administrative funds may be used for costs of PHA advisory services for temporary relocation of tenants to be assisted under this program.

(c) Tenants who believe they have not received relocation opportunities, services, or payments in accordance with this section may appeal to the PHA and shall be given an informal hearing on the appeal.

E. Other Federal Requirements

Section 882.407, Other Federal Requirements, shall apply to this program. In addition—

(1) Executive Orders 12432, Minority Business Enterprise Development, and 12138, Creating a National Women's Business Enterprise Policy, shall apply. Consistent with HUD's responsibilities under these Executive Orders and Executive Order 11625 (see § 882.407(c)(5)), the PHA and Owner shall make efforts to encourage the use of minority and women's business enterprises in connection with activities assisted under this program.

(2) If the procedures that PHA or Owner, as appropriate, intends to use to make known the availability of this program are unlikely to reach persons of any particular race, color, religion, sex, age, or national origin who may qualify for admission to the program, the PHA or Owner shall establish additional procedures that will ensure that these persons are made aware of the availability of this program. The PHA or Owner shall also adopt and implement procedures to ensure that interested persons can obtain information concerning the existence and location of services and facilities which are accessible to handicapped persons.

(3) Notwithstanding the permissibility of projects that serve designated populations of homeless persons, the PHA or Owner, as appropriate, is required, in serving the designated population, to comply with the requirements under this paragraph E, for nondiscrimination on the basis of race, color, religion, sex, age, and national origin. In addition, the PHA shall comply with section 504 of the Rehabilitation Act of 1973, which prohibits discrimination against otherwise qualified individuals with handicaps solely by reason of handicap. Designated populations of homeless persons may include (but are not limited to) substance abusers and the chronically mentally ill.

(4) In selecting among proposals, the PHA shall also take into consideration compliance with the Coastal Barriers Resources Act (which prohibits assistance for sites identified under that Act).

III. PHA Application Process, HUD Review and Selection, ACC Execution, and Pre-Rehabilitation Activities

A. General

(1) PHAs that are currently administering a Moderate Rehabilitation Program under 24 CFR Part 882 are invited to submit applications for this program. There is no application form. Applications shall contain the information prescribed in paragraph C., be addressed to Lawrence Goldberger in Room 6130 at the address specified above, and be received by 5:15 p.m. on November 16, 1987. Each PHA shall also submit a copy of the application to the appropriate HUD field office by the same deadline. HUD will reject late applications.

(2) PHAs have discretion to select proposals by Owners in accordance with their own procedures and policies, consistent with the requirements of this Notice. Accordingly, section 882.503, Obtaining Proposals from Owners; sections 882.504(c)(1), (4), and (5), Selection of Proposals; and section 882.504(d), Notification of Owners, shall not apply to this program.

(3) HUD headquarters will process all applications and select the successful PHAs. HUD intends to complete the selection process by approximately December 1, 1987.

B. Comprehensive Homeless Assistance Plan (CHAP)

(1) Section 401 of the McKinney Act prohibits assistance under this program from being made available within the jurisdiction of a State, or a metropolitan city or urban county that is eligible for a formula allocation under the Emergency Shelter Grants program established by the McKinney Act (ESG formula city or county), unless the entity has a HUD-approved CHAP. For PHAs that wish to receive funding under this program, the following rules apply. If the project to be assisted is located *within* an ESG formula city or county, the city or county must have an approved CHAP. If the project is located *outside* an ESG formula city or county, the State must have an approved CHAP. Since Indian tribes are not required to have approved CHAP's the CHAP requirement does not apply to PHAs seeking funding for projects within the jurisdictions of Indian tribes.

(2) The Department published a Notice in the **Federal Register** on August 14, 1987 (52 FR 30628) establishing requirements for CHAPs. Among other things, that Notice listed the ESG formula cities and counties and other entities that are subject to the CHAP requirements. Potential applicants under this program are encouraged to familiarize themselves with these requirements.

C. PHA Application

Section 441 of the McKinney Act requires that HUD allocate the amounts made available for this program on the basis of a national competition to the applicants that best demonstrate a need for the assistance and the ability to undertake and carry out a program to be assisted. Each application shall contain the following information to enable HUD to make these determinations.

(1) *Size and Characteristics of SRO Population.* The application shall include a description of the size and characteristics of the homeless population within the applicant's jurisdiction that would occupy SRO dwellings under this program, and a statement of the basis for this description. The application shall also state whether the PHA intends to serve a designated population of homeless persons, such as substance abusers and the chronically mentally ill.

(2) *Inventory of Suitable Housing Stock to Be Rehabilitated under this Program.*

(a) The PHA application shall include an inventory of structures, by address (indicating city and urban county, where applicable), that would be available and appropriate for rehabilitation under this program, and shall specify the number of units the PHA proposes to assist. The application shall also describe the type of rehabilitation expected.

(b) Where possible, instead of the inventory under paragraph (a), the application shall identify specific structures, by address (indicating city and urban county where applicable), that the PHA proposes for rehabilitation and assistance under this program, including:

(i) The total number of units in each structure; and

(ii) The number of SRO units to be assisted under this program, and the number of vacancies among SRO units to be assisted.

The application shall also describe the type of rehabilitation expected.

(3) *Interest in Participation.* The PHA application shall include a description of the interest that has been expressed by builders, developers, Owners and others (including profit and nonprofit organizations) in participating in the program. This may include statements

expressing interest in acquiring or rehabilitating structures identified in the application and in providing supportive services or otherwise assisting the PHA or the Owners in meeting program requirements.

(4) *Additional Commitments.* The application shall describe any additional commitments from public and private sources, which may include (but are not limited to):

(a) Below market interest rate rehabilitation financing;

(b) Donation of real estate or furniture; and

(c) Supportive services.

The application shall identify any supportive services (as defined in section VII.B.) which would be necessary for the population expected to be served. (If this information on supportive services is not available, the PHA may obtain these commitments later, but no later than the date of execution of the Agreement.) The PHA shall demonstrate that the necessary supportive services appropriately address the needs of the homeless population to be served. These services may be provided in the project or elsewhere, if the services are readily accessible to the homeless population to be served. Services are readily accessible if residents can get to the services on their own, or if transportation is provided to the site where the services are provided. The application shall also include a description of how the necessary services will be made available. The PHA is encouraged to include information on commitments for any additional supportive services which would be desirable, but are not necessary.

(6) *CHAP Certifications.* The application shall contain a certification by the public official responsible for submitting a CHAP for the jurisdiction where the project(s) is to be located that the proposed project is consistent with the CHAP. (See, also, paragraph B. of this section.)

(7) *CHAP and Local Government Certifications.* The PHA and the chief executive officer of each unit of general local government in which a project is proposed to be located shall certify that, on or before January 4, 1988 (a) the PHA will be able to complete all necessary steps in time to enter into an Agreement, and (b) necessary private or public resources for the project will be committed. The certification shall also include a statement that the PHA and chief executive officer understand that if the January 4, 1988, deadline is not met, HUD may cancel its approval of the application, terminate the ACC (if executed), recaptured any reservation for the project, and reuse the recapture amounts for other approvable applications then available or which become available as a result of another national competition.

(8) *Permanent Displacement Certification.* The application shall contain a certification from the PHA that neither its proposed activities, nor the acquisition or rehabilitation activities of any Owner whose proposal is selected or considered for selection, will result in the permanent displacement of any residential tenant or owner-occupant.

(9) *Section 213 Letter.* Section 213 of the Housing and Community Development Act of 1974 requires HUD to provide the chief executive officer of the unit of general local government an opportunity to comment on the application. Where the unit of general local government has a housing assistance plan, its comment may include an objection to HUD approval of an application for housing assistance on the grounds that the application is inconsistent with the local housing assistance plan. PHAs should encourage the chief executive officer to submit a section 213 letter with the PHA application. See Part 791 for specific requirements. Since HUD cannot approve an application until the 30-day comment period is closed, the section 213 letter should not only comment on the application and indicate that approval of the application for assistance under this Notice is consistent with the community's housing assistance plan, where applicable, but also state that HUD may consider the letter to be the final comments, and that no additional comments will be submitted by the unit of local government.

(10) *Schedule.* The application shall contain a schedule for completion of all necessary steps through execution of the Housing Assistance Payments Contract and demonstrate that it is feasible for the PHA to meet its schedule. The schedule shall specify dates for completion of at least the following:

(a) Selection of the specific structure or structures to be rehabilitated (if not already specified in the application);

(b) Inspection of units, feasibility analysis, detailed work write-ups, and cost estimates;

(c) Determine initial base rents and Contract Rents;

(d) Ensuring that firm commitments of financing and identified necessary supportive services and other resources to be provided are in place;

(e) Execution of the Agreement (must be on or before January 4, 1988);

(f) Start of rehabilitation activities, with an identification of any which may be affected by weather conditions and a discussion of how weather delays have been taken into account; and

(g) Execution of the Contract (must be within six months from execution of the Agreement).

(11) *Administrative Capability and Rehabilitation Expertise.* The application shall include a description of the PHA's experience in administering the section 8 Moderate Rehabilitation Program and a description of the PHA's rehabilitation expertise.

(12) *Financing.* The application shall indicate the types of financing expected to be used, including Federal, State, or locally assisted financing programs, and describe the availability of such financing.

D. HUD Selection Process

(1) *Part 791.* Upon receipt of an application that does not include a section 213 letter from the chief executive officer of the Unit of general local government (see paragraph C.(9)), HUD shall send the application to the appropriate chief executive officer in accordance with 24 CFR Part 791.

(2) *Ranking.* HUD will rank all applications from PHAs administering the Moderate Rehabilitation Program that contain all items required by section C., based upon its assessment of which applications have the best combination of the following:

(a) The need for assistance, as demonstrated by the PHA's analysis of the size and characteristics of the population to be served, and by the reliability of the basis for the analysis; and

(b) The PHA's ability to undertake and carry out the program within the schedule proposed by the PHA, as demonstrated by:

(i) Whether the PHA has proposed specific projects for assistance or only submitted an inventory of structures that would be available and appropriate for rehabilitation under this program;

(ii) Whether there is evidence of site control or other evidence that the site will be available for rehabilitation in accordance with the PHA's schedule;

(iii) The percentage of units proposed for assistance which are vacant (rehabilitation of vacant units will result in more units becoming available for the homeless);

(iv) Whether it appears feasible that the PHA and Owner will complete all steps necessary so the Agreement may be executed before January 4, 1988, and

VOL
52
ISS
199
OC
15
1987
UMI

will execute the Contract within six months of execution of the Agreement;

(iv) Whether it appears feasible that the PHA and Owner will execute the Contract sooner than six months from execution of the Agreement;

(vi) Whether the PHA has specified the resources available to provide necessary and any desirable supportive services, including the strength and length of the commitments to provide those resources;

(vii) Other public and private resources to be provided, including the availability of financing, both assisted and unassisted, as demonstrated by statements or commitments form lenders;

(viii) The PHA's experience with the section 8 Moderate Rehabilitation Program, including past performance in placing units under Agreement, and the PHA's overall administrative capability, as evaluated by the HUD field office;

(ix) The demonstrated capacity of the PHA to administer a rehabilitation program; and

(x) The overall feasibility of the proposed program.

HUD shall assign 30 percent of the points based on paragraph (a) and 70 percent based on paragraph (b).

(3) *Selection of Applications.*

(a) HUD will select the highest ranking applications. However, no city or urban county may have projects receiving a total of more than 10 percent of the assistance to be provided under this program ($350,000 in contract authority per year, which HUD expects will fund a maximum of approximately 60–80 units for any one city or urban county).

(b) HUD will notify each PHA whether or not its application has been selected.

(c) Where the review and comment process required under 24 CFR Part 791 has not been completed by the time HUD is ready to make its selections, it may select one or more applications subject to completion of the process required under Part 791, if it has determined that the application is consistent with a housing assistance plan (where applicable). See, also, paragraphs C.(9) and D.(1).

E. ACC Exectution

(1) Before execution of the ACC, the PHA shall submit to the appropriate HUD field office the following:

(a) Equal Opportunity Housing Plan and Certifications, Form HUD–920;

(b) Estimates of Required Annual Contributions, Forms HUD–52672 and HUD–52673;

(c) Administrative Plan;

(d) Proposed Schedule of Allowances for Tenant-Furnished Utilities and Other Services, Form HUD–52667, with a justification of the amounts proposed;

(e) If applicable, proposed variations to the acceptability criteria of the Housing Quality Standards (see section II.B); and

(f) the fire and building code applicable to each project.

(2) After HUD approves the PHA's application, the requirements of 24 CFR Part 791 have been complied with, and the PHA has submitted and HUD has approved the items required by paragraph (1), HUD and the PHA shall execute the ACC in the form prescribed by HUD, on or before January 4, 1988. The ACC shall give HUD the option to renew the ACC for an additional 10 years. The PHA should not wait to receive the executed ACC before proceeding with project development in accordance with paragraph F.

(3) Section 882.403(a), Maximum Total ACC Commitments, shall apply to this program.

(4) Section 882.403(b), Project Account, shall apply to this program.

F. Project Development

Before execution of the Agreement, the PHA shall:

(1)(a) Inspect the project(s) to determine the specific work items which need to be accomplished to bring the unit(s) to be assisted up to the Housing Quality Standards (see section II.B.) or other standards approved by HUD; (b) conduct a feasibility analysis, and determine whether cost-effective energy conserving improvements can be added; (c) ensure that the Owner prepares the work write-ups and cost estimates required by § 882.504(f); and (d) determine initial base rents and Contract Rents;

(2) Assure that the Owner has selected a contractor in accordance with § 882.504(g);

(3) After the financing and a contractor are obtained, determine whether the costs can be covered by initial Contract Rents, computed in accordance with section G.; and, where a project contains more than 50 units to be assisted, submit the base rent and Contract Rent calculations to the appropriate HUD field office for review and approval in sufficient time for execution of the Agreement on or before January 4, 1988;

(4) Obtain firm commitments to provide necessary and any desirable supportive services;

(5) Obtain firm commitments for other resources to be provided;

(6) Develop procedures for tenant outreach and for establishing a waiting list(s);

(7) Develop a policy governing temporary relocation;

(8) Design a mechanism to monitor the provision of supportive services;

(9) Review and approve the Lease, including any special Lease provisions related to special characteristics of the designated population to be served, such as provisions prohibiting the use of alcohol in projects targeted for persons with alcoholism;

(10) Require the Owner to demonstrate to the PHA's satisfaction that the allowable rent will be sufficient to rehabilitate, manage, and maintain the units adequately;

(11) Determine that the $1,000 minimum amount of work requirement and other requirements in §§ 882.504 (c)(2) and (c)(3) are met;

(12) Determine eligibility of current tenants, and select the units to be assisted, in accordance with § 882.504(e);

(13) Comply with the financing requirements in § 882.504(i); and

(14) Assure compliance with all other applicable requirements of this Notice.

G. Initial Contract Rents

Section 882.408, Initial Contract Rents (including the establishment of fair market rents for SRO units at 75 percent of the 0-bedroom Moderate Rehabilitation Fair Market Rent), shall apply to this program, except as follows:

(1)(a) In determining the monthly cost of a rehabilitation loan, in accordance with § 882.408(c)(2), a 10-year loan term (instead of a 15-year loan term) shall be assumed. The exception in § 882.408(c)(2)(iii) for using the actual loan term where the total amount of the rehabilitation is less than $15,000 shall continue to apply. In addition, the cost of the rehabilitation that may be included for the purpose of calculating the amount of the initial Contract Rent for any unit shall not exceed the lower of (i) the projected cost of rehabilitation, or (ii) $14,000 per unit, plus the cost of the fire and safety improvements required by section II.B.(2). HUD shall, however, increase the limitation in clause (ii) by an amount it determines is reasonable and necessary to accommodate special local conditions, including high construction costs or stringent fire or building codes.

(b) Where the PHA believes that high construction costs warrant an increase in the limitation in paragraph G.(1)(a)(ii), the PHA shall demonstrate to HUD's satisfaction that a higher average per unit amount is necessary to conduct this

program and that every appropriate step has been taken to contain the amount of the rehabilitation within an average of $14,000 per unit, plus the cost of the required fire and safety improvements. These higher amounts will be determined as follows:

(i) HUD may approve a higher average per unit amount up to, but not to exceed, an amount derived by applying the HUD-approved High Cost Percentage for Base Cities (used for computing FHA high cost area adjustments) for the area to the total of the $14,000 average per unit cost and the cost of the required fire and safety improvements; or

(ii) HUD may, on a project-by-project basis, increase the level approved in paragraph (i) to up to an amount computed by multiplying 2.4 by the total of the $14,000 average per unit cost and the cost of the required fire and safety improvements.

(2) In approving changes to initial Contract Rents during rehabilitation in accordance with § 882.408(d), the revised Contract Rents may not reflect an average per unit rehabilitation cost that exceeds the limitation specified in paragraph G.(1) of this section.

(3) Where the project involves a structure containing four or fewer SRO units, the Fair Market Rent for that size structure (the Fair Market Rent for a 1-, 2-, 3-, or 4-bedroom unit, as applicable) shall apply instead of a separate Fair Market Rent for each SRO unit. The Fair Market Rent for the structure shall be allocated to each SRO unit.

(4) Contract Rents shall not include the costs of providing supportive services, transportation, furniture, or other non-housing costs, as determined by HUD. PHAs shall consult with HUD where it is not clear whether the cost may be covered by the Contract Rent.

IV. Agreement To Enter Into Housing Assistance Payments Contract, Rehabilitation Period, and Cost Certifications

A. Rehabilitation Period

(1) *Agreement.* Before the Owner begins any rehabilitation, but no later than January 4, 1988, the PHA shall enter into an Agreement with the Owner in the form prescribed by HUD.

(2) *Timely Performance of Work.* Section 882.506(a) shall apply to this program. In addition, the Agreement shall provide that the work shall be completed and the Contract executed within six months of execution of the Agreement. HUD may reduce the number of units or the amount of the annual contribution commitment if, in the determination of HUD, the PHA fails to demonstrate a good faith effort to adhere to this schedule or if other reasons justify a reduction in the number of units.

(3) *Inspections.* Section 882.506(b) shall apply to this program.

(4) *Changes.* Section 882.506(c)(1) shall apply to this program. Contract Rents may only be increased in accordance with section III.G.(2).

(5) *List of Vacancies.* Section 882.506(d) shall apply to this program. See also, section VI.A., Outreach to Lower Income Individuals and Appropriate Organizations.

B. Completion of Rehabilitation

(1) *Notification of Completion.* Section 882.507(a) shall apply to this program.

(2) *Evidence of Completion.* Section 882.507(b) shall apply to this program, except that § 882.507(b)(2)(iv), concerning lead-based paint requirements, shall not apply.

(3) *Actual Cost and Rehabilitation Loan Certifications.* Section 882.507(c) shall apply to this program, except that Contract Rents shall be established in accordance with section III.G.

(4) *Review and Inspections.* Section 882.507(d) shall apply to this program.

(5) *Acceptance.* Section 882.507(e) shall apply to this program.

V. Housing Assistance Payments Contract

A. Time of Execution of Contract

Section 882.508(a) shall apply to this program.

B. Term of Contract

The Contract for any unit rehabilitated in accordance with this program shall be for a term of 10 years. The Contract shall give the PHA the option to renew the Contract for an additional 10 years.

C. Changes in Contract Rents from Agreement

The Contract Rents may be higher or lower than those specified in the Agreement, in accordance with section III.G.

D. Unleased Unit(s)

Section 882.508(c) shall apply to this program.

E. Contract Rents at End of Rehabilitation Loan Term

Section 882.409 shall apply to this program, except that the requirement to reduce rents shall apply on the earlier of: (1) The end of the term of the rehabilitation loan, or (2) 10 years from the effective date of the Contract. Base rents for this program are determined under section III.G.

VI. Management

A. Outreach to Lower Income Individuals and Appropriate Organizations; Waiting List(s)

(1) *Outreach to Lower Income Individuals and Appropriate Organizations.* Promptly after receiving the executed ACC, the PHA shall engage in outreach efforts to make known the availability of this program to homeless individuals in general or homeless individuals in the category for which the project is designed, such as substance abusers. The PHA shall also ask appropriate organizations to refer homeless individuals to the PHA or assist the PHA in locating them. Any outreach shall be made in accordance with the PHA's HUD-approved application and with the HUD guidelines for fair housing requiring the use of the equal housing opportunity logotype, statement, and slogan.

(2) *Waiting List(s).* The PHA shall maintain a separate waiting list for all applicants (or each category of applicants) for this program. In establishing the waiting list(s), the PHA shall first review any of its existing waiting lists for section 8 Moderate Rehabilitation and Existing Housing (Certificate and Housing Voucher) programs and add the names of any homeless individuals on those lists to the list(s) for this program, where it is able to identify the individuals on those lists as homeless. The names of the individuals on the section 8 Moderate Rehabilitation and Existing Housing lists shall remain on those lists as well.

(3) *First Priority for Homeless Individuals.* Homeless individuals on the waiting list(s) shall have a first priority for occupancy of housing rehabilitated under this program.

B. Individual Participation

(1) *Initial Determination of Individual Eligibility.* Section 882.514(a) shall apply to this program. (The Department has suspended requirements relating to alien status pending development of a new regulation.)

(2) *PHA Selection of Individuals for Participation.* Section 882.514(b) shall apply to this program, except that the PHA shall only refer Homeless Individuals.

(3) *Owner Selection of Individuals.* All vacant units under Contract shall be rented to Homeless Individuals referred by the PHA from its waiting list(s). However, if the PHA is unable to refer a sufficient number of interested applicants on the waiting list(s) to the Owner within 30 days of the Owner's notification to the PHA of a vacancy, the

Owner may advertise or solicit applications from homeless persons, and refer such persons to the PHA to determine eligibility. Since the Owner is responsible for tenant selection, the Owner may refuse any Individual provided that the Owner does not unlawfully discriminate. Should the Owner reject an Individual, and should the Individual believe that the Owner's rejection was the result of unlawful discrimination, the Individual may request the assistance of the PHA in resolving the issue. If the issue cannot be resolved promptly, the Individual may file a complaint with HUD, and the PHA may refer the Individual to the next available unit in this program.

(4) *Leasing to Non-Homeless Individuals.* When neither the PHA nor the Owner can find a sufficient number of interested applicants who are Homeless Individuals, the Owner may rent to non-homeless Eligible Individuals, in accordance with § 882.514 (a) through (c).

(5) *Briefing of Individuals.* Section 882.514(d) shall apply to this program, except that paragraph (d)(1)(vi) shall not apply.

(6) *Continued Participation of Individual When Contract Is Terminated.* Section 882.514(e) shall apply to this program, except that the PHA may issue a Housing Voucher instead of a Certificate.

(7) *Individuals Determined by the PHA to Be Ineligible.* Section 882.514(f) shall apply to this program. In addition, individuals are not precluded from exercising other rights if they believe they have been discriminated against on the basis of age.

C. Lease

(1) *Contents of Lease.* Section 882.504(j) shall apply to this program. In addition, the Lease shall limit occupancy to one Eligible Individual.

(2) *Term of Lease.* Section 882.403(d) shall apply to this program.

D. Security and Utility Deposits

Section 882.112 shall apply to this program.

E. Rent Adjustments

Section 882.410 shall apply to this program.

F. Payments for Vacancies

Section 882.411 shall apply to this program.

G. Subcontracting of Owner Services

Section 882.412 shall apply to this program.

H. Responsibility of the Individual

Section 882.413 shall apply to this program.

I. Reexamination of Individual Income

(1) *Regular Reexaminations.* The PHA shall reexamine the income of all Individuals at least once every 12 months. After consultation with the Individual and upon verification of the information, the PHA shall make appropriate adjustments in the Total Tenant Payment in accordance with 24 CFR Part 813, and determine whether only one individual is still occupying the unit. The PHA shall adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment.

(2) *Interim Reexaminations.* The Individual shall supply such certification, release, information, or documentation as the PHA or HUD determines to be necessary, including submissions required for interim reexaminations of Individual income and determinations as to whether only one person is occupying the unit. In addition, the second and third sentences of section 882.515(b) shall apply.

(3) *Continuation of Housing Assistance Payments.* Section 882.515(c) shall apply to this program.

J. Overcrowded Units

If the PHA determines that anyone other than, or in addition to, the Eligible Individual is occupying an SRO unit assisted under this program, the PHA shall take all necessary action, as soon as reasonably feasible, to ensure that the unit is occupied by only one Eligible Individual. Such action may include assisting the occupants of the unit in locating other housing, and requiring the occupants who do not have a right to occupy the unit under the Lease to move to other housing.

K. Adjustment of Utility Allowance

Section 882.510 shall apply to this program.

L. Termination of Tenancy

Section 882.511 shall apply to this program.

M. Reduction of Number of Units Covered by Contract

Section 882.512 shall apply to this program.

N. Maintenance, Operation, and Inspections

Section 882.516 shall apply to this program.

O. HUD Review of Contract Compliance

Section 882.217 shall apply to this program.

VII. Definitions

A. Section 882.402 shall apply to this program, except that:

(1) With respect to the definition of Moderate Rehabilitation, in determining compliance with the $1,000 minimum expenditure required to qualify as Moderate Rehabilitation, the cost of the repair or replacement of major building systems or components in danger of failure shall not be counted; and

(2) With respect to the definition of Single Room Occupancy (SRO) Housing, the requirement that an SRO unit must be located within a multifamily structure consisting of more than 12 units shall not apply.

B. In addition to the definitions contained in § 882.402, the following definitions shall apply to this program:

Eligible Individual ("Individual"). A lower income individual who, taking into account the supportive services available to the individual, is capable of independent living as a "Family" or "Single Person" under 24 CFR Part 812.

Homeless Individual. An individual who—

(1) Is an Eligible Individual,

(2) Lacks a fixed, regular, and adequate nighttime residence; and

(3) Has a primary nighttime residence that is—

(a) A supervised publicly or privately operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill);

(b) An institution that provides a temporary residence for individuals intended to be institutionalized; or

(c) A public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

The term "Homeless Individual" does not include any individual imprisoned or otherwise detained pursuant to an Act of the Congress or a State law.

Supportive Services. Services that may include outpatient health services; employment counseling; nutritional counseling; security arrangements necessary for the protection of residents of facilities to assist the homeless; other services essential for maintaining independent living; assistance to homeless individuals in obtaining other Federal, State, and local assistance available for such individuals, including mental health benefits, employment counseling, medical assistance, and

income support assistance, such as Supplemental Security Income benefits, General Assistance, and Food Stamps; and residential supervision necessary to facilitate the adequate provision of supportive services to the residents. The term does not include major medical equipment.

VIII. Waivers

A. Authority To Waive Provisions of This Notice

Upon determination of good cause, the Assistant Secretary for Housing—Federal Housing Commissioner may, subject to statutory limitations, waive any provision of this Notice. Each such waiver shall be in writing and shall be supported by documentation of the pertinent facts and grounds.

B. Waiver of the Limitation and Preference in the Second and Third Sentences of Section 3(b)(3) of the 1937 Act

Section 8(n) of the U.S. Housing Act of 1937 authorizes HUD, in appropriate cases involving SRO housing, to waive the limitation and preference in the second and third sentences of section 3(b)(3) of that Act. The second sentence of section 3(b)(3) limits to 15 percent the number of units under the jurisdiction of any PHA which can be occupied by "other single persons" (those which do not qualify as elderly, displaced, or the remaining member of a tenant family). The third sentence requires a preference for persons who are elderly, handicapped, or displaced over other single persons.

The Department believes that waiver of the limitation and preference is appropriate for this program since many of those who will occupy this housing would not be subject to the 15 percent limitation and would qualify for the preference. Therefore, in light of the administrative burden involved, HUD hereby waives these provisions for purposes of this program. In addition, any regulations implementing the percentage limitation or the preference shall not apply to units assisted under this Notice. The authority elsewhere in section 3(b)(3) to "increase the [15 percent] limitation described in the second sentence" to 30 percent does not apply, since the limitation in the second sentence has been waived and there is no applicable limitation in the second sentence to "increase."

Other Information

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street SW., Washington, DC 20410.

The information collection requirements contained in this Notice have been submitted to the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). When OMB has approved these requirements, HUD will announce control numbers in a Federal Register Notice. Until that time, no person may be subjected to a penalty for failure to comply with information collection requirements.

(The Catalog of Federal Domestic Assistance Program number is 14.156, Lower Income Housing Assistance Program.)

Authority: Sections 401 and 441 of the Stewart B. McKinney Homeless Assistance Act, Pub. L. 100–77, approved July 22, 1987; section 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: October 9, 1987.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

The Federal Register: What It Is and How to Use It

A Guide for the User of the Federal Register — Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem.

Price $4.50

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Proclamation 5728 of October 14, 1987

World Food Day, 1987

By the President of the United States of America

A Proclamation

This is the seventh successive year in which people everywhere, including Americans, have observed World Food Day in a spirit of rededication to the continuing fight against world hunger. We Americans are a people with strong ties to other nations and with a long record of humanitarian concern for the hungry around the world. We are blessed with the wherewithal to help: a bountiful land whose fertile soil, moderate climate, and economic and political freedom provide the keys not only to abundance here at home but to a surplus which can be shared with others in grave need around the globe.

Progress has been made in averting the threat of famine in many regions, but widespread poverty and hunger, especially in developing countries, constantly challenge us to ease the human suffering they cause and to preserve the human potential they deplete. As hunger robs people of health and strength, it also saps the economic systems to which they might otherwise contribute, upsets the social order, frustrates progress at every level, and engenders hopelessness and instability.

Our Nation has always been—and continues to be—deeply committed to helping feed the hungry wherever they may be, and to accomplish this goal an extensive network of private and public efforts has been established. But additional steps are clearly necessary. Greater success in the fight against hunger will require the implementation of worldwide agricultural and trade policies designed to promote economic growth and stability for all nations, developing and developed alike. Schemes of narrowly focused government intervention must be replaced by systems that respond to the production and trade decisions made by free individuals. Farmers must have ready access to the international marketplace and the opportunity to compete freely and to sell the goods they produce. Nations, if they are to move toward self-reliance in agriculture, must install systems that promote private ownership, reward effort and efficiency, and recognize the dignity of those who work the land.

The United States has established an initiative to End Hunger in Africa by the end of the century through economic growth and private sector development. All U.S. bilateral and multilateral economic programs and policies are oriented toward this goal. But U.S. government programs cannot do it alone. The participation and commitment of Africans, other donors, and the private sector—volunteer and business, both American and international—are essential.

In recognition of the desire and commitment of the American people to end world hunger, the Congress, by Senate Joint Resolution 110, has designated October 16, 1987, as "World Food Day" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim October 16, 1987, as World Food Day, and I call upon the people of the United States to observe this day with appropriate activities to explore ways in which our Nation can contribute further to the elimination of hunger in the world.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 52, No. 200
Friday, October 16, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 40, and 70

Regional Nuclear Materials Licensing for the United States Navy

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The NRC is amending its regulations concerning the domestic licensing of source, byproduct, and special nuclear material (collectively referred to as nuclear materials) to transfer the authority for administering the United States Navy license from Headquarters to the NRC Region II office in Atlanta, Georgia. This action is necessary to inform the public of this administrative change.

EFFECTIVE DATE: December 1, 1987.

FOR FURTHER INFORMATION CONTACT: George J. Deegan, Program Analyst, Operations Branch, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 427–4114.

SUPPLEMENTARY INFORMATION: Each year since 1982 (May 27, 1982; 47 FR 23138) (April 14, 1983; 48 FR 16030) (May 9, 1984; 49 FR 19630) (April 15, 1985; 50 FR 14692) (October 8, 1986; 51 FR 35999), the Nuclear Regulatory Commission (NRC) published rules decentralizing most domestic licensing of nuclear materials. The NRC is amending its codified regulations to reflect that the United States Navy license is now included in its decentralization program. This is accomplished by amending 10 CFR 30.6, 10 CFR 40.5, and 10 CFR 70.5 to remove the reference to the exception for the United States Navy.

The NRC recently consolidated approximately one hundred eighty individual United States Navy licenses into one "master" license with many individual permits. During the consolidation and for a short time after it, Headquarters retained the regulatory authority for the Navy licensing effort to maintain continuity. NRC Headquarters has now transferred this authority to the appropriate Regional Office (Region II, Atlanta, Georgia), consistent with similar delegations which affected nearly all other Federal licenses in 1985 and 1986.

Accordingly, with respect to licenses issued pursuant to 10 CFR Parts 30 through 35, 39, 40, and 70, the revisions to 10 CFR 30.6, 40.5, and 70.5 require the Navy to contact the appropriate Regional Office, rather than NRC Headquarters offices, for license applications, renewals, and revisions.

Because delegations of authority to the Regional Administrator are contained in NRC Manual Chapter 0128, the changes to §§ 30.6, 40.5, and 70.5 are procedural amendments only. For purposes of communications, the revised sections indicate the type of licensing authority already delegated administratively to the Regional Administrator.

Because these are amendments dealing with Agency practice, procedure, and organization, pursuant to 5 U.S.C. 533(b)(A), the notice and comment provisions of the Administrative Procedure Act do not apply. The amendments are effective December 1, 1987.

Environmental Impact—Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(3)(i). Accordingly, pursuant to 10 CFR 51.22(b), neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval numbers 3150–0017 for Part 30, 3150–0016 for Part 31, 3150–0001 for Part 32, 3150–0015 for Part 33, 3150–0007 for Part 34, 3150–0010 for Part 35, 3150–0130 for Part 39, 3150–0020 for Part 40, and 3150–0009 for Part 70.

List of Subjects

10 CFR Part 30

Byproduct material, Government contracts, Intergovernmental relations, Isotopes, Nuclear materials, Penalty, Radiation protection Reporting and recordkeeping requirements.

10 CFR Part 40

Government contracts, Hazardous materials-transportation, Nuclear materials, Penalty, Reporting and recordkeeping requirements, Source material, and Uranium.

10 CFR Part 70

Hazardous materials-transportation, Nuclear materials, Packaging and containers, Penalty, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Security measures, Special nuclear material.

Under the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the following amendments to 10 CFR Parts 30, 40, and 70 are published as a document subject to codification.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. The authority citation for Part 30 continues to read as follows:

Authority: Secs. 81, 82, 161, 182, 183, 186, 68 Stat. 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2111, 2112, 2201, 2232, 2233, 2236, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 30.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 30.34(b) also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 30.61 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 30.3, 30.34 (b) and (c), 30.41 (a) and (c), and 30.53 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 30.6, 30.36, 30.51, 30.52 30.55, and 30.56 (b) and (c) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

VOL 52 ISS 200 OCT 16 1987 UMI

2. In § 30.6, paragraphs (b)(2) (i), (ii), (iii), (iv), and (v) are amended by removing the phrase, "With the exception of the United States Navy," also, the introductory text of paragraph (b) and paragraph (b)(1) are revised to read as follows:

§ 30.6 Communications.

* * * * *

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its decentralized licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, or revoke licenses for nuclear materials issued pursuant to 10 CFR Parts 30 through 35, 39, 40, and 70 to all persons for academic, medical, and industrial uses, with the following exceptions:

(i) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's Headquarters to the Regional Administrators.

(ii) Health and safety design review of sealed sources and devices and approval, for licensing purposes, of sealed sources and devices.

(iii) Processing of source material for extracting of metallic compounds (including Zirconium, Hafnium, Tantalum, Titanium, Niobium, etc.).

(iv) Distribution of products containing radioactive material to persons exempt pursuant 10 CFR 32.11 through 32.26.

(v) New uses or techniques for use of byproducts, source, or special nuclear material.

* * * * *

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

3. The authority citation for Part 40 continues to read as follows:

Authority: Secs. 62, 63, 64, 65, 81, 161, 182, 183, 186, 68 Stat. 932, 933, 935, 948, 953, 954, 955, as amended, secs. 11e(2), 83, 84, Pub. L. 95–604, 92 Stat. 3033, as amended, 3039, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2014(e)(2), 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2232, 2236, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688 (42 U.S.C. 2021); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); sec. 275, 92 Stat. 3021, as amended by Pub. L. 97–415, 96 Stat. 2067 (42 U.S.C. 2022).

Section 40.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 40.31(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 40.46 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 40.71 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 40.3, 40.25(d)(1)–(3), 40.35(a)–(d), 40.41 (b) and (c), 40.46, 40.51 (a) and (c), and 40.63 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 40.5, 40.25(c), (d) (3), and (4), 40.26(c)(2), 40.35(e), 40.42, 40.61, 40.62, 40.64, and 40.65 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

4. In § 40.5, paragraph (b)(2) (i), (ii), (iii), (iv), and (v) are amended by removing the phrase, "With the exception of the United States Navy," also, the introductory text of paragraph (d) and paragraph (b)(1) are revised to read as follows:

§ 40.5 Communications.

* * * * *

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its decentralized licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, or revoke licenses for nuclear materials issued pursuant to 10 CFR Parts 30 through 35, 39, 40, and 70 to all persons for academic, medical, and industrial uses, with the following exceptions:

(i) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's Headquarters to the Regional Administrators.

(ii) Health and safety design review of sealed sources and devices and approval, for licensing purposes, of sealed sources and devices.

(iii) Processing of source material for extracting of metallic compounds (including Zirconium, Hafnium, Tantalum, Titanium, Niobium, etc.).

(iv) Distribution of products containing radioactive material to persons exempt pursuant 10 CFR 32.11 through 32.26.

(v) New uses or techniques for use of byproduct, source, or special nuclear material.

* * * * *

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

5. The authority citation for Part 70 continues to read as follows:

Authority: Secs. 51, 53, 161, 182, 183, 68 Stat. 929, 930, 948, 953, 954, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2201, 2232, 2233, 2282); secs. 201, as amended, 202, 204, 206, 88 Stat. 1242, as amended, 1244, 1245, 1246 (42 U.S.C. 5841, 5842, 5845, 5846).

Section 70.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 70.21(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 70.31 also issued under sec. 57d, Pub. L. 93–377, 88 Stat. 475 (42 U.S.C. 2077). Sections 70.36 and 70.44 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 70.61 also issued under secs. 186, 187, 68 Stat. 955 (42 U.S.C. 2236, 2237). Section 70.62 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 70.3, 70.19(c), 70.21(c), 70.22(a), (b), (d)–(k), 70.24(a) and (b), 70.32(a)(3), (5), (6), (d), and (i), 70.36, 70.39(b) and (c), 70.41(a), 70.42(a) and (c), 70.56, 70.57(b) (c), and (d), 70.58(a)–(g)(3), and (h)–(j) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 70.7, 70.20a(a), and (d) 70.20b(c) and (e), 70.21(c), 70.24(b), 70.32(a)(6), (c), (d), (e), and (g), 70.36, 70.51(c)–(g), 70.56, 70.57(b), and (d), and 70.58(a)–(g)(3) and (h)–(j) are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 70.5, 70.20b(d) and (e), 70.38, 70.51(b) and (i), 70.52, 70.53, 70.54, 70.55, 70.58(g)(4), (k), and (l), 70.59, and 70.60(b) and (c) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

6. In § 70.5, paragraphs (b)(2) (i), (ii), (iii), (iv), and (v) are amended by removing the phrase, "With the exception of the United States Navy," also, the introductory text of paragraph (b) and paragraph (b)(1) are revised to read as follows:

§ 70.5 Communications.

* * * * *

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its decentralized licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, or revoke licenses for nuclear materials

issued pursuant to 10 CFR Parts 30 through 35, 39, 40, and 70 to all persons for academic, medical, and industrial uses, with the following exceptions:

(i) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's Headquarters to the Regional Administrators.

(ii) Health and safety design review of sealed sources and devices and approval, for licensing purposes, of sealed sources and devices.

(iii) Processing of source material for extracting of metallic compounds (including Zirconium, Hafnium, Tantalum, Titanium, Niobium, etc.).

(iv) Distribution of products containing radioactive material to persons exempt pursuant to 10 CFR 32.11 through 32.26.

(v) New uses or techniques for use of byproduct, source, or special nuclear material.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-CE-15-AD; Amdt. 39-5748]

Airworthiness Directives; Beech 65, 70, 80, 90, 99, 100, 200, 300 and 1900 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Beech 65, 70, 80, 90, 99, 100, 200, 300 and 1900 Series airplanes, which requires repetitive inspections of the nose landing gear fork assembly to detect fatigue cracking. Reports have been received of cracks developing in the nose landing gear fork around the edge of the weld. The inspection specified in this action will detect critical cracks prior to failure.

DATES: *Effective date:* November 16, 1987. *COMPLIANCE:* As prescribed in the body of the AD.

ADDRESSES: Beech Service Bulletin No. 2102, Revision I, dated April 1987, applicable to this AD may be obtained from Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201-0085; telephone 316-681-7279. This information may be examined at the Rules Docket, Office of the Regional Counsel, Attention: Rules Docket No. 87-CE-15-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Don Campbell, Aerospace Engineer, Airframe Branch, ACE-120W, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone 316-946-4409.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring repetitive inspections for fatigue cracking of the nose landing gear (NLG) fork around the edge of the weld on certain Beech 65, 70, 80, 90, 99, 100, 200, 300 and 1900 Series airplanes was published in the **Federal Register** on June 5, 1987 (52 FR 21312). The proposal resulted from the receipt of an increased number of reports of cracks developing in the nose landing gear (NLG) fork around the edge of the weld on Beech 90, 100, 200 and 300 airplanes. In February 1985, the NLG fork broke on a Model 200 during ground roll, causing severe damage to the airplane. All the Beech airplanes in the "heavy twin" series utilize the same NLG design. This design uses a welded fork assembly which connects the lower strut to the axle. The fork is a curved tube which is welded to a collar, which is press-fitted on the strut tube. In July 1986, Beech issued Service Bulletin No. 2102, of which Part II pertains to cracking of the NLG fork. Part I of the Bulletin pertains to slippage of the joint where the fork collar is pressed onto the strut tube.

Beech has issued Revision I to Service Bulletin No. 2102, dated April 1987, which eliminates the time period before initial inspection, expands the serial number effectivity, and reduces the allowable crack length from 1.25 inch to 0.75 inch. Beech is also developing an improved NLG fork which will be more fatigue resistant. The improved forks will not be available in quantity for quite some time, so inspections per the revised bulletin must be relied on to ensure safety in the interim period.

Since the condition described is likely to exist or develop in other Beech 65, 70, 80, 90, 99, 100, 200, 300 and 1900 Series airplanes of the same design, the AD requires inspection of NLG forks per Beech Service Bulletin No. 2102, Revision I, dated April, 1987. If a crack along the edge of the weld is found to exceed 0.75 inch length, the NLG fork must be replaced with a serviceable part prior to further flight.

Interested persons have been afforded an opportunity to comment on the proposal. Only one comment was received. The commenter concurred with the proposed rule, with one exception. The commenter feels that improved, fatigue-resistant NLG fork assemblies should be made available by the manufacturer within a reasonable time. The FAA agrees, and is confident that such replacement parts will be available in due course. Accordingly, the proposal is adopted without change. The FAA has determined that this regulation only involves 4200 airplanes at an approximate total cost of $2250 for each airplane, or a total fleet cost of $9,450,000. The total cost of this inspection is less than the threshold for a significant economic impact.

Therefore, I certify that this action (1) is not a major rule under the provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibilty Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

VOL 52 ISS 200 OC 16 1987 UMI

Beech: Applies to all Models 65, 65–80, A65, A65–8200, 70, 65–A80, 65–A80–8800, 65–B80, 65–88, 65–90, 65–A90, 65–A90–1, 65–A90–2, 65–A90–3, 65–A90–4, B90, C90, C90A, E90, H90, F90, 100, A100, B100, 99, 99A, A99A, B99, C99, 200, 200C, 200CT, 200T, A200, A200C, A200CT, B200, B200C, B200CT, B200T, 300, 1900, and 1900C (all serial numbers) airplanes certificated in any category.

Compliance: Required as indicated after the effective date of this AD unless already accomplished.

To prevent failure of the nose landing gear (NLG) fork due to undetected fatigue cracking, accomplish the following:

(a) Within 200 hours time-in-service (TIS) after the effective date of this AD, and thereafter at intervals not to exceed 100 hours TIS for airplanes in the 65 Series, 70 Series, 80 Series, 99 Series and 1900 Series, and 150 hours TIS for airplanes in the 90 Series, 100 Series, 200 Series and 300 Series, inspect the NLG fork using fluorescent penetrant method in accordance with the instructions in Part II of Beech Service Bulletin No. 2102, Revision I, dated April 1987.

Note.—Inspection for slippage of the NLG fork collar on the strut tube per Part I of the Service Bulletin is recommended but not required by this AD.

(1) If no cracks are found, the airplane may be returned to service.

(2) If a crack is detected at the tip of the weld, is not more than 0.75 inch in length, and does not branch out into the unwelded tube wall (See Figure 1 or Figure 2 as applicable), thereafter at intervals not to exceed 25 hours TIS, inspect the NLG fork per paragraph (a) above until replaced with a serviceable part. The replacement part is immediately subject to the conditions of this AD.

(3) If a crack is detected that exceeds the limits of paragraph (a)(2), prior to further flight, replace the NLG fork with a serviceable part. The replacement part is immediately subject to the conditions of this AD.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD can be accomplished.

(c) The repetitive inspection intervals required by this AD may be adjusted up to 10 percent of the specified interval so as to coincide with other scheduled maintenance.

(d) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone 316–946–4400.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085; or may examine the documents referred to herein at FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on November 16, 1987.

Issued in Kansas City, Missouri, on September 30, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

[FR Doc. 87–23938 Filed 10–15–87; 8:45 am]

14 CFR Part 39

[Docket No. 87–NM–70–AD; Amdt. 39–5743]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD), applicable to certain Boeing Model 727 series airplanes, which requires the modification of the main landing gear (MLG) door ground release lever. This amendment is prompted by reports of a left MLG door ground release lever that vibrated into the door open position during flight. This prevented the extension of the left MLG and resulted in the airplane landing with the left MLG retracted.

EFFECTIVE DATE: November 20, 1987.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Airframe Branch, ANM–120S; telephone 431–1924. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington, 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which requires modification of the main landing gear (MLG) door ground release lever was published in the **Federal Register** on July 2, 1987 (52 FR 25022).

Interested persons have been afforded an opportunity to participate in the making of this amendment. The Air Transport Association (ATA) of America, on behalf of its members, submitted the only comment.

ATA commented that the parts required to be incorporated in accordance with the proposed AD would not be available for 5 to 6 months. The commenter stated that insufficient time would be available for operators with high utilization rates to comply with the 3,000 hour provision of the proposed AD. Therefore, they requested that the compliance time be extended to two years or 4,500 hours time-in-service, whichever occurs first, after the effective date of this AD. The FAA concurs that the 5 to 6 month lead time on parts would be insufficient time for some operators to comply with the AD. Therefore, the final rule is being changed to require compliance within 2 years or 4,500 hours time-in-service, whichever occurs first, after the effective date of this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted above.

It is estimated that 1188 airplanes of U.S. registry will be affected by this AD, that it will take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The cost of the modification kit is $148. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $651,000.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities, because few, if any Model 727 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 727 series airplanes, as listed in Boeing Service Bulletin 727–32–267, Revision 1, dated June 15, 1984, certified in any category. Compliance is required within the next 4,500 hours time-in-service or 2 years after the effective date of this AD, whichever occurs first, unless previously accomplished.

To prevent the main landing gear door release lever from moving to the door open position during flight, accomplish the following:

A. Modify the left and right main landing gear door release levers in accordance with the Accomplishment Instructions of Boeing Service Bulletin 727–32–267, Revision 1, dated June 15, 1984, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 20, 1987.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 87–23939 Filed 10–15–87; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 87–NM–136–AD; Amdt. 39–5752]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which requires inspection for cracking, and repair or replacement, as necessary, of the skin along the upper row of fasteners of certain fuselage lap joints. This amendment is prompted by recent inspection reports on three airplanes of extensive skin cracking adjacent to lap splice fasteners. Delamination of fuselage tearstraps has also been found in these same areas. Failure to detect and repair cracks could result in rapid depressurization of the airplane.

EFFECTIVE DATE: November 2, 1987.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara J. Baillie, Airframe Branch, ANM–120S; telephone (206) 431–1927. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: There have been recent reports of multiple site cracking of the skin on three airplanes along the upper row of fasteners of certain fuselage lap joints. Delamination of fuselage tearstraps has also been found in these same areas. This cracking, when discovered, was severe enough to require replacement of five skin panels on the fuselage of one airplane. The cracking occurs in lap joints that have also experienced adhesive failure of the bonded joint. The loss of the bond to the joint inner skin creates a knife at the bottom of the countersink for the fastener head in the joint outer skin. Fatigue cracking is initiated at the multiple sites in disbonded panels and extends longitudinally from fastener to fastener along the upper row of fasteners. If the cracks suddenly join together and the associated tearstraps are disbonded, extensive structural damage and rapid depressurization of the airplane could result.

It is believed that the problem is confined to airplanes between line number 1 and 291. Improvements were made in the bonding procedure at line number 292.

The FAA has reviewed and approved Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 30, 1987, which describes procedures for the visual and eddy current inspection and repair of fuselage lap splices.

Since this condition is likely to exist or develop on other airplanes of the same type design, this AD requires inspection and repair, as necessary, in accordance with the service bulletin previously mentioned.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes listed in Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 20, 1987, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent rapid depressurization as a result of failure of certain fuselage lap splices, accomplish the following:

A. Prior to the accumulation of 30,000 landings or within 250 landings after the effective date of this AD, whichever occurs later, and at intervals thereafter not to exceed 4,500 landings, perform a detailed visual inspection for cracking of the skin

VOL
52
ISS
200
OC
16
1987
UMI

adjacent to the upper row of longitudinal lap splice fasteners, at stringer 4, both left and right side of the fuselage, from stations 360 to 1016, in accordance with Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 20, 1987, or later FAA-approved revisions. If any cracks are found, perform an eddy current inspection for the full length of the panel in which the cracks were found in accordance with the service bulletin.

B. The repetitive inspections required by paragraph A. of this AD may be terminated upon the performance of inspections for cracks and/or tearstrap delamination using one of the following three options in accordance with Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 20, 1987, or later FAA-approved revisions:

1. Perform a high frequency eddy current inspection of the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right side of the fuselage, from stations 360 to 1016. Repeat at intervals thereafter not to exceed 20,000 landings. If no cracks are found, prior to the accumulation of 6,000 landings after the completion of the above eddy current inspection, and at intervals thereafter not to exceed 3,000 landings until the next eddy current inspection, perform a detailed visual inspection of these same areas.

2. Perform a high frequency eddy current inspection on the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right sides of the fuselage, from stations 360 to 1016. Repeat at intervals not to exceed 20,000 landings. In addition, perform a tearstrap inspection for delamination. If no cracks are found and tearstrap bond is intact, prior to the accumulation of 6,000 landings after the completion of the above inspections, and at intervals thereafter not to exceed 6,000 landings, perform a detailed visual inspection for skin cracks of the areas previously inspected by eddy current.

3. Perform a high frequency eddy current inspection of the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right side of fuselage, from stations 360 to 1016. In addition, perform a tearstrap inspection for delamination. Repeat the eddy current inspections at intervals not to exceed 10,000 landings and the delamination inspections at intervals not to exceed 20,000 landings.

C. Repair all cracks and tearstrap delaminations found as a result of the above inspections prior to further flight in accordance with Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 20, 1987, or later FAA-approved revisions. If blind fasteners are used in the repair, reinspect installation at intervals not to exceed 3,000 landings for loose or missing fasteners. Also, if blind fasteners are used in the skin repair, prior to the accumulation of 15,000 landings after installation, or within 250 landings after the effective date of this AD, whichever is later, and thereafter at intervals not to exceed 4,500 landings, perform the inspection as detailed in paragraph A. above.

D. Terminating action for the inspections required by this AD is the replacement of the existing upper row of joint fasteners with standard protruding head solid fasteners at all affected fuselage longitudinal lap splices and ensuring functional tearstraps in accordance with Boeing Alert Service Bulletin 737–53A1039, Revision 3, dated August 20, 1987, or later FAA-approved revisions.

E. For the purpose of complying with this AD, the number of landings may be determined to equal the number of pressurization cycles where the cabin pressure differential was greater than 2.0 PSI.

F. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 2, 1987.

Issued in Seattle, Washington, on October 5, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 87–23940 Filed 10–15–87; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 87–NM–133–AD; Amdt. 39–5744]

Airworthiness Directive; British Aerospace Model BAC 1–11 –200 and –400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model BAC 1–11 –200 and –400 series airplanes, which requires inspection, and replacement or repairs, as necessary, to the rear passenger door structure. This amendment is prompted by reports that several horizontal structural members of the door have failed. This condition, if not corrected, could result in structural failure of the door and sudden decompression of the airplane.

EFFECTIVE DATE: October 21, 1987.

ADDRESSES: The applicable service information may be obtained from British Aerospace Inc., Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Several failed horizontal structural members have been reported on rear passenger doors on Model BAC 1–11 airplanes. Cracks initiated in the aft free flange of some horizontal members, and grew towards the pressure skin attach flange. Failure of these members could result in structural failure of the door and sudden decompression of the airplane.

British Aerospace issued Campaign Wire 52–CW–PM5448, dated September 4, 1987, which describes a one-time inspection, and replacement or repairs, as necessary, to the affected structural members of the door. Campaign Wire 52–CW–PM5448, Issue 2, was issued September 18, 1987, to correct the original issue and specify repetitive inspections. The United Kingdom Civil Aviation Authority has classified the campaign wires as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design, this AD requires inspections, and replacement or repairs, as necessary, in accordance with the campaign wires previously mentioned.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAC 1–11 –200 and –400 series airplanes, listed in British Aerospace Campaign Wire 52–CW–PM5448, Issue 2, dated September 18, 1987, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent sudden decompression of the fuselage as a result of failure of the rear passenger door, accomplish the following:

A. Within the next 100 landings, or within 30 days after the effective date of this AD, or prior to the accumulation of 20,000 landings, whichever occurs later, inspect the rear passenger door structure for cracks, in accordance with British Aerospace Campaign Wire 52–CW–PM5448, Issue 2, dated September 18, 1987.

B. Repair or replace cracked structure, before further flight, in accordance with the campaign wire described in paragraph A., above.

C. Repeat the inspection required by paragraph A., above, at intervals not to exceed:

1. 800 landings for airplanes with doors that have the horizontal members repaired in accordance with the structural repair manual.

2. 1,200 landings for airplanes with doors in which the horizontal members were found undamaged at the last inspection or were replaced.

D. And alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes unpressurized to a base for the accomplishment of the inspection required by this AD.

All persons affected by this directive who have not already received the appropriate service information, may obtain copies upon request to British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective October 21, 1987.

Issued in Seattle, Washington, on September 21, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[FR Doc. 87–23941 Filed 10–15–87; 8:45 am]

[Docket No. 87–ASW–10, Amdt. 39–5747]

Airworthiness Directives; Societe Nationale Industrielle Aerospatiale Model AS 332C and L Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires an initial inspection and separation of the electrical cable bundles connecting each AC generator to its regulating card on Aerospatiale Model AS 332C and L helicopters. This AD is needed to prevent a complete loss of the AC electrical generation system which could result in possible loss of the helicopter.

DATES: Effective Date: November 12, 1987.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, TX 75053.

A copy of the applicable service documents is contained in the Rules Docket, Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Mr. W. Boyce, Brussels Aircraft Certification Office, AEU–100 (APO Air Mail Address), Federal Aviation Administration, c/o American Embassy, APO New York 09667–1011, or Mr. John Swihart, Aircraft Certification Division, Rotorcraft Standards Staff, ASW–110, Federal Aviation Administration, Fort Worth, Texas 76193–0110, telephone (817) 624–5120.

SUPPLEMENTARY INFORMATION: The FAA has determined that a short circuit in the cable connecting the No. 2 AC generator to its regulator card could cause the complete loss of the AC electrical power on Aerospatiale Model AS 332C and L helicopters. Since this condition is likely to exist or develop on other helicopters of the same type design, an airworthiness directive is being issued which requires an initial inspection and separation of the electrical cable bundles connecting each AC generator to its regulating card.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1987). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT"**.

VOL 52 ISS 200 OCT 16 1987 UMI

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the FAR as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.89.

§ 39.19 [Amended]

2. By adding the following new AD:

Societe Nationale Industrielle Aerospatiale: Applies to all Model AS 332C and L helicopters certificated in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent loss of the AC electrical generation system, accomplish the following:

(a) Within the next 50 hours' time in service or the next 30 days after the effective date of this AD, inspect the electrical cable bundles connecting each AC generator to its regulating card in accordance with the instructions given in paragraph BBA of Aerospatiale Telex Service No. 05.12, transmitted by Aerospatials Telex No. 10084, dated January 16, 1987.

(b) The aircraft can be returned to operational service if the insulation values measured are greater than 2 megohms.

(c) If the insulation values measured are less than 2 megohms, the installation is to be modified in accordance with the instructions given in Aerospatiale AS 332 Service Bulletin No. 24.10, paragraph 2, "Accomplishment Instructions."

(d) Within 400 hours' time in service following the inspection or before December 31, 1987, whichever occurs first, modify the aircraft in accordance with the instructions given in AS 332 Service Bulletin No. 24.10, paragraph 2, "Accomplishment Instructions."

(e) An alternate means of compliance which provides an equivalent level of safety may be used if approved by the Manager, Aircraft Certification Division, Federal Aviation Administration, Fort Worth, Texas 76193–0100.

This amendment becomes effective November 12, 1987.

Issued in Fort Worth, Texas, on September 25, 1987.

Don P. Watson,

Acting Director, Southwest Region.

BILLING CODE 4910–13–M

14 CFR Part 71

[Airspace Docket No. 87–ASO–11]

Alteration of Transition Area, Venice, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Venice, Florida, transition area to accommodate instrument flight rules (IFR) operations at the Venice Municipal Airport. This action lowers the base of controlled airspace from 1200 feet to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure predicated on the Venice non-directional radio beacon (RBN) has been developed to serve the airport and additional controlled airspace is required for the protection of IFR aeronautical activities.

EFFECTIVE DATE: 0901 UTC, November 6, 1987.

FOR FURTHER INFORMATION CONTACT: Walter H. Wulff, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On July 2, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by increasing the size of the Venice, Florida, transition area to accommodate instrument flight rules (IFR) operations at the Venice Municipal Airport. This action will provide additional controlled airspace for aircraft executing a new instrument approach procedure to the Venice Municipal Airport (FR 26023).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Venice, Florida, transition area to accommodate IFR aeronautical operations in the vicinity of the Venice Municipal Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Public Law 97–449, January 12, 1983); [14 CFR 11.69]; 49 CFR 1.47.

§ 71.181 [Amended]

2. By amending § 71.181 as follows:

Venice, Florida [Revised]

Venice, Florida

That airspace extending upward from 700 feet above the surface within a 6.5.-mile radius of Venice Municipal Airport (Lat. 27°04'30" N., Long. 82°25'00" W.); within 3 miles each side of the 137° bearing from the Venice RBN (Lat. 27°03'38" N., Long. 82°25'47" W.) extending from the 6.5 mile radius area to 8.5 miles of the RBN.

Issued in East Point, Georgia, on October 1, 1987.

William D. Wood,

Acting Manager, Air Traffic Division, Southern Region.

[FR Doc. 87–23943 Filed 10–15–87; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 97

[Docket No. 25407; Amdt. No. 1358]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference: Approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS-230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliances dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, when applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC, on October 2, 1987.

Robert L. Goodrich,

Director of Flight Standards.

Adoption of The Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.M.T. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33 and 97.35 [Amended]

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR 276

[Rel. No. IA-1092]

Applicability of the Investment Advisers Act to Financial Planners, Pension Consultants, and Other Persons Who Provide Investment Advisory Services as a Component of Other Financial Services

ACTION: Statement of staff interpretive position.

SUMMARY: The Commission is publishing the views of the staff of the Division of Investment Management on the applicability of the Investment Advisers Act of 1940 to financial planners and other persons who provide investment advice as a component of other financial services. The views expressed in this statement were developed jointly by Division staff and the North American Securities. Administrators Association, Inc. ("NASAA") to update Investment Adivsers Act Release No. 770 and provide uniform interpretations of the application of federal and state adviser laws to financial planners and other persons. The revised statement clarifies, among other things, the "business" element of the definition of investment adviser.

FOR FURTHER INFORMATION CONTACT: A. Thomas Smith III, Attorney, (202) 272-2030 Office of the Chief Counsel, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: Since the Commission published Investment

Advisers Act Rel. No. 770 (Aug. 13, 1981) ("IA–770"), the Commission and NASAA have worked together to promote more uniform regulation of investment advisers under federal and state securities laws. At the federal level, advisers are regulated under the Investment Advisers Act of 1940 ("Advisers Act"). Approximately 40 states regulate the activities of advisers under state adviser laws that typically are substantially similar to the Advisers Act. The staff of the Division and the NASAA Financial Planner/Investment Advisers Committee jointly developed the views stated in this release to provide uniform interpretations about the applicability of federal and state adviser laws to the activities of financial planners and other persons. While the views being published are based substantially on IA–770, this release revises IA–770 in some respects. Specifically, the revised release provides additional guidance on the fiduciary responsibilities of advisers, clarifies the "business" element of the definition of investment adviser, and supplements the views contained in IA–770 by references to interpretive letters issued by the Division since IA–770 was published.

I. Background

Financial planning typically involves providing a variety of services, principally advisory in nature, to individuals or families regarding the management of their financial resources based upon an analysis of individual client needs. Generally, financial planning services involve preparing a financial program for a client based on the client's financial circumstances and objectives. This information normally would cover present and anticipated assets and liabilities, including insurance, savings, investments, and anticipated retirement or other employee benefits. The program developed for the client usually includes general recommendations for a course of activity, or specific actions, to be taken by the client. For example, recommendations may be made that the client obtain insurance or revise existing coverage, establish an individual retirement account, increase or decrease funds held in savings accounts, or invest funds in securities. A financial planner may develop tax or estate plans for clients or refer clients to an accountant or attorney for these services.

The provider of such financial planning services in most cases assists the client in implementing the recommended program by, among other things, making specific recommendations to carry out the general recommendations of the program, or be selling the client insurance products, securities, or other investments. The financial planner may also review the client's program periodically and recommend revisions. Persons providing such financial planning services use various compensation arrangements. Some financial planners charge clients an overall fee for developing an individual client program while others charge clients an hourly fee. In some instances financial planners are compensated, in whole or in part, by commissions on the sale to the client of insurance products, interests in real estate, securities (such as common stocks, bonds, limited partnership interests, and mutual funds), or other investments.

A second common form of service relating to financial matters is provided by "pension consultants" who typically offer, in addition to administrative services, a variety of advisory services to employee benefit plans and their fiduciaries based upon an analysis of the needs of the plan. These advisory services may include advice as to the types of funding media available to provide plan benefits, general recommendations as to what portion of plan assets should be invested in various investment media, including securities, and, in some cases, recommendations regarding investment in specific securities or other investments. Pension consultants may also assist plan fiduciaries in determining plan investment objectives and policies and in designing funding media for the plan. They may also provide general or specific advice to plan fiduciaries as to the selection or retention of persons to manage the assets of the plan.[1]. Persons providing these services to plans are customarily compensated for their services through fees paid by the plan, its sponsor, or other persons; by means of sales commissions on the sale of insurance products or investments to the plan; or through a combination of fees and commissions.

Another form of financial advisory service is that provided by persons offering a variety of financially related services to entertainers or athletes based upon the needs of the individual client. Such persons, who often use the designation "sports representative" or "entertainment representative," offer a number of services to clients, including the negotiation of employment contracts and development of promotional opportunities for the client, as well as advisory services related to investments, tax planning, or budget and money management. Some persons providing these services to clients may assume discretion over all or a portion of a client's funds by collecting income, paying bills, and making investments for the client. Sports or entertainment representatives are customarily compensated for their services primarily through fees charged for negotiation of employment contracts but may also receive compensation in the form of fixed charges or hourly fees for other services provided, including investment advisory services.

There are other persons who, while not falling precisely into one of the foregoing categories, provide financial advisory services. As discussed below, financial planners, pension consultants, sports or entertainment representatives or other persons providing financial advisory services, may be investment advisers within the meaning of the Advisers Act, state adviser laws, or both.

II. Status as an Investment Adviser

A. Definition of Investment Adviser

Section 202(a)(11) of the Advisers Act defines the term "Investment adviser" to mean:

> * * * any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities * * *.

Whether a person providing financially related services of the type discussed in this release is an investment adviser within the meaning of the Advisers Act depends upon all the relevant facts and circumstances. As a general matter, if the activities of any person providing integrated advisory services satisfy the elements of the definition, the person would be an investment adviser within the meaning of the Advisers Act, unless entitled to rely on one of the exclusions from the definition of investment adviser in

[1] The authority to manage all or a portion of a plan's assets often is delegated to a person who qualifies as an "investment manager" under the Employee Retirement Income Security Act of 1974 [29 U.S.C. 1001 *et seq.*]. Under that statute, which is applicable to private sector pension and welfare benefit plans, an "investment manager" must be a registered investment adviser under the Advisers Act, a bank as defined in the Advisers Act, or an insurance company that is qualified to perform services as an investment manager under the laws of more than one State.

clauses (A) to (F) of section 202(a)(11).[2] A determination as to whether a person providing financial planning, pension consulting, or other integrated advisory services is an investment adviser will depend upon whether such person: (1) Provides advice, or issues reports or analyses, regarding securities; (2) is in the business of providing such services; and (3) provides such services for compensation. These three elements are discussed below.

1. *Advice or Analyses Concerning Securities*

It would seem apparent that a person who gives advice or makes recommendations or issues reports or analyses with respect to specific securities is an investment adviser under section 202(a)(11), assuming the other elements of the definition of investment adviser are met, *i.e.*, that such services are performed as a part of a business and for compensation. However, it has been asked on a number of occasions whether advice, recommendations, or reports that do not pertain to specific securities satisfy this element of the definition. The staff believes that a person who provides advice, or issues or promulgates reports or analyses, which concern securities, but which do not relate to specific securities, generally is an investment adviser under section 202(a)(11), assuming the services are performed as part of a business [3] and for compensation. The staff has interpreted the definition of investment adviser to include persons who advise clients concerning the relative advantages and disadvantages of investing in securities in general as compared to other investments.[4] A person who, in the course of developing a financial program for a client, advises a client as to the desirability of investing in, purchasing or selling securities, as opposed to, or in relation to, any non-securities investment or financial vehicle would also be "advising" others within the meaning of section 202(a)(11).[5]

Similarly, a person who advises employee benefit plans on funding plan benefits by investing in, purchasing, or selling securities, as opposed to, or in addition to, insurance products, real estate not involving securities, or other funding media, would be "advising" others within the meaning of section 202(a)(11). A person providing advice to a client as to the selection or retention of an investment manager or managers also, under certain circumstances, would be deemed to be "advising" others within the meaning of section 202(a)(11).[6]

2. The "Business" Standard

Under section 202(a)(11), an investment adviser is one who, for compensation, (1) engages in the business of advising others as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or, alternatively, (2) issues or promulgates reports or analyses concerning securities as part of a regular business. Each of these two alternatives in the statutory definition of investment adviser contains a business test—one involves "engaging in the business" of advising others while the other involves issuing reports about securities as "part of a regular business." While the "business" standards established under section 202(a)(11) are phrased somewhat differently, it is the staff's opinion that they should be interpreted in the same manner. In both cases, the determination to be made is whether the degree of the person's advisory activities constitutes being "in the business" of an investment adviser. The giving of advice need not constitute the principal business activity or any particular portion of the business activities of a person in order for the person to be an investment adviser under section 202(a)(11). The giving of advice need only be done on such a basis that it constitutes a business activity occurring with some regularity. The frequency of the activity is a factor, but is not determinative.

Whether a person giving advice about securities for compensation would be "in the business" of doing so, depends upon all relevant facts and circumstances. The staff considers a person to be "in the business" of providing advice if the person: (i) Holds himself out as an investment adviser or as one who provides investment advice, (ii) receives any separate or additional compensation that represents a clearly definable charge for providing advice about securities, regardless of whether the compensation is separate from or included within any overall compensation, or receives transaction-based compensation if the client implements in the investment advice, or (iii) on anything other than rare, isolated and non-periodic instances, provides specific investment advice.[7] For the purposes of (iii) above, "specific investment advice" includes a recommendation, analysis or report about specific securities or specific categories of securities (*e.g.*, industrial development bonds, mutual funds, or medical technology stocks). It includes a recommendation that a client allocate certain percentages of his assets to life insurance, high yielding bonds, and mutual funds or particular types of mutual funds such as growth stock funds or money market funds. However, specific investment advice does not include advice limited to a general recommendation to allocate assets in securities, life insurance, and tangible assets.

In applying the foregoing tests, the staff may consider other financial services activities offered to clients. For example, if a financial planner structures his planning so as to give only generic, non-specific investment advice as a financial planner, but then gives specific securities advice in his capacity as a registered representative of a dealer or as agent of an insurance company, the person would not be able to assert that he was not "in the business" of giving investment advice. See discussion of the broker-dealer exception set forth in section 202(a)(11)(C) of the Advisers Act, *infra*. In the staff's view, it is necessary to

---

[2] *See* discussion of section 202(a)(11) (A) to (F) in section IIB, *infra*.

[3] In this regard, as discussed in detail below, it is the staff's view that a person who gives advice or prepares analyses concerning securities generally may, nevertheless, not be "in the business" of doing so and, therefore, will not be considered an "investment adviser" as that term is used in section 202(a)(11).

[4] *See, e. g., Richard K. May* (pub. avail. Dec. 11, 1979).

[5] *See, e. g., Thomas Beard* (pub. avail. May 8, 1975); *Sinclair-deMarinis Inc.* (pub. avail. May 1, 1981).

[6] *See, e. g., FPC Securities Corp.* (pub. avail. Dec. 1, 1974) (program to assist client in selection and retention of investment manager by, among other things, recommending investment managers to clients, monitoring and evaluating the performance of a client's investment manager, and advising client as to the retention of such manager); *William Bye Co.* (pub. avail. Apr. 26, 1973) (program involving recommendations to client as to selection and retention of investment manager based upon client's investment objectives and periodic monitoring and evaluation of investment manager's performance). On occasion in the past the staff has taken no-action positions with respect to certain situations involving persons providing advice to clients as to the selection or retention of investment managers. *See, e. g., Sebastian Associates, Ltd.*, (pub. avail. Aug. 7, 1975) (provision of assistance to clients in obtaining and coordinating the services of various professionals such as tax attorneys and investment advisers, including referring clients to such professionals, in connection with business as agent for clients with respect to negotiation of employment and promotional contracts); *Hudson Valley Planning Inc.* (pub. avail. Feb. 25, 1978) (provision of names of several investment managers to client upon request, without recommendation, in connection with business of providing administrative services to employee benefit plans.)

[7] *See Zinn v. Parish*, 644 F.2d 360 (7th Cir 1981).

consider these other financial services activities. Section 208(d) of the Advisers Act makes it illegal for someone to do indirectly under the Advisers Act what cannot be done directly.

3. Compensation

The definition of investment adviser applies to persons who give investment advice for compensation. This compensation element is satisfied by the receipt of any economic benefit, whether in the form of an advisory fee or some other fee relating to the total services rendered, commissions, or some combination of the foregoing. It is not necessary that a person who provides investment advisory and other services to a client charge a separate fee for the investment advisory portion of the total services. The compensation element is satisfied if a single fee is charged for a number of different services, including investment advice or the issuing of reports or analyses concerning securities within the meaning of the Advisers Act.[8] As discussed above, however, the fact that no separate fee is charged for the investment advisory portion of the service could be relevant to whether the person is "in the business" of giving investment advice.

It is not necessary that an adviser's compensation be paid directly by the person receiving investment advisory services, but only that the investment adviser receive compensation from some source for his services.[9] Accordingly, a person providing a variety of services to a client, including investment advisory services, for which the person receives any economic benefit, for example, by receipt of a single fee or commissions upon the sale to the client of insurance products or investments, would be performing such advisory services "for compensation" within the meaning of section 202(a)(11) of the Advisers Act.[10]

B. Exclusions From Definition of Investment Adviser

Clauses (A) to (E) of section 202(a)(11) of the Advisers Act set forth limited exclusions from the definition of investment adviser available to certain persons.[11] Whether an exclusion from the definition of investment adviser is available to any financial planner, pension consultant or other person providing investment advisory services within the meaning of section 202(a)(11), depends upon the relevant facts and circumstances.

A person relying on an exclusion from the definition of investment adviser must meet all of the requirements of the exclusion. The staff's view is that the exclusion contained in section 202(a)(11)(B) is not available, for example, to a lawyer or accountant who holds himself out to the public as providing financial planning, pension consulting, or other financial advisory services. In such a case it would appear that the performance of investment advisory services by the person would not be incidental to his practice as a lawyer or accountant.[12] Similarly, the exclusion for brokers or dealers contained in section 202(a)(11)(C) would not be available to a broker or dealer, or associated person of a broker or dealer, acting within the scope of the business of a broker or dealer, if the person receives any special compensation for providing investment advisory services.[13] Moreover, the exclusion from the definition of investment adviser contained in section 202(a)(11)(C) is only available to an associated person of a broker or dealer or "registered representative" who provides investment advisory services to clients within the scope of the person's employment with the broker or dealer.[14] For example, if a registered representative provides advice independent of, or separate from, his broker or dealer employer such as by establishing a separate financial planning practice, then he could not rely on the exclusion because his investment advisory activities would not be subject to control by his broker or dealer employer.[15] Similarly, the exclusion would be unavailable if he provides advice without the knowledge and approval of his employer because in that capacity his advisory activities would, by definition, be outside the control of his employer.[16]

III. Registration as an Investment Adviser

Any person who is an investment adviser within the meaning of section 202(a)(11) of the Advisers Act, who is not excluded from the definition of investment adviser by virtue of one of the exclusions in section 202(a)(11), and who makes use of the mails or any instrumentality of interstate commerce in connection with the person's business as an investment adviser, is required by section 203(a) of the Advisers Act to register with the Commission as an investment adviser unless specifically exempted from registration by section 203(b) of the Advisers Act.[17] Also, any

---

[8] *See, e.g., FINESCO* (pub. avail. Dec. 11, 1979).

[9] *See, e.g., Warren H. Livingston* (pub. avail. Mar. 8, 1980).

[10] Section 202(a)(11)(C) of the Advisers Act excludes from the definition of investment adviser a broker or dealer who performs investment advisory services that are incidental to the conduct of its broker or dealer business and who receives no special compensation therefor. *See* discussion of section 202(a)(11)(C), *infra*.

[11] Section 202(a)(11) provides that the defintion of investment adviser does not include:

(A) A bank, or any bank holding company as defined in the Bank Holding Company Act of 1956, which is not an investment company;

(B) Any lawyer, accountant, engineer or teacher whose performance of such [advisory] services is solely incidental to the practice of his profession;

(C) Any broker or dealer whose performance of such [advisory] services is solely incidental to the conduct of his business as a broker or dealer and who receives no special compensation therefor;

(D) The publisher of any bona fide newspaper, news magazine or business or financial publication of general and regular circulation;

(E) Any person whose advice, analyses, or reports related to no securities other than securities which are direct obligations of or obligations guaranteed as to principal or interest by the United States, or securities issued or guaranteed by corporations in which the United States has a direct or indirect interest which shall be, designated by the Secretary of the Treasury, pursuant to section 3(a)(12) of the Securities Exchange Act of 1934, as exempted securities for the purpose of that Act * * *

Section 202(a)(11)(F) excludes from the definition of investment adviser "such other persons not within the intent of this paragraph, as the Commission may designate by rules and regulations or order."

[12] *See, e. g., Mortimer M. Lerner* (pub. avail. Feb. 15, 1980); *David R. Markley* (pub. avail. Feb. 8, 1985); *Hauk, Soule & Fasani, P.C.* (pub. avail. May 1, 1986). The "professional" exclusion provided in section 202(a)(11)(B) by its terms is only available to lawyers, accountants, engineers, and teachers. A person engaged in a profession other than one of those enumerated in section 202(a)(11)(B) who performs investment advisory services would be an investment adviser within the meaning of section 202(a)(11) whether or not the performance of investment advisory services is incidental to the practice of such profession. Unless another basis for excluding the person from the definition of investment adviser is available, the person would be subject to the Advisers Act.

person who is an investment adviser within the meaning of any State investment adviser definition, and who is not excluded from that definition, may be required to register with that State. The materials necessary for registering with the Commission as an investment adviser can be obtained by writing the Publications Unit, Securities and Exchange Commission, Washington, DC, 20549. As to the various States, persons should contact the office of the State securities administrator in the State in which they must register to obtain the necessary materials.

IV. Application of Antifraud Provisions

The antifraud provisions of section 206 of the Advisers Act [15 U.S.C. 80b–6], and the rules adopted by the Commission thereunder, apply to any person who is an investment adviser as defined in the Advisers Act, whether or not the person is required to be registered with the Commission as an investment adviser.[18] Sections 206 (1) and (2) of the Advisers Act, upon which many State antifraud provisions are patterned, make it unlawful for an investment adviser, directly or any indirectly, to "employ any device, scheme, or artifice to defraud client or prospective client" or to "engage in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client." [19] An investment adviser is a fiduciary who owes his clients "an affirmative duty of 'utmost good faith, and full and fair' disclosure of all material facts." [20] The Supreme Court has stated that a "[f]ailure to disclose material facts must be deemed fraud or deceit within its intended meaning, for, as the experience of the 1920's and 1930's amply reveals, the darkness and ignorance of commercial secrecy are the conditions under which predatory practices best thrive." [21] Accordingly, the duty of an investment adviser to refrain from fraudulent conduct includes an obligation to disclose material facts to his clients whenever the failure to do so would defraud or operate as a fraud or deceit upon any client or prospective client. In this connection the adviser's duty to disclose material facts is particularly pertinent whenever the adviser is in a situation involving a conflict, or potential conflict, of interest with a client.

The type of disclosure required by an investment adviser who has a potential conflict of interest with a client will depend upon all the facts and circumstances. As a general matter, an adviser must disclose to clients all material facts regarding the potential conflict of interest so that the client can make an informed decision as to whether to enter into or continue an advisory relationship with the adviser or whether to take some action to protect himself against the specific conflict of interest involved. The following examples, which have been selected from cases and staff interpretive and no-action letters, illustrate the scope of the duty to disclose material information to clients in certain common situations involving conflicts of interests.

The advisers' duty to disclose material facts includes the duty to disclose the various capacities in which he might act when dealing with any particular client. For example, an adviser who intends to implement the financial plans he prepares for clients, in whole or part, through the broker or dealer or insurance company with whom the adviser is associated, should inform a client that in implementing the plan the adviser will also act as agent for the broker or dealer or the insurance company.[22]

An investment adviser who is also a registered representative of a broker or dealer and provides investment advisory services outside the scope of his employment with the broker or dealer must disclose to his advisory clients that his advisory activities are independent from his employment with the broker or dealer.[23] Additional disclosures would be required, depending on the circumstances, if the investment adviser recommends that his clients execute securities transactions through the broker or dealer with which the investment adviser is associated. For example, the investment adviser would be required to disclose fully the nature and extent of any interest the investment adviser has in such recommendation, including any compensation the investment adviser would receive from his employer in connection with the transaction.[24] In addition, the investment adviser would be required to inform his clients of their ability to execute recommended transactions through other brokers or dealers.[25] A financial planner who will recommend or use only the financial products offered by his broker or dealer employer when implementing financial plans for clients should disclose this practice to clients [26] and inform clients that the plan may be limited by the products offered by the broker or dealer. Finally, the Commission has stated that "an investment adviser must not effect transactions in which he has a personal interest in a manner that could result in preferring his own interest to that of his advisory clients." [27]

An investment adviser who structures his personal securities transactions to trade on the market caused by his recommendations to clients must disclose this practice to clients.[28] An investment adviser generally also must disclose if his personal securities transactions are inconsistent with the advice given to clients.[29] Finally, an investment adviser must disclose compensation received from the issuer of a security being recommended.[30]

---

generally to the public as an investment adviser nor acts as an investment adviser to any investment company registered under the [Investment Company Act] * * *

[18] The antifraud provisions of some State statutes may apply to any person receiving consideration from another person for rendering investment advice even if the person rendering the investment advice is technically excluded from the State definition of investment adviser.

[19] In addition, section 206(3) of the Advisers Act generally makes it unlawful for an investment adviser acting as principal for his own account knowingly to sell any security to or purchase any security from a client, or, acting as broker for a person other than such client, knowingly to effect any sale or purchase of any security for the account of such client, without disclosing to such client in writing before the completion of such transaction the capacity in which he is acting and obtaining the consent of the client to such transaction. The responsibilities of an investment adviser dealing with a client as principal or as agent for another person are discussed in Advisers Act Rel. Nos. 40 and 470 (February 5, 1945 and August 20, 1975 respectively).

[26] Elmer D. Robinson, supra note 15.

[27] *Kidder, Peabody & Co., Inc.*, 43 S.E.C. 911, 916 (1968).

[28] *SEC* v. *Capital Gains Research Bureau, supra* note 19, at 197.

[29] *In the Matter of Dow Theory Letters et al.*, Advisers Act Rel. No. 571 (Feb. 22, 1977).

[30] *In the Matter of Investment Controlled Research et al.*, Advisers Act Release No. 701 (Sept. 17, 1979).

Unlike other general antifraud provisions in the Federal securities laws which apply to conduct "in the offer or sale of any securities" [31] or "in connection with the purchase or sale of any security," [32] the pertinent provisions of Section 206 do not refer to dealings in securities but are stated in terms of the effect or potential effect of prohibited conduct on the client. Specifically, section 206(1) prohibits "any device, scheme, or artifice to defraud any client or prospective client," and section 206(2) prohibits "any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client." In this regard, the Commission has applied sections 206(1) and (2) in circumstances in which the fraudulent conduct arose out of the investment advisory relationship between an investment adviser and its clients, even though the conduct does not involve a securities transaction. For example, in an administrative proceeding brought by the Commission against an investment adviser, the respondent consented to a finding by the Commission that the respondent had violated sections 206(1) and (2) by persuading its clients to guarantee its bank loans and ultimately to post their securities as collateral for its loans without disclosing the adviser's deteriorating financial condition, negative net worth, and other outstanding loans.[33] Moreover, the staff has taken the position that an investment adviser who sells non-securities investments to clients must, under sections 206(1) and (2), disclose to clients and prospective clients all its interests in the sale to them of such non-securities investments.[34]

V. Need for Interpretive Advice

The general interpretive guidance provided in this release should facilitate greater compliance with the Advisers Act and the investment adviser laws of the states. The staff of the Commission will respond to routine requests for no-action or interpretive advice relating to the status of persons engaged in the types of businesses described in this release by referring persons making the requests to the release, unless the requests present novel factual or interpretive issues such as material departures from the nature and type of services and compensation arrangements discussed above. Requests for no-action or interpretive advice from the staff of the Commission should be submitted in accordance with the procedures set forth in Investment Advisers Act Release No. 281 (Jan. 25, 1971). As to requests for no-action or interpretive advice from the states, persons should contact the various state securities departments to inquire as to their procedures.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 601

Statement of Procedural Rules

AGENCY: Internal Revenue Service, Treasury.

VOL
52
ISS
200
OC
16
1987
UMI

ACTION: Amendment of the statement of procedural rules.

SUMMARY: This document contains amendments to certain sections of the Statement of Procedural Rules (SPR) that relate to written protest procedures to obtain Appeals consideration of the findings of field examinations. The SPR sets forth the procedural rules of the Internal Revenue Service.

EFFECTIVE DATE: October 16, 1987.

FOR FURTHER INFORMATION CONTACT: George Bradley of the Legislation and Regulations Division, Office of Chief Counsel, 1111 Constitution Avenue, NW., Washington, DC 20224, Attn: CC:LR:T. Telephone 202–343–0231 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the SPR (26 CFR Part 601), issued under the authority contained in 5 U.S.C. sections 301 and 552. These amendments simplify the protest procedures through which taxpayers may obtain Appeals review of field examinations. Under existing procedures, a written protest is required in field examination cases if the amount at issue exceeds $2,500. As a result of these amendments, a written protest will be required for field examinations if the total amount at issue for any taxable period exceeds $10,000. In lieu of a written protest, a brief written statement of disputed issues will be required for field examination if the total amount at issue for any taxable period exceeds $2,500 but does not exceed $10,000. No brief written statement of disputed issues or written protest is required to obtain an Appeals office conference in office interview and correspondence examination.

These special amendments do not address any other provisions under § 601.105 or § 601.106, either directly or by implication. General amendments to the Statement of Procedural Rules will be the subject of separate documents.

Special Analyses

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for procedural rules. Accordingly, the amendments to the Statement of Procedural Rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these amendments to the Statement of Procedural Rules is George Bradley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service. However, other personnel of the Internal Revenue Service participated in developing the amendments in matters of both substance and style.

List of Subjects in 26 CFR Part 601

Adoption of Amendments to Statement of Procedural Rules

Accordingly, 26 CFR Part 601 is amended as follows:

PART 601—[AMENDED]

Paragraph 1. The authority for Part 601 continues to read as follows:

Authority: 5 U.S.C. 301 and 552.

Par. 2 Section 601.105 is amended as follows:

1. Paragraph (c)(2)(iii) is revised.
2. A new paragraph (c)(2)(iv) is added.
3. Paragraph (d)(2) is revised.
4. The revised and added provisions read as follows:

§ 601.105 Examination of returns and claims for refund, credit or abatement; determination of correct tax liability.

* * * * *

(c) *District procedure*-(1) *Office examination.*

* * * * *

(2) *Field examination.* * * *

(iii) If for any taxable period the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $2,500 but does not exceed $10,000, the taxpayer, on request, will be granted an Appeals office conference, provided a brief written statement of disputed issues is submitted.

(iv) If for any taxable period the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $10,000, the taxpayer, on request, will be granted an Appeals office conference, provided a written protest is filed.

(d) *Thirty-day letters and protests*—(1) *General.* * * *

(2) *Protests.* (i) No written protest or brief written statement of disputed issues is required to obtain an Appeals office conference in office interview and correspondence examination cases.

(ii) No written protest or brief written statement of disputed issues is required to obtain an Appeals office conference in a field examination case if the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) is $2,500 or less for any taxable period.

(iii) A written protest is required to obtain Appeals consideration in a field examination case if the total amount of proposed tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $10,000 for any taxable period.

(iv) A written protest is optional (although a brief written statement of disputed issues is required) to obtain Appeals consideration in a field examination case if for any taxable period the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $2,500 but does not exceed $10,000.

(v) Instructions for preparation of written protests are sent to the taxpayer with the transmittal (30-day) letter.

* * * * *

Par. 3. Section 601.106 is amended as follows:

1. In paragraph (a)(1)(i), third sentence, the language "subdivisions (ii) through (iv)" is revised to read "subdivisions (ii) through (v)".
2. The concluding material in paragraph (a)(1)(ii), immediately following subparagraph (*c*), is revised.
3. Paragraphs (a)(1) (iii) and (iv) are redesignated (a)(1) (iv) and (v), respectively.
4. A new paragraph (a)(1)(iii) is added.
5. The revised and added material read as follows:

§ 601.106 Appeals function.

(a) *General.* (1) * * *

(ii) * * *

(*c*) * * *

in any case originating in the office of any district director situated in the

region, or in any case in which jurisdiction has been transferred to the region.

(iii) The taxpayer must request Appeals consideration.

(*a*) An oral request is sufficient to obtain Appeals consideration in (*1*) all office interview or correspondence examination cases or (*2*) a field examination case if the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) is $2,500 or less for any taxable period. No written protest or brief statement of disputed issues is required.

(*b*) A brief written statement of disputed issues is required (a written protest is optional) to obtain Appeals consideration in a field examination case if the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $2,500 but does not exceed $10,000 for any taxable period.

(*c*) A written protest is required to obtain Appeals consideration in a field examination case if the total amount of proposed additional tax including penalties, proposed overassessment, or claimed refund (or, in an offer in compromise, the total amount of assessed tax, penalty, and interest sought to be compromised) exceeds $10,000 for any taxable period.

(*d*) A written protest is required to obtain Appeals consideration in all employee plan and exempt organization cases.

(*e*) A written protest is required to obtain Appeals consideration in all partnership and S corporation cases.

* * * * *

BILLING CODE 3810-01-M

POSTAL SERVICE

39 CFR Part 111

Implementation of Interim Changes in the Domestic Mail Manual Regarding Merchandise Return Service

AGENCY: Postal Service.

ACTION: Interim regulations and request for comments.

SUMMARY: Effective 12:01 a.m. October 25, 1987, the Postal Service will implement interim changes in the Domestic Mail Manual allowing registered mail service and merchandise return service to be used in conjunction with each other and allowing special handling and merchandise return service to be used in conjunction with each other. Implementing regulations have been developed and are set forth below.

DATES:

Effective date: October 25, 1987.

Comment date: Comments must be received on or before November 25, 1987.

ADDRESSES: Written comments should be directed to the Director, Office of Classification and Rates Administration, Rates and Classification Department, U.S. Postal Service, Room 8430, 475 L'Enfant Plaza SW., Washington, DC 20260-5350. Copies of all written comments received will be available for public inspection and photocopying between 9:00 a.m. and 4:00 p.m. Monday through Friday, in the Office of Classification and Rates Administration, Room 8430, at the above address.

FOR FURTHER INFORMATION CONTACT: Lynn M. Martin, (202) 268-5176.

SUPPLEMENTARY INFORMATION: The permanent Domestic Mail Classification Schedule (DMCS) does not provide for registered mail service and mechandise return service to be used in conjunction with each other or for special handling and merchandise return service to be used in conjunction with each other. On May 7, 1987, the United States Postal Service filed with the Postal Rate Commission a Request for a Recommended Decision on amending sections 14.060, 18.060, and 20.040 of the DMCS to authorize the use of registered mail service and merchandise return service in conjunction with each other and to authorize special handling and merchandise return service to be used in conjunction with each other. More than ninety days having elapsed since the Postal Service filed its request and the Rate Commission not having transmitted its recommended decision to the Governors, on October 6, 1987, the Board of Governors of the Postal Service adopted Resolution No. 87-8 implementing these changes on a temporary basis. 52 FR_____. This temporary classification change will make registered mail service available for use with articles returned First-Class or Priority Mail to permit holders under merchandise return service. Special handling will also be added as an option for use with merchandise return service for third- and fourth-class pieces. To implement these temporary classification changes, interim regulation changes have been developed. These regulations are needed as the use of registered mail service and merchandise return service in conjunction with each other, and the use of special handling and merchandise return service in conjunction with each other become available on October 25, 1987.

BEST COPY AVAILABLE

A general description of the interim regulations concerning registered mail service and special handling service is as follows:

As to Registered Mail Service

(1) Applications for new merchandise return service permits that indicate registered mail service will be used must be submitted to the post office where the mail will be returned. However, Postal Service headquarters must approve the applications.

(2) Current merchandise return service permit holders that wish to use registered mail service must submit a letter of request and sample label(s) to the post office where the permit is held. Such requests will also require approval by Postal Service headquarters.

(3) A separate merchandise return label format must be used that does not contain any other special service format elements, endorsements or markings. It is recommended that space be allowed to the right of the return address on the merchandise return label for placement of Label 200–A or B, *Registered Mail.*

(4) Merchandise return articles must be brought to the post office to be registered.

(5) The customer returning the article (not the permit holder) must declare the full value of the article at the time of mailing.

(6) Claims or inquiries for registered articles may be filed only by the permit holder and only at the post office where the permit is held.

As to Special Handling Service

(1) Current permit holders desiring to use special handling should submit sample labels to the post office where the permit is held in accordance with 919.22 of the Domestic Mail Manual (DMM). No special application procedures for new permits are required.

(2) The permit holder meets the format and other requirements in 919.421d(2) and 919.453 of the DMM.

(3) The customer must bring the article to a post office.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service ordinarily invites comments from the public before it puts into effect new or amended regulations which might have a substantial effect on the public. In this case, the applicable statute (39 U.S.C. 3641(a)) expressly permits implementation of the underlying mail classification change on 10 days notice in the **Federal Register.** Moreover, any further delay in introducing these services would unnecessarily disadvantage those who may wish to use them. Accordingly, the Postal Service finds it not in the public interest to follow its customary practice of publishing these rules as proposed rules for comment before they become effective. However, comments are requested on these interim rules, and any proposed changes to the regulations will be considered and acted upon, as appropriate, once the Rate Commission and the Governors of the Postal Service have completed their consideration of the permanent changes, so that final implementing rules (to replace the interim rules) can be considered.

In view of the considerations discussed above, the Postal Service hereby adopts on an interim basis the following revisions of the Domestic Mail Manual which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority for Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, 5001.

PART 137—OFFICIAL MAIL

2. Section 137.276h is amended as follows:

137.2 Penalty Mail—Executive and Judicial Officers.

* * * * *

.27 Penalty mail indicia formats.

* * * * *

.276 Penalty reply mail.

* * * * *

h. Penalty merchandise return.

* * * * *

(1) *Description.* Merchandise return service allows a merchandise return permit holder to authorize individuals and organizations to send single piece First-Class (including Priority Mail), single piece third-class, and single piece fourth-class (parcel post, special fourth-class, and bound printed matter) to the permit holder. The permit holder pays the return postage and fees (see 919).

* * * * *

(3) *Label Format.* The one-part merchandise return labels available for use by Federal Government agencies must bear the address of one of the authorized agencies listed in 137.252 or one of their components. See Exhibit 137.276h(3)(a) for the format required when no special services are requested or when insurance and/or special handling are requested and Exhibit 137.276h(3)(b) when registered service *without* postal insurance is requested. The label must be printed in the format required by 919.4 with the following exceptions:

* * * * *

(4) *Special services—insurance.*

* * * * *

(c) The format in Exhibit 137.276h(3)(a) must be used for the merchandise return label. To request insurance, the following endorsement must be preprinted to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement.

Insurance Desired by Permit Holder for

$ _____
(value)

The value portion of the endorsement may be handwritten by the permit holder. The permit holder must indicate the specific dollar amount of insurance applicable to the article in the value portion of the endorsement.

[Renumber 137.276h(5) through (7) as 137.276h(8), (9), and (10) and insert the following.]

(5) *Special services—registered mail.* (a) Only the permit holder (government agency) may request that the mail piece receive registered mail service by preprinting the endorsement required in 137.276h(5)(c). Registered mail service may be obtained only on articles returned at First-Class or Priority Mail rates.

(b) Only registered mail service without postal insurance is available under penalty mail merchandise return procedures. (Agencies desiring to register merchandise return articles with postal insurance must follow the procedures in 919.)

BILLING CODE 7710-12-M

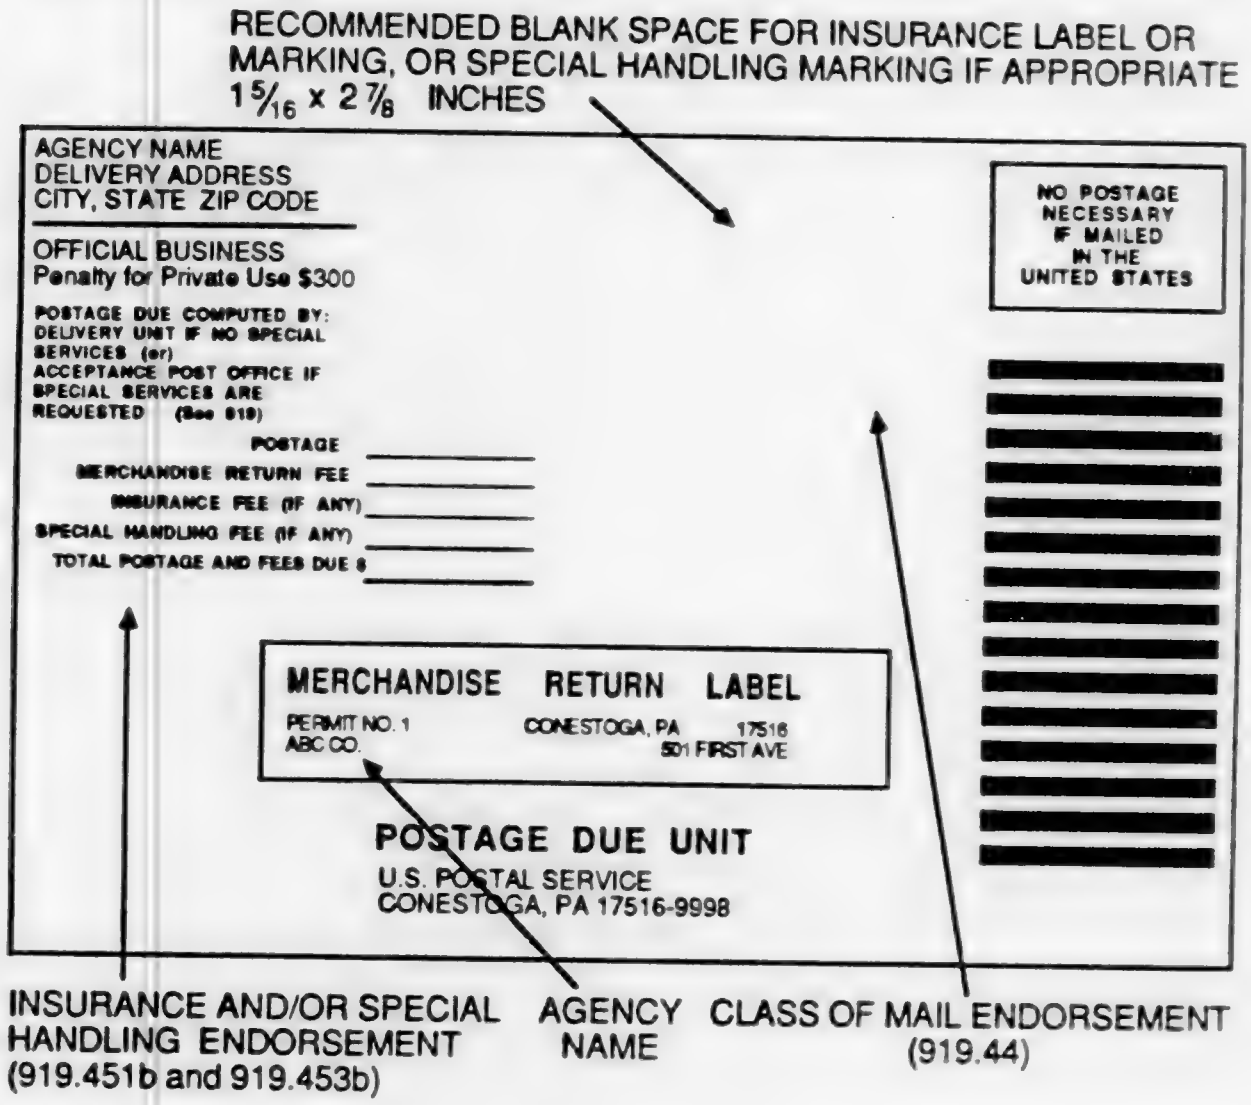

Exhibit 137.276h(3)(a)
Merchandise Return Label With No Special Services or With Insurance and/or Special Handling

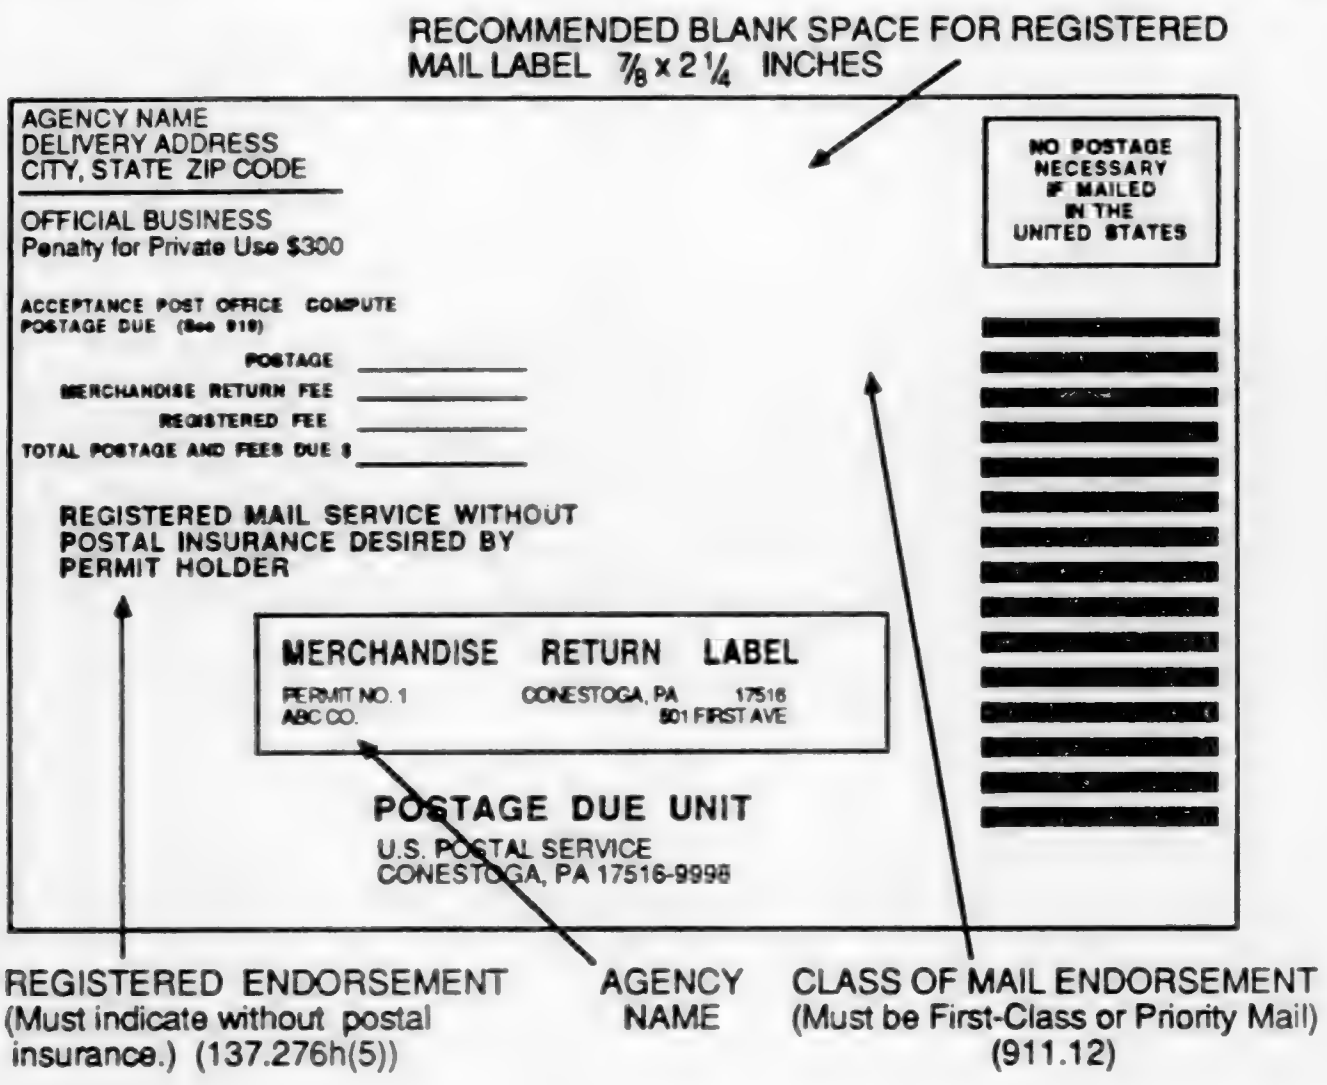

Exhibit 137.276h(3)(b)

Merchandise Return Label For Registered Mail Service Without Postal Insurance

BILLING CODE 7710-12-C

(c) When registered mail service is requested for single piece First-Class (including Priority) Mail, no other special service may be obtained. The format in Exhibit 137.276h(3)(b) must be used for the merchandise return label. The following endorsement must be preprinted to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement.

Registered Mail Service Without Postal Insurance Desired by Permit Holder

(6) *Special services—special handling.* Only the permit holder may request that the mailpiece receive special handling. The format in Exhibit 137.276h(3)(a) must be used for the merchandise return label. Third- or fourth-class items requiring special handling must have the following endorsement preprinted (see 919.41) or rubberstamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" Statement.

Special Handling Desired by Permit Holder

(7) *Combining special services.* Third- and fourth-class parcels may be insured and receive special handling if the mailer so desires and preprints or rubberstamps the appropriate endorsements and markings for both special services as required in 137.276h(4), 137.276h(6).

* * * * *

3. Section 149.41 is amended as follows:

PART 149—INDEMNITY CLAIMS

149.4 Registered mail claims.

.41 Claim filing instructions.

.411 Required forms. Except for articles registered in conjunction with merchandise return service, a customer may file a claim at any post office, classified station, or branch. Claims for articles registered in conjunction with merchandise return service may only be filed by the merchandise return permit holder and the claims must be filed only at the post office where the merchandise return permit is held. Form 565, *Registered Mail Application for Indemnity/Inquiry* (May 1982 or later), must be used to file a claim for loss or damage of registered mail insured by the Postal Service. Do not complete a separate Form 1510–B or 3841–A for registered claims. A claim has not been filed until a completed Form 565 has been received by the Postal Service.

.412 Evidence of loss or damage.

a. *Claims for Complete Loss Filed by the Mailer.* [Delete Last sentence and add the following to the end of this section.] Except for articles mailed with merchandise return service, proof may be supplied by any of methods (1) through (4) below. For matter registered in conjuction with merchandise return service, proof must be supplied by the method in (5) below.

* * * * *

(5) The merchandise return service permit holder must request that the customer complete items 2 through 9 of Form 565, and return it, along with the original mailing receipt, to the permit holder. The permit holder must complete items 10 and 11 and submit the completed form, along with the original mailing receipt, to the post office where the permit is held. The date in item 11 must show that 15 days or more have elapsed since the date of mailing.

* * * * *

4. Section 911 is amended as follows:

PART 911—REGISTERED MAIL

911.1 Description.

* * * * *

.12 What May Be Registered. [Add the following to the end of this section.] *Exception:* Official mail prepared in accordance with 137 and items returned under merchandise return service in 919 may be registered without prepayment of postage and fees. However, mail of a government department or agency for which insurance is requested cannot be sent as penalty mail and must have postage and fees prepaid.

* * * * *

911.2 Fees and Liability.

.21 Fees. (See Exhibit 911.21.)

.22 Payment of Fees and Postage. The fee and postage may be paid by ordinary postage stamps, meter stamps, or by permit imprints. The fee and postage on official mail of Federal Government agencies and departments may also be collected under the reimbursement procedures in 137.22. The fees and postage on items registered with merchandise return service are paid through a postage due account as set forth in 919.332.

* * * * *

.25 Declaration by sender.

* * * * *

.255 Merchandise return. The customer (not the permit holder) must declare the full value of articles presented for registered merchandise return service in accordance with section 911.251.

* * * * *

.26 Mail registered without prepayment.

* * * * *

.262 Merchandise return. Matter registered in conjunction with merchandise return service, if prepared in accordance with the requirements set forth in 919, may be sent by registered mail without prepayment of postage and fees.

[Renumber former 911.262 as 911.263]

.264 Indemnity. Except for matter registered in conjunction with merchandise return service, no indemnity will be paid for any matter registered without prepayment of postage and fees. If a Government department or agency desires indemnity coverage, both the postage and appropriate registry fee from column A, Exhibit 911.21, must be paid in full by stamps or meter stamps.

* * * * *

911.5 Inquiries on uninsured articles.

.51 Who may file. [Add the following to the end of this section.] *Exception:* For matter registered without postal insurance in conjunction with merchandise return service, only the permit holder may file an inquiry.

.52 How to file.

.521 Original inquiry. The mailer may not file any inquiry until 15 days after the date of mailing. An inquiry may be filed at any post office, classified station, or branch, except for inquiries concerning matter registered in conjunction with merchandise return service (see 919) which must be filed by the permit holder at the post office where the permit is held. Form 565, *Registered Mail Application for Indemnity/Inquiry* (May 1982 edition or later), must be used in processing an inquiry for uninsured registered mail. An inquiry may be filed in the following manner:

* * * * *

.521b This proof may be supplied by method (1), (2), or (3), below. *Exception:* See 911.521c for registered merchandise return service articles.

* * * * *

.521c A merchandise return permit holder must ask the customer to complete items 2 through 9 of Form 565, and return it, along with the original mailing receipt, to the permit holder. The permit holder must complete items 10 and 11 and submit the completed form, along with the original mailing receipt, to the post office where the permit is held. An inquiry may be filed no sooner than 15 days after the date of mailing.

5. Section 919 is amended as follows:

PART 919—MERCHANDISE RETURN

919.1 Description.

.11 General. Merchandise return service allows authorized permit holders to pay the postage and fees on single piece First-Class (including Priority Mail), single piece third-class, and single piece fourth-class (parcel post, special fourth-class, library rate, or bound printed matter) mail to be returned by their customers.

* * * * *

.13 Merchandise Return Label. The label used for this service must contain the delivery address of the postage due unit at the post office where the permit is held, the address of the permit holder, a space for the return address of the customer, and otherwise meet the format requirements in 919.4. *Note:* Mailers must preprint the class of mail on the label if they wish articles to be returned at other than single piece third-class or fourth-class parcel post rates. The mailer must also preprint endorsements indicating that registered mail service (for First-Class, including Priority Mail, pieces only), special handling (for third- or fourth-class pieces only), or insurance is to be provided for the return of the pieces. (See 919.451, 919.452, and 919.453.)

* * * * *

.16 Acceptance.

a. *Labels That Do Not Request Special Services.* Customers may mail articles using merchandise return labels that do not request any special services in any mail deposit receptacle, or at any other place designated by the postmaster for receipt of mail, within the delivery area of the post office shown in the return address of the label. If mailed at a post office outside the delivery area of the post office shown in the return address however, the articles must be brought to the window of a post office.

b. *Labels That Request Special Services.* Customers must bring articles bearing merchandise return labels that request special services (registered mail, insurance, or special handling) to a post office window. These articles may be mailed at any post office because they will be processed by an acceptance clerk.

* * * * *

919.2 Permits.

* * * * *

.22 Application. A Form 3625, *Merchandise Return Permit Application* (See Exhibit 919.2), must be submitted to each post office where the mail will be returned. Each application must be accompanied by copies of the merchandise return labels and copies of the instructions that will be furnished to the permit holder's customers. The applicant must write "Registered Mail" in the "Sub-Class" section of the application form(s) if articles will be returned from customers as registered mail. Once a permit is obtained, any changes to label formats, or any changes to the instructions permit holders provide to their customers, must be approved by the post office where the permit is held. A permit holder who desires to add the use of registered mail service under an existing permit must submit a letter of request to the post office where the permit is held, along with samples of the merchandise return labels, and a copy of the instructions to be provided to the permit holder's customers. The permit holder must not distribute labels that request registered mail service until written approval is received as outlined in 919.23.

.23 Processing Applications. Upon receipt of the application and the annual permit fee, the postmaster will complete the indicated section and forward it to the MSC Manager for approval unless registered mail service is requested. If registered mail service is requested, the postmaster must forward the Form 3625, or the letter requesting addition of registered mail service to an existing permit, along with the sample labels and instructions to customers, to the General Manager, Customer and Field Support Division, Office of Classification and Rates Administration, U.S.P.S. Headquarters, Washington, DC 20260–5361. Upon approval by the MSC Manager or the General Manager, Customer and Field Support Division, the application will be returned to the postmaster. The postmaster will issue the permit or issue a letter granting usage of registered mail service under an existing permit.

* * * * *

919.3 Postage and fees.

* * * * *

.33 Postage payment.

.331 Applicable rates and fees. The applicable single piece rate postage for First-Class (including Priority Mail), third-class, or fourth-class (parcel post, special fourth-class, library rate, or bound printed matter) will be charged the permit holder for each piece returned under merchandise return service. In addition, the applicable fees for registry service, special handling, or insurance will be charged the permit holder where return with such a service was indicated on the label by the permit holder. The customer may pay, at the time of mailing, the fee for a certificate of mailing, if such service is desired.

.332 Advance deposit account. Permit holders must pay postage and fees through a postage-due advance deposit account. Only when sufficient funds are in an advance deposit account to pay applicable postage and fees will articles be delivered under this service. Permit holders may use the same advance deposit for this service as they use for other postage due mail. (See 146.33.)

919.4 Format.

* * * * *

.42 Required format elements.

.421 Preprinted endorsements.

* * * * *

d. *Postage Due Computation Markings.*

(1) *With Registered Service.* When registered service is requested for single piece First-Class (including Priority) Mail, no other special service may be obtained. No special service information other than the options shown in this section may appear on merchandise return labels used to obtain registered service. The following information must be shown in capital letters above the merchandise return legend. (See Exhibit 919.4a.)

Acceptance Post Office Compute Postage Due

(See 919)

Postage $ _____
Merchandise Return Fee _____
Registered Mail Fee _____
Total Postage and Fees Due $ _____

Note: The endorsement required in 919.452 that indicates whether or not postal insurance is desired must appear below the "Total Postage and Fees Due" statement. Additionally, the First-Class or Priority Mail endorsement must appear on merchandise return labels that will be used to receive registered mail service (see 919.442).

(2) *With No Special Services or Services other than Registry.* The following information must be shown in capital letters above the merchandise return legend:

Postage Due Computed by: Delivery Unit if no Special Special Services or Acceptance Post Office if Special Services Requested (See 919).

Postage	
Merchandise Return Fee	$
*Insurance Fee, if any	$
*Special Handling Fee, if any	$
Total Postage and Fees Due	$

*The Insurance Fee and Special Handling Fee statements may be omitted if the permit holder does not choose to insure or obtain special handling for returned items. See 919.451 and 919.452 for additional markings and requirements for use of insurance and special handling.

* * * * *

.44 *Class of mail endorsements.*

* * * * *

.442 Articles will be returned as First-Class Mail or Priority Mail if the permit holder endorses the label to show either "First-Class" or "Priority Mail" as appropriate. The endorsements must be in letters at least ¼ inch high and must be printed or rubberstamped in the open space to the right and above the "Merchandise Return Label" legend. (See Exhibits 919.4 a and b.)

Note.—First-Class Mail (including Priority Mail) cannot be insured unless the contents contain third- or fourth-class matter and are so labeled as required in 913.12b. Registered Mail must be paid at First-Class or Priority Mail rates and the merchandise return label must be so endorsed. See 919.421d(1) and 911.12.

.443 Articles qualifying for the single piece special fourth-class rate, library rate, or bound printed matter rate will be returned at those rates, provided the appropriate identifying endorsement prescribed in 764.11, 725.1, or 767.1 is preprinted or rubberstamped in letters at least ¼ inch high to the right and above the "Merchandise Return Label" legend. (See Exhibit 919.4b.)

[Delete former 919.45 and add new 919.45 and 919.46]

.45 *Special services.*

.451 *Insured mail service.*

a. *Eligibility.* Only the permit holder may obtain insured mail service in conjunction with merchandise return service. The customer using a merchandise return label to return an article that does not have the appropriate postage due computation markings in 919.421d(2) or the endorsement required in 919.451b may not elect to obtain insured mail service. Only matter returned at the third- or fourth-class rates, or third- or fourth-class matter mailed at First-Class or Priority Mail rates may be insured. If the matter is to be returned at First-Class (including Priority Mail) rates of postage, the endorsement required by 913.12b must appear below the class of mail endorsement on the merchandise return label.

b. *Required Endorsement.* To request insured mail service, the permit holder must place the following endorsement and information on the merchandise return label:

Insurance Desired by Permit Holder for
$_____ (value)

Except for the dollar amount of insurance requested (value), the endorsement must be preprinted (see 919.41) or rubberstamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement. The value portion of the endorsement may be handwritten by the permit holder. The permit holder must indicate the specific dollar amount of insurance applicable to the article in the value portion of the endorsement.

c. *Special Service Marking.* The permit holder must either:

(1) leave a clear space on the merchandise return label to the right of the return address for the placement of the numbered insured label or the insured elliptical stamp (in the manner prescribed in 121.44 and Exhibit 121.4), or

(2) instruct the customer to affix the merchandise return label to the article in a manner that will allow the acceptance clerk to place the insured label or marking on the article directly above the merchandise return label.

.452 Registered mail service.

a. *Eligibility.* Registered mail service may be obtained only on articles returned at First-Class or Priority Mail rates. Only the permit holder may obtain registered mail service in conjunction with merchandise return service by furnishing the customer a label having the appropriate postage due computation markings in 919.421d, and the appropriate endorsement in 919.542b. The customer using the merchandise return label to return an article may not elect to obtain registered mail service. However, when the customer has been provided a merchandise return label that properly indicates registered mail service is desired by the permit holder, the customer will be required to declare the full value of the article to be registered when it is presented at the post office.

b. *Required Endorsement.* To request registered mail service, the permit holder must place one and only one of the following endorsements on the merchandise return label:

Registered Mail Service Without Postal Insurance Desired by Permit Holder

OR

Registered Mail Service With Postal Insurance Desired by Permit Holder

The endorsement must be preprinted (see 919.41) or rubberstamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement. The First-Class or Priority Mail endorsement must also be preprinted or handstamped on merchandise return labels requesting registered mail service (see 919.442). *Note:* The customer entering the article at a post office must declare the full value of the article on Form 3806, *Receipt for Registered Mail*, or on Form 3877, *Firm Mailing Book for Registered, Insured, COD, Certified and Express Mail.*"

c. *Special Service Marking.* The mailer must either:

(1) leave a clear space on the merchandise return label to the right of the return address for the placement of Label 200–A or B, *Registered Mail*, (in the manner prescribed in 121.44 and Exhibit 121.4), or

(2) instruct the customer to affix the merchandise return label to the article in a manner that will allow the acceptance clerk to place the registered mail label on the article directly above the merchandise return label.

.453 Special handling.

a. *Eligibility.* Special handling service can be obtained only for articles returned at third- or fourth-class rates. Only the permit holder may obtain special handling on pieces returned with a merchandise return label by furnishing the customer a label having the appropriate endorsement in 919.453b. The customer using the merchandise return label to return an article may not elect to obtain special handling.

b. *Required Endorsement.* To request this service, the permit holder must place the following endorsement and information on the merchandise return label to be attached or affixed to the article:

Special Handling Desired By Permit Holder

This endorsement must be preprinted (see 919.41) or handstamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement.

c. *Special Service Marking.* The mailer must either: (1) leave a clear space on the merchandise return label to the right of the return address for the placement of the "Special Handling" marking required by 916.3, or

(2) instruct the customer to affix the merchandise return label to the article in a manner that will allow the acceptance clerk to place the "Special Handling" marking on the article directly above the merchandise return label.

.454 Combining special services. Third— and fourth-class articles may be insured and receive special handling if the mailer so desires and preprints or rubberstamps the appropriate endorsements and markings for both

special services as required in 919.421d(2), 919.451, and 919.453. Merchandise return pieces that receive registered service cannot receive any other special service.

.46 Illustrations of merchandise return labels. Permit holder's requirements and resources for making labels may vary. Exhibit 919.4a is a suggested example that would meet all address and endorsement requirements for articles to be returned with registered mail service. Exhibit 919.4b is a suggested example that would meet all address and endorsement requirements for articles to be returned with no special services or with insurance, special handling, or both.

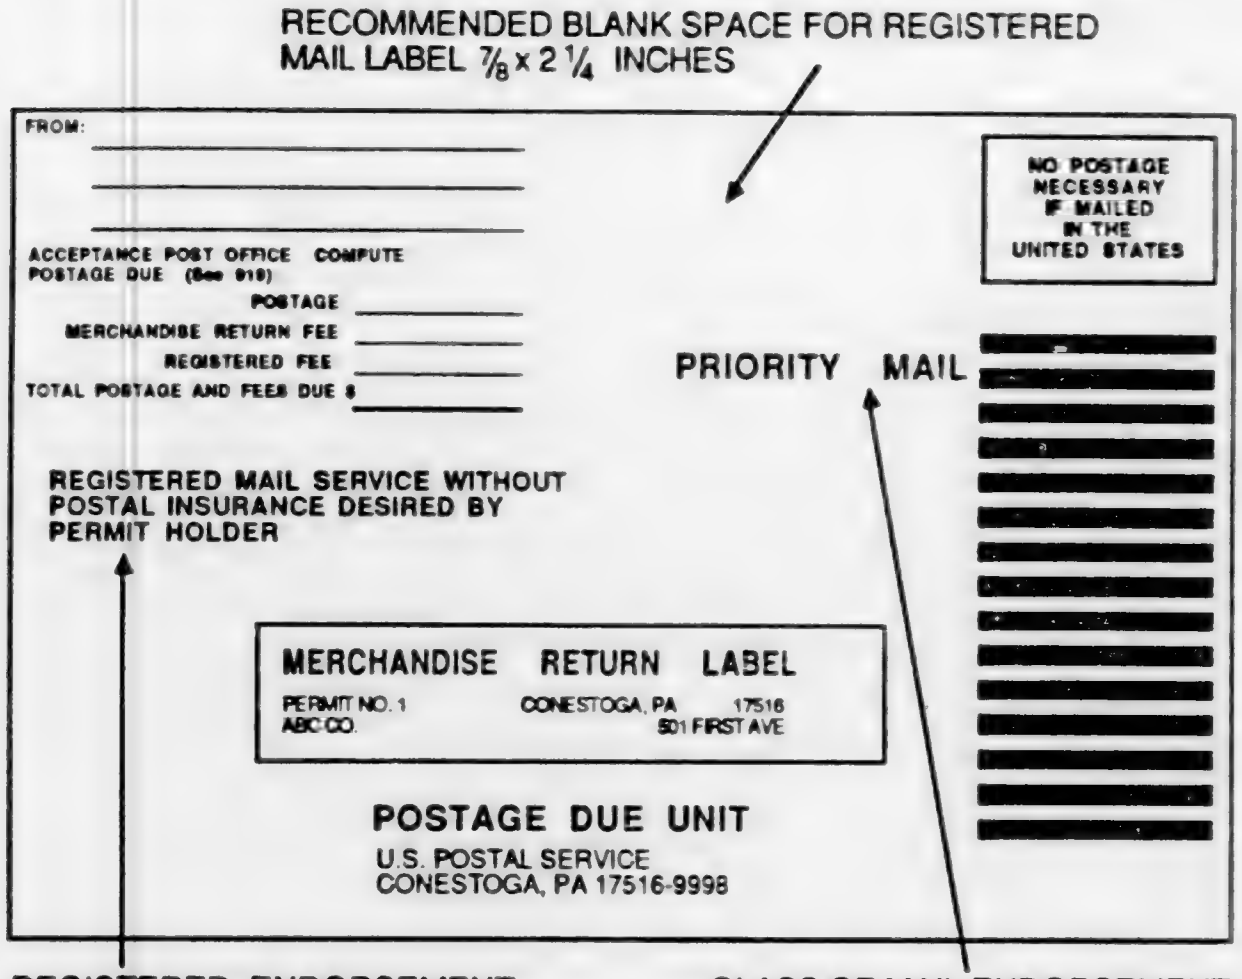

Exhibit 919.4a

Merchandise Return Label With Registered Mail Service

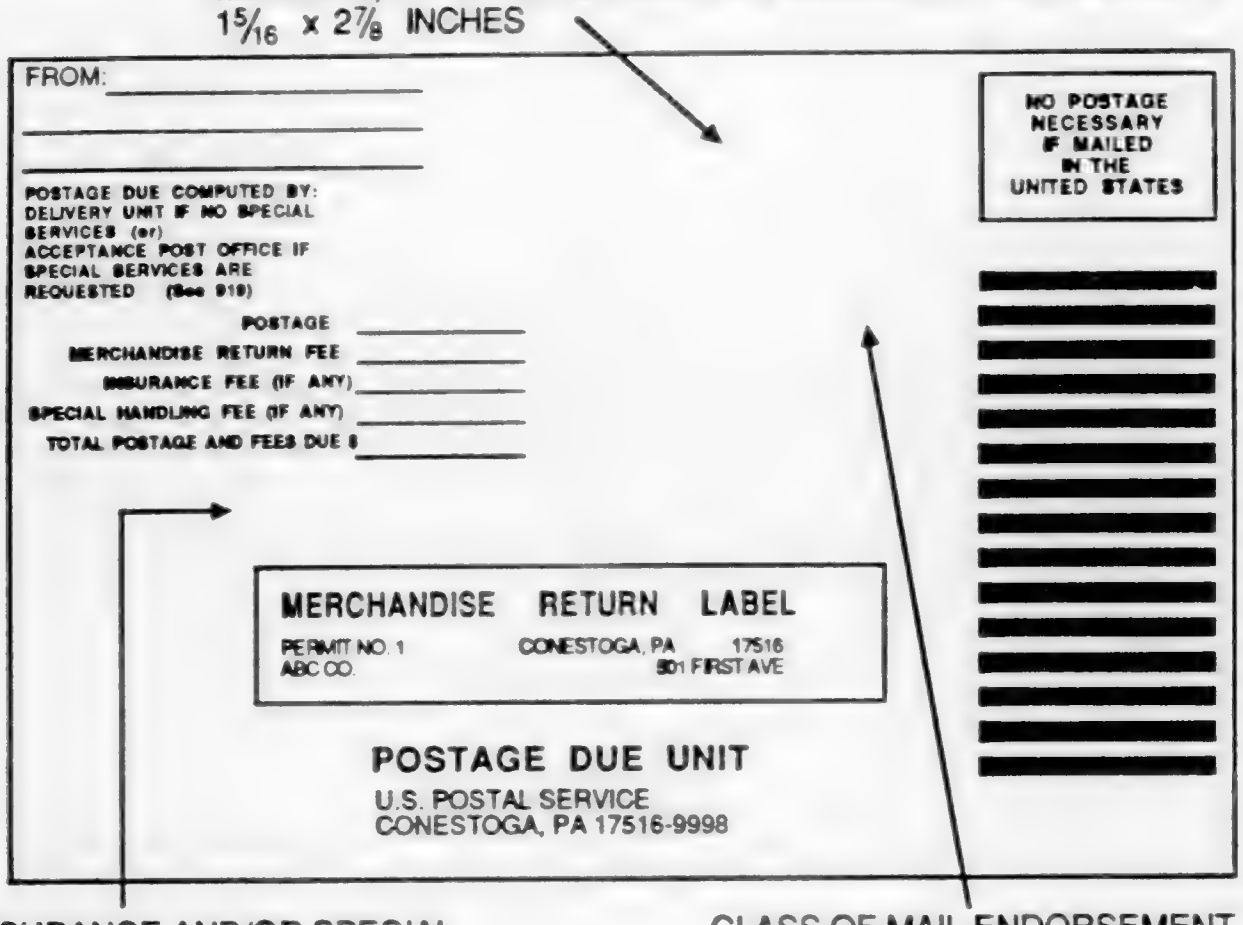

Exhibit 919.4b

Merchandise Return Label With No Special Services or With Insurance and/or Special Handling

BILLING CODE 7710-12-C

[Delete former 919.5 and 919.6 and insert the following]

919.5 Certificate of mailing.

.51 Customers mailing a merchandise return service article may obtain a certificate of mailing (see 931) at their own expense at the time of mailing.

.52 When customers desire a certificate of mailing, they must present the merchandise return article at a post office to obtain the receipt.

919.6 Acceptance.

.61 No special services. If no special services are requested, the customer may place merchandise return articles in any mail-deposit receptacle or any other place designated by the postmaster for receipt of mail within the delivery area of the post office shown in the return address of the merchandise return label. If mailed at a post office other than the one shown in the return address of the label, the merchandise return article must be brought to the window of a post office for mailing. When merchandise return articles requesting no special services are brought to a post office for mailing, the accepting clerk should not compute the amount of postage due. The accepting clerk should, however, postmark the label above the "Merchandise Return Label" legend so that the postage due unit where the permit is held can properly assess postage from the point of mailing.

.62 Insurance. When a merchandise return article is presented at a post office for return to the permit holder, and the return label is endorsed with the "Insurance Desired by Permit Holder for $_____" endorsement, the accepting Postal Service employee will take the following actions:

a. Look at the endorsement to see how much insurance the permit holder desires and enter the appropriate insurance fee for the coverage desired on the mailing label line "Insurance Fee, If Any."

b. Compute the postage based on the class of mail endorsement or weight of the article, as appropriate, and record it and the merchandise return fee on the appropriate lines on the merchandise return label. Total the postage and fees due and enter it on the line "Total Postage and Fees Due." (This information must also be shown on the receipt as indicated below.)

c. If the article is to be insured for $25 or less, stamp the merchandise return label or the item "Insured." Complete and postmark a Form 3813, *Receipt for Domestic Insured Parcel.* Give the receipt to the customer, and instruct the customer to keep the receipt as evidence of mailing until the article is accounted for.

d. If the article is to be insured for more than $25, complete and postmark Form 3813–P, *Receipt for Insured Mail, Domestic/International.* Affix the insured label with the insurance number on it to the merchandise return label or to the article. Give the receipt portion of the Form 3813–P to the customer, and instruct the customer to keep the receipt as evidence of mailing until the article is accounted for.

e. Postmark the merchandise return label in the space directly above the merchandise return legend.

.63 Registered mail. When a merchandise return article is presented at a post office for return to the permit holder, and the return label is endorsed with either the "Registered Mail Service Without Postal Insurance Desired by Permit Holder" or "Registered Mail Service With Postal Insurance Desired by Permit Holder" endorsement, the accepting Postal Service employee will take the following actions:

a. Check to see that the appropriate "First-Class" or "Priority Mail" endorsement appears on the merchandise return label. If it does not, inform the customer that the piece cannot be registered unless the postage and fees are prepaid by the customer (the merchandise return label may not be used).

b. Ask the customer to complete the appropriate portion of the Form 3806, *Receipt for Registered Mail.* The customer must declare the full value of the article on the Form 3806.

c. Look for the registered mail endorsement on the merchandise return label (919.452b) to determine if the permit holder desired registered mail service and, if so, whether insurance was desired. If the customer indicates registered mail service with postal insurance is desired on the Form 3806, the permit holder must have entered the registered mail endorsement requesting postal insurance on the merchandise return label.

d. Enter the appropriate registered mail fee for the declared value and type of coverage desired on the "Registered Mail Fee" line of the merchandise return label.

e. Compute the postage based on the class of mail endorsement or the weight of the article as appropriate, and record it and the merchandise return fee on the appropriate lines on the merchandise return label. Total the postage and fees due on the "Total Postage and Fees Due" line of the merchandise return label.

f. Postmark the merchandise return label in the space directly above the merchandise return legend.

g. Complete and postmark Form 3806, *Receipt for Registered Mail.* Write the words "Merchandise Return Service" in the margin of the Form 3806. Give the receipt to the customer and instruct the customer to keep the receipt as evidence of mailing the registered article.

h. Affix registered mail Label 200–A or B, *Registered Mail,* to the merchandise return label or to the article.

Note.—Articles sent via registered merchandise return service must meet all packaging and sealing requirements for registered mail.

.64 *Special handling.* When a merchandise return article is presented at a post office for return to the permit holder, and the return label is endorsed with the "Special Handling Desired by Permit Holder" endorsement, the accepting Postal Service employee will take the following actions:

a. Check the class of mail endorsement on the merchandise return label. (If it is endorsed "First-Class" or "Priority Mail" advise the customer that the article can not receive special handling service.)

b. Enter the appropriate third- or fourth-class postage based on the endorsement or weight of the article and record it on the merchandise return label. Record the merchandise return fee and special handling fee on the merchandise return label, and enter the total postage and fees due on the "Total Postage and Fees Due" line of the merchandise return label.

c. Place the "Special Handling" marking on the merchandise return label or on the article as appropriate.

d. Postmark the merchandise return label in the space directly above the merchandise return legend

919.7 Delivery.

* * * * *

d. When numbered insured, or registered merchandise return articles are delivered, the delivering postal employee will obtain a delivery receipt for the articles on Form 3849–A, *Delivery Notice or Receipt,* Form 3849–B, *Delivery Reminder Receipt,* or Form 3883, *Firm Delivery Book—Registered, Certified and Numbered and Insured Mail*

Note: Merchandise return articles received without a return address or postmark, that are subject to the parcel post or bound printed matter rates of postage, will be charged the appropriate rate for zone 4 in addition to other required fees.

BILLING CODE 7710-12-M

ENVIROMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region II Docket No. 77; (FRL-3271-6)]

Revision to the Commonwealth of Puerto Rico Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces Environmental Protection Agency approval of the renewal of a visible emissions variance issued by the Commonwealth of Puerto Rico to the Owens-Illinois of Puerto Rico Corporation's Vega Alta glass making facility, ovens "A" and "B." The renewal maintains the allowable visible emissions limit as regulated under Commonwealth Rule 403, "Visible Emission," at 50 percent opacity for each furnace. This action will not result in an increase in particulate emissions.

EFFECTIVE DATE: This action will be effective December 15, 1987, unless notice is received within 30 days that adverse or critical comments will be submitted.

ADDRESSES: All comments should be addressed to: Christopher J. Daggett, Regional Administrator, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of this SIP revision are available at the following addresses for inspecting during normal business hours:

Environmental Protection Agency, Air Programs Branch, Region II Office, Room 1005, 26 Federal Plaza, New York, New York 10278

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460

Environmental Quality Board, 204 Del Parque Street, Santurce, Puerto Rico 00910

FOR FURTHER INFORMATION CONTACT: William Baker, Chief Air Programs Branch Region II Office, Room 1005, 26 Federal Plaza, New York, New York 10278, (212) 264-2517.

SUPPLEMENTARY INFORMATION: On December 31, 1986 the Environmental Protection Agency (EPA) received from Puerto Rico a proposed revision to the Commonwealth's Implementation Plan. The Commonwealth requested EPA approval of its renewal of a visible emissions variance which it issued under the provisions of Rule 301, "Variances Authorized," of its "Regulation for the Control of Atmospheric Pollution." This variance was originally approved by EPA on September 3, 1982 at 47 FR 38887.

The effect of the variance is to maintain an average opacity limit at 50 percent applicable to ovens "A" and "B" of Owens-Illinois' Vega Alta glass plant. This limit is based on visible emission observation taken during stack tests which were conducted to determine compliance with the mass emission standard of Rule 407, "Process Sources." It represents a variance to the present average opacity standard of Rule 403, "Visible Emissions," Section A.1, which provides for 20 percent opacity limitation. Rule 403, Section A.2, requiring that visible emission not exceed 60 percent opacity for a period or periods of more than four minutes in any thirty-minute interval, also remains applicable to these sources.

The Commonwealth's submittals consist of an Owens-Illinois glass plant source emissions test report (including visible emission observations taken throughout the stack test), test evaluation information from the Environmental Quality Board (EQB), copy of one resolution of EQB, a certification that adequate public notice was provided by EQB and that no comment or request for public hearing was received, and a letter requesting renewal of the variance. The Commonwealth approved the variance for a three-year period from the date of EPA's approval.

EQB's analysis of the Owens-Illinois oven tests indicates that for three tests of oven "A" the allowable particulate emission rate was 12.3 lbs/hr, the actual particulate emission rate was between 7.2 and 8.7 lbs/hr, and the average opacity was between 46 and 56 percent. For three tests of oven "B," the allowable particulate emission rate was 12.5 lbs/hr, the actual particulate emission rate was between 9.3 and 10.0 lbs/hr, and the average opacity was between 47 and 52 percent. These data support EQB's conclusion that these sources would continue to meet applicable mass emission standards as long as average opacity does not exceed 50 percent.

This notice is issued as required by section 110 of the Clean Air Act, as amended. The Administrator's decision regarding approval of this proposed plan revision is based on its meeting of the requirements of Section 110 of the Clean Air Act and 40 CFR Part 51.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective December 15, 1987.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 15, 1987. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

BILLING CODE 6712–01–M

DEPARTMENT OF ENERGY

48 CFR Ch. 9

Acquisition Regulation; Miscellaneous Amendments

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: This rule amends the Department of Energy Acquisition Regulation (DEAR) to clarify certain policies and to reflect current procedures. This rule follows a notice of proposed rulemaking, published August 26, 1985, 50 FR 34656, and an amendment therefore, published October 28, 1985, 50 FR 43589. These revisions concern correcting the authority citation for issuance of this regulation, updating documentation, changes in reporting procedures, use of standard forms, expansion of existing guidance on interagency acquisition, prenegotiation objectives and price negotiation memorandum, clarification and guidance regarding the small business subcontracting program and updating solicitation provisions and contract clauses.

EFFECTIVE DATE: This final rule will become effective November 16, 1987.

FOR FURTHER INFORMATION CONTACT:

Richard C. Loeb, Office of Policy (MA–42), Procurement and Assistance Management Directorate, Washington, DC 20585, (202) 586–8190.

Supplementary Information:

I. Background
II. Procedural Requirements
A. Review Under the Executive Order 12291
B. Review Under Regulatory Flexibility Act
C. Paperwork Reduction Act
D. National Environmental Policy Act
E. Public Hearing
III. Public Comments

I. Background

Under section 644 of the Department of Energy Organization Act, Pub. L. 95–91, (42 U.S.C. 7254), the Secretary of the Department is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in the position. Accordingly, the Department of Energy Acquisition Regulation (DEAR) was promulgated with an effective date of April 1, 1984 (49 FR 11922, March 28, 1984), 48 CFR Chapter 9.

The primary purpose of this rule is to revise the DEAR, as necessary, to supplement the Federal Acquisition Regulation (FAR), which is codified at 48 CFR Chapter 1. As a result, the following sections and subsections are affected. Section 901.102 is revised to update and correct the authority citation for issuance of this regulation. Section 902.100, "Definitions," is corrected to read 902.101, in order to conform to the numbering of the corresponding FAR section. Section 902.101 is revised to update the priorities authority under paragraph (e) of the definition of "Procurement Executive" and the definition of "Senior Program Official" to reflect current organizational usage. Subsection 904.601–70, "Procurement and Assistance Data System (PADS)," is revised to update reporting procedures and to require use of a standard form in lieu of a DOE form. Sections 912.300, 912.302 and 912.304 are updated to reflect the regulations, procedures and contract clauses required under the Defense Priorities and Allocations System. A new subsection 913.505–1, "Optional Form (OF) 347, Order for Supplies or Services, and Optional Form (OF) 348, Order for Supplies or Services Schedule—Continuation," is added and 913.505–2, "Agency order forms in lieu of Optional Forms 347 and 348," is removed. Sections 915.612, "Formal source selection," and 915.613, "Alternative source selection procedures," are revised to increase the threshold for use of Source Evaluation Board procedures. Section 915.807, "Prenegotiation objectives," has been added, and 915.808, "Price negotiation memorandum," has been revised to implement the FAR by providing additional items that must be addressed

in the prenegotiation plan and in the price negotiation memorandum. Revisions have been made to section 917.505, "Ordering procedures," and subsection 917.505–70, "Methods of financing employed by DOE." Subsection 917.505–71, "Cost reimbursement standards," has been revised to implement FAR 17.5, "Interagency Acquisition Under the Economy Act." Section 919.501, "General," has been revised to clarify the threshold for the Department's review and screening process for small business set-asides. A new Subpart 919.6, "Certificates of Competency and Determinations of Eligibility," is added. A new subsection 919.705–2, "Determining the need for a subcontracting plan" is added and subsection 919.705–5, "Awards involving subcontracting plans," is revised. Editorial changes have been made in subsections 952.204–2, "Security requirements," and 952.209–72, "Organizational conflicts of interest—special clause." Subsections 952.212–70, "Priorities and allocations for energy programs (solicitations)," and 952.212–71, "Priorities and allocations for energy programs (contracts)," are revised to implement the new Defense Priorities and Allocations System (DPAS) which supersedes the regulations of the Defense Materials System (DMS) and the Defense Priorities System (DPS). Subsection 952.219–9, "Small business and small disadvantaged business subcontracting plan," is revised to clarify the requirement for submission of Standard Form 294. A new subsection 952.225–70, "Buy American Act Notice," has been added to clarify Buy American Act applicability to DOE construction contracts. Subsection 970.0404–4, "Contract clauses," is revised with respect to security and classification requirements under atomic energy production contracts. Subpart 970.19, "Small Business and Small Disadvantaged Business Concerns," is amended to revise section 970.1901, "General," regarding the need for a subcontracting plan. Editorial changes have been made in subsections 970.5204–13, "Allowable costs and fixed-fee (CPFF management and operating contracts)," 970.5204–22, "Contractor procurement," and 970.5204–33, "Priorities, allocations and allotments." Section 971.103, "Documentation submittals," is revised to add a list of items that must be provided for Headquarters review for sealed bid awards.

II. Procedural Requirements

A. Review Under Executive Order 12291

This Executive order, entitled "Federal Regulations," requires that certain regulations be reviewed by OMB prior to their promulgation. OMB Bulletin 85–7 exempts all but certain types of procurement regulations from such review. This rule does not involve any of the topics requiring prior review under the Bulletin and is accordingly exempt from such review.

B. Review Under the Regulatory Flexibility Act

This rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. This rule will have no impact on interest rates, tax policies or liabilities, the cost of goods or services or other direct economic factors. It will also not have any indirect economic consequences, such as changed construction rates.

DOE certifies that this rule will not have a signficant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

C. Paperwork Reduction Act

The information collections in this rule have been cleared by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), and OMB's implementing regulations at 5 CFR Part 1320.

D. National Environmental Policy Act

DOE has concluded that promulgation of this rule would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 *et seq.* 1976) or the Council on Environmental Quality regulations (40 CFR Part 1020) and, therefore, does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

E. Public Hearing

The Department has concluded that this rule does not involve a substantial issue of fact or law and that the rule should not have a substantial impact on the nation's economy or large numbers of individuals or businesses. Therefore, pursuant to Pub. L. 95–91, the DOE Organization Act, the Department does not plan to hold a public hearing on this rule.

III. Public Comments

Interested persons were invited to participate by submitting data, views or arguments with respect to this rule, as proposed. Comments were received from three universities, an organization representing universities conducting research, four DOE offices or employees, and the Office of Federal Procurement Policy. They are discussed below.

One comment was received pointing out that the authority citation given for Parts 902, 904, 913, 915, 917, 919, 952, 970 and 971 in the notice of proposed rulemaking included a reference to section 161 of the Atomic Energy Act of 1954, as amended (Act), whereas the reference in the present Code of Federal Regulations is to section 148 of that Act. Section 148 of the Act involves rulemaking authority available to the Secretary relating to the unauthorized dissemination of unclassified information pertaining to atomic energy defense programs. Section 161 of the Act involves a much more general grant of authority including, at paragraph (p), the authority to "make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act." Of the two, the reference to section 161 is the more appropriate reference for the purpose of a general authority citation. Neither is necessary however because the parallel reference to section 644 of the Department of Energy Organization Act contains the more recent generic rulemaking authority. Accordingly, the authority citation for the entire DEAR has been changed to reference section 644 of the DOE Organization Act, (42 U.S.C. 7254). In addition, because the DEAR is also issued under the authority of section 205(c) of the Federal Property and Administrative Services Act of 1949 (FPASA), as amended, (40 U.S.C. 486(c)), a citation of the Secretary's rulemaking authority under that Act is appropriate. DEAR section 901.102, "Authority," references both section 644 of the Department of Energy Organization Act and the FPASA. However, the U.S.C. citation for the FPASA contained in 901.102 is to 41 U.S.C. 252. This is the "Applicability" section of the FPASA rather than the rulemaking authority under which civilian agency acquisition regulations are issued. Accordingly, the U.S.C. citation has been changed to reflect the proper authority under which the DEAR is issued in accordance with the FPASA (40 U.S.C. 486(c)). As a result of the above-described changes, it is necessary to amend the authority citation for all parts of the DEAR. The

revised section 901.102 also reflects these changes.

Two comments were received suggesting that 902.101, as proposed, be changed to identify the Director, Office of Energy Research, as a Senior Program Official. This was accomplished by changing "Assistant Secretaries" to "Secretarial Officers" and by adding a reference to DOE 1325.1A which contains a list of Secretarial Officers, which includes the Director of Energy Research. Subsection 904.601–70, as proposed, would have changed the title and number of the subcontracting report form as well as change the form's due date from 15 to 25 days after the end of each fiscal quarter. No public comments were received on this proposed change. The Department, however, is concerned that it could not meet its own commitments to furnish timely contract data to others, such as the Federal Procurement Data System and Congress. For this reason, the original due date of 15 days after the end of the fiscal quarter has been retained.

No comments were received regarding the Department's proposed changes to Subpart 913.5. Accordingly the proposed language appears in the final rule without change.

No public comments were received regarding the changes proposed for Subpart 915.6, "Source Selection." Several comments were received from within the Department and one comment was received from the Office of Federal Procurement Policy. The Department had first proposed in the August 26, 1985 notice that several sections of this subpart be rearranged to more closely track the Federal Acquisition Regulation coverage of the subject. The proposal would have increased the threshold for source evaluation board applicability from actions exceeding $5 million to actions exceeding $10 million and would have excluded fixed price and architect-engineer acquisitions from this procedure. On October 28, 1985, the Department amended the original notice to eliminate the exemption for fixed-price and other acquisitions for which selection would be based solely on a published predetermined formula or on the lowest price. The changes initially proposed for Subpart 915.6 (i.e., those proposed in the August 26, 1985 proposed rulemaking) were the subject of much discussion. These discussions suggested a need for further study in this area. For this reason, the only changes being made in Subpart 915.6 are increases in the threshold for use of formal source selection procedures and alternative source selection procedures. The other proposed changes in Subpart 915.6 are not being made, and the remainder of DEAR 915.6 will remain unchanged by this rulemaking.

Four comments were received regarding section 915.807, "Prenegotiation objectives." One comment suggested that 915.807(d) was contradictory to the objectives of the Paperwork Reduction Act. The Paperwork Reduction Act calls for the reduction of paperwork burdens on the general public. The prenegotiation plan is not completed by any member of the general public so the concern is unfounded. The same commenter suggested that the duration(s) of the contract(s) rather than just their award date(s) would be more meaningful at 915.807(d)(2)(b). This comment was accommodated by substituting the words "performance period(s)" for the words "date(s) of award" at 915.807(d)(2)(b). Another comment suggested that the words "and the extent of competition in awarding subcontracts" be added to 915.807(d)(5)(d) immediately after the word "subcontracting." DOE does not agree with this comment. Our position is that the extent of competition in subcontracting cannot be accurately gauged prior to award of the prime contract. For this reason, we have chosen not to adopt the suggested language. One comment suggested that the detailed prenegotiation plan should be placed in an informal guide rather than in the DEAR in order that local variations can be adopted. The Department prefers to adopt the detailed plan, at the Departmental level, in order to promote greater uniformity in this area. An individual plan can vary from the prescribed format as indicated by the words of the last sentence of the introductory paragraph preceding the contents of the plan itself.

It was suggested that 915.808, "Price negotiation memorandum," be changed at subparagraph (a)(15) by deletion of the word "significant." This would remove the subjective characteristic of the requirement that significant departures from the prenegotiation objectives be documented. The suggestion would, however, result in a need to document *insignificant* departures from the prenegotiation objectives. The Department has elected not to adopt the suggestion.

A general comment was received to the effect that the detailed listing of interagency agreement contents at 917.504(b) was duplicative of information required for entry on DOE Form 1270.1 as directed by DOE Order 1270.1. DOE is in the process of revising DOE 1270.1. Accordingly, the listing of items supplementary to the FAR will be retained as it appeared in the proposed rule. It was suggested that subparagraph (b)(11) of 917.504, "Ordering procedures," be revised to eliminate the need for patent counsel to review each interagency agreement. This use of the language at (b)(11) is intended to make certain that patent counsel is utilized whenever necessary. Therefore no change was made. Subparagraph (b)(12) of this section was changed to note the new designation of the "Office of Scientific and Technical Information" in place of the old "Technical Information Center" and "minimum of two copies" was changed to "two copies" in subparagraph (b)(12). One comment noted that paragraph (d) of subsection 917.505–71 seemed to indicate that DOE does not automatically acquire title to the capital equipment acquired under an interagency agreement. As promulgated in this final rule, paragraph (d) makes clear that DOE reserves a right of first refusal to any capital equipment acquired under an interagency agreement.

A comment was received regarding Subpart 919.5, "Set-Asides for Small Business." It was requested that DOE specifically provide at subparagraph (g) that class set-asides are made and administered on an individual contracting activity basis only. The suggested change has been incorporated in this final rule.

Two commenters, one representing research universities, expressed objection to the proposed language at 919.705–2, "Determining the need for a subcontracting plan," because it imposes additional requirements unique to DOE on contractors where Federal-wide rules and standards have been established and that a deviation from the FAR is required; because OMB clearance is required since it would establish recordkeeping and reporting requirements for contracts covered by FAR; and because OMB Bulletin 85–7 requires prior review of this subsection by OMB. DOE disagrees with the commenters' interpretations of both the proposed language and the FAR instructions. The proposed DOE language was developed to make it clear that the large multi-million dollar, long-term, research contracts of DOE that are funded on an annual basis may require a subcontracting plan when subcontracting opportunities exist. For such contracts, it is known at the outset that there is a likelihood that DOE will fund the contract to a level that will exceed $500,000, even though the basic contract, and modifications thereto, are

VOL 52 ISS 200 OC 16 1987 UMI

individually less than $500,000. Although the ultimate funding level is not known at the time of initial award, provisions are included within the contract which indicate that there is a likelihood that DOE will continue funding for a period of time. The Department takes the position that DOE research contracts are included within the ambit of the instructions to contracting officers contained in FAR 19.705–2(a), i.e., "If the action includes options *or similar provisions* (emphasis added) include their value in determining whether the threshold is met." It is the Department's position that we would be remiss in continuing to exempt these large dollar contracts from the requirements of submitting a subcontracting plan when the contracting officer expects at the outset that subcontracting opportunities exist and that the contract funding will exceed $500,000. The Department interprets the FAR to include such situations and therefore we do not consider this provision to be an additional unique requirement of DOE requiring OMB review or deviation from the FAR. Therefore, the substance of the proposed language at DEAR 919.705–2 was not changed, however, it was modified to emphasize that the dollar threshold is an issue only if subcontracting opportunities exist.

The proposed rule contained a new section 925.205 concerning the use of a clause entitled "Buy American Act—Construction Materials." In light of the FAR coverage at 25.205, the proposed DEAR 925.205 has been withdrawn, along with the accompanying clause at 952.225–70.

The proposed rule contained an instruction at 970.0404–4, "Contract clauses," which required, at (a)(2), that all management and operating contracts contain a clause entitled "Additional Work, Defense Classified/Unclassified." The text of the clause, proposed to be set forth as 970.5204–4, would have required acceptance of any national defense work assignment, whether classified or unclassified, by a management and operating contractor. Numerous comments were received regarding this proposal. Most objected to the proposal. The Department withdrew the proposal on October 28, 1985, 50 FR 43589.

At 971.103, "Documentation submittals," it was suggested that the word "advertised" be changed to "sealed bid" to reflect new terminology necessitated by the Competition in Contracting Act. This was done.

List of Subjects in 48 CFR Ch. 9

Government acquisition.

For the reasons set out in the preamble, Chapter 9 of Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, DC, on October 8, 1987.

Berton J. Roth,

Director, Procurement and Assistance Management Directorate.

1. The authority citation for all parts of Chapter 9 is revised to read as follows:

Authority: 42 U.S.C. 7254; 40 U.S.C. 486(c).

PART 901—[AMENDED]

2. Section 901.102 is revised to read as follows:

901.102 Authority.

The DEAR and amendments thereto are issued by the Procurement Executive pursuant to a delegation from the Secretary in accordance with the authority of section 644 of the Department of Energy Organization Act (42 U.S.C. 7254), section 205(c) of the Federal Property and Administrative Services Act of 1949, as amended, (40 U.S.C. 486(c)), and other applicable law.

PART 902—[AMENDED]

902.100 [Redesignated as 902.101]

3. Subpart 902.1 is amended by redesignating 902.100 as 902.101. Newly redesignated 902.101 is further amended by revising paragraph (e) of the "Procurement Executive" definition, and by revising the definition for the "Senior Program Official" to read as follows:

902.101 Definitions.

* * * * *

"Procurement Executive" * * *

(e) Exercise priorities authority on behalf of the agency, in accordance with the provisions of the Defense Production Act of 1950 (50 U.S.C. App. 2071, *et seq.*), Defense Priorities and Allocations System Delegation 2, dated June 21, 1984, and applicable policies and regulations; and the Energy Conservation and Policy Act, Pub. L. 94–164.;

* * * * *

"Senior Program Official" is any of the individuals appointed as Secretarial Officers or Directors of DOE staff offices. (See DOE 1325.1A.)

PART 904—[AMENDED]

4. Subsection 904.601–70 is amended by revising paragraph (b)(3)(ii) to read as follows:

904.601–70 Procurement and Assistance Data System (PADS).

* * * * *

(b) * * *

(3) * * *

(ii) On a summary basis, by completion and submission of Standard Form 281, FPDS—Summary of Contract Actions of $10,000 or less. Summary reports shall be submitted within 15 calendar days after the end of each Federal fiscal quarter.

* * * * *

PART 912—[AMENDED]

5. Subpart 912.3 is amended by changing the title and text to conform to the requirements of the Defense Priorities and Allocations System. As revised, Subpart 912.3 reads as follows:

Subpart 912.3—Priorities and Allocations

912.300 Scope of subpart.

This subpart implements and supplements FAR Subpart 12.3, Priorities and Allocations, and implements the regulations and procedures of the Defense Priorities and Allocations System (DPAS) in solicitations and contracts in support of authorized national defense programs and those energy programs which maximize domestic energy supplies. (See 15 CFR Part 350.)

912.302 General.

(d) Programs which maximize domestic energy supplies are eligible for priorities and allocations support depending on an executive decision made on a case-by-case basis. Eligibility is pursuant to section 104(a) of the Energy Conservation and Policy Act, Pub. L. 94–163, which added a new section 101(c) to the Defense Production Act. Guidance is provided by 10 CFR Part 216 and Department of Energy publication DOE/MA–0192, "Priorities and Allocations Support for Energy: Keeping Energy Programs on Schedule," dated August 1985. Rated orders placed in support of authorized energy programs are equivalent to orders placed in support of authorized defense programs under the DPAS and receive the same preferential treatment throughout the industrial supply chain.

(e) Heads of Contracting Activities shall ensure that members of their staffs and contractors under their jurisdiction are advised of the provisions of the DPAS regulation and that the related procedures are followed to ensure adherence to the regulation throughout the industrial supply chain. Under DPAS, it is mandatory that the priority rating be extended through the industrial chain from supplier to supplier.

912.304 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 952.212–70, Priorities and Allocations (Atomic Energy) (June 1987), in solicitations that will result in the placement of rated orders for authorized DOE atomic energy programs.

(b) The contracting officer shall insert the clause at 952.212–71, Priorities and Allocations (Atomic Energy) (June 1987) in contracts that are placed in support of authorized DOE atomic energy programs.

(c) The use of the provisions at 952.212–70 and the clause at 952.212–71 is optional for industrial delivery orders of $1,000 or less.

(d) The contracting officer shall insert the provision at 952.212–70 (Alternate I), Priorities and Allocations (Domestic Energy Supplies) (June 1987), in solicitations that may result in the placement of rated orders for authorized energy programs.

(e) The contracting officer shall insert the clause at 952.212–71 (Alternate I), Priorities and Allocations (Domestic Energy Supplies) (June 1987), if it is believed the contract involves a program the purpose of which is to maximize domestic energy supplies.

PART 913—[AMENDED]

6. Subpart 913.5 is amended by adding a new subsection 913.505–1 and removing subsection 913.505–2. As revised, Subpart 913.5 reads as follows:

Subpart 913.5—Purchase Orders

913.505–1 Optional Form (OF) 347, Order for Supplies or Services, and Optional Form 348, Order for Supplies or Services Schedule—Continuation.

(a)(2) Optional Forms 347 and 348 shall be used for purchase orders using small purchase procedures. The form shall not be used as the contractor's invoice.

(b)(2) An addendum of applicable clauses, including DOE Clause Set 319 which is provided to contracting activities by the Office of Policy, Procurement and Assistant Management Directorate, shall be used with each Optional Form 347.

PART 915—[AMENDED]

7. Subpart 915.6 is amended by revising paragraph (a) of section 915.612 to reflect a change in the threshold for use of formal source selection procedures, and by revising section 915.613 to reflect a change in the threshold for use of alternative source selection procedures. As revised, 915.612(a) and 915.613 read as follows:

Subpart 915.6—Source Selection

915.612 Formal source selection.

(a) Negotiated competitive acquisitions of less than $10 million are not subject to the SEB Handbook unless specifically required by the Procurement Executive. For acquisitions under $10 million, less formal procedures are used.

* * * * *

915.613 Alternative source selection procedures.

Source Evaluation Board (SEB) procedures shall be used for all negotiated competitive prime acquisitions expected to be $10 million or more, excepting acquisitions for architect-engineer services, and acquisitions specifically waived by the Procurement Executive. Guidance regarding the designation and operation of the SEB are set forth in the SEB Handbook.

8. Subpart 915.8 is amended by adding a new section 915.807 and by adding a new paragraph (a) to section 915.808 to read as follows:

Subpart 915.8—Price Negotiation

915.807 Prenegotiation objectives.

(d) The Head of the Contracting Activity shall assure that all prenegotiation objectives and proposed actions are documented in accordance with the requirements of FAR 15.807 and the following requirements of this section. The degree of documentation should be commensurate with the complexity and dollar value of the procurement. For those procurement actions of $250,000 and above the contracting officer shall prepare a written prenegotiation plan which shall include prenegotiation objectives for price and other contract requirements, as appropriate. The prenegotiation plan required by this section shall be included as section I of the price negotiation memorandum at 915.808. The prenegotiation plan should include, to the extent applicable, the information cited below.

Prenegotiation Plan

(1) *General.*
- (a) Procurement request number, solicitation, and contract number.
- (b) Offeror(s) involved in the negotiation. Include address and location where effort is to be performed.
- (c) Brief description of the work to be performed (reference to statement of work is not sufficient).
- (d) Type of solicitation (RFP, PON, PRDA, etc.) and type of contract being awarded.
- (e) Period of performance/delivery schedule.
- (f) Proposed funding schedule for term of contract.

(2) *Prior procurement history.*

Names of previous contractors, if previous awards made for same or similar work to be performed. Contract number(s) and performance period(s).

(3) *Solicitation data.*
- (a) Summary of selection process used, including number of firms solicited, proposals received, competitive range, name of selection official if SEB was used.
- (b) If noncompetitive, basis for approval and name and title of person approving the justification.
- (c) Discuss what considerations were given to socio-economic requirements.

(4) *Advisory reports.*

Identify, by title and date, the advisory reports received in support of the negotiations, i.e., audit reports, technical evaluation reports, cost or price analysis reports, and any other advisory report used in preparing the prenegotiation objectives.

(5) *Pricing objectives.*
- (a) A schedule showing the elements of the proposer's cost proposal, recommended adjustments (auditor, technical evaluation, etc.), and the negotiator's pricing objectives in columnar form.
- (b) Discussion of how previous procurements impact the pricing objectives of the instant procurement.
- (c) Appropriate comments justifying the negotiation objective for each element of cost. In discussing DOE's objectives indicate the position taken in advisory reports, if requested, and the proposed treatment of such advice/comments.
- (d) The extent of subcontracting and justification for subcontract price(s) provided by the prime contractor and the justification as viewed by the DOE negotiator.
- (e) Discussion of whether, and to what extent, negotiation will be based on actual costs expended.
- (f) Discussion of any special pricing techniques and the rationale for their use.
- (g) Discussion of how DOE's objective for fee and profit was established, including a copy of the weighted guideline analysis, if used. For construction contracts and construction management contracts, discuss how the profit or fee objective was established in accordance with the requirements of 915.971.
- (h) Discussion of incentive arrangements, cost or technical, if applicable, (i.e., share ratios, ceiling price, minimum/maxium fees.)
- (i) Discussion of the treatment given to facilities capital cost of money, if applicable, in establishing the fee/profit objective.
- (j) A summary statement regarding the reasonableness of the total price objective and appropriate discussion of the considerations used to determine the reasonableness of price.

(6) *Other issues and factors.*
- (a) Discuss any proposed special provisions.
- (b) Identify any anticipated deviations to regulations and the required approvals.

(c) Identify any unusual features of the Statement of Work.
(d) If applicable, identify any solicitation provisions which have been challenged by the offeror.
(e) Indicate if the Consolidated List of Debarred, Suspended, and Ineligible Contractors has been reviewed.
(f) Discuss whether the contractor has an approved purchasing and accounting system.
(g) Discuss any unique or peculiar features of the contract; e.g., cost sharing, facility ownership, options, etc.
(h) Discuss any deviations to regulations or exceptions suggested by the offeror and discuss proposed disposition.
(i) Discuss any results of pre-award surveys of the offeror's financial, accounting and other management systems.

915.808 Price negotiation memorandum.

(a) The Head of the Contracting Activity shall assure that all contract actions are adequately documented and shall establish internal review requirements therefor. While documentation may be simplified for lesser dollar value acquisitions, documentation of prenegotiation objectives and negotiation summaries shall be maintained in order to promote the discipline of adequate preparation for negotiations and to assist in supervisory review. For acquisitions of $250,000 and above, the price negotiation memorandum (PNM) shall be divided into two major sections: Section I, the prenegotiation plan and Section II, the post-negotiation summary. The prenegotiation plan prepared in accordance with 915.807 shall document the negotiation objectives established prior to the start of formal negotiations. The post-negotiation summary shall discuss the results of the negotiations leading to a final agreement, and, in a general sense, provide the results of the negotiation in terms of the extent to which prenegotiation objectives were met. In addition to the items listed at FAR 15.807 the following shall also be addressed in the PNM.

(11) Date and location of negotiations.

(12) Discussion of any issues raised during negotiations that were not addressed in the prenegotiation position.

(13) In the event that pricing or other contract terms cannot be justified to the satisfaction of the contracting officer but award is recommended because of compelling programmatic considerations, the PNM must fully document the efforts to obtain a more satisfactory agreement, including the extent to which the matter was escalated within DOE and the contractor's organization. The file must also show what consideration was given to alternate sources or other short or long-term alternatives (See FAR 15.803(d)).

(14) Indicate the date on which agreement was reached on the price, and the date the certificate of current cost or pricing data was signed, if applicable.

(15) Explain why the total price or estimated cost and fee are considered fair and reasonable if there was significant departure from the prenegotiation objectives.

PART 917—[AMENDED]

9. Subpart 917.5 is amended by revising section 917.504; by revising the title and paragraph (a) of section 917.505–70; and by amending section 917.505–71 by revising paragraphs (b), and (c) and adding new paragraphs (d) and (e), to read as follows:

Subpart 917.5—Interagency Acquisitions Under the Economy Act

917.504 Ordering procedures.

(b) DOE Form 1270.1, Order for an Interagency Acquisition, shall be used for interagency acquisitions. The order shall include an attachment addressing, as a minimum, the items listed at FAR 17.504(b) and the following:

(6) The parties to the interagency acquisition.

(7) Order number and/or modification number.

(8) Period covered by the interagency acquisition.

(9) Cost estimate of the interagency acquisition and the amount of funds to be provided by DOE including:

(i) The total etimated cost of the work for the period of time specified in the order;

(ii) The capital equipment, if any, approved for purchase under the subject acquisition; and

(iii) Limitations, if any, on the reimbursement of costs by DOE.

If DOE participates with another agency or agencies in sponsoring a project, the amount of contribution to be made by each agency and the basis for distributing the costs incurred shall be specified.

(10) Termination provisions that allow DOE to terminate the interagency acquisition upon 30 days written notice to the servicing agency. In the event of a termination, DOE may reimburse the servicing agency for costs actually incurred to the effective date of termination and for any commitments extending beyond the termination date (but not exceeding the expiration date of the order) that the servicing agency is unable to cancel.

(11) Appropriate patent provisions which recognize DOE's mission of achieving widespread availability and competitive commercial utilization of the benefits of DOE-funded research, development, and demonstration activities. Specific wording will vary depending on the agency and acquisition involved and must be obtained from the cognizant DOE patent counsel.

(12) Reporting requirements and technical data provisions, if appropriate, which require that technical reports prepared under the order to freely exchanged and made available for public sale, unless classified. Two copies of technical reports must be sent to the DOE Office of Scientific & Technical Information (OSTI), P.O. Box 62, Oak Ridge, TN 37830.

(13) Financial reports as determined by the contracting officer.

(14) Security provisions of 952.204, if appropriate, for those interagency acquisitions requiring access to/or generating classified information. (Revisions to the DEAR clauses will be required to effect the appropriate relationship between the servicing agency and DOE.)

917.505–70 Reimbursement by DOE.

(a) Payment methods to reimburse the servicing agency shall be specified in the interagency acquisition. Such specified payment methods shall be coordinated with the servicing finance officer to ensure that they are consistent with current Department of Treasury Regulations as implemented by DOE.

* * * * *

917.505–71 Cost-reimbursement standards.

* * * * *

(b) Direct costs are the costs that can be directly identified with work under the acquisition. Examples of such costs are salaries and wages, technical services, materials, travel, transportation, communications, and any facilities and equipment expressly approved for purchase under the interagency acquisition.

(c) Indirect costs shall be limited to the properly allocable portion of costs that cannot be charged directly to the work, but can be shown as mutually benefiting the effort covered by the interagency agreement as well as other work of the servicing agency. Justification for any such charges shall be required, and the basis of allocation must be reasonable. Where interagency acquisitions are entered into under authority of section 601 of the Economy Act of 1932, the servicing agency's

charge for any indirect costs may include appropriately allocable charges for "general administration" or "central agency overhead," but only to the extent specified in the acquisition.

(d) The servicing agency shall be responsible for maintenance, safeguarding, control, and accounting of capital equipment (items of equipment expected to have an extended period of service, generally a year or more and generally having a value of $1,000 or more) in a manner satisfactory to DOE. DOE reserves the right of first refusal for any capital equipment acquired under the interagency acquisition at completion or termination of the interagency acquisition.

(e) Unless authorized by the contracting officer in advance, the servicing agency shall not be reimbursed for the acquisition or condemnation of real property or any facility or plant construction or expansion.

PART 919—[AMENDED]

10. Subpart 919.5 is amended by revising 919.501 to read as follows:

Subpart 919.5—Set-Asides for Small Business

919.501 General.

(c) The Department has established an internal comprehensive review and screening process for acquisitions exceeding $10,000. The review is intended to enhance the prospect of participation by small business, small disadvantaged business, and women-owned small business concerns.

(g) The policy prescribed by FAR 19.501(g), which requires that a product or service acquired by a successful small business set-aside shall continue to be acquired on a set-aside basis, is applicable to DOE on a contracting activity-wide basis. The small and disadvantaged business specialist at a contracting activity shall maintain a list of such small business set-aside awards.

11. A new Subpart 919.6 consisting of section 919.602–1 is added to read as follows:

Subpart 919.6—Certificates of Competency and Determinations of Eligibility

919.602–1 Referral

(a)(2) The contracting officer shall coordinate with the small and disadvantaged business specialist and the SBA procurement center representative prior to referring a determination of nonresponsibility of a small business to the SBA Regional Office.

12. Subpart 919.7 is amended by adding a new subsection 919.705–2 and by adding a new paragraph (a)(5) to subsection 919.705–5 to read as follows:

Subpart 919.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

919.702–2 Determining the need for a subcontracting plan.

(a) It is the policy of DOE to comply with the spirit as well as the requirements of Public Law 95–507. FAR requires that options be considered in determining whether the dollar value of a contract meets the dollar threshold necessitating a subcontracting plan. Accordingly, if a contract includes options or *similar provisions* which the contracting officer knows at the time of award will result in an overall contract value exceeding $500,000, then, although the ultimate value of the contract may not be known at the time of initial award, a subcontracting plan will nevertheless be obtained *if* substantial subcontracting opportunities are determined to exist. Examples of such actions which may require a subcontracting plan are contracts for basic research, including special research contracts awarded pursuant to Subpart 917.71, which fund a portion of a project under the initial award, with subsequent research funded on an annual basis by contract modification. The plan should be applicable to the basic contract and then be modified, as appropriate, through the life of the contract.

(b) A subcontracting plan is generally not obtained from an offeror until selection of an awardee except in those cases where a plan is requested of all firms in a competitive range (see FAR 19.705–2(d)). When it is determined that a subcontracting plan is required in accordance with FAR 19.705–2, the contracting officer shall request development and submission for approval of a subcontracting plan which includes all of the elements listed in the contract clause at FAR 52.219–9 or shall determine in writing as required by FAR 19.705–2 that a subcontracting plan is not required because subcontracting opportunities do not exist.

(c) A copy of the determination required by FAR 19.705–2(c) shall be provided, prior to award, to the small and disadvantaged business specialist at the contracting activity.

919.705–5 Awards involving subcontracting plans.

(a)(5) Ensure that an acceptable plan is incorporated into and made a material part of the contract by including in every contract with a plan a provision which either incorporates the approved plan into the contract by reference, or makes the plan an attachment to, and thus a part of, the contract. Subsequent revisions to a plan, i.e., revised goals or other changes, may be incorporated by reference on approval of the contracting officer. The subcontracting plan must be included in the official contract file when the plan is incorporated into the contract by reference.

* * * * *

PART 952—[AMENDED]

14. The table of contents for Part 952 is amended by correcting the designation of "952.261–7" to read "952.216–7".

15. Subsection 952.204–2 is corrected by revising the first sentence in paragraph (a) of the Security clause, and by revising the parenthetical reference at the end of paragraph (i) of the clause, to read as follows:

952.204–2 Security requirements.

* * * * *

Security (April 1984)

(a) *Responsibility.* It is the contractor's duty to safeguard all classified information, special nuclear material, and other DOE property. * * *

(i) * * * (See the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011 *et seq.;* 18 U.S.C. 793 and 794; and Executive Order 12356).

* * * * *

16. Subsection 952.209–72 is amended by revising paragraph (b)(2)(iii) of the Organizational conflicts of interest—special clause to read as follows:

952.209–72 Organizational conflicts of interest—special clause.

* * * * *

(b) * * *

(2) * * *

(iii) The contractor shall have, subject to patent, data, and security provisions of this contract, the right to use technical data it first produces under this contract for its private purpose consistent with the Rights in Data provisions of this contract.

* * * * *

17. Subsections 952.212–70 and 952.212–71 are revised to read as follows:

952.212–70 Priorities and allocations for energy programs (solicitations).

As prescribed in 912.304(a), insert the following provision in solicitations that will result in the award of a contract in support of DOE atomic energy programs:

Priorities and Allocations (Atomic Energy) (June 1987)

Contracts or purchase orders awarded as a result of this solicitation shall be assigned a [ ] DO-Rating; [ ] DX-Rating; and certified for national defense use in accordance with the Defense Priorities and Allocations System (DPAS) regulation (15 CFR Part 350) (Contracting officer check appropriate box).

Alternate I: As prescribed in 912.304(d), insert the following provision in solicitations in support of a program or project which may be determined to maximize domestic energy supplies:

Priorities and Allocations (Domestic Energy Supplies) (June 1987)

Contracts or purchase orders awarded as a result of this solicitation may be eligible for priorities and allocations support in accordance with 10 CFR Part 216 and section 101(c) of the Defense Production Act of 1950, as amended.

952.212-71 Priorities and allocations for energy programs (contracts).

As prescribed in 912.304(b), insert the following clause in contracts and purchase orders that are placed in support of authorized DOE atomic energy programs pursuant to the Atomic Energy Act of 1954, as amended:

Priorities and Allocations (Atomic Energy) (June 1987)

The Contractor shall follow the provisions of Defense Priorities and Allocations System (DPAS) regulation (15 CFR Part 350) in obtaining controlled materials and other products and materials needed to fill this contract. *Alternate I:* As prescribed in 912.304(e), insert the following clause in contracts if they are placed in support of programs or projects which may be determined to maximize domestic energy supplies:

Priorities and Allocations (Domestic Energy Supplies) (June 1987)

(a) This contract may be eligible for priorities and allocations support, as provided for by section 101(c) of the Defense Production Act of 1950, as amended by the Energy Policy and Conservation Act (Pub. L. 94-163, 42 U.S.C. 6201 *et seq.*) if its purpose is determined to be to maximize domestic energy supplies. Eligibility is dependent on an executive decision on a case-by-case basis with the decision being jointly made by the Departments of Energy and Commerce.

(b) DOE regulations regarding material allocations and priority performance under contracts or orders to maximize domestic energy supplies can be found at Part 216 of Title 10 of the Code of Federal Regulations (10 CFR Part 216).

(c) Additional guidance is provided by DOE Publication MA-0192, "Priorities and Allocations Support for Energy: Keeping Energy Programs on Schedule," dated August 1985, as it may from time to time be revised. Copies may be obtained by written request to: Department of Energy, Office of Scientific and Technical Information (OSTI), Post Office Box 62, Oak Ridge, Tennessee 37830.

18. In subsection 952.219-9 paragraph (d)(10) of the clause is amended by revising the paragraph through the word "December" to read as follows:

952.219-9 Small business and small disadvantaged business subcontracting plan.

* * * * *

(d)(10) Assurances that the offeror will (i) cooperate in any studies or surveys as may be required, (ii) submit periodic reports in order to allow the Government to determine the extent of compliance by the offeror with the subcontracting plan, (iii) submit, not later than the 25th day of the succeeding month, Standard Form (SF) only, (DOE contractors need not submit SF 295) on a quarterly basis current as of the last day of March, June, September and December, * * *

PART 970—[AMENDED]

19. Subsection 970.0404-4 is amended by revising paragraph (a)(1) and by removing and reserving paragraph (a)(2), to read as follows:

970.0404-4 Contract clauses.

(a) * * *

(1) *Security and Classification, 970.5204-1.* This clause is required in management and operating contracts under section 41 (ownership and operation of production facilities) of the Atomic Energy Act of 1954, as amended; and all management and operating contracts which involve classified information.

(2) [Reserved]

* * * * *

20. Subpart 970.19 is amended by adding a new paragraph (i) in section 970.1901 to read as follows:

Subpart 970.19—Small Business and Small Disadvantaged Business Concerns

970.1901 General.

* * * * *

(i) Management and operating contracts shall include a subcontracting plan which is effective for the term of the contract. Goals for the contract shall be negotiated annually when revised funding levels are determined. The plan should include provisions for revising the goals or any other sections of the plan. Such revisions shall be in writing, approved by the contracting officer, and shall be specifically made a material part of the contract.

21. Subsection 970.5204-13 is amended by revising paragraph (d)(14) of the clause to read as follows:

970.5204-13 Allowable costs and fixed-fee (CPFF management and operating contracts).

* * * * *

(d) * * *

(15) Establishment and maintenance of bank accounts in connection with the work hereunder, including, but not limited to, service charges, the cost of disbursing cash, necessary guards, cashiers, and paymasters. If payments are made by check, facilities and arrangements for cashing checks may be provided without expense to the employees, subject to the approval of the contracting officer.

* * * * *

22. Subsection 970.5204-22 is amended by revising "Note A" to read as follows:

970.5204-22 Contractor procurement.

* * * * *

Note A: When appropriate, the words, "if required by the contracting officer," may be inserted in the third sentence of paragraph (a) after the first use of the word "shall."

* * * * *

23. Subsection 970.5204-33 is revised to read as follows:

970.5204-33 Priorities and allocations.

(a) The following clause shall be used in management and operating contracts for military and atomic energy construction, operations and other directly related activity, where the programs have been authorized pursuant to the Atomic Energy Act of 1954, as amended.

Priorities and Allocations (June 1987)

The contractor shall follow the rules and procedures of the Defense Priorities and Allocations System (DPAS) regulation (15 CFR Part 350) in obtaining controlled materials and other products and materials needed for contract performance.

(b) The following clause shall be used in management and operating contracts in support of programs and projects which may be determined to maximize domestic energy supplies.

Priorities and Allocations—Domestic Energy Supplies (June 1987)

A program or project under this contract may be determined to be eligible for priorities and allocations support as provided for by Section 101(c) of the Defense Production Act of 1950, as amended by the Energy Policy and Conservation Act (Pub. L. 94-163, 42 U.S.C. 6201 *et seq.*) if it is determined that its purpose is to maximize domestic energy supplies. Eligibility is dependent on an executive decision on a case-by-case basis with the decison being jointly made by the Department of Energy and Commerce.

DOE regulations regarding material allocation and priority performance under contracts or orders to maximize domestic energy supplies can be found at Part 216 of Title 10 of the Code of Federal Regulations (10 CFR Part 216).

Additional guidance is provided by DOE Publication MA-0192, "Priorities and Allocations Support for Energy: Keeping Energy Programs on Schedule," dated August 1985, as it may from time to time be revised. Copies may be obtained by written request

to: Department of Energy, Office of Scientific and Technical Information (OSTI), Post Office Box 62, Oak Ridge, Tennessee 37830.

PART 971—[AMENDED]

24. Section 971.103 is amended by adding new paragraphs (a) (3) and (4) to read as follows:

971.103 Documentation submittals.

(a) * * *

(3) *Prior to a sealed bid award.*

(i) Four copies of the successful bid.

(ii) Copy of proposed contract.

(iii) Record of bid opening and selection.

(iv) Copy of the solicitation.

(4) *After completing a sealed bid award.*

(i) Four copies of an award memorandum which documents that the award was made to the responsible, responsive bidder whose bid is most advantageous to the Government, price and other factors considered as provided in FAR 14.407.

(ii) One copy of any other documents the contracting officer believes would benefit the Headquarters review. (List of documents required for contract file are cited at FAR 4.803(a)).

BILLING CODE 6450-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 83-12; Notice 6]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule; technical amendment.

SUMMARY: This notice constitutes a technical amendment of Safety Standard No. 108 to reflect the agency's intent in Footnote 3 to Figure 1b. The Footnote in part establishes a minimum separation distance between a turn signal lamp of certain minimum candela and the lower beam headlamp, "or from the lighted edge of any additional lamp installed as original equipment or used in lieu of the lower beam." The distance intended by the agency is between the turn signal lamp and the edge of the lower beam headlamp, or from the lighted edge of any additional lamp installed as original equipment which supplements the lower beam.

DATE: Effective date of the amendment is November 16, 1987.

FOR FURTHER INFORMATION CONTACT: Richard Van Iderstine, Office of Rulemaking, NHTSA, Washington, DC (202-366-5280).

SUPPLEMENTARY INFORMATION: With the advent of the replaceable bulb headlamp, motor vehicle and lighting manufacturers have shown an interest in headlamp, designs which combine headlighting with other lighting functions such as parking lamps or fog lamps. Figure 1b of Standard No. 108 establishes the minimum and maximum allowable candle power values for several items of lighting equipment required as original equipment on motor vehicles, including yellow front turn signals. According to Footnote 3 to Figure 1b some of these values "apply when the optical axis (filament center) of the front-turn signal is at a spacing less than 4 in. (10 cm.) from the lighted edge of the headlamp unit providing the lower beam, or from the lighted edge of any additional lamp installed as original equipment or used in lieu of the lower beam." Manufacturers have asked the agency for interpretations of this language as it affects the spacing between turn signals and front lamps that combine headlighting with other functions. These requests have demonstrated that a literal reading of the language results in an overly restrictive interpretation and one which the agency did not intend.

For example, Koito Manufacturing Co. of Japan submitted a drawing depicting a headlamp and a parking lamp in a common chamber, upartitioned, consisting of a lens and a reflector. The parking lamp would be separate and outboard of the headlamp-parking lamp. Koito asked whether the 4 inches specified is to be measured from the edge of the effective area of the optical design of the headlamp or from the edge of the lens adjacent to the parking lamp. Because a parking lamp is an "additional lamp installed as original equiment," a literal interpretation requires that measurement be made from the edge of the lens adjacent to the parking lamp. However, the candela of the parking lamp is so low compared with that of the turn signal lamp, 500 minimum, that it will never conflict with it, and there is no safety reason requiring that measurement take it into account. In adopting Footnote 3 the agency had in mind lamps that are not covered by Standard No. 108 but which a manufacturer might wish to install as original equipment, such as fog lamps or passing lamps. Unlike parking lamps, these lamps supplement the lower beam headlamp, and this fact gave rise to the agency's erroneous phrase "or used in lieu of the lower beam." The agency is not aware of any State in which a lamp may be used in place of the lower beam during such time as headlamp use is required.

The agency has therefore concluded that a technical correction to Footnote 3 is required to reflect its true intent. It is amending the phrase "from the lighted edge of any additional lamp installed as original equipment or used in lieu of the lower beam" to read "from the lighted edge of any additional lamp installed as original equipment and which supplements the lower beam."

Because the amendment is corrective in nature, imposes no additional burden upon any person, and has no safety consequences, it is hereby found that notice and comment thereon are not necessary, and that for good cause shown that an effective date earlier than 180 days after issuance of the rule is in the public interest. The amendment is effective 30 days after publication in the **Federal Register.**

NHTSA has considered this amendment and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation" or significant under Department of transportation regulatory policies and procedures, and that neither a regulatory impact analysis nor a regulatory evaluation is required. The amendment imposes no additional requirements nor alters the cost impacts of requirements already adopted.

NHTSA has analyzed this rule for purposes of the National Environmental Policy Act. The rule will have no effect on the human environment since it clarifies an existing requirement.

The agency has also considered the impact of this amendement under the Regulatory Flexibility Act. I certify that the amendment will not have a significant econmic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles, those businesses affected by the amendment, generally are not small businesses within the meadning of the Regulatory Flexibility Act. Finally, small organizations and governmental jurisdictions will not be affected by this amendment since prices will not be impacted.

VOL 52 ISS 200 OCT 16 1987 UMI

PART 571—[AMENDED]

List of Subjects in 49 CFR Part 571

Motor vehicle safety.

In consideration of the foregoing Part 571 is amended as follows:

1. The authority citation for § 571.108 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.108 [Corrected]

2. Footnote 3 to Figure 1b is revised to read:

[3] Values apply when the optical axis (filament center) of the front turn signal is at a spacing less than 4 in. (10 cm.) from the lighted edge of the headlamp unit providing the lower beam, or from the lighted edge of any additional lamp installed as original equipment and which supplements the lower beam.

Issued on: October 9, 1987.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

[Docket No. 61220-7033]

Foreign Fishing, Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment.

SUMMARY: This action reapportions surplus domestic annual processing (DAP) amounts of Atka mackerel to joint venture processing (JVP) in each of the Western and Central Regulatory Areas of the Gulf of Alaska. This action is intended as a conservation and management measure that provides for full utilization of available groundfish resources off Alaska during 1987.

DATES: This notice is effective on October 13, 1987.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker (National Marine Fisheries Service, 907-586-7229.

SUPPLEMENTARY INFORMATION:

Background

Domestic and foreign groundfish fisheries in the exclusive economic zone (EEZ) of the Gulf of Alaska are managed in accordance with the Fishery Management Plan for Groundfish of the Gulf of Alaska, which was developed by the North Pacific Fishery Management Council (Council) under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act) and implemented by regulations appearing at 50 CFR 611.92 and Part 672. Under § 672.20(d)(1)(ii) of this Part, the Secretary of Commerce (Secretary), after consultation with the Council, may apportion to domestic annual harvesting (DAH) on such dates any amounts of any reserve that he determines to be needed to supplement DAH. Target quotes (TQs) for groundfish species in the Gulf of Alaska are established under § 672.20(a)(2). The sum of the TQs for all species must fall within the established optimum yield (OY) range for these species of 116,000–800,000 metric tons (mt) as described at 52 FR 7868 (March 13, 1987).

TQs are apportioned initially among domestic annual processing (DAP), joint venture processing (JVP), reserves, and total allowable level of foreign fishing (TALFF) for each species under §§611.92 and 672.20(a)(2). DAP amounts are intended for harvest by U.S. fishermen for delivery and sale to U.S. processors. JVP amounts are intended for joint ventures in which U.S.fishermen deliver their catches to foreign processors at sea. The reserves for the Gulf of Alaska are 20 percent of the TQ for each species category. These amounts are set aside for possible reapportionment to DAP and/or to JVP if the initial apportionments prove inadequate.

The Regional Director has determined that U.S. harvesting vessels, which process their catch on board or deliver their catch to U.S. processors will only harvest 10 metric tons (mt) of Atka mackerel in each of the Western and Central Regulatory Areas of the Gulf of Alaska for the remainder of 1987. These amounts are expected to be taken as bycatch in other target groundfish fisheries. This determination is based on DAP catches of Atka mackerel to date and results of NMFS industry surveys which indicate the extent to which the Atka mackerel DAP would be processed during the remaining months of 1987. Although current reported DAP catches of Atka mackerel for 1987 are zero, the Regional Director projects that DAP catches will equal 10 mt during the remaining months of 1987. Currently, the DAPs for Atka mackerel for the Western and Central Areas are 80 and 75 mt, respectively. On October 2, 20 mt of Atka macherel were reapportioned from DAP to JVP in the Western Area (52 FR 37464, October 7, 1987).

Since DAP needs for Atka macherel are lower than the current allocation, and JVP needs for this species are higher than the current allocation, the Secretary agrees with the Regional Director and is reapportioning 70 mt and 65 mt of surplus DAP for Atka macherel to JVP in the Western and Central Regulatory Areas, respectively. This leaves 10 mt of Atka macherel for DAP for both the Western and Central Areas of the Gulf of Alaska. This action is taken under § 672.20(d)(2). The resulting reapportionments (see table below) will allow foreign processors receiving groundfish in joint venture operations to purchase and retain catches of Atka macherel from U.S. fishermen, thereby providing economic benefits to those U.S. fishermen.

Species	Area	Species code	TQ	DAH	DAP	JVP	Reserve	TALFF
Atka mackerel	W	207	100	100	10	90	0	0
	C		100	100	10	90	0	0
	E		40	40	40	0	0	0
	Total		240	240	60	180	0	0

Classification

This action is taken under the authority of 50 CFR 611.92 and 672.20 and complies with Executive Order 12291.

The NOAA Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice is necessary to benefit U.S. fishermen delivering to foreign processors who otherwise would forgo amounts of Atka mackerel if those amounts remainded in DAP. An immediate opportunity to harvest Atka mackerel in JVP fisheries could result in

substantial economic gain. Interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

BILLING CODE 3510-22-M

---

50 CFR Part 663

[Docket No. 70101-7001]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of fishing restriction and request for comments.

SUMMARY: NOAA issues this notice modifying earlier restrictions to limit the levels of fishing for widow rockfish taken in the groundfish fishery off the coasts of Washington, Oregon, and California, and seeks public comment on this action. This action is authorized under regulations implementing the Pacific Coast Groundfish Fishery Management Plan and is necessary because biological stress to widow rockfish is expected to increase if landings are not restricted. This action is intended to lower fishing rates, reduce the risk of biological stress while allowing for unavoidable incidental catches in other fisheries, and reduce the probability of fishery closure before the end of the year.

DATES: Effective 0001 hours (Pacific Daylight Time), October 14, 1987, until modified, superseded, or rescinded. Comments will be accepted through October 28, 1987.

ADDRESSES: Send comments to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115; or to E. Charles Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten at 206-526-6150, E. Charles Fullerton at 213-514-6196, or the Pacific Fishery Management Council (Council) at 503-221-6352.

SUPPLEMENTARY INFORMATION: At its September 16-18, 1987 meeting, the Council evaluated catch rates of widow rockfish and recommended to the Secretary of Commerce (Secretary) that when 95 percent of the 12,500 metric ton optimum yield (OY) quota is projected to be reached, the weekly trip limit will be lowered from 30,000 pounds to 5,000 pounds per vessel per trip, limited to no more than one landing a week above 3,000 pounds. As a result, the Secretary published a notice of fishing restrictions on October 7, 1987 (52 FR 37466) which announced his concurrence with the Council's recommendation and stated that this reduced trip limit will be implemented by separate notice in the **Federal Register**. All other provisions of the trip limit for widow rockfish announced at 52 FR 790 (January 9, 1987), as modified at 52 FR 15726 (April 30, 1987), which changes the fishing week from Sunday-Saturday to Wednesday-Tuesday, will remain in effect.

The best available scientific information as of October 6, 1987 indicates that 95 percent of the OY will be landed by October 14, 1987. Accordingly, the trip limit for widow rockfish is reduced to 5,000 pounds effective October 14, 1987, which is the beginning of the fishing week. The States of Washington, Oregon, and California are taking similar action effective October 14, 1987.

This reduction is intended to allow most incidental catches of widow rockfish to be landed, while greatly reducing target fishing on this species. If this action does not sufficiently control landings, additional restrictions may be necessary. If the OY is reached before the end of the calendar year, further landings of widow rockfish will be prohibited. The rationale and overall intent of this action are more fully discussed in the notice at 52 FR 37466.

Secretarial Action

For the reasons stated above and in the notice at 52 FR 37466, the Secretary announces the following:

(1) No more than 5,000 pounds (round weight) of widow rockfish may be taken and retained, or landed, per vessel per fishing trip in a one-week period. Only one landing of widow rockfish above 3,000 pounds (round weight) may be made per vessel in that one-week period. "One-week period" means seven consecutive days beginning 0001 hours Wednesday and ending 2400 hours Tuesday, local time.

(2) This restriction applies to all widow rockfish taken and retained 0-200 nautical miles offshore of Washington, Oregon, or California. All widow rockfish possessed from 0-200 nautical miles offshore of, or landed in, Washington, Oregon, or California are presumed to have been taken and retained from 0-200 nautical miles offshore of Washington, Oregon, or California unless otherwise demonstrated by the person in possession of those fish.

This limit applies to vessels of the United States, including those vessels delivering groundfish to foreign processors. Retention of this species by foreign fishing or processing vessels is limited by incidental percentage limits established under § 611.70.

U.S. vessels operating under an experimental fishing permit issued under § 663.10 also are subject to these restrictions unless otherwise provided in the permit.

Landings of groundfish in the pink shrimp, spot and ridgeback prawn fisheries are governed by regulations at § 663.28. If fishing for groundfish and pink shrimp, spot or ridgeback prawns in the same fishing trip, the groundfish restrictions in this notice apply.

Classification

The determination to impose this fishing restriction is based on the most recent data available. The aggregate data upon which the determination is based are available for public inspection at the office of the Director, Northwest Region (see **ADDRESSES**) during business hours until the end of the comment period.

This action is taken under the authority of 50 CFR 663.22 and 663.23, and is in compliance with Executive Order 12291. The action is covered by the Regulatory Flexibility Analysis prepared for the authorizing regulations.

Section 663.23 of the groundfish regulations states that the Secretary will publish a notice of action reducing fishing levels in proposed form unless he determines that prior notice and public review are impracticable, unnecessary, or contrary to the public interest. If landings of widow rockfish are not immediately restricted, premature closure of the widow rockfish fishery will result. Accordingly, further delay of this action is impracticable and contrary to the public interest, and this action is published in final form effective October 14, 1987.

The public has had the opportunity to comment on these management

measures. The public participated in Groundfish Select Group, Groundfish Management Team, and Council meetings in August and September 1987 that generated the management actions endorsed by the Council and the Secretary, in addition to the Groundfish Management Team meeting in October 1987. A public comment period followed publication of the October 7, 1987, notice at 52 FR 37466 announcing this action. Further public comments will be accepted for 15 days after date of filing with the Office of the Federal Register.

Proposed Rules

Federal Register
Vol. 52, No. 200
Friday, October 16, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of marketing policy.

SUMMARY: This notice sets forth a summary fo the 1987–88 marketing policy for navel oranges grown in California and Arizona. The marketing policy was discussed and approved on September 16, 1987, by the Navel Orange Administrative Committee, which locally administers the marketing order covering California-Arizona navel oranges. The marketing policy contains information on crop and market prospects for the 1987–88 session.

DATE: Written suggestions, views, or pertinent information relative to the marketing of the 1987–88 California-Arizona navel orange crop will be considered if received by October 26, 1987.

ADDRESS: Interested persons are invited to submit written statements in triplicate to: Docket Clerk, Room 2085–S, F&V, AMS, USDA, P.O. Box 96456, Washington, DC 20090–6456. Such submissions should reference the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC. 20090–6456; telephone: (202) 447–5697. Growers and handlers of navel oranges may obtain a copy of the marketing policy directly from the Navel Orange Adminstrative Committee. Copies of the marketing policy are also available from Mr. Cioffi.

SUPPLEMENTARY INFORMATION: Pursuant to § 907.50 of the marketing order covering navel oranges grown in Arizona and designated part of California, the Navel Orange Administrative Committee, hereinafter referred to as the "committee", is required to submit a marketing policy to the Secretary prior to recommending regulations for the ensuing season. The order, issued pursuant to the Agricultural Marketing Agreement Act (the "Act", 7 U.S.C. 601–674), as amended, authorizes volume and size regulations applicable to fresh shipments of navel oranges to domestic markets which are defined by the order to include Canada. Regulation of export shipments of navel oranges and navel oranges utilized in the production of processed orange products is not authorized under the order.

Section 907.50 of the marketing order reads as follows:

"(a) Prior to the recommendation for regulation for each prorate district, the committee shall submit to the Secretary its marketing policy for the ensuing season. Such marketing policy shall contain the following information: (1) The available crop of oranges in the prorate district, including estimated quality and composition of sizes; (2) the estimated utilization of the crop, showing the quantities and percentages of the crop that will be marketed in domestic, export, and by-product channels, together with quantities otherwise to be disposed of; (3) a schedule of estimated weekly shipments to be recommended to the Secretary during the ensuing season; (4) available supplies of competitive oranges in all producing areas of the United States; (5) level and trend of consumer income; (6) estimated supplies of competitive citrus commodities; and (7) any other pertinent factors bearing on the marketing of oranges. In formulating its marketing policy, the committee should give due consideration to the onset and duration of prorate, and size regulation. In the event that it becomes advisable to substantially modify such marketing policy, the committee shall submit to the Secretary a revised marketing policy setting forth the information as required in this paragraph."

The committee adopted its marketing policy for the 1987–88 marketing season at its September 16, 1987, meeting. Various meetings to develop, discuss, and review the committee's marketing policy were held throughout the production area on August 18 and 25 in Los Angeles, California, September 3 in Lindsay, California, and September 10 in Phoenix, Arizona. In addition, meetings to discuss and review the marketing policy were held on September 22 in Visalia, California and October 6 in Redlands, California. Substantial numbers of industry representatives were present at many of these meetings. The marketing policy is intended to inform the Secretary and persons in the industry of the committee's plans for recommending regulation of shipments during the marketing season and the basis therefor. The committee evaluates market conditions and makes recommendations to the Secretary as to the quantity of navel oranges that can be shipped each week to domestic outlets during the season, without disrupting markets. Under certain conditions, the committee may recommend size regulations applicable to fresh domestic shipments.

In addition to providing the Secretary with information specified in the marketing order about crop and marketing conditions, the policy statement affords an opportunity for growers and handlers to gain a broad perspective of the industry as it relates to all prorate districts and supplies a view of the anticipated economic environment in which the total crop will be marketed. The committee identified an array of general considerations in formulating its 1987–88 marketing policy. It indicated that the industry is essentially stable, consisting of about 118,000 acres of navel orange trees. However, despite the general stability in planted acreage, there is a sizeable variation in year-to-year production for reasons beyond the control of growers and handlers, e.g., weather and alternate bearing tendencies. This inherent variability requires a high degree of flexibility in handling and marketing navel oranges within a single marketing season.

Another important characteristic of the navel orange to which the committee called attention is that the navel is primarily a fresh market orange, in contrast with other citrus varieties which have viable alternative uses. Juice from navel oranges develops a bitter off-flavor within a short time after it has been squeezed. This characteristic

precludes its use for juice except when blended with juice from other varieties of oranges, and in most recent years, prices received for navels sold to processors have produced negative returns in terms of on-tree prices.

The committee stated that the importance of the fresh market means that fruit quality is a primary consideration for navel orange growers. There are many factors affecting quality beyond the control of growers. For example, the varied climates in which navels are grown and the various weather conditions that occur produce a variety of skin texture and thicknesses of peel as well as a range of sizes of fruit.

Another major characteristic of navels considered by the committee in developing its marketing policy is the ability of the fruit to be held on the trees for an extended period. This has proven to be useful in extending shipments throughout the marketing season while narrowing fluctuations in short term volume. In many other crops, mature fruit can be harvested and stored for an extended marketing period. However, the marketing policy points out that navels are not amendable to this storage practice as they develop flavor characteristics making them unusable for any purpose. Therefore, the industry has developed a variety of strategies which extend the navel season. These include the use of growth regulators which can delay maturity for long periods, planting of early and late maturing varieties, and the use of frost protection devices.

In its 1987–88 marketing policy, the committee projected the California-Arizona navel orange crop at 49,000 cars (1,000 cartons at 37 1/2 pounds net weight each equals one car). This compares with last year's estimated total production of 71,900 cars. The National Agricultural Statistics Service's (NASS) September estimate for the 1987–88 crop was 52,000 cars for the State of California, which when combined with the committee's estimate of 1,100 cars for the Arizona desert valley, totals 53,100 cars for the entire production area.

The committee estimates District I, Central California, 1987–88 production at 41,500 cars compared to 60,300 cars produced in 1986–87. In District 2, Southern California, the crop is estimated to be 6,100 cars compared to 9,400 cars produced last year. In District 3, the Arizona-Calfornia desert valley, production of 1,100 cars is forecast, compared to 1,600 cars in 1986–87. In District 4, Northern California, a 300 car crop is projected compared to 525 cars last year.

The committee projected much larger orange sizes in the 1987–88 crop than the previous year. In fact, the projected average number of oranges per carton at the mid-point of the season indicates the largest average size on record. Because of the larger fruit sizes, the skin texture of the fruit is not expected to be as smooth or as thin as the past season. Fruit quality is expected to be near average, ranging from excellent to below average.

In estimating the proportion of the crop destined for domestic fresh market outlets, the committee stated "* * * the domestic market will absorb all the fruit that meets quality standards and is economically feasible to ship * * *" On this basis, the Committee estimated that shipments to domestic fresh outlets, including Canada, during the 1987–88 season would account for 36,600 cars. Last year a total of 47,621 cars were shipped to fresh domestic markets. Fresh export shipments are expected to total 5,000 cars compared to 6,069 last year. Processing and other dispositions are forecast at 7,400 cars compared to 18,184 cars last year.

Based on current projections, shipments are expected to begin at the end of October and finish in late May. The committee has developed a schedule of estimated weekly shipments covering the 1987–88 season.

The committee reports that Florida round orange production is expected to be 254,000 cars, about 6 percent greater than last year. In Texas, orange production for the 1987–88 season is expected to be 2,700 cars, an increase of more than 50 percent from last season. Production of apples is estimated at 230.7 million bushels in 1987–88 compared to 187.9 million bushels in 1986–87. The fresh winter pear pack is estimated at 10.1 million bushels in 1987–88 compared to 9.2 million bushels last year. Of increasing importance in the supply of competitive non-citrus fruit are "summer fruit" importations from Chile (nectarines, plums, peaches, grapes and apples), and it is expected that this upward trend will continue. General economic conditions are expected to be favorable.

In terms of total crop utilization, the committee expects 75 percent of the 1987–88 crop to be accounted for in domestic fresh markets compared with 66 percent in 1986–87; fresh exports are projected to use 10 percent of total 1987–88 utilization compared with 9 percent in 1986–87; processed and other uses would account for the residual 15 percent compared with 25 percent in the last season. Expressed in terms of actual changes in the volume of navels shipped or processed, domestic fresh market shipments would be down about 23 percent from 1986–87 estimates, export shipments would be down about 18 percent and processed and other utilization would fall approximately 59 percent.

The 1986–87 season average fresh equivalent on-tree grower returns for California-Arizona navel oranges as reported by the NASS were $3.70 per carton. This was about 72 percent of the equivalent season average parity of $5.16 per carton. The 1987–88 equivalent seasonal parity is projected to be $5.45 per carton.

Preliminary indications are that 1987–88 season grower returns for California-Arizona navel oranges may equal or exceed the equivalent seasonal parity. The Act authorizes regulations in an above parity situation. Section 602(4) of the Act provides that regulations may be issued "* * * to establish and maintain such orderly marketing conditions for any agricultural commodity * * * in the interests of producers and consumers, an orderly flow of the supply thereof to market throughout its normal marketing season to avoid unreasonable fluctuations in supplies and prices." The committee's marketing policy states that recommendations for volume regulation at the onset of the season would be made for the purpose of creating conditions of orderly marketing pursuant to § 602(4) of the Act.

Section 907.52 of the naval orange marketing order provides authority for regulation in an above parity situation, stating: "* * * Such regulation may be made effective; as authorized by the Act, irrespective of whether the season average price for navel oranges is in excess of the parity price specified thereof in the act. * * *"

In discussing the possible need for prorate regulation early in the season, the marketing policy indicated that early varieties are reported to have a near normal crop and have not been adversely affected by unfavorable conditions that have affected later varieties (excessive temperatures and a dry winter). Consequently, the committee anticipates there will be abundant, normal supplies at the beginning of the season.

In view of the above, it is the committee's view that early shipments without volume regulation could be excessive and disruptive to the early market and to the market immediately following that time. The committee states that such conditions would be contrary to the purposes of the Act, and one of its objectives is providing for an orderly flow of fruit to the market, for the benefit of growers and consumers.

The committee anticipates that volume regulations likely will be recommended to the Secretary near the very early part of the season, perhaps as early as the first week ending in November. It points out that such recommendations, of course, will depend on the rate of the early harvest and anticipated market conditions at the time regulations are considered. The committee believes it is essential to the successful marketing of the entire crop that shipments be made in an orderly manner from the beginning of the season.

Section 907.51(b) of the marketing order identifies areas the committee should consider in recommending prorate regulation and reads as follows:

"In making its recommendations, the committee shall provide equity of marketing opportunity to handlers in all districts and shall give due consideration to the following factors: (1) Market prices for oranges, including market prices by grades and sizes; (2) supply of oranges on track at, and en route to, the principal markets; (3) supply, maturity, and condition of oranges in the area of production including the grade and size composition thereof; (4) market prices and supplies of citrus fruits from California, Arizona, and competitive producing areas, and supplies of competitive fruits; (5) trends and level in consumer income; and (6) other relevant factors."

In order to provide an opportunity for public input, the Department will accept written views and information pertinent to the marketing policy and the need for, or level of, regulation for the 1987–88 season. Due to the possibility of season average prices above the equivalent season parity, comments are invited on the appropriate levels of fresh oranges which can be made available to the fresh domestic market and the intraseasonal dispersion of shipments. Interested persons are also invited to comment on the possible regulatory and informational impact of this marketing policy and seasonal volume regulations on small businesses. This notice provides a 10-day period for the receipt of comments. This period is considered to be adequate due to the number of meetings held throughout the production area, both prior to and subsequent to the adoption of the marketing policy, at which such policy was reviewed and discussed by industry representatives and interested persons.

Publication of this summary of the marketing policy is to provide information as to potential regulations. This action does not create any legal obligations or rights, either substantive or procedural.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: October 13, 1987.

Charles R. Brader,

Director, Fruit and Vegetable Division.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 129

Small Business Development Center Program

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The Small Business Administration proposes to adopt the following comprehensive rule to govern the operations of the Small Business Development Center Program, a small business assistance delivery program. SBA intends that these proposed rules provide a framework for the effective and efficient operation of the program.

DATE: Comments will be accepted until November 16, 1987.

ADDRESS: Written comments should be addressed to Ms. Janice Wolfe, Deputy Associate Administrator for Business Development/Small Business Development Centers, 1441 L Street NW., Room 317, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Mr. J. Hardy Patten, (202) 653–6315.

SUPPLEMENTARY INFORMATION: The Small Business Development Center (SBDC) Program was originally established in 1980 by Pub. L. 96–302, which amends section 21 of the Small Business Act (15 U.S.C. 648). It was later amended by Pub. L. 98–395 in 1984. Many of the provisions set forth in this proposed rule are contained in one of the Public Laws or have stemmed from the operations of the program since its inception.

On October 23, 1986, at 51 FR 37580, SBA published proposed regulations governing the SBDC program. The public was afforded 60 days to comment on that proposal. By notice in the **Federal Register** on November 21, 1986, SBA extended that comment period by an additional 30 days (see 51 FR 42255). During the 90 days which SBA afforded the public to comment on the proposed SBDC regulations, SBA received approximately 200 comments in response to that publication. A detailed analysis of the issues raised by the public comment has been made a part of this Supplementary Information. SBA has now evaluated all of the public comments and these proposed regulations represent the results of that evaluation. SBA recognizes the complexity of some of the issues addressed in these rules, and is, therefore, publishing these revised rules in proposed form and soliciting public comment on the rules for 30 days.

Review of Issues Raised by Public Comments and Summary of Changes to the Proposed Regulation

SBA has carefully reviewed all of the over 200 comments received during the 90 day public comment period. Where appropriate, SBA has made changes to the proposed regulations to reflect the views of the commenters. Where SBA has not agreed with the comments regarding particular issues raised by the regulations, SBA's rationale for retaining the original proposal is given. In some cases, minor technical changes were made to correct omissions or clarify the intent of the original proposed rule.

Several commenters objected to SBA's statement in the Summary to the October 1986 proposed rule that one of the purposes of the rule was "to insure that the program operations are uniform nationwide." SBA certainly supports a diverse and flexible SBDC program which can accommodate the varied needs of small businesses across the nation. SBA also believes that administrative and financial requirements of the program, such as those addressed by the appropriate Office of Management and Budget Circulars, should be uniform where possible. To avoid any misunderstanding of the purpose of these regulations, the sentence at issue does not appear in the Summary to this proposed rule.

The comment letter received on behalf of the SBDC Directors Association objected to SBA's certification under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), that the October 1986 proposed rule, if promulgated in final form, would not have a significant economic effect *directly* on a substantial number of small entities. It was the view of the commenter that such economic effect need not be direct in order to trigger the RFA requirement that a Regulatory Flexibility Analysis be included in the preamble of the regulation.

SBA's interpretation of the RFA requirement is based on a U.S. Court of Appeals case, *Mid-Tex Electric Cooperative v. Federal Energy Regulatory Commission (Mid-Tex)*, 773 F. 2d 327, 340–343 (1985). In *Mid-Tex*, the Court held that, in complying with the RFA, an agency need only look to the economic impact on the small entities

subject to the regulation and not to the impact on those which might be indirectly affected by the regulation.

Section 129.10 Introduction.

Some commenters objected to the phrasing of this section because, in their view, the language did not clearly delineate the separate responsibilities of SBA and the SBDC Director in a decentralized program. The section has been amended to address that concern.

Subparagraphs (c)(2) and (3) discussing the relationships between SBDCs and other SBA-funded programs have been deleted in response to comments that such relationships should not be governed by regulations.

Section 129.11 Definitions.

Some new definitions have been added to this proposed section, as noted below. The subsections are proposed to be renumbered as necessary.

Several commenters noted that the definition of "cash match" (subsection (c)) was not consistent with an October 1986 SBA Notice on the subject. The definition has been amended to clarify that direct costs committed by the applicant as specific line item costs prior to funding for such items as personnel services and fringe benefits would be considered cash match for purposes of this program.

Some commenters objected to the definition of "conflict" (subsection (d)) because it failed to recognize that once a Cooperative Agreement has been signed, it governs all program matters to which a disagreement could relate. SBA agrees with this objection and has amended the subsection accordingly.

Many commenters disagreed with SBA's effort to restate the requirements of the OMB Circulars in these regulations, rather than cross-referencing the Circulars. The commenters would prefer simple references to the appropriate Circulars where necessary. SBA has adopted this approach and has referenced the OMB Circulars in amended subsections (e), (m), (n), and (u) defining Direct Costs, Indirect Costs, In-Kind Costs and Program Income, respectively. Subsection (u), Program Income, is a new definition, which was added to these proposed regulations for clarity.

SBA notes, however, that on June 9, 1987, the Agency published a proposed rule amending the provisions of OMB Circular A-102 concerning the administration of Grants and Cooperative Agreements with State and local governments. *See* 52 FR 21824. The proposed rule was based on a model regulation prepared by a task force of representatives of OMB and other interested agencies. A similar effort is underway regarding OMB Circular A-110. Once those regulations are adopted in final form, SBA intends to amend these regulations for consistency on Grants/Cooperative Agreement administration matters.

Several commenters questioned whether teaching a course outside of working hours would diminish the full-time status of an employee. SBA wishes to make clear that nothing in these regulations would preclude a full-time employee from teaching one course outside of the normal SBDC workweek. However, any full-time employee intending to teach two or more courses or to teach during the hours of operation of the SBDC would be expected to receive SBA approval prior to engaging in such activity. (See § 129.17(b)(4) Staff and Access Requirements.)

Subsection (j), Grants/Cooperative Agreement Appeals Committee was redefined generally. The amended definition would authorize the Administrator to appoint the membership of the Committee, in his or her discretion.

Minor technical changes are proposed to subsections (j), (k), and (l) defining the terms "Grants Management Branch Chief" and "Grants Management Officer."

Some commenters questioned SBA's definition of lobbying (redesignated subsection (q)), citing the difficulty of raising the statutorily required matching funds under the definition as proposed. SBA has no intention of limiting the ability of the SBDCs to acquire matching funds. Therefore, SBA proposes to amend the exceptions to the definition of lobbying (subparagraph (q)(2)(ii)) to permit lobbying to obtain matching contributions. It is the Agency's view that this change would be consistent with the requirements of the Small Business Act and with the Federal government-wide policy against subsidizing lobbying with Federal funds.

A definition of "Qualified Independent Public Accountant" (subsection (y)) was added to comply with the **Federal Register** requirements that, where possible, terms used in regulations should be defined in those regulations and not by reference to outside sources. (*See* § 129.21(e)(2)(ii).)

Subsection (dd) defines the term "SBDC State Director." Some commenters found the term misleading because some SBDCs are regional and not statewide. In the history of the program, "SBDC State Director" has come to mean the Director of the SBDC Network, regardless of its area of service. Therefore, SBA has retained the term in these proposed regulations. Further, this definition has been amended to include a statement clarifying that, as part of his or her full-time management duties, an SBDC State Director may manage other Federal and State government programs that are concerned with aiding small business in a manner otherwise authorized for SBDCs by the Small Business Act. Such management would be part of the State Director's full-time duties, and as such, would not be the basis of additional compensation. This clarification resulted from an Opinion of the SBA General Counsel of December 9, 1986, interpreting the statutory requirements that an SBDC employ a full-time director and that the SBDC "make full use of other Federal and State government programs that are concerned with aiding small business;" (*see* section 21(c)(2)(A) of the Small Business Act, 15 U.S.C. 648(c)(2)(A)).

Subsection (ff) defines the term "Subcenter Director." Many commenters noted that some subcenters do not require full-time managers. To require that a subcenter director be a full-time manager, as the October 1986 proposed regulations did, would be detrimental to the efficient operation of the program in some States. SBA proposed to adopt the changes to this definition recommended by the commenters and to delete the "full-time" requirement from the definition of subcenter director.

Some commenters thought that the definition of "working days" (subsection (gg)) inappropriately referenced Federal holidays and should have permitted State holidays or other holidays as agreed upon in the Cooperative Agreement. Since many lead SBDCs are State universities, some commenters believed that State holidays may be more appropriate. SBA agrees with this comment and proposes to amend the definition of working days to exclude Saturdays, Sundays and "those holidays designated in the Cooperative Agreement." In general, the Cooperative Agreements have allowed 12 holidays per SBDC each year. SBA expects that this practice will continue.

Section 129.13 Allocation of funds.

One commenter suggested that the third service category (increased services provided to areas already served by SBDCs established within the previous three years) and the fourth service category (increased services to areas already served by SBDCS established prior to the previous three years) be reversed. Since the priority of service categories (2) through (5) is to be determined for the individual SBDC based on the needs and goals of the

small business community to be served by that SBDC, no purpose would be served by reversing the service categories. Therefore, SBA did not adopt the suggested change.

Section 129.14 Application Procedure.

Several commenters expressed their view that application procedures should remain as flexible as possible and, therefore, should not be the subject of regulations. In order to provide the public with an overview of the application process without eliminating its flexibility, SBA proposes to modify the regulations to generally describe the process and to delete the specific application requirements previously found in § 129.14(b)(2).

Subsection (c) discusses amendments to the application. In response to some comments calling for clarification on this subject, SBA proposes to add a provision making clear that an applicant may submit an amendment to its application at any time for SBA's review. Further, SBA proposes to amend the provision to state that once the Cooperative Agreement is awarded, no amendment, whether submitted by the applicant on its own accord or in response to a request from SBA, is effective until it has been made a part of the Cooperative Agreement by the Grants Management Officer.

In response to public comment, SBA proposes to amend subsection (d), Competing Applications, to state clearly its policy that competing applications will be accepted in states with a currently operating SBDC only after the SBDC has been in operation for five years or more or when SBA has made a decision not to refund an existent SBDC for reasons of nonperformance, poor performance, a disregard for or violations of the regulations or any of the reasons listed in the regulation ("previously causes for terminations"). This proposed policy regarding acceptance of competing applications would apply to applications submitted by subcenters of the operating SBDC as well as by other eligible entities. The proposed policy reflects the agancy's experience that a five year start-up period is generally required for an SBDC to become fully operational. It also incorporates the Agency's view that to allow competing applications to be considered before the SBDC is established and absent a showing of one or more of the above-mentioned causes would be unfair to the SBDC.

One commenter suggested that subsection (e) be amended to allow the agency longer than seven months from the effective date of the Cooperative Agreement. It was the commenter's view that, in light of the filing deadlines on the quarterly reports (45 days after the end of the quarter), the regulation would require a decision not to refund to be made based on only one quarter's performance. SBA considered adjusting the timeframes as suggested by the commenter, but found it impractical to do so in light of the necessity for notice and an opportunity for the SBDC to correct its defective performance.

Another commenter objected to the fact that the procedures outlined in paragraphs (e) (1) through (5) which relate to decisions not to refund operating SBDCs do not incorporate an arbitration by an independent board. It is the agency's view that such arbitration is not called for because the proposed regulations would require notice to the SBDC of the reasons for the proposed decision and an opportunity to correct its deficiencies as well as an opportunity to discuss its case at the District and Regional Office levels before a final decison is made by the Central Office.

SBA proposes to adopt the suggestion of another commenter that the regulation clearly state a period for close-out of an SBDC once SBA has decided not to refund it. Therefore, SBA proposes to amend paragraph (e)(4) to provide for a period of 60 days after SBA has made a decision not to refund an SBDC for that SBDC to conclude its federally funded activities and to submit appropriate documents to the SBA District Office.

Several commenters questioned the purpose of subsection (i), which would require certain employees to submit completed Standard Forms 912 within 30 days of the issuance of the Cooperative Agreement. Such information would enable SBA to perform a criminal background check and are a standard requirement for many SBA programs where individuals are managing substantial Federal funds. SBA has attempted to minimize the proposed regulatory requirement as much as possible by limiting the group of employees to which it would apply and by not requiring its submission prior to the award of the Cooperative Agreement.

Several commenters found the Conflicts Resolution Policy set forth in subsection (k) to be cumbersome. SBA notes that subsection (k) describes the current system for resolving such conflicts which was developed at a joint meeting of SBA and the SBDC State Directors in 1984. While SBA agrees that some streamlining of those producers, as well as those governing disputes resolutions, may be in order, delaying publication of the entire regulation to do so did not seem prudent. SBA does intend to study these procedures over the next several months with an eye toward increasing their effectiveness and eliminating duplication where possible.

Subsection (1), dealing with financial disagreements, is proposed to be amended to shorten the decision process by making the decision of the Grants Management Officer a final decision and by eliminating an appeal to the Grants Management Branch Chief. SBA decided to propose these changes to make the process consistent with the contract dispute resolution procedures used by SBA and other Federal agencies. Moreover, the appeal process proposed in the October 1986 rule would not afford a separate and independent review of the matter since the Grants Management Branch Chief would be responsible in a supervisory capacity for the issuance of the initial decision and, in all likelihood, would be in agreement with that decision.

Section 129.15 Cooperative Agreement.

In response to public comment, SBA proposes to make several amendments to § 129.15 concerning the Cooperative Agreement.

SBA proposes to change subsection (b), Revision to the Cooperative Agreement, in one respect: To require the SBDC to notify SBA in the quarterly report of funding transfers within its budget for that quarter. The October 1986 proposed rule required notice of each transfer as it occurred. The notice requirement was included so that SBA and the SBDC would be aware of the SBDC's cumulative transfers exceeding the 5 percent point, which is the threshold required by OMB Circulars. The compromise adopted in this proposed rule was reached to accommodate the commenters' concern that the proposed reporting requirements were too burdensome, and SBA's interest in maintaining adequate controls on the expenditures of Federal funds and in complying with OMB's guidelines on financial administration.

For reasons discussed above under the procedure for resolving Financial Disagreements, (§ 129.14(1)), SBA proposes to amend subsection (c), Disputes, to eliminate the decision of the Grants Management Branch Chief and to provide for an appeal to a Grants/Cooperative Agreement Appeals Committee which is authorized to make a final decision. These proposed changes would be procedural in nature and would not affect the substantive rights of the recipient organization or the SBDC.

1987
UMI

Several commenters would have preferred SBA's inclusion of a non-SBA party on the Grants/Cooperative Agreement Appeals Committee (G/CA Appeals Committee). SBA did not adopt this suggestion because SBA is primarily responsible for ensuring the proper use of Federal funds in the SBDC program and because involvement of non-SBA individuals would delay the decision process.

One or two commenters urged SBA to impose a time limit on the Committee for issuance of its decisions. SBA has determined that adoption of this suggestion is not advisable because of the substantially different time frames required for decisions where factfinding by the Office of Hearings and Appeals is required and for those where such factfinding is not required. It is expected that the Committee would issue its decision expeditiously.

Section 129.16 Suspension and Termination of the Cooperative Agreement.

This section has been deleted from these proposed regulations because SBA is presently working with the Office of Management and Budget and other agencies to develop regulations concerning government-wide Suspension and Debarment. Since this and other SBA programs will be subject to those regulations once adopted in final form, SBA will refrain from addressing the subject in these proposed regulations.

Section 129.17 (Redesignated as § 129.16) Small Business Development Centers (SBDCs).

Some commenters expressed the view that, except in three states, SBA is not authorized to fund more than one SBDC per State. Others stated their view that the recipient organization should also be consulted in a case where SBA is considering funding more than one SBDC in a given State. It is SBA's view that, although in most States one SBDC is appropriate, there may be instances where the small businesses of the State are better served by funding more than one. In those instances, SBA would be authorized to fund more than one SBDC. Therefore, the first comment was not adopted. However, SBA is in partial agreement with the second comment and proposes to amend the regulation to permit consultation with an existent SBDC about the respective areas of service, once a decision has been made to fund more than one SBDC in a given State. SBA also proposes to add a requirement to subparagraph (ii) that determinations of service areas must be consistent with the State plans, in States where such plans exist.

Proposed paragraph (3) of subsection (a) addressed the procedure to be used when, during the budget year, an SBDC would like to add a subcenter or satellite location which was not specified in its proposal. The provision is proposed to be amended to clarify that this procedure would be required only for such subcenters funded in whole or in part by Federal funds. In response to public comment that such procedure would unnecessarily stifle service to small businesses through satellite locations, SBA also proposes to delete satellite locations from the application of the provision.

SBA proposes to amend subsection (b) by deleting and adding certain paragraphs as noted below. The paragraph numbering has also been corrected to conform to the changes.

SBA proposes to amend paragraph (2) of subsection (b) to incorporate SBA's policy that each SBDC develop a written conflict of interest policy and advise each employee annually of such policy. This amendment is consistent with some public comment which objected to SBA's proposed definition of conflict of interest and which expressed the view that the term should be defined locally.

SBA proposes to amend paragraph (3) of subsection (b) to permit the SBDC Director to manage other Federal or State programs aimed at assisting small business in a manner otherwise authorized for SBDCs under section 21 of the Small Business Act. It would be encouraged, but not required, that each SBDC State Director make full use of one or more other Federal or State-funded small business development programs. The SBDC State Director would be permitted to manage the program if necessary to make full use of it. However, prior SBA approval would be required before an SBDC State Director could commit to undertake such responsibility.

SBA proposes to add a new paragraph (4) to subsection (b) which addresses the question of an SBDC State Director or any other full-time employee teaching one or more academic courses. SBA's rationale for this policy is discussed above in the section concerning the definition of "full-time employee", § 129.11(i).

Some commenters objected to previously proposed paragraph (7) (new paragraph (8)) which would require daily time and attendance records on all part-time SBDC and subcenter employees and a certification in the quarterly report by the SBDC Director that each full-time employee dedicated 100 percent of his effort during that quarter to the SBDC program. Based on past experience where SBA has had difficulty accounting for the hours worked by some part-time employees, the method set forth in the October 1986 proposed version remains unchanged in this proposal. Both the method adopted for part-time employees and that adopted for full-time employees are consistent with cost principles set forth in the appropriate OMB Circulars.

New paragraph (9) (previously proposed paragraph (8)) is proposed to be amended in response to public comment to eliminate the requirement that satellite locations operate on a 40-hour week basis or during the normal business hours of the recipient organization. The requirement remains unchanged for the Lead SBDC and for the subcenters. SBA proposes this change to accommodate the nature of satellite locations which are often temporary or short-term in nature.

Several commenters asked that SBA clarify the meaning of the term "client awareness" as used in previously proposed paragraph (3) of § 129.17(c). SBA proposes to reword the provision (new § 129.16(c)) to make clear that when publicizing other Federal and State government small business programs which it participates in, the SBDC is required to note that the program is separately or cooperatively funded, as appropriate.

In response to a comment from SCORE/ACE (Service Corps of Retired Executives/Active Corps of Executives), a separate SBA management assistance delivery program, SBA proposes to amend paragraph (4) of subsection (c) by deleting references to SCORE/ACE participants which inaccurately characterized them as resources of the SBDC.

Several commenters also objected to a provision of paragraph (4) which required the SBDC Director to *ensure* that resources funded through the SBDC were not providing services identical to those otherwise provided to their service area. The commenters believed that an absolute guarantee would be impossible for an SBDC Director to make. The regulation is proposed to be amended to require the SBDC Director to make a good faith effort to determine that duplication is not occurring with SBDC funded services.

The same comment applies to paragraph (1) of subsection (d), Services. SBA proposes to amend that provision in an identical manner.

SBA proposes to further amend subsection (d) to delete a reference to publicity, which is addressed in

subsection (e) of this section, and to clarify the requirements: (1) That training funded by the Cooperative Agreement not duplicate other training in the service area, and (2) that, prior to beginning the training, the SBDC submit for the approval of the Project Officer a statement describing the nature and extent of training that was not anticipated in the Cooperative Agreement, but will be funded in whole or in part by SBDC program funds.

A few commenters recommended the deletion of previously proposed paragraph (9) (new paragraph (10)) which is concerned with organizing vacation schedules to maintain the operations of the SBDC and subcenters. SBA believes that consistent staffing is important to the quality operation of an SBDC network and therefore, has not adopted the recommendation.

SBA proposes to add a new subsection (e) which would require all publicity relating to SBDC funded activities to prominently list SBA as a funding agency and would describe other publicity requirements. Several commenters noted that provisions of the October 1986 proposed rule dealing with training incorrectly included more generalized requirements for publicity. SBA has created this new subsection to correct that oversight.

SBA received a few comments on previously proposed paragraph (e) (new paragraph (f)), Research. One comment noted that research projects do not always present themselves during the budgeting cycle of the SBA. Another comment found the requirement that the SBDC review the national research projects to avoid duplication to be impossible to satisfy as there is no centralized record of such projects at this time. SBA proposes to adopt both of these comments and to amend the proposed regulation accordingly.

Section 129.17 (previously designated § 129.18) SBDC Clients.

Several commenters objected to the paperwork burden that would result from subsection (a), Eligibility, which would require the SBDC to ensure that it served only small businesses. In the interest of minimizing the paperwork requirements to the extent possible, SBA proposes to amend subsection (a) to prohibit an SBDC from knowingly providing assistance to a business which is not considered small under SBA's regulations (13 CFR Part 121) and to permit the SBDC State Director to refer a questionable case to the appropriate Regional Office for a size determination if the Regional Administrator deems it appropriate.

Some commenters suggested that SBA amend proposed subsection (b) to emphasize the role of the annual Program Announcement and the negotiation process which occurs prior to issuance of the Cooperative Agreement. SBA proposes to adopt this comment and to amend subsection (b) accordingly.

Section 129.18 (previously § 129.19) Advisory Boards.

SBA received several comments concerning Advisory Boards. One commenter did not believe that each SBDC should be required to establish a separate advisory board it another body in the State was available for a similar purpose. Several commenters did not feel it was appropriate to require an SBDC to seek a member of SBA's SCORE/ACE organization to participate in its State SBDC advisory board.

For the following reasons, SBA did not adopt the first comment, but proposes to adopt the second comment concerning advisory boards: First, SBA believes that an advisory board which has as its sole purpose providing advice to the SBDC network in its State will have a greater and more beneficial impact on the operations of the program than one which has more diverse issues as its focus. Second, although SBA encourages cooperative efforts among all of its program participants, SBA agrees that such relationships need not, in this instance, be the subject of regulations.

Section 129.19 (previously § 129.20) Financial Aspects of the Program.

Several commenters suggested that SBA remove due dates from subsection (a) Budgeting, and allow them to be contained in the program announcement for greater flexibility. SBA has not adopted this comment. SBA believes that the public, including SBDCs, should be apprised of submission dates which must be met to ensure timely funding of an SBDC.

Some commenters were concerned that the October 1986 proposed regulation did not require the Office of Procurement and Grants Management (OPGM) to issue a continuation of funding in a situation where timely refunding of a Cooperative Agreement will not occur through no fault of the SBDC. Others suggested that two weeks notice of refunding was insufficient for planning purposes. In addition, a few commenters objected to the letter of continued funding lapsing in 120 days from issuance, citing certain instances where the funding should continue beyond the 120 days.

After reviewing these comments, SBA proposes to make the following changes to paragraph (a)(1) of redesignated § 129.19, Budget Proposal. Subsection (a) is proposed to be reworded to require a letter of continued funding to be issued and received at least two weeks prior to the end of the budget period where all approvals have been received by OPGM in a timely fashion. More advance notice would not be required because OPGM would be able to issue a notice of award in the time remaining in the budget period if more than two weeks was available for processing. SBA also added a provision permitting the letter of continued funding to remain in effect past 120 days where SBA and the SBDC are in the process of resolving a conflict or a dispute.

SBA proposes to amend the general requirements section to reference the Program Announcement concerning certain costs and to delete provisions concerning those costs becuse the requirements are set forth in the Program Announcement.

Subparagraph (vi), SBDC and Subcenter Closures, has been redesignated §129.16(b)(11) but otherwise remains unchanged from the previously proposed rule.

Some commenters suggested that SBA amend redesignated § 129.19(a)(3), Transfer of Funds, to incorporate proposed revisions to applicable OMB Circulars on the subject. Since proposed amendments to the appropriate OMB circulars may change significantly before they are finalized, SBA proposes to retain the requirements of the existing circulars and to make appropriate changes when final OMB revisions are published.

Redesignated § 129.19(a)(4), Carryover of Funds (Unobligated, unexpended Federal dollars) is proposed to be amended in subparagraphs (i), (iii), and (iv) for clarity.

Some commenters suggested that redesignated § 129.19(b) be amended to refer only generally to the statutory funding formula because it may be subject to change. SBA proposes to adopt that suggestion.

Some commenters noted that § 129.19(b)(2) (as redesignated) was not consistent with agency policy on cash match. This inconsistency was inadvertent and has been corrected in this proposed rule.

This paragraph is proposed to be further amended to accommodate the view expressed by several commenters that certain state appropriation cycles do not permit verification of cash match prior to submission of a timely SBDC budget proposal, or in some cases, prior

VOL
52
ISS
200
OC
16
1987
UMI

to the first day of the budget period. The regulation is proposed to be amended to require such verification prior to the first day of the budget period where possible, and where the state budget cycle would not permit total compliance by the first day of the budget period, the revised regulation would require verification of matching funds prior to the use of the Federal funds to which the match relates. For example, in situations where a state legislature does not appropriate until March and the SBDC is on a calendar year budget, the SBDC would be expected to submit a budget proposal in March of the previous year and would be able to verify only as much match from the state as was appropriated until March of the following year. Under the revised proposal, the SBDC would be required to verify the remainder of the match as soon as the state's budget cycle permits, but in no case would the SBDC be authorized to expend more Federal funds than it had matched on a one to one basis.

Some commenters expressed their view that an SBDC should be able to use verified spent and unspent overmatch to offset any confirmed audit disallowance relating to the budget year in which the overmatch occurred. The October 1986 proposed regulation permitted only verified unspent overmatch to be used for such purposes. Since SBA wishes to encourage overmatching in the SBDC program, the suggestion of the commenters is proposed to be adopted and § 129.19(b)(2), as redesignated, is proposed to be amended accordingly.

Some commenters objected to SBA's inclusion of impermissible source of matching funds in the regulation (§ 129.19(b)(vi)) because they are listed in the pertinent OMB Circulars. SBA has retained them in this proposed rule because questions regarding these sources have arisen in the past.

The definition of program income, previously found in subparagraph (4)(i) of § 129.20(b), is proposed to be abbreviated to reference the appropriate OMB circulars and is proposed to be included § 129.11, Definitions. SBA, upon internal agency comment, proposes to amend subparagraph (4)(ii) of this subsection, as redesignated, to clarify that income received through cosponsored activities would be considered program income for reporting purposes on Financial Reporting Form 269.

The public response was almost unanimously opposed to the portion of previously proposed § 129.19(b)(5), as redesignated, which would have allowed SBDCs to charge fees for counseling with SBA's prior approval. Therefore, SBA proposes to delete that sentence from the paragraph.

SBA received several comments opposing previously proposed § 129.19(c)(3), Travel, which would have required the employees of the SBDC to abide by the Federal Travel Regulations. Commenters suggested that a more appropriate standard would be the written travel policies of the recipient organization which sponsors the SBDC since the SBDC employees are not, strictly speaking, Federal employees, but rather employees of the sponsoring organization. SBA proposes to adopt this comment and has amended this proposed regulation appropriately. In addition, minor changes are proposed to subparagraph (v) to require proposed out-of-state travel which exceeds the budgeted amount for travel to be submitted to the Project Officer for approval.

Many commenters addressed paragraph (4) of this subsection which concerns dues payments to civic, business, technical and professional organizations. Some objected to SBA's absolute prohibition of SBDC program funds being used to pay dues to organizations that may lobby, citing the benefits to the small business community of the SBDCs' membership in certain types of organizations, such as Chambers of Commerce. To accommodate this concern, subparagraph (v) of the regulation is proposed to be amended to permit up to $250 of dues payments per organization per year without a certification by the SBDC Director or Chief Financial Officer regarding lobbying. SBA recognizes that most such organizations charge minimal membership fees and that, although a small fraction of such dues may be spent for lobbying, it is not administratively feasible to trace such small amounts by their use within each organization.

However, the Agency remains committed to ensuring that the Federal and matching funds dedicated to the program are spent to further program interests in legally permissible ways. Therefore, this proposal would require a certification from the SBDC Director or Chief Financial Officer as a part of the budget submission that organization dues in excess of the minimal threshold would not be used directly or indirectly for lobbying as defined in § 129.11(q) of this regulation.

A few commenters objected to the requirement in proposed subparagraph (iv) of a separate written justification for dues payments exceeding $2,000 per organization per year which are paid with program funds. As stated in the preamble to the previously proposed rule, payments from program funds exceeding $2,000 per year per organization should be separately justified because such payments would represent substantial amounts of program funds which should be spent only to further program purposes consistent with the rules and policies of the SBDC program.

Section 129.20 (previously § 129.21) Evaluation of the SBDC Program.

Some commenters noted that paragraph (2) of § 129.20(b) (as redesignated), Client Control Records, should be amended to require projected client results only for long term counseling clients. For reasons of confidentiality with the small business client, other members of the public objected to paragraph (6) of this subsection relating to which documents retained by the SBDC must be made available to SBA upon request. To prevent such documents from being duplicated by other SBA personnel for reasons unrelated to the SBDC and its assistance, the public suggested that the regulation permit such records to be duplicated for SBDC performance reviews and audit purposes only.

SBA proposes to adopt both suggestions in these proposed regulations.

A few commenters requested a longer time for the final filing date of the quarterly report. SBA has proposed to allow the SBDCs 45 days following the end of the quarter to submit their reports. SBA also proposes to abbreviate paragraph (2) of that subsection. Since most of the requirements are set forth in the Cooperative Agreement with each SBDC, SBA proposes to delete all of the requirements of paragraphs (2) and (3) as redundant of the provisions of the Program Announcement.

In response to several comments on the relationship of the Single Audit Act (31 U.S.C. 7501, *et seq.*), to the audit authority of SBA's Inspector General, SBA proposes to amend redesignated § 129.20(e)(2), Audits, to clarify that, in his or her discretion, SBA's Inspector General may condust financial or compliance audits of an SBDC even where a single audit of the recipient organization has been performed. The Single Audit Act encourages agencies to accept the findings of the single audit team, but does not proscribe agencies from conducting their own audits when deemed necessary.

The paragraph is also proposed to be amended in response to public comment to clarify that the Office of Inspector General would assume the costs of any

audit of an SBDC that it requried the SBDC to have performed by a qualified independent public accountant.

Subparagraph (v) of § 129.20(e)(2) is proposed to be deleted from the final rule as duplicative of subparagraph (iii) of that paragraph.

Some commenters questioned on what basis SBA could know that someone was "about to engate in actions which would constitute a violation of the Small Business Act[* * *." Redesignated § 129.20(e)(3), Investigations, is proposed to be amended to clarify that SBA may conduct an investigation where information is received which indicates that such a violation is about to occur.

SBA proposes to make minor amendments to redesignated § 129.20(f) to more accurately reflect the scope of on-site reviews of SBDCs.

Compliance With Executive Order 12291, the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Paperwork Reduction Act (44 U.S.C. ch. 35) and the Administrative Procedure Act (5 U.S.C. 552 et seq.)

Executive Order 12291

For the purposes of E.O. 12291, SBA has determined that this proposed rule is not a major rule because it would not, if adopted in final form, have an annual effect on the economy of $100 million or more. The total SBDC budget for FY 1987 was $35 million. The non-Federal equal matching requirement added another $35 million to the program budget. Although many of the SBDCs are partially funded by non-Federal contributions over and above the matching requirement, it is unlikely that those contributions would equal the $30 million or more needed to exceed the $100 million threshold of a major rule.

Moreover, this rule would not be likey to result in a major increase in costs for consumers, individual industries, Federal, States, or local government agencies, or geographic regions, or to have significant adverse effects on competition, employment, productivity, innovation, or on the ability of United States-based businesses to compete with foreign-based businesses in domestic or export markets. Therefore, it would not be a major rule for purposes of E.O. 12291.

Regulatory Flexibility Act

For purposes of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) (RFA), SBA certifies that this proposed rule will not, if promulgated in final form, have a significant economic impact directly on a substantial number of small entities. If adopted in final form, these regulations would set forth the policies and operational requirements of the SBDC program, which affect only the SBDCs or their sponsoring organizations directly. The vast majority of entities potentially affected by this rule would not be considered small for purposes of the Regulatory Flexibility Act.

In a 1985 case, *Mid-Tex Elective Cooperative v. Federal Energy Regulatory Commission*, the U.S. Court of Appeals for the District of Columbia held that indirect impact on small business is not properly considered for purposes of the FRA. 773 F.2d 327, 340–343 (1985).

Paperwork Reduction Act

All reporting and recordkeeping requirements of this regulation which require approval by the Office of Management and Budget under the Paperwork Reduction Act are published in Part 133 of this title. Anyone wishing to comment on such requirements may send written comments as specified under the ADDRESS caption of this rule, or to Robert Neal, SBA Desk Officer, Room 3228 New Executive Office Building, 726 Jackson Place, Washington, DC 20503.

Administrative Procedure Act

SBA is publishing this regulation in proposed form to afford the public a 30-day period in which to comment on changes made to the rules proposed in October 1986. Although the issues raised by this revised proposed rule were presented in the October 1986 proposed rule and many public comments were adopted, SBA wishes to allow further opportunity for public input.

List of Subjects in 13 CFR Part 129

Active Corps of Executive (ACE), Service Corps of Retired Executive (SCORE), Management assistance, Small Business Development Centers, Small Business, Federal assistance, Volunteers.

Accordingly, pursuant to the authority contained in section 5(b) and 21 of the Small Business Act (15 U.S.C. 634(b) and 648), Part 129, Title 13 of the Code of Federal Regulations is proposed to be amended as follows:

1. The authority citation for Part 129 continues to read as follows:

Authority: Secs. 2, 7(i), 7(j), 8, and 21 of the Small Business Act, as amended (15 U.S.C. 631, 636(i), 636(j), 637(b), 648); section 302(c)(2), Domestic Volunteer Service Act, Pub. L. 93–113, 87 Stat. E.O. 11871, dated July 18, 1975.

2. Sections 129.1 through 129.5 are designated as Subpart A—General and §§ 129.6 through 129.9 are designated as Subpart B—Service Corps of Retired Executives (SCORE) and Active Corps of Executives (ACE)—Payment of Out-of-Pocket Expenses to Volunteers.

3. A new Subpart C is added to read as follows:

Subpart C—Small Business Development Centers (SBDCs)

Sec.
129.10 Introduction.
129.11 Definitions.
129.12 Entities eligible to establish an SBDC.
129.13 Allocation of funds.
129.14 Application procedure.
129.15 Cooperative Agreement.
129.16 Small Business Development Centers (SBDCs).
129.17 SBDC clients.
129.18 Advisory boards.
129.19 Financial aspects of the program.
129.20 Evaluation of the SBDC program.

Subpart C—Small Business Development Centers (SBDCs)

§ 129.10 Introduction.

(a) The Small Business Development Center (SBDC) Program is a Small Business Management and Technical Assistance Service being approved under the program authority and responsibility of the SBA. The program is a partnership between the SBA and the State-endorsed organizastion receiving SBA appropriated funds as well as other funds being provided by other sources. It is a decentralized program where SBA delegates operational management of the program to SBA regional and district office personnel. The implementation of the program is accomplished through a Cooperative Agreement wherein SBA and the SBDC negotiate the types of services to be performed by the SBDC during a given time period.

(b) *Purposes.* (1) The SBDC program is designated to provide quality assistance to small businesses in order to promote growth, expansion, innovation, increased productivity, and management improvement, thereby assisting in furthering economic development.

(2) SBDCs are intended to be responsive to local needs in providing assistance to the small business community as mutually identified by the SBA Project Officer and the SBDC State Director.

(c) *Relation of an SBDC to SBA.* The SBDC Program shall be under the general management and oversight of SBA, but with recognition that a partnership exists between SBA and each SBDC for the delivery of assistance to the small business community. However, the final authority for the

VOL
52
ISS
200
OC

1987
UMI

selection of SBDCs, the terms of the Cooperative Agreement, and the establishment of program policy rests with SBA.

§ 129.11 Definitions.

(a) *Applicant Organization or Applicant.* That entity which applies to sponsor a lead SBDC, as defined in paragraph (q) of this section. After funding is approved and the entity enters into a Cooperative Agreement with SBA, the applicant organization is then referred to as the recipient organization.

(b) *Budget period.* Generally, a 12-month period in which expenditure obligations are incurred, which coincides with either the calendar year or the Federal fiscal year and which is annually reviewed for renewal upon submission and subsequent negotiation of a proposed Cooperative Agreement and upon appropriation of the necessary funds by Congress.

(c) *Cash match.* Non-Federal funds allocated specifically to the SBDC equaling the Federal contribution and under the direct management of the SBDC State Director or, for accounts relating to subcenters, under the direct management of subcenter directors. At no time may cash match include indirect costs, overhead costs or in-kind contributions. Cash match may include direct costs committed by the applicant organization (personnel services, fringe benefits, consultants, etc.), only to the extent that such costs are committed as part of the specific direct line item costs verified by the certifying representative prior to funding. Cash match shall not include:

(1) Funds contributed from other Federal sources;

(2) Program income or fees collected from recipients of assistance; or

(3) Amounts committed by the applicant organization for unidentified and/or contingent costs in the budget proposal.

(d) *Conflict.* For purposes of this subpart, conflict means any preaward disagreement or problem between an SBDC, an applicant organization or a recipient organization and SBA regarding any matter relating to the SBDC application or application process.

(e) *Direct costs.* See definition set forth in Office of Management and Budget (OMB) Circulars A–21, A–87 or A–122, as appropriate.

(f) *Dispute.* For purposes of this Subpart, dispute means any disagreement or problem between an SBDC or the recipient organization and SBA concerning one or more elements of the SBDCs Cooperative Agreement.

(g) *Financial disagreement.* For purposes of this subpart, financial disagreement means a problem or disagreement relating to the budget proposal of an SBDC or applicant organization which arises prior to the award of the Cooperative Agreement. Upon issuance of the Cooperative Agreement, any disagreement relating to the SBDC's budget will be treated as a dispute. (See § 129.11(f).)

(h) *For-profit organization.* Any entity organized for profit.

(i) *Full-time employee.* An employee of the recipient organization who is assigned to work at the SBDC 40 hours per week or the full customary work week of the recipient organization.

(j) *Grants/Cooperative Agreement Appeals Committee.* The six-member Committee responsible for, among other things, resolving appeals arising in disputes between a recipient organization or an SBDC and the SBA after the Cooperative Agreement for that budget period has been awarded. The membership of the Committee is designated by the Administrator. (See, Disputes, § 129.15(c).)

(k) *Grants Management Branch Chief.* The Chief of SBA's Grants Management Branch, who supervises Grants Management Officers. The Grants Management Branch Chief is the person responsible for overseeing fiscal compliance of the SBDC Program with the terms of the Cooperative Agreement.

(l) *Grants Management Officer.* A certified specialist in SBA's Grants Management Branch within the SBA Office of Procurement and Grants Management who awards the Cooperative Agreement and oversees the implementation and operation of Federal grants involving SBA.

(m) *Indirect costs.* See definition set forth in Office of Management and Budget (OMB) Circulars A–21, A–87 or A–122, as appropriate.

(n) *In-kind contributions.* These are valued according to OMB Circulars A–102 or A–110, as appropriate.

(o) *Key SBDC employee.* Any employee of an SBDC having managerial, oversight or substantive control over the activities of the SBDC or any SBDC subcenter.

(p) *Lead SBDC.* The entity which serves as the administrative headquarters of the SBDC network for the purpose of coordinating the delivery of assistance to the small business community. A lead SBDC may also function as a subcenter and provide assistance directly to the small business community.

(q) *Lobbying.* (1)(i) Any attempt to influence the outcome of any Federal, State, or local election, referendum, initiative, or similar procedure, through in-kind or cash contributions, endorsements, publicity, or similar activity;

(ii) Establishing, administering, contributing to, or paying the expenses of a political party, campaign, political action committee, or other organization established for the purpose of influencing the outcomes of elections;

(iii) Any attempt to influence:

(A) The introduction of Federal or State, legislation; or

(B) The enactment or modification of any pending Federal or State legislation through communication with any member or employee of the Congress or state or local legislature (including efforts to influence State officials to engage in similar lobbying activity), or with any Government official or employee in connection with a decision to sign or veto enrolled legislation;

(iv) Any attempt to influence:

(A) The introduction of Federal or State legislation, or

(B) The enactment or modification of any pending Federal or State legislation by preparing, distributing or using publicity or propaganda, or by urging members of the general public or any segment thereof to contribute to or participate in any demonstration, march, rally, fund-raising drive, lobbying campaign or letter writing or telephone campaign; or

(v) Any legislative liaison activities, including attendance at legislative sessions or committee hearings, gathering information regarding legislation, and analyzing the effect of legislation, when such activities are carried on in support of or in knowing preparation for an effort to engage in proscribed lobbying.

(2) However, the following activities are excepted from the definition of lobbying:

(i) Providing a technical and factual presentation of information on a topic directly related to the performance of a grant, contract, or other agreement through hearing testimony, oral or written statements or letters to the Congress or a State legislature, or subdivision, member, or cognizant staff member thereof, in response to a documented request (including a Congressional Record notice requesting testimony or statements for the record at a regularly scheduled hearing) made by the recipient member, legislative body or subdivision, or a cognizant staff member thereof; provided such information is readily obtainable and can be readily put in deliverable form; and further provided that costs under

this section for travel, lodging or meals are unallowable unless incurred to offer testimony at a regularly scheduled Congressional hearing pursuant to a written request for such presentation made by the Chairman or Ranking Minority Member of the Committee or Subcommittee conducting such hearing.

(ii) Any lobbying proscribed by paragraph (q)(1)(iii) of this section to influence State legislation in order to obtain matching contributions, to directly reduce the cost, or to avoid material impairment of the organization's authority to perform the grant, contract, or other agreement.

(iii) Any activity specifically authorized by statute to be undertaken with funds from the grant, contract, or other agreement.

(r) *Overmatched amount.* That amount of indirect, in-kind or cash contributions by the recipient organization or by a third party to the recipient organization which exceeds the required non-Federal contribution to the program budget of an amount equal to the Federal grant.

(s) *Part-time employee.* An employee of the recipient organization who is assigned to work at the SBDC less than 40 hours per week or less than the full customary work week of the recipient organization.

(t) *Program announcement.* SBA's annual publication of items which an applicant organization must address in its application in order to be considered for SBDC funding by SBA.

(u) *Program income.* Gross income earned by the recipient from federally supported activities, as defined in OMB Circulars A–102 and A–110.

(v) *Program Officer or SBA Program Officer.* The person in SBA's Central Office of SBDCs assigned to oversee the operations of certain SBDCs.

(w) *Project Officer or SBA Project Officer.* Generally the person in the SBA district office designated by the SBA District Director and appointed by the SBA Office of Procurement and Grants Management who monitors and oversees the Cooperative Agreement and the ongoing operations of the SBDC located in the geographic area served by the district office. The Project Officer is usually the Assistant District Director for Business Development within a particular district office, but can also be an SBA employee directly responsible to the District Director. In circumstances where the SBDC will cover multiple SBA districts, an SBA employee who reports to someone other than the district director may be designated the Project Officer, with concurrence from the Deputy Associate Administrator for Business Development/Office of Small Business Development Centers.

(x) *Project period.* The period of time beginning on the day of award and normally continuing in twelve (12) month increments until terminated by SBA. A project period will normally consist of a number of budget periods.

(y) *Qualified independent public accountant.* Certified public accountant or public accountant licensed on or before December 31, 1970, or persons working for a certified public accounting firm or a public accounting firm licensed on or before December 30, 1970.

(z) *Recipient organization.* That organization which enters into a Cooperative Agreement with SBA after applying to be admitted into the SBDC Program.

(aa) *Resources.* SBDC lead center, subcenter or satellite staff, as well as professional consultants, Chambers of Commerce, members of professional associations, qualified student counselors, SBI student teams, university faculty, volunteers or other Federal, State or local personnel qualified to offer small business assistance.

(bb) *Satellite.* Location other than a subcenter used by an SBDC network for program delivery.

(cc) *SBDC Network or SBDC Program.* The combination of the lead SBDC and the SBDC subcenters and satellite locations.

(dd) *SBDC State Director.* Regardless of the area of service of the SBDC, the person with the highest full-time management position within the organization of any SBDC. As part of his/her full time management responsibilities, the SBDC State Director may manage other Federal and State government programs that are concerned with aiding small business in a manner otherwise authorized for SBDCs under the Small Business Act. Implementation of the Program and ultimate responsibility for the operation of an SBDC rests with the SBDC Director.

(ee) *SBDC Subcenter.* An entity which is directly responsible to the lead SBDC for the delivery of assistance to the small business community. A written agreement must govern the relationship between a lead SBDC and its subcenter.

(ff) *Subcenter Director.* The person with the highest management position within an SBDC subcenter. The Subcenter Director runs the day-to-day operations of an SBDC subcenter and is programmatically responsible to the SBDC State Director.

(gg) *Working days.* For purposes of this subpart, those days excluding Saturdays, Sundays and those holidays designated in the Cooperative Agreement.

§ 129.12 Entities eligible to establish an SBDC.

(a) The following entities are eligible to enter into a Cooperative Agreement with the Small Business Administration for the purpose of establishing or continuing the operation of a Small Business Development Center:

(1) Any State government or any of its agencies;

(2) Any regional entity;

(3) Any State-chartered development, credit or finance corporation;

(4) Any public or private institution of higher education;

(5) Any land-grant college or university;

(6) Any college or school of business, engineering, commerce, or agriculture;

(7) Any community or junior college; or

(8) Any entity formed by two or more of the above entities.

(b) SBDC subcenters are not required to meet the eligibility requirements of a lead SBDC.

§ 129.13 Allocation of funds.

(a) The Deputy Associate Administrator for Business Development/SBDCs shall be responsible for the allocation of program funds. The DAA/BD/SBDC will consider recommendations by each Regional Administrator for the allocation of funds within the states within his/her region and from appropriate District Directors. Funds shall be allocated based on applicants' abilities to provide services in the following service categories:

(1) Maintainance of existing services to areas already served by SBDCs,

(2) Provision of service to new areas in States and regions already serviced by SBDCs,

(3) Increases in services provided to areas already served by SBDCs established within the previous three years,

(4) Increases in services to areas already served by SBDCs established prior to the previous three years,

(5) Establishment of service to areas in States and regions not already serviced by SBDCs.

(b) The most important service category is maintenance of existing services to areas already served. The other service categories shall be weighted as deemed appropriate by the DAA/BD/SBDCs.

(c) In determining the allocation of funding among applicants for funding and refunding, significant factors shall include:

(1) Whether or not previous Federal funding has reached the statutory

VOL
52
ISS
200
OC
16
1987
UMI

funding cap (the greater of $200 thousand or the pro rata share of a $65 million program based on the population to be served by the SBDC as compared to the total population of the United States);

(2) The ability of the applicant to contribute matching funds;

(3) The amount or precentage of total funds allocated to each of the service categories in the preceding fiscal year;

(4) The amount of funding per capita already provided, or to be provided, in the areas served; and

(5) For applicants who have been previously funded, the quality of the performance in the previous year.

§ 129.14 Application procedure.

(a) *General.* (1) An eligible entity may apply to participate in the Small Business Development Program by submitting an application and three copies of the proposal to the SBA district office covering the State or region in which the applicant proposes to provide service. The application shall include a signed Application for Federal Assistance (SF 424). The application shall not be inconsistent with any area-wide plan providing management assistance to small business, if there is one, which has been adopted by an agency recognized by the State government as authorized to do so. The application shall indicate what officials are authorized to amend the application with regard to all or particular parts of such application.

(2) An application for the initial funding only of an SBDC must include a letter of endorsement by the Governor of the State in which the SBDC will operate or his delegatee.

(b) *Contents—General.* The application shall set forth the eligible entity or entities participating in or to participate in the program, a list of the centers and subcenters by name and address, the geographic areas to be serviced, the resources to be used, the services that will be provided, the method for delivering the services, including a description of how and what extent academic, private and public resources will be used, a budget, a State or Regional Advisory Board and other information set forth in the Program Announcement.

(c) *Amendment.* The applicant should make every effort to ensure that the application is complete when filed. Authorized SBA officials at the district, regional and Central Office levels may request that the applicant amend an application. At any time, as SBDC may file an amendment for SBA's review. Any amendment shall be signed by the official authorized to do so on the regional application. No application amendment submitted after the Cooperative Agreement has been entered in effective until it is incorporated into the Cooperative Agreement by the Grants Management Officer.

(d) *Competing applications.* (1) Except as provided in paragraphs (d)(1)(i) through (viii) of this section, an existing SBDC will be refunded to provide service to an area it is already servicing in preference to a competing application provided that it has operated for less than five years. An SBDC will not be refunded if there has been clear showing of nonperformance, poor performance, a disregard for or violation of these regulations, or any of the following reasons:

(i) A willful or material failure to perform under the Cooperative Agreement under other public agreements or under these regulations.

(ii) Conduct within an SBDC indicating a lack of business integrity or honesty which affects the present responsibility of that SBDC.

(iii) Conviction of or civil judgment against the SBDC Director, any subcenter Director or any key SBDC employee for:

(A) Fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a public or private agreement; or

(B) Bribery, embezzlement, false claims, false statements, falsification or destruction of records, forgery, obstruction or justice, receiving stolen property, or theft.

(iv) As defined by the SBDCs written conflict of interest policy, a conflict of interest or self-dealing by the SBDC Director, any subcenter Director, or any key employee.

(v) Improper use of letter of credit.

(vi) Failure of the SBDC Director to work at the SBDC on a full-time basis.

(vii) Failure of an SBDC, its subcenters, or the recipient organization to consent to audits or investigations or to maintain required documents and records.

(viii) Any other cause not otherwise specified which seriously and adversely affects the operation or integrity of an SBDC or the SBDC program

(2) Where an existing SBDC has operated five years or more, where an existing SBDC will not be refunded, or where no SBDC has been funded and SBA receives more than one application for a particular region or State, the relevant SBA District Office shall decide which application to pursue based upon which application more closely responds to the needs of the small business community in the area to be served by that SBDC. Where the applications cover more than one SBA district, the appropriate SBA regional office shall make the decision in consultation with the Deputy Associate Administrator for Business Development/SBDCs.

(3) Where two or more applications are received for the same geographical area, the Project Officer shall encourage agreement between the competing applicants to establish and operate an SBDC through their combined efforts. Should agreement not be reached, paragraph (d)(2) of this section applies.

(e) *Decisions not to refund previous program participant.* In situations where the SBA District Office has sufficient evidence of an SBDC's nonperformance poor performance, a disregard for or violation of these regulations or any of the reasons set forth in § 129.14(d)(1) (i) through (viii), the SBA District Office shall notify the SBDC State Director and any other appropriate official of the recipient organization of its intention not to refund the SBDC. This notification must be forwarded to the recipient organization no later than five months prior to the expiration of the current Cooperative Agreement then in existence. However, when the District Office has sufficient evidence of an SBDCs disregard of or violation of these regulations or of any other cause(s) listed in § 129.14(d)(1) (i) through (viii), the SBA District Office may waive the notification period with the concurrence of the Regional Office, the Deputy Associate Administrator for Business Development/SBDCs, and the Grants Management Officer.

(1) This notification shall specifically cite the reasons for the proposal not to refund the SBDC and allow the recipient organization a 60-day period within which to make changes and adjustments in its operations to correct the problem cited in the notice, and to report to the SBA District Office officially, in writing, on the results of such changes.

(2) If the recipient organization is unwilling or unable to resolve the specific problem areas to the satisfaction of the SBA district office within the 60-day time frame, the Project Officer shall describe, in writing, any issue raised and clearly state the positions of his office and the SBDC. The Project Officer shall refer such description and any supportive documentation to the appropriate regional office within ten calendar days of the close of the 60-day period.

(3) If the regional office cannot resolve the matter within 15 calendar days of receipt, it shall refer the issue and its position in writing along with any

supporting documentation to the Deputy Associate Administrator for Business Development/SBDCs for final resolution.

(4) The Deputy Associate Administrator for Business Development/SBDCs or his/her delegatee shall transmit the final resolution in writing to the recipient organization, the SBDC State Director, the Project Officer, the Grants Management Officer and other appropriate SBA Regional and District Office personnel within 15 calendar days of receipt. If the Deputy Associate Administrator for Business Development/SBDCs or his/her delegatee determines that available evidence clearly indicates nonperformance, ineffective performance, or an unwillingness to implement suggested changes to improve performance, the SBA district office shall pursue proposals from other organizations interested in applying for SBDC designation. The SBDC shall have sixty days to conclude operations and to submit close-out documents to the appropriate SBA District Office.

(5) Provided that competing applications are being accepted, nothing herein precludes a subcenter of the previously funded recipient organization from applying for designation as the recipient organization.

(f) *Notice of applications under Executive Order 12372.* Applicants submitting proposals to SBA for operation of an SBDC are bound by the provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs."

(1) To ensure compliance with this Executive Order and SBA's regulations pursuant thereto (13 CFR Part 135), SBA will publish a Notice in the **Federal Register** to provide public awareness of the pending application of presently existing SBDCs for refunding and of the pending application for funding of proposed SBDCs. The Notice shall describe the SBDC program, highlighting the area proposed to be served by the applicant and the proposed amount of funding.

(2) A copy of such Notice will be simultaneously furnished to each affected State single point of contact, which has been established under Executive Order.

(g) *Application review*—(1) *District Office.*

The responsibility of assuring that an application is acceptable rests initially with the district office having jurisdiction in the State or region which the SBDC proposes to serve primarily. The district office in that State or region shall request and obtain such amendments to the application as are necessary or desirable to ensure that: (i) The requirements of these regulations and SBA policies are met, and (ii) the SBDC will respond to the needs of small businesses in the area to be served by the SBDC in a cost effective manner and in concert with other small business assistance efforts. Such needs will be determined by the appropriate SBA District Office after consultation with the SBDC State Director. Once the application is complete to the satisfaction of the district office, the district office shall forward its recommendation, either to approve or disapprove, in writing to the appropriate Regional Administrator, and shall submit the application, as amended, for review by that regional office.

(2) *Regional Office.* The regional office shall review the application to determine its conformity with the requirements of the regional operating plans and priorities, the SBDC regulations, and the national policies and priorities of the Agency. The regional office, through the Project Officer in the district office, may request amendments to the application, if necessary, to better accomplish the goals of the program. When the application, as amended, has been thoroughly reviewed by the regional office, that office shall issue a written recommendation to approve or disapprove and shall specify the reasons therefore. The regional office shall forward a copy of the application, the district office's recommendation, and its recommendation to the Central Office for review.

(3) *Central Office.* (i) The Office of SBDCs, in consultation with the Office of General Counsel, shall assure the conformity of the application to the statutory and regulatory requirements, national priorities, and policies of the SBA. The office may request, through the region and district offices, amendments to the application related to such requirements, priorities and policies, if necessary, to better accomplish the goals of the program.

(ii) The Office of Procurement and Grants Management shall negotiate and determine the reasonableness, allowability and allocability of all dollars committed to assure the conformity of the application with the statutory, financial and regulatory requirements, OMB Circulars, and procurement and grants management policies which it administers. It may request amendments to the application related to such responsibilities.

(iii) The Deputy Associate Administrator for Business Development/SBDCs may approve, conditionally approve, or reject any application. If the application is rejected, the Central Office shall simultaneously communicate the reasons therefor to the applicant, the regional office and the district office. If the approval is conditional, the conditions shall be set forth in the Cooperative Agreement. Upon approval or conditional approval, a Cooperative Agreement shall be issued.

(h) Within 30 days of the issuance of a Cooperative Agreement, the State Director, each Subcenter Director and any employee with authority to commit funds must complete and submit SF 912 to SBA's Office of Personnel and Physical Security, Room 203, 1441 L Street, NW., Washington, DC 20416.

(i) *Pre-award audits.* Any SBDC may be subject to a preaward audit prior to the issuance of or continuation of the Cooperative Agreement. All applicant organizations that propose to enter the Program for the first time will be subject to a preaward audit. The purpose of a preaward audit is to verify the adequacy of the accounting system, the allowability of the proposed costs and the proposed matching contribution, including, the source(s) of the matching contributions.

(j) *Conflicts Resolution Policy.* All conflicts will be resolved pursuant to SBA's Conflicts Resolution Policy.

(1) Every effort shall be made to resolve programmatic conflicts at the SBA district office level. The SBDC Director, or proposal developer in the case of a first-time SBDC, shall direct all such questions or conflicts to the SBA Project Officer.

(2) In those infrequent instances in which issues and problems cannot be resolved at the SBA district office level within 15 calendar days, and no agreement has been reached between the parties to extend the resolution period, the issue will be referred, in writing, by the Project Officer or the SBDC Director/proposal developer to the appropriate SBA regional office for resolution. Upon receipt, the Regional Administrator, or his delegatee, shall ensure that good faith attempts had been made by both parties to resolve the issue. If so, the regional office will confer with the SBDC Director's supervisor and attempt to mediate the issue within 15 calendar days of receipt. If not, the regional office will return the issue to the district office for further resolution efforts.

(3) If the regional office and the SBDC Director's supervisor cannot resolve the matter within the specified time, the issue will be referred, in writing, to the

Deputy Associate Administrator for Business Development/SBDCs for final resolution. Upon receipt, the Deputy Associate Administrator for Business Development/SBDCs or his/her delegatee, shall ensure that good faith attempts had been made at the district and regional office levels to resolve the conflict. If so, the Deputy Associate Administrator for Business Development/SBDCs shall confer with the person associated with the SBDC who has supervisory authority over the SBDC Director's immediate supervisor and the SBDC Director to resolve the issue. If not, the Deputy Associate Administrator for Business Development/SBDCs shall return the issue to the appropriate office for further resolution efforts. As soon as practicable, a final decision regarding the conflict is made by the DAA/BD, in writing, to the SBDC and SBA regional and district offices.

(k) *Pre-award financial disagreement.* After 30 days of attempted resolution of a financial disagreement, any applicant that wishes to resolve such disagreement or issue concerning its application must submit a written statement describing the matter to the appropriate Grants Management Officer in the Office of Procurement and Grants Management, with a copy of such statement provided simultaneously to the Project Officer. The Grants Management Officer must issue final written determination to the applicant within 15 calendar days of receipt of the statement. Copies of the determination must be sent to cognizant SBA offices.

§ 129.15 Cooperative Agreement.

(a) *General*—(1) *Description.* Upon approval of the initial or renewal application, the recipient organization and SBA enter into a Cooperative Agreement. The Cooperative Agreement sets forth the programmatic and fiscal responsibilities of the recipient organization and the SBA, and describes the scope of the project to be funded as well as the budget of the program year covered by the Cooperative Agreement. These responsibilities are described in greater detail throughout this part.

(2) Principles for determining administrative requirements are contained in the following Office of Management and Budget Circular and are applicable to the Cooperative Agreement: A–110 (for programs administered by educational institutions and nonprofit organizations), and A–102 (for programs administered by State and local governments).

(b) *Revision to Cooperative Agreement.* A revision to the Cooperative Agreement may be requested in writing, by either the recipient or SBA. Such revision will normally relate to changes in the scope of work, or funding, during a project year. For example, the recipient may wish to transfer dollars from one line item category to another. Should the transfer, together with any other transfers made during that program year, not exceed 5 percent of the approved total budget, prior approval from SBA is not required, however, the SBA Office of Procurement and Grants Management must be notified of the transfer in the quarterly report submitted by each SBDC. Should the amount of transfer exceed 5 percent, either singly or in conjunction with other transfers, then prior SBA written approval and a written revision to the approved budget is required. Any revision to the Cooperative Agreement must have approval of the cognizant SBA field offices and the DAA/SBDC. All revisions shall be issued by the Grants Management Office.

(C) *Disputes.* (1) All communications relating to disputes under the Cooperative Agreement must be transmitted to SBA's Office of Procurement and Grants Management, with a copy of such transmittal provided simultaneously to the Project Officer.

(2) *Disputes resolution procedure.* (i) Any recipient organization or SBDC that wishes to resolve a dispute concerning one or more elements of its Cooperative Agreement must submit a written statement describing the subject of the dispute together with evidence of such dispute to the appropriate Grants Management Officer in the Office of Procurement and Grants Management, with a copy of such statement and evidence to the Project Officer. The Grants Management Officer must respond to such dispute within 30 calendar days of receipt of the descriptive statement.

(ii) If the recipient organization or the SBDC receives an unfavorable decision regarding the dispute, they may make a final appeal to the SBA Grants/Cooperative Agreement Appeals Committee. The appeal must be received within 30 calendar days of the date of the Grants Management Officer's letter by the Chairman, SBA Grants/Cooperative Agreement Appeals Committee, Room 600, 1441 L Street NW., Washington, DC 20416. A copy of the appeal shall also be sent to the Director, Office of Procurement and Grants Management.

(iii) There is no prescribed form for submission of an appeal. Formal briefs and other technical forms of pleading are not required. However, appeals must be in writing and should be concise and logically arranged. Appeals are required to contain at least the following:

(A) Name and address of appellant;

(B) Identity of the SBA office/program and the Cooperative Agreement/Grant;

(C) A statement of the grounds for appeal, with reasons why the appeal should be sustained;

(D) Any documents or other evidence in support of the appeal not previously furnished the Grants Management Officer;

(E) A request for the specific relief desired on appeal; and

(F) A statement as to whether or not a hearing is requested, and if requested, the reasons why a hearing would materially assist in resolving the dispute. Requests for hearing will not usually be granted unless significant material facts are substantially in dispute.

(iv) If a request for a hearing is denied, or no request is made, the Committee will reach a decision on the merits of the appeal as soon as practicable. The Committee may solicit additional information or material before reaching its decision.

(v) If a request for a hearing is granted, the Committee will issue appropriate written instructions to the appellant pertaining to the hearing. Following the hearing, the Committee will reach a decision as soon as practicable. The Committee may solicit additional information or material before reaching its decision.

(vi) The Chairman, with advice from the Office of General Counsel, will prepare a written final decision to be transmitted to the appellant with a copy to the Director, Office of Procurement and Grants Management.

(vii) *Expedited Dispute Appeal Process.* When a dispute which may affect refunding arises within 120 days of the end of the budget period, the Committee, in consultation with the Office of Procurement and Grants Management, by an affirmative vote of two members, may agree to shorten all response times as necessary to reach final resolution of the dispute before the timely issuance of a new Cooperative Agreement. At any time during the appeal process, either the appellant or the Project Officer may submit a written request to use an expedited process.

§ 129.16 Small Business Development Centers (SBDCs).

(a) *Area of service and location of SBDCs*—(1) *Area of service.*

(i) The area of service for any SBDC shall be the State in which it is located. In exceptional circumstances, more than one SBDC may be located in any State

in which, in the determination of the Deputy Associate Administrator for Business Development/SBDCs, in consultation with the appropriate Regional Administrator, it is necessary or beneficial to effectively implement the program and to provide services to all interested small businesses.

(ii) Where more than one SBDC is to be located in a given State, the Deputy Associate Administrator for Business Development/SBDCs, in consultation with the Regional Administrator and the recipient organizations, shall determine in writing the general geographic areas to be served by the SBDCs in that State. Such determination shall be consistent with the State plan. Each SBDC shall provide assistance and services to those small businesses of the State located in the general geographic area to which it is assigned.

(iii) According to the terms of the Cooperative Agreement, certain SBDCs may be permitted by the Deputy Associate Administrator for Business Development/SBDCs, after consultation with the appropriate Regional Administrator, to provide advice, information and assistance to small business concerns located outside the State in which the SBDC is located if the small business is located within a close geographic proximity to the lead SBDC or an SBDC subcenter.

(2) *Location of lead SBDCs, subcenters and facilities.* The facilities and staff of each SBDC network shall be located in such places as to provide maximum accessibility and benefits to the small businesses which the network is intended to serve.

(i) Lead SBDCs and subcenters should be structured to serve major small business population areas of the State.

(ii) SBDC program outreach shall be established by all SBDCs in such locations as mutually determined by the SBDC Director and the SBA Project Officer to provide maximum accessibility and benefits to the small business community. The proper location of the SBDC and subcenters will be annually reviewed by the SBDC Director and Project Officer and the addresses and telephone numbers of existing or new locations will be noted in the annual Cooperative Agreement. Subcenters and satellite locations should be primarily located in the heart of some local communities.

(3) *Subcenters not in the application.* A request for any subcenter not in the original proposal and to be funded in whole or in part by Federal funds must be submitted as an amendment to the Cooperative Agreement to the appropriate SBA district office, and shall be processed according to the procedures used for approving amendments to applications.

(b) Staff and access requirements. (1) Each SBDC shall operate as an independent organization within the receipt organization.

(2) Each SBDC shall have—

(i) A full-time staff, including a full-time Director;

(ii) Access to business analysts to counsel, assist, and inform small business clients;

(iii) Access to technology transfer agents to provide state of the art technology to small business through coupling with national and regional technology data sources;

(iv) Access to information specialists to assist in providing information searchers and referrals to small business;

(v) Access to part-time professional specialists to conduct research or to provide counseling assistance when the need arises;

(vi) Access to laboratory and adaptive engineering facilities; and

(vii) A written conflict of interest policy and shall advise each employee of such policy annually.

(3) The SBDC Director shall, consistent with the Cooperative Agreement and the budget approved therein by SBA, have the authority to make expenditures under the SBDCs budget, including any funding from other Federal or State programs. The SBDC Director shall implement and manage the activities and services of the SBDC program, and, where applicable and approved by SBA, such other Federal and/or State programs that are concerned with aiding small business in a manner otherwise authorized for SBDCs under the Small Business Act.

(i) The Director's position shall be the highest full-time management position established within the organization of any SBDC.

(ii) In a university setting, the SBDC Director shall be directly accountable for the performance of the SBDC to an official of the university at a Dean's level or higher.

(iii) In a nonuniversity setting, the SBDC Director shall be directly accountable for the performance of the SBDC to an official of the state-endorsed organization at a level equivalent to or higher than that of a Dean at a university.

(4) Any full-time employee may teach one course during non-business hours of the SBDC; however, prior approval by the Project Officer is required to permit a full-time employee to teach more than one course or to teach during business hours of the SBDC.

(5) All paid SBDC staff positions shall be limited to those essential to operate the program. Essential positions are those positions required to:

(i) Direct or maintain the efficient operation of the program;

(ii) Provide counseling and training to small business clients when other resources providing these services are not readily available; or

(iii) Further individual program objectives.

(6) All new SBDCs must submit to the district office a current résumé of each key employee as part of its application. At least annually, ongoing SBDCs shall submit a roster of their key employees, and résumés of new key employees only.

(7) SBDCs shall not establish administrative support positions which cannot be justified to the Project Officer by the services to be provided.

(8) The SBDC shall maintain daily time and attendance records on all part-time SBDC and subcenter employees. The SBDC State Director shall certify in the quarterly report that each full-time SBDC employee dedicated 100 percent of his effort during that quarter to the SBDC program.

(9) Lead SBDCs and subcenters shall operate on a 40 hour week basis, or during the normal business hours of the recipient organization, throughout the calendar year provided that such business hours are adequate to insure the services are delivered to the small business community.

(10) Vacations shall be arranged so that the continuity of SBDC and subcenter operations is not disrupted, except where there is a total shutdown of the host organization's facilities where the SBDC or subcenter is located (i.e., shutdown of administrative officers, public services, utilities, etc.)

(11) *SBDC and subcenter closures.* (i) The applicant SBDC is responsible for enumerating all anticipated center and subcenter closures whether for holidays or shutdown of the host organization, in its annual formal proposal. Otherwise, the SBDC must submit such dates to the Project Officer as soon as possible.

(ii) Closures above and beyond those enumerated in the proposal shall result in an appropriate reduction of the SBDCs budget, except for unique unanticipated circumstances (e.g., snow days, building power or heat failure).

(A) The SBDC Director must notify the appropriate SBA Project Officer in the quarterly report of any SBDC or subcenter closure beyond those enumerated in the proposal. If the reason for the closure is a unique unanticipated circumstance, the specific

VOL
52
ISS
200
OC
16
1987
UMI

rationale for the closure must be furnished in the written notice.

(B) If the closure will be for an extended period of time (more than three days), the SBDC Director must notify the Project Officer within 24 hours.

(c) *Resources.* (1) SBDCs shall concentrate on developing and coordinating the unique resources of the university system, the private sector, and Federal, State and local governments to provide services to the small business community which are not readily available from existing small business support systems in the SBDC service area.

(2) Each subcenter shall be governed by a written agreement with the SBDC. Such agreement shall contain all of the basic terms and conditions of the Cooperative Agreement.

(3) To the extent possible, SBDCs shall make full use of other Federal and State government programs that are concerned with aiding small business. Such programs must be kept separate in funding and recordkeeping. Moreover, publicity of such programs must note that they are separately or cooperatively funded, as appropriate.

(4) SBDC services shall be provided to small businesses:

(i) with the knowledge that many entities both public and private also assist small business in various ways and that better coordination in and through SBA will yield better results for small business. Although the type of resources will differ from location to location, SBDC personnel should make themselves aware of services being provided by such resources as professional consultants, Chambers of Commerce, members of professional associations, qualified student counselors, SBI student teams, university faculty, volunteers and other Federal, State or local entities so that SBDC services will not duplicate those services already being provided at adequate levels and so that the SBDC will be in a position to work cooperatively with the resources available within its area of service.

(ii) Every effort should be made by the SBDC Director to attain a balanced use of resources as negotiated with the Project Officer and reflected in the Cooperative Agreement.

(iii) The SBDC Director is responsible for the development of new resources that will assist small business within the area to be served by that SBDC and is to provide upon request, technical assistance to current resources that will assist them in expanding their services, to the small business community. The SBDC Director must report the progress the SBDC has made to develop new resources in the annual report. The SBDC Director should endeavor to determine that newly acquired resources are not receiving financial compensation from the SBDC program for services which are identical to those already being provided to the area small business community under provisions of another local, State or Federal contract, grant or Cooperative Agreement or other salaried or fee paid arrangements. Proposed services by such new resources must be in addition to pre-existing support provided to the small business community.

(5) SBDCs shall also utilize qualified small business vendors, including but not limited to, private management consultants, private consulting engineers and private testing laboratories, to provide services to small businesses. Such private sector resources shall be compensated for their services. These qualified small business vendors shall be classified in conformity with appropriate SBA size standards as provided in 13 CFR Part 121.

(6) SBDCs are encouraged to use qualified volunteers to provided services to small business.

(7) Laboratories operated and funded by the Federal Government shall cooperate with SBA in developing and establishing programs to support SBDCs by making facilities and equipment available; providing experiment station capabilities in adaptive engineering; providing library and technical information processing capabilities; and providing professional staff for consulting. These laboratories shall be reimbursed through an SBDCs budget for any such services utilized.

(8) SBA and SBDCs may request the cooperation of the National Science Foundation in developing and establishing programs to support the centers.

(9) SBDCs may request the cooperation of the National Aeronautics and Space Administration and industrial application centers supported by the National Aeronautics and Space Administration on developing and establishing programs to support the centers.

(d) *Services.* (1) Each SBDC shall endeavor to ensure that the assistance it provides does not duplicate or replace existing services.

(2) SBDCs shall provide assistance to small businesses within the area of service designated or approved by SBA.

(3) In close coordination with SBA, the SBDC Director shall promote the SBDC and its services to the target markets identified in the Cooperative Agreement.

(4) SBDC services shall be tailored as closely as possible to meet the local needs of small business owners and potential small business owners. Primary services to be provided shall include, but not be limited to, management and technical assistance through one-to-one individual counseling and training of small businesses.

(i) *Counseling.* SBDCs shall assist small businesses in solving problems concerning operations, manufacturing, engineering, technology exchange and development, business planning, personnel administration, marketing, sales, merchandising, finance, accounting, business strategy development, capital formation, procurement assistance, innovation and research, new product development, product analysis, plant layout and design, computer application, and other disciplines required for small business growth and expansion, increased productivity, and management improvement, and for decreasing industry economic concentrations.

(ii) *Training.* Each SBDC shall ensure that quality training to improve the skills and knowledge of existing and prospective small business owners is provided throughout its SBDC network.

(A) All training offered by an SBDC pursuant to the Copperative Agreement shall be carefully planned with the SBA Project Officer to avoid duplication with the training efforts presented by other Federal, State, local, and private organizations and by SBA.

(B) In those cases where the SBDC recognizes a need for training that was not planned at the time of the negotiation of the Cooperative Agreement, the SBDC shall submit to the Project Officer for his/her approval the particulars of the proposed training prior to the commencement of the training. Such training shall not duplicate other training services being provided in the SBDC service area.

(iii) SBDCs shall assist in technology transfer, research, and coupling from existing sources to small businesses.

(iv) SBDCs shall coordinate and conduct research into technical and general small business problems for which there are no ready solutions. SBDCs are also authorized to coordinate and conduct research concerning market needs.

(v) SBDCs shall maintain a working relationship and open communications with the financial and investment communities, legal associations, local and regional private consultants, and local and regional small business groups and associations in order to help

address the various needs of the small business community.

(vi) *Other required services.* Each SBDC shall:

(A) Maintain current information concerning Federal, State, and local regulations that affect small businesses, including all regulations promulgated by SBA, and counsel small businesses on methods of compliance. Counseling and technical support shall be provided when necessary to help small businesses find solutions for complying with environmental, energy, health, safety, and other Federal, State, and local regulations;

(B) Provide and maintain a comprehensive library that contains current information and statistical data needed by small businesses. Such library must contain, among other things, current copies of the Small Business Act, as amended, Small Business Investment Act of 1958, as amended, Title 13 of the Code of Federal Regulations, and the Commerce Business Daily.

(C) Conduct in-depth surveys for local small business groups in order to develop general information regarding the local economy and general small business strengths and weaknesses in the locality; and

(D) Maintain lists of local and regional private consultants to whom small businesses can be referred.

(vii) *International Trade Center.* As mutually determined by the SBA Project Officer and SBDC State Director, an SBDC may establish an International Trade Center within the SBDC to increase the export capabilities of small businesses with products which are potentially marketable internationally; Provided such Center does not duplicate services provided by the International Trade Administration, the Department of Commerce or other Federal, State or local trade assistance programs. The International Trade Center will coordinate and utilize public and private resources to provide assistance to current and potential small business exporters. Its specialists will help business people with the various aspects and complexities of exporting and foreign investment, and assist them in developing an export marketing plan for the sale of their products(s) overseas. International Trade Centers should have the capability to do the following:

(A) Evaluate client's export capability;

(B) Identify and analyze client's international trade needs and problems;

(C) Provide counseling in international trade techniques, procedures, and opportunities;

(D) Establish an operational relationship with Federal, State, and local organizations essential to improving international trade;

(E) Develop and conduct seminars on opportunities and procedures involved in exporting, importing, joint ventures, and licensing; and

(F) Provide a manual of step-by-step procedures and sources of international trade information, where appropriate.

(5) Every SBDC and subcenter must continue to upgrade and modify its services, as needed, in order to meet the changing and evolving needs of the small business community.

(6) *Legal services restrictions.* Legal advisory information shall not be provided to assist clients involved in litigation or other actions against the Government's interest. Legal information services shall not be used to represent any client in any action. Legal services other than providing basic business law information require the endorsement of the State Bar Association and the approval of SBA.

(e) *Publicity.* SBA must be prominently displayed as a sponsor/co-sponsor and/or funding Agency on all materials (training or other type of materials) and on all publicity initiated or funded by the SBDC. "Prominently displayed" shall be no less than that which is being displayed for the SBDC or other cooperating entities. The verbiage or display pertaining to SBA placement shall be submitted to the Project Officer for approval prior to finalization.

(f) *Research.* Research projects performed by an SBDC and agreed to by SBA Project Officer shall be listed, where possible, in the annual Cooperative Agreement and shall have direct benefit to the State and/or local small business community served by the SBDC. Research activities should not be considered a primary focus of SBDC operations and should be undertaken only when a specific identifiable need exists for this service within the small business community and a plan for using the research results to meet the need has been developed. A description of the results of such projects shall be included as an attachment to the quarterly report for the quarter in which the project is completed. Insofar as possible, research undertaken should not be duplicative of other available research.

§ 129.17 SBDC clients.

(a) *Eligibility.* Subject to available resources, any existing or potential small business owner or primary officer of a small concern may receive assistance from an SBDC. The SBDC may not knowingly provide assistance to businesses which are not considered "small" under Part 121 of this title. When in doubt, the SBDC Director may refer the question of size to the appropriate Regional Office for a size determination if the Regional Administrator deems it appropriate.

(b) *Delivery of assistance.* (1) SBDCs shall provide assistance to eligible clients who independently become aware of the availability of SBDC assistance. SBDCs shall also provide assistance to target groups and to eligible clients referred by SBA.

(2) It is recognized that program and service priorities are set from time to time by Congress and the Administration. These priorities reflect the concerns and the needs of small business as seen by the Legislative and Executive branches of Government. The SBDC, as a partner with SBA, must reflect national priorities in delivering its services to the small business sector. The Central Office will communicate these priorities through the program announcement and other issuances of the Central Office.

(3) Within these standards, the Region will determine the most appropriate manner in which to implement national priorities on a regional level. The Region will also determine regional priorities that are not inconsistent with the national priorities and will communicate this plan to the various district offices within the Region for inclusion in the Cooperative Agreements through the negotiation process. Consistent with the regional plan, the district office will determine the most appropriate means of implementing the priorities along with district level priorities.

(4) The District Office, through the Project Officer will consider the implementation of those national, regional and district priorities as the most critical items to be negotiated in the Cooperative Agreement.

§ 129.18 Advisory Boards.

(a) *National SBDC Advisory Board.* (1) The SBA is required to establish a National SBDC Advisory Board consisting of nine members who are not part of the Federal work force, appointed by the Administrator of SBA. Three members of the National SBDC Board shall be from universities or their affiliates and six shall be from small businesses or associations representing small businesses. All Board members serve three year terms.

(2) The National SBDC Board shall elect a Chairman and shall advise, counsel, and confer with SBA's Deputy Associate Administrator for Business Development/SBDCs on policy matters pertaining to the operation of the SBDC

program. The Board shall meet, with the Deputy Associate Administrator for Business Development/SBDCs, at least semiannually at the call of the Chairman.

(b) *State/Regional SBDC Advisory Boards.* (1) Each SBDC shall establish an advisory board to advise, counsel, and confer with the SBDC Director on all policy matters pertaining to the operation of the center, including how local and regional private consultants may participate with the SBDC.

(i) Such as advisory board shall be referred to as a State SBDC Advisory Board in a State having only one SBDC.

(ii) Such an advisory board shall be referred to as a Regional SBDC Advisory Board in a State having more than one SBDC.

(2) These boards shall represent the entire service area and each shall be composed predominantly of small business owners and representatives of small business associations.

(3) First-time SBDCs are required to establish a State or regional SBDC Advisory Board no later than the second budget period.

(c) *Local Advisory Boards.* The SBDC State Director shall encourage subcenters to establish local SBDC Advisory Boards to advise, counsel, and confer with the Subcenter Director on matters pertaining to the operation of the subcenter. However, a local Advisory Board need not be established for each subcenter.

(d) A State/Regional or local SBDC Advisory Board member may also be a member of the National SBDC Advisory Board.

(e) *Travel of Advisory Board Members.* Travel of any Board member for official Board activities may be paid for out of the SBDC's budgeted funds.

§129.19 Financial aspects of the program.

(a) *Budgeting—(1) Budget proposal.* (i) the SBA Project Officer shall send the Program Announcement to the SBDC nine months prior to the close of its budget period.

(ii) *Submission.* The budget proposal for the upcoming budget period must be submitted to the SBA district office by the SBDC State Director, or by the proposal developer in the case of a first-time SBDC application, for appropriate review and ultimate approval of the Grants Management Branch Chief. (See §129.14, Application Procedure.) To ensure timely funding of existent SBDCs, the SBDC Director of any SBDC operating on a Federal fiscal year budget must submit to the Project Officer a draft budget proposal by March 15 and a final budget proposal, acceptable to the Project Officer, by June 1, of the preceding budget year. Similarly, for any SBDC operating on a calendar year budget, the SBDC Director must submit a draft budget proposal to the Project Officer by June 15 and a final budget proposal, acceptable to the Project Officer, by September 1, of the preceding budget year.

(iii) In a case where refunding will not occur in a timely fashion through no fault of the SBDC and where the Office of Procurement and Grants Management has received appropriate programmatic and budgeting approvals at least 45 days prior to the expiration of the budget year, the Office of Procurement and Grants Management shall issue a letter advising the SBDC of continued funding based on availability of funds. Such letter should be received by the SBDC at least two weeks prior to the close of the current budget period.

(iv) A letter of continuation may be issued when refunding of an SBDC is anticipated. Except in cases described below, the continuation letter shall lapse in 120 days of its issuance if the recipient organization and SBA have not entered a new Cooperative Agreement. In cases where the SBDC and SBA are in the process of resolving a conflict or a dispute, the continuation letter shall not lapse until a final decision is issued on such conflict or dispute.

(v) *General requirements:* The budget proposal must include all items required by the Program Announcement:

(vi) SBA requires, as a minimum, that 80 percent of the Federal dollars provided must be allocated to direct costs of program delivery. In the case where indirect costs are waived by the applicant organization, in order to meet the matching funds requirement, 100 percent of the Federal dollars must be allocated to program delivery. In a case where some, but not all, indirect costs are waived to meet the matching funds requirement, the lesser of the following may be allocated as indirect costs of the program; and charged to Federal dollars:

(A) 20 percent of Federal dollars provided to the program, or

(B) That amount remaining after the waived portion of indirect costs is subtracted from the total indirect costs.

(vii) *Subcenter costs.* (A) As a separate attachment to the budget, the SBDC shall include separate subcenter budgets indicating individual subcenter costs charged to the recipient and their applicable indirect base and rate.

(B) The amount of Federal cash, in-kind and indirect costs for each subcenter shall be indicated.

(2) *Budget revisions.* (i) Revision may be requested at any time and requires approval of the appropriate district office, regional office, the Central Office of SBDCs and the Office of Procurement and Grants Management within the time frames prescribed by OMB Circulars A-102 and A-110, attachment K and J respectively, as appropriate.

(ii) All procedures for revisions must conform to the requirements of the applicable OMB Circular. (See § 129.15(b)(2).)

(3) *Transfer of funds.* (i) Line item to line item transfer of 5 percent or less of the total approved costs in the budget may be transferred without SBA approval. However, all transfers to the line items relating to out-of-state travel and capital equipment require SBA approval.

(ii) Transfer of greater than a cumulative 5 percent requires prior written approval of the Grants Management Branch Chief.

(4) *Carryover of funds (unobligated, unexpended Federal dollars).* (i) An SBDC may not carry over unobligated, unexpended Federal funds allocable under the Cooperative Agreement to recurring expenses, e.g., salary, travel, supplies, etc., from one budget period to the next. However, an SBDC, subject to SBA approval, may carry over unexpended Federal funds allocated under the Cooperative Agreement to non-recurring, bona fide needs of the SBDC (e.g., start-up costs of a new subcenter), provided that the SBDC obligated the funds during the time period covered by the Cooperative Agreement through which such funds were made available. The Grants Management Officer will determine whether funds may be so carried over, in consultation with the Grants Management Branch Chief and the Project and Program Officers.

(ii) An SBDC may carry over unobligated, unexpended matching funds from one budget period to the next, provided that during the budget period the SBDC had used matching funds on a one-to-one ratio with Federal funds. (i.e., for every dollar of Federal funds expended, one dollar of matching funds is expended). An SBDC cannot claim that it utilized all Federal funds first, and that all unobligated, unexpended funds are matching funds.

(iii) Any funds provided to the SBDC budget by the recipient organization in excess of the required match (overmatch) which have not been obligated or expended may be carried over to the succeeding budget period.

(iv) When the final financial report is issued, the Grants Management Officer will deduct all unobligated, unexpended Federal funds from the letter of credit. Upon closing out the Cooperative Agreement, any unobligated,

unexpended Federal funds will be deobligated by SBA (i.e., returned to the Treasury).

(b) *Receipts*—(1)*Grants—Amount of Grant.* No recipient of funds shall receive a grant which would exceed the greater of—

(i) $200,000, or

(ii) Its pro rata share as determined by the statutory formula.

(2) *Matching funds.* (i) As a condition of any grant or amendment or modification thereof, the applicant organization must provide for an additional amount equal to the amount of the Federal grant. This amount (matching funds) is subject to the following restrictions:

(A) The amount must be provided from sources other than the Federal Government;

(B) It may not include any fees collected from the recipients of assistance, or other program income;

(C) The additional amount shall not include any amount of indirect costs or in-kind contributions paid for under any Federal program;

(D) Indirect costs or in-kind contributions shall not exceed 50 percent of the non-Federal additional amount;

(E) The remaining 50 percent will be cash match provided by the applicant, and may include no indirect or in-kind contributions.

(ii) At the close of the phase-in periods indicated below, indirect and in-kind matching contributions shall not exceed 50 percent of the non-Federal matching requirement and not less than 50 percent of the matching contribution shall be cash match. This requirement is effective as follows:

(A) If the applicant is located in a state which received its initial grant to be performed before August 1, 1984, then this requirement applies to grants effected on or after October 1, 1987.

(B) If the applicant is located in a state which received its initial grant to be performed after August 1, 1984, and prior to October 1, 1986, then this requirement applies to grants to be performed on or after October 1, 1988.

(C) If the applicant is located in a state which received its initial grant effective after October 1, 1986, then this requirement applies as of October 1, 1986.

(iii) All sources of matching contributions must be identified as specifically as possible. In the case of cash, it shall be identified by name and account number in the budget proposal and certified by the appropriately authorized official of the applicant organization. The account containing such cash must be under the direct management of the SBDC Director. If the State is providing such cash, and if the State appropriation cycle permits, the SBDC must verify that such funds will be obligated by the State prior to the first day of the budget period. In situations where State appropriation cycles preclude total compliance prior to the first day of the budget period, the SBDC shall verify that sufficient upfront cash match will be available from the State or other sources prior to use of Federal funds.

(iv) The Office of Procurement and Grants Management is responsible for determining acceptable match.

(v) *Restrictions in overmatched amounts.* (A) SBDCs are encouraged to furnish more than the required equal match. Once approved as part of the budget, such amounts (overmatch) become part of the recipient organization's contribution to that year's SBDC program.

(B) If such overmatched amounts are used for program delivery during the budget period for which they were pledged, they may not be applied to the matching funds requirements of the subsequent budget period. If such overmatched funds are not used for program delivery during the budget period for which they were pledged, they may be carried over to meet the match requirements of the subsequent budget period. Such overmatched amounts must be included in the budget presentation for the subsequent budget period.

(C) Any cash match (overmatch) committed to the program over and above the amount required by law shall be budgeted to support the level of effort approved by both parties for the Cooperative Agreement year in which the "overmatch" is applied. Verified, unspent dollars of "overmatch" may be applied to the following continuation year(s) if these "overmatch" funds are budgeted to support the proposed, approved level of effort. Verified "overmatch" dollars may be used as a credit to offset any confirmed audit disallowances applicable to the budget period in which the "overmatch" exists. Offsetting funds shall be considered obligated and not allowable as match for past or future budget periods.

(vi) *Impermissible sources of matching contributions.* Under no circumstances may the following be used as sources of the matching contribution of the recipient organization.

(A) Uncompensated student labor;

(B) SCORE, ACE, or SBI volunteers;

(C) Program income;

(D) Pre-existing training courses or programs, unless the SBDC is expanding or enhancing the course or program;

(E) Funds, indirect or in-kind contributions from any other Federal program, including SBA supported companies or corporations, notwithstanding the allowability of such sources for matching purposes under their own enabling legislation.

(3) *Funding.* (i) Letter of credit is the preferred method of funding SBDCs. Withdrawal of cash from the U.S. Treasury for advances to recipient SBDC organizations shall be deposited in an interest bearing account and, in the case of other than State government sponsored SBDCs, such interest must be reported and returned annually to SBA.

(ii) SBDCs may also be funded by reimbursement for work performed. (SBDCs operating without a letter of credit.)

(A) In order to voluntarily use the reimbursement method of funding, an SBDC must submit written justification to the Project Officer identifying why the letter of credit method would be inappropriate.

(B) In order for an SBDC to be reimbursed, the Project Officer must certify that the SBDC was operating for the period of time claimed.

(C) The reimbursement method may be initiated by SBA, if the Agency determines that its use will be in the best interests of the Government.

(4) *Program income.* (i) Treatment of program income for SBDCs based in universities or nonprofit organization SBDCs is subject to the provisions of Attachment D, of OMB Circular A–110. Treatment of program income for SBDCs based in State or local governments is subject to provisions of Attachment E of OMB Circular A–102.

(ii) Program income, including any interest earned on program income, must be used to further program objectives. It cannot be used to satisfy the match requirements. Each SBDC must report in detail receipts and expenditures of program income, including any income received through co-sponsored activities on Financial Reporting Form SF 269 as outlined in § 129.20(d).

(A) The phrase "to further program objectives" means expanding the quantity and quality of services, resources and outreach provided by the SBDC.

(B) The Project Officer is responsible for determining whether an SBDC is furthering program objectives; and

(C) This determination is based, in part, on the required narrative in the

BEST COPY AVAILABLE

financial report indicating how such income was used by the SBDC.

(iii) Any unused program income will be carried over to be utilized to further program objectives in the subsequent budget year.

(5) *Fees.* SBDC clients may be charged a reasonable fee to cover program costs in connection with training activities sponsored or cosponsored by the SBDC, or costs associated with specialized services.

(c) *Expenses.*—(1) *Cost principles.*

(i) Principles for determining the allowable costs of SBDCs are contained in Office of Management and Budget Circulars A–21 (cost principles for grants, contracts, and other agreements with educational institutions), A–87 (cost principles for programs administered by State and local governments), and A–122 (cost principles for nonprofit organizations).

(ii) The principles are designed to provide that the Federal Government and federally-assisted programs bear their fair share of total costs, determined in accordance with generally accepted accounting principles, except where restricted or prohibited by law.

(iii) The Director of each SBDC shall have the authority to make expenditures under the center's budget.

(iv) No portion of the Federal program funds used by an SBDC may be used for lobbying activities, either directly or indirectly through outside organizations.

(A) When an organization seeks reimbursement for indirect costs, total lobbying costs shall be separately identified in the indirect cost rate proposal, and thereafter treated as other unallowable activity costs.

(B) Organizations shall submit as part of their annual indirect costs rate proposal a certification that the requirements and standards of this paragraph have been complied with.

(C) Organizations shall maintain adequate records to demonstrate that the determination of costs as being allowable or unallowable lobbying complies with the requirements of the appropriate OMB Circular.

(D) Time logs, calendars, or similar records documenting the portion of an employee's time that is treated as an indirect cost shall not be required for the purposes of complying with paragraph(c)(1)(v) of this section, and the absence of such records which are not kept pursuant to the discretion of the grantee or contractor, will not serve as a basis for disallowing claims of allowable costs by contesting estimates of unallowable lobbying time spent by employees during any calendar month unless:

(*1*) The employee engages in lobbying for more than 25 percent of his compensated hours of employment during that calendar month; or

(*2*) The organization has materially misstated allowable or unallowable costs within the preceding five year period.

(2) *Salaries.* (i) Generally, the salary of the SBDCs Director, SBDC Subcenter Director and the salaries paid to SBDC staff members shall be comparable to annualized salaries established for similar positions in the area served by that particular SBDC or subcenter as agreed to by the SBA Project Officer and specified in the Cooperative Agreement.

(ii) Recruitment and salary increases for SBDC Directors, subcenter Directors and staff members shall conform to the administrative policy of the recipient organization.–

(3) *Travel.* (i) Transportation costs shall be at coach class and per diem rates, including lodging, shall not exceed those authorized by the written travel policies of the host instititution by that institution.

(ii) All travel must be separately indentified in the proposed budget as in-State, out-of-State, and unplanned.

(iii) In order for any travel to be approved by SBA, it must be in accordance with the written travel policies of the recipient organization and directly attributable to specific work of the SBDC or incurred in the normal course of administration of the program.

(iv) All proposed travel by the SBDC Director and the SBDC staff must be reasonable, justified in writing, and included in the SBDC's proposed annual budget. Such justification must indicate the estimated cost, number of persons traveling, and the benefit to be derived by the small business community for the proposed travel. A specific amount, based on past experiences, where appropriate, must also be included in the budget for any unplanned travel. A justification in greater detail is required for unplanned out-of-State travel.

(v) Any proposed unplanned out-of-State travel that exceeds the approved budgeted amount for travel must be submitted to the Project Officer for approval on a case-by-case basis. Any such submission must contain a written budget revision and written narrative explaining the need for such travel and the relation of such travel to the efficient operation of the SBDC.

(vi) Travel outside the United States must have prior approval by the Administrator on a case-by-case basis.

(4) *Dues.* (i) Costs of the SBDCs membership in civic, business, technical, and professional organizations are allowable expenses. As such, the use of Federal funds in payment of such dues is permitted, provided that the requirements of paragraphs (c)(4)(ii), (iii), (iv) and (v) of this section are met.

(ii) All such payments must be anticipated in the budget proposal, be approved by SBA, be fully described, and be reasonable and realistic in relation to the benefits derived, as determined by SBA's Office of SBDCs and Office of Procurement and Grants Management.

(iii) The benefits derived from this expenditure must be fully explained.

(iv) Notwithstanding the above, annual dues exceeding $2,000 per organization per year which are paid by an individual SBDC network from Federal or matching funds to any professional, technical, business or civic organization must be separately justified, detailing benefits received for this expenditure.

(v) No portion of annual dues exceeding $250 per organization per year paid from Federal or matching funds may be used directly or indirectly for lobbying activities by the organization receiving such funds. As part of the budget proposal, the SBDC Director or, where appropriate, the Chief Financial Officer and the SBDC Director shall certify that no portion of annual dues exceeding $250 per organization per year are paid from program funds are being used directly or indirectly for lobbying activities.

§ 129.20 Evaluation of SBDC Program.

(a) *SBA review authority.* (1) SBA shall monitor and oversee the Cooperative Agreement and ongoing operations of each SBDC to ensure the effective and efficient use of Federal funds for the benefit of the small business community.

(2) In order to properly evaluate the SBDC Program, SBA shall require each SBDC to keep records as set forth below in this section, and to submit quarterly and annual performance and financial reports, as specified in paragraphs (b) and (c) of this section respectively. Those reports and the clients' evaluations of services provided will be reviewed to:

(i) Determine the quality of services provided by the SBDC;

(ii) Determine the completeness and accuracy of SBDC records; and

(iii) Compare the actual SBDC accomplishments with the SBDC performance objectives, such as the Planned Milestone Accomplishment Chart submitted with the proposal for funding or refunding which are listed in the Cooperative Agreement.

(3) SBA representatives are authorized to make on-site visits to SBDCs and SBDC subcenters to inspect SBDC records and clients files, and to analyze and evaluate training, counseling and any other activities. As a courtesy, SBA representatives should generally advise the SBDC Director or Subcenter Director at least two weeks prior to the planned visit. The Project Officer shall review these records on a regular basis to verify that SBDC staff are adequately documenting the necessary files.

(b) *Client control records.* (1) The lead SBDC shall maintain control records as necessary.

(2) Subcenters and lead SBDCs which provide services to small business shall maintain detailed, complete and accurate client activity files, specifying counseling, training and other assistance provided. These records must clearly identify and locate the client, set forth the client's management problems, reflect the SBDC service provided, including the client's evaluations of services received, and for counseling of long duration, project the client results anticipated.

(3) Each SBDC shall report on SBA Standard Form 888 the number of training programs, the number of attendees, and the attendee demographic data and certain financial information, and each shall submit the client evaluations or a summary of those evaluations.

(4) Individual client counseling files are to be maintained for each client and entered into the Management Information System.

(5) One-time files should be concise, but sufficient to ensure that thorough program audit and evaluation practices can be applied. Substantive counseling should be well documented to enable an outside party to assess the adequacy of services provided.

(6) All SBDC and subcenter records shall be made available to SBA for review upon request. Such records may be duplicated for SBDC performance reviews and audit purposes only.

(c) *Performance reports.* (1) Each SBDC shall provide three quarterly and one annual programmatic report to the appropriate SBA Project Officer. Quarterly reports must be submitted (post-marked) no later than 45 days following the end of the quarter; annual reports must be submitted no later than 90 days following the end of the program year. All reports are to be submitted in an original and two copies.

(2) Information required in quarterly and annual performance reports is set forth in the annual Program Announcement.

(d) *Financial reports.* (1) Each SBDC shall provide three quarterly and one annual financial report to the appropriate Project Officer. Quarterly reports must be submitted (post-marked) no later than 45 days of the month following the end of the quarter; preliminary annual reports must be submitted no later than 90 days following the end of the budget year. The final annual reports must be submitted no later than 120 days following the end of the budget year. All reports are to be submitted in an original and two copies.

(2) The required financial reports are set forth in the Cooperative Agreement and include at a minimum the following:

(i) Report of Federal Cash Transactions (SF 272);

(ii) Financial Status Report (SF 269); and

(iii) Request for Advance or Reimbursement (SF 270), as applicable.

(e) *Audits and investigations*—(1) General—. (i) *Access.* At all reasonable times, SBA may inspect, examine and copy in the office of either the SBDC, its subcenters, the respective sponsoring organization or entity, its accountants, attorneys and consultants, or its subcontractors, if any, all documents, files, books, records and other materials relevant to SBA's Small Business Development Center Program. These records shall be maintained for a period of three years beyond the term of the Cooperative Agreement plus such additional time as may be required to settle cost disallowances or claims for which the SBDC may seek recovery from SBA or to resolve any litigation claim or audit begun within the three year period. Such records shall include but not be limited to the following:

(A) The Cooperative Agreement and all amendments;

(B) The application;

(C) All documents submitted by the SBDC clients applying for management assistance;

(D) All information made, used or maintained by the SBDC in connection with the provision of management assistance;

(E) All records of any transaction for which the SBDC makes payments pertinent to the Federal funds, matching funds, and expenditures related to program income spent to further the program objective, including but not limited to all invoices, payroll records, project ledgers, general ledgers, detailed supporting allocations, travel vouchers, subgrants, contracts or subcontracts, and any other pertinent documents;

(F) All records of any transaction relating to receipt of cash from fees or other sources, including but not limited to receipts, bills, settlement agreements, judgments, arbitration decisions and any other pertinent documents;

(G) Legal opinions and memoranda or other advice prepared by an attorney and paid for by the SBDC from the Federal funds, matching funds, or program income funds.

Failure of an SBDC, its subcenters, or the respective sponsoring organizations to maintain such records or to consent to such inspection, examination or copying, will be grounds for SBA to refuse to renew or continue cooperative agreements or to make advance payments until such time as the SBDC or other entity consents to such access. *See* § 129.14(d)(1) (i) through (viii).

(2) *Audits.* (i) All audits will be conducted, supervised, or coordinated by the Office of Inspector General.

(ii) All audits, to the extent practicable, shall be conducted in accordance with generally accepted auditing standards of the Comptroller General of the United States, as published in *Standards for Audit of Government Organizations, Programs, Activities and Functions (Yellow Book)* and in accordance with generally accepted auditing standards promulgated by the American Institute of Certified Public Accountants.

(iii) Whenever possible, financial and compliance audits will be conducted as a single audit of a recipient organization pursuant to OMB Circular A–102, A–110, or A–128. Such audits will be conducted annually, to the extent practicable, and at least once every two years. However, at the discretion of the Inspector General, audits may be performed of selected SBDCs even though single audits may have been performed. SBA also reserves the right to require an SBDC to have the financial and compliance audit performed by a qualified independent public accountant, as defined by § 129.11(d) of this part and submitted to the SBA Office of Inspector General, pursuant to audit guidelines issued by the Office of Inspector General. In such cases where the Office of Inspector General requires such audits, that office will assume all costs associated with the audit. Audit work papers made in connection with such audits must be available and produced for review upon request of the Office of Inspector General.

(iv) Requests for compliance audits of SBDCs may be made to SBA's Office of Inspector General by the Office of SBDCs. Requests for financial audits of SBDCs may be made to the Office of Inspector General by the Office of Procurement and Grants Management.

(3) *Investigations.* SBA may conduct such investigations as it deems necessary to determine whether a person has engaged in any acts or practices which constitute a violation of the Small Business Act of 1953, as amended (15 U.S.C. 631, *et seq.*), or any rule or regulation under that Act or of any order issued under that Act, or of other applicable Federal law. In circumstances where SBA receives information indicating that any such violation is about to occur, SBA may conduct such investigations as it deems necessary.

(f) *On-site reviews.* (1) An on-site evaluation of each SBDC shall be conducted by SBA at least once every two years. At least one, but no more than two, representative(s) of another SBDC shall participate in each such evaluation on a cost-reimbursement basis.

(i) This evaluation will include a thorough analysis of the records, procedures, organizational structure, management, and services of the SBDC. The evaluation will be both qualitative and quantitative, will measure the effectiveness of the program, and will make an assessment of the benefits accruing to the areas served.

(ii) The SBDC Director and the apropriate Project Officer shall be advised of the scheduled evaluation at least one month before the date of the evaluation.

(iii) The evaluation team shall send a copy of the evaluation with recommendations for improving the program to the SBDC Director, appropriate Project Officer, and other appropriate SBA officials.

(2) In addition, on-site financial evaluations of each SBDC shall be conducted, as needed, by the SBA Grants Management Branch Chief or his delegatee. Representatives of other SBDCs may not participate in such evaluations.

Dated: September 23, 1987.

James Abdnor,

Administrator.

13 CFR Part 140

Debt Collection

AGENCY: Small Business Administration

ACTION: Proposed rule.

SUMMARY: The Small Business Administration (SBA) proposes to amend its Debt Collection Regulations to make them consistent with those published by the Office of Personnel Management (OPM). For policy reasons, government-wide consistency is advisable in the debt collection area. The amendments will permit SBA to collect debts of employees of other Federal agencies via salary offset and make certain other technical corrections.

DATE: Comments must be received on or before November 16, 1987.

ADDRESS: Comments should be addressed to Martin D. Teckler, Deputy General Counsel, Small Business Administration, 1441 L Street NW., Room 700, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Martin D. Teckler, Deputy General Counsel, (202) 653-6642.

SUPPLEMENTARY INFORMATION: On July 2, 1984, the SBA published a Final Regulation regarding Debt Collection, 49 FR 27138, that was later amended on October 2, 1984, 49 FR 38931. We have now been asked to conform our Regulations with an OPM Final Regulation referred to as Pay Administration (General), published July 3, 1984, 49 FR 27470. Accordingly, SBA proposes to amend Part 140 consistent with the OPM Pay Administration (General) Regulation in the following respects: (1) The definition of "debt", (2) the sections governing the collection of debt by salary offset when an employee has terminated his or her employment, and (3) to provide for the assessment of interest, penalties and administrative costs and also a non-waiver of rights provision.

In addition, at the time SBA published its Regulations, it had no agreements with other agencies to permit the sharing of debt collection efforts. SBA is now working with other agencies to find Federal employees who have defaulted on their obligations to SBA. Similarly, other agencies are interested in pursuing their debtors who are employees of SBA. Therefore, SBA is proposing to amend those portions of Part 140 of Title 13 of the Code of Federal Regulations which relate to salary offset.

1. Definitions

Section 140.2(c) excludes intra-agency overpayments due to normal processing delays from the definition of "debt."

SBA proposes to amend § 140.2(c) by deleting this language, so that it is consistent with the compatible section of OPM Final Regulation, Pay Administration (General), 5 CFR 550.1103. Section 550.1103 does not include this language. The preamble, 49 FR 27470 (1984), of § 550.1103 addressed these two "exclusions" as "adjustments" and determined that such adjustments for four pay periods or less should not be treated as "exclusions" from the definition of debt. OPM regarded such adjustments as voluntary and therefore, pursuant to 5 U.S.C. 5514, as not *involuntary* adjustments for purposes of salary offset. As a result, the reference to exclusions which were at one time included in § 550.1103 were later deleted from the OPM Final Regulation.

Although these "exclusions" are included in SBA Regulation, § 140.2(c), § 140.2(c) is still consistent with § 550.1103. The added "exclusions" in § 140.2(c) do not alter the meaning of what was intended in both Regulations as to the definition of debt, amounts due and owing the United States from sources which include loans insured or guaranteed and all other amounts due and owing the United States from fees, leases, rents, etc. Nevertheless, the two subsections are proposed to be deleted from § 140.2(c) for consistency.

SBA proposes to add a new paragraph (g) to § 140.2 to define "employee". The current SBA Regulations do not define employee, but appear to be limited to employees of the Small Business Administration. The new definition is proposed to include any person whose salary is eligible for offset pursuant to 5 U.S.C. § 5514.

2. Section 140.4, General

The term "SBA employee" is proposed to be deleted in this section. In its place, SBA proposes to use the term "employee" unless further clarification is required. The word "SBA" or "Agency" is proposed to be changed to "agency" or "paying agency" where required to permit collection by another agency of debts owned to SBA.

3. Payments Made to Employees at the Time of Separation or Thereafter

SBA proposes to amend § 140.4(a)(4) to clarify which payments due a former employee are subject to salary offset, 5 U.S.C. 5514, and which should be collected under administrative offset, 31 U.S.C. 3716. A final salary check and lump sum payments at the end of employment may be offset under this section. The proposed regulation clarifies that salary offset procedures will be used in this situation only if regular salary checks were being offset during employment. Other post-employment payments, such as a civil service annuity, must be offset pursuant to administrative offset, even if salary offset was in effect prior to the employee's retirement or other separation.

The proposed regulation also clarifies that the employee, or former employee,

shall be given only one opportunity to challenge an offset. Salary offset is a subcategory of administrative offset. The procedural rights under this section, salary offset, are more extensive than those under § 140.5, administrative offset. Therefore, a former employee who had a hearing, or an opportunity for hearing prior to salary offset will not be given a § 140.5 administrative offset "review" upon separation.

4. Technical Correction

In paragraph (a)(4)(ii) of § 140.4, the term "retirement" is proposed to be changed to "retired". "Retired pay" is a term of art which applies to certain members of the armed forces. The Comptroller General has rules that such retired pay is subject to salary offset. "Retirement pay", on the other hand, is not a technical term and could be misunderstood to mean a civil service annuity which is not subject to salary offset but must be collected through administrative offset.

5. Interest, Penalties, Administrative Costs; Non-Waiver of Rights

Section 140.4 does not provide for the assessment of interest, penalties and administrative costs and does not provide for a non-waiver of rights provision.

SBA proposes to amend § 140.4 by adding two new subsections (f) and (g). The new subsections (f) and (g) are proposed to be added so that § 140.4 is consistent with OPM Final Regulation, Pay Administration (General), 5 CFR § 550.1104(n), (o).

Section 140.4 is *not* consistent with § 550.1104(n). Section 140.4 does not provide for the assessment of interest, penalties and administrative costs that are provided for in § 550.1104(n). As stated in § 550.1104(n), "* * * [t]hese charges and the waiving of them must be prescribed in accordance with 4 CFR 102.13 [FCCS]." 4 CFR 102.13 provides for agencies to assess interest, penalties, and admnistrative costs on debts owed to the United States pursuant to 31 U.S.C. 3717, and sets forth the procedures by which agencies shall access these charges.

In addition to interest, penalties and administrative costs being omitted from § 140.4, a non-waiver of rights provision was also omitted. Section 550.1104(o) "[p]orvide[s] that an employee's involuntary payment, of all or any portion of a debt being collected under 5 U.S.C. 5514 must not be construed as a waiver of any rights which the employee may have under 5 U.S.C. 5514 or any other provision of contract or law, unless there are statutory or contractual provisions to the contrary."

Therefore, § 140.4 is proposed to be amended to incorporate these provisions.

6. Procedures When SBA Seeks To Collect a Debt

SBA proposes to amend paragraph (b) to clarify that this paragraph applies when SBA is attempting to collect debts owed by federal employees to SBA.

A new paragraph (c) is proposed to explain how SBA will nofity the debtor's paying agency of the debt. The procedures described are those required by OPM.

7. Deductions for The Account of Another Agency From The Salary of an SBA Employee

A new paragraph (d) is proposed to explain the procedures which another agency must follow when requesting SBA to deduct payments from the salary of an SBA employee.

For the purposes of the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et. seq.*, SBA certifies that this proposed rule, if adopted in final form, would not be likely to have a significant economic impact on a substantial number of small entities, 5 U.S.C. 605(b), because employees are not considered small entities under the RFA.

SBA certifies that this proposed rule does not constitute a major rule for the purpose of Executive Order 12291, because the proposed changes would not be likely to result in an annual effect on the economy of $100 million or more.

This proposed rule contains no reporting or recordkeeping requirements which are subject to the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

List of Subjects in 13 CFR Part 140

Credit, Practice and procedure, Small business.

Accordingly, pursuant to the authority contained in section 5(b)(6) of the Small Business Act, 15 U.S.C. 634(b)(6), SBA proposes to amend Part 140, Title 13, Code of Federal Regulations, as follows:

PART 140—DEBT COLLECTION

1. The authority citation for Part 140 continues to read as follows:

Authority: Sec. 5(b)(6) of the Small Business Act, 15 U.S.C. 634(b)(6).

§ 140.2 [Amended]

2. In § 140.2, the last sentence of the introductory text of paragraph (c) and paragraphs (c) (1) and (2) are removed.

3. Section 140.2 is amended by redesignating paragraphs (g) and (h) as paragraphs (h) and (i) and adding a new paragraph (g) to read as follows:

* * * * *

(g) "Employee" for the purposes of § 140.2(f) and § 140.4 means a current civilian employee as defined in 5 U.S.C. 2105; an employee of the U.S. Postal Service or Postal Rate Commission; or a member or Reserve of the Uniformed Service.

4. Section 140.4, paragraph (a) is amended by revising the introductory text of paragraph (a), and revising paragraph (a)(4) to read as follows:

§ 140.4 Salary offset.

(a) When SBA determines that an SBA or other Federal employee is indebted to the SBA for debts to which the SBA is entitled to be repaid at the time of the determination, the amount of indebtedness may be collected in monthly installments or at officially established pay intervals, by deduction from the current pay account of the individual.

* * * * *

(4) *Post employment payments.* (i) If an employee terminates employment after salary offset has been initiated, a deduction after salary offset has been initiated, a deduction may be made from final salary payments, from payment for accrued annual leave, or from similar payments due the individual from the Federal government. Deductions against such final payments may exceed 15% of the total payment, up to the amount owed to the Federal government. If the employee terminates employment prior to the completion of salary offset procedures, deductions shall be made pusuant to 31 U.S.C. 3716.

(ii) Where SBA is collecting the indebtedness through deductions from biweekly or monthly retired pay, the Agency may not deduct more than 15 percent of disposable pay for any payment period, except that a greater percentage may be deducted upon the signed written consent of the individual involved.

§ 140.4 [Amended]

5. Section 140.45, paragraph (b) is amended by revising the introductory text of paragraph (b)(1), and paragraphs (b)(1)(i), (b)(1)(ii), the introductory text of paragraph (b)(2), and paragraphs (b)(2)(ii) and (b)(2)(iii), (b)(3), (b)(4)(vi) and (b)(5) to read as follows:

(b) *Notice and opportunity to be heard.* (1) Before initiating any proceedings under paragraph (a) of this section to collect any indebtedness of an employee, SBA shall provide the employee with—(i) A minimum of 30 days written notice, informing such individual: Of the nature and amount of the indebtedness determined to be due; the intention of the agency to initiate

proceedings to collect the debt through deductions from pay; * * *

* * * * *

(iii) An opportunity to enter into a written agreement acceptable to SBA to establish a schedule for the repayment of the debt; and

* * * * *

(2) If there is a statutory provision authorizing waiver, remission or forgiveness of the debt, SBA will give the employee—

* * * * *

(ii) Fifteen days from receipt of such notice in which to request consideration for waiver; and

(iii) A written response, if the employee timely requests a waiver. Such response shall answer the issues raised in the employee's request; state the agency's decision; and if the decision is not in the employee's favor, inform him or her whether there is a right to request a hearing before SBA's Office of Hearings and Appeals, that a hearing will be granted if the employee is entitled to one and timely files a request for a hearing, and that such hearing will be conducted prior to the initiation of deductions.

(3) Any alternative arrangement entered into pursuant to paragraph (b)(1)(iii) of this section shall be signed by both the employee and the SBA and be documented in the SBA's files.

(4) * * *

* * * * *

(vi) If the employee timely requests a waiver under § 140.4(b)(2), the time period in which to file a petition for a hearing is suspended. An employee must then file a petition for a hearing within 15 days after receiving a written response denying the request for a waiver.

(5) An employee loses his or her right to a hearing, and will have his or her disposable pay offset in accordance with the repayment schedule established if the employee fails to file a written petition for a hearing before the deadline established under § 140.4(b)(4).

* * * * *

6. Section 140.4 is amended by redesignating paragraph (c) as paragraph (e) and adding new paragraphs (c) and (d) as follows:

(c) *Notice to paying agency.* Upon completion of the procedures explained in paragraphs (a) and (b) of this section, SBA will provide the following to the paying agency:

(1) The Chief of SBA's Office of Portfolio Management shall certify, for SBA, in writing, that the employee owes the debt, the amount and basis of the debt, the date on which payment(s) is due, the date the Government's right to collect the debt first accrued, and that these regulations implementing 5 U.S.C. 5514 have been approved by the Office of Personnel Management.

(2) If the collection must be made in installments, the SBA shall advise the paying agency of the amount of percentage of disposable pay to be collected in each installment. SBA may, at its option, state the number and the commencing date of the installments. If SBA does not state such a date, the paying agency shall begin collection the next officially established pay period.

(3) SBA will forward the employee's written consent to the salary offset or signed statement acknowledging receipt of the required procedures. If SBA has not obtained such consent or statement, SBA will advise the paying agency of the actions taken under 5 U.S.C. 5514(b) and give the dates the actions were taken.

(d) *Deductions from pay of an SBA employee upon certification of another agency.* SBA will make deductions from the pay of its employee upon receipt of a claim from another agency. The head of such agency, or a designee, shall provide the information required in paragraph (c) and certify that the claim satisfies the requirements of 5 U.S.C. 5514, the applicable regulations of the Office of Personnel Management, and the implementing regulations of the creditor agency.

* * * * *

7. The following new paragraphs (f) and (g) are added to § 140.4.

(f) *Interest, penalties, and administrative costs.* SBA is authorized to collect any assessment of interest, penalties, and administrative costs on debts being collected under this section. The assessment of these charges and the waiving of them must be made in accordance with 4 CFR 102.13.

(g) *Non-waiver of rights by payments.* An employee's involuntary payment of all or any portion of a debt being collected under 5 U.S.C. 5514 shall not be construed as a waiver of any rights which the employee may have under 5 U.S.C. 5514 or any other provision of contract or law, unless there are statutory or contractual provisions to the contrary.

Date: September 3, 1987.

James Abdnor,

Administrator.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 25

[Docket No. NM-25; Notice No. SC-87-4-NM]

Special Conditions; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for Boeing Model 747 series airplanes which incorporate overhead crew rest areas. These rest areas have novel or unusual design features for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. These special conditions contain the safety standards which the Administrator finds necessary, because of these design features, to establish a level of safety equivalent to that established in the regulations.

DATE: Comments must be received on or before November 5, 1987.

ADDRESSES: Comments on this proposal may be mailed in duplicate to Federal Aviation Administration, Office of the Regional Counsel, Attn: Rules Docket (ANM-7), Docket No. NM-25, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; or delivered in duplicate to the Office of the Regional Counsel at the above address. Comments must be marked: Docket No. NM-25 Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Franklin Tiangsing, Transport Standards Staff, ANM-112, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; telephone (206) 431-2121.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on this proposal. The proposal contained in

this Notice may be change in light of the comments received. All comments submitted will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM-25." The postcard will be date/time stamped and returned to the commenter.

Background

Under the provisions of § 21.101(a) of the Federal Aviation Regulations (FAR), an applicant for a change to a type certificate must comply with either the regulations incorporated by reference in the type certificate (sometimes referred to as the "original certification basis") or with the applicable regulations in effect on the date of the application for the change. Section 21.101(b) further provides that, if the proposed change consists of a new design of a component, equipment installation, or system installation and that the regulations incorporated by reference in the type certificate do not provide adequate standards with respect to the proposed change, the applicant must comply with certain additional requirements in order to provide a level of safety equal to that established by the regulations incorporated by reference in the type certificate. These additional requirements are the applicable regulations in effect on the date of application for the change and any special conditions established under the provisions of § 21.16.

Section 21.16 provides that if the airworthiness regulations do not contain adequate or appropriate safety standards, because of a novel or unusual design feature, special conditions are prescribed. The special conditions contain the safety standards found necessary to establish a level of safety equivalent to that established in the regulations.

On December 17, 1986, the Boeing Commercial Airplane Company applied for change to Type Certificate No. A20WE for type certification of Model 747 series airplanes with overhead crew rest areas installed. The crew rest area would be installed above the main passenger cabin in the vicinity of the Number 5 passenger doors. This is an area that has never been used for this purpose in any previous transport airplane. Due to the novel or unusual features associated with the installation of these rest areas, special conditions are considered necessary to provide a level of safety equal to that established by the regulations incorporated by reference in the type certificate.

The regulations incorporated by reference in Type Certificate No. A20WE for Boeing 747 series airplanes include Part 25 of the FAR as amended by Amendments 25–1 through 25–8, 25–15, 25–17, 25–18, 25–20 and 25–39, and §25.803(d) as amended by Amendment 25–46. In addition, the regulations incorporated by reference include Part 36 of the FAR and a number of special conditions that are not relevant to the installation of crew rest areas. Because neither the regulations incorporated by reference in Type Certificate No. A20WE nor those in effect on the date of application for the change provide adequate standards, the special conditions discussed in this notice are proposed to provide adequate standards for the 747 series airplanes in which crew rest areas are installed.

These special conditions would establish seating, communication, lighting, personal safety and evacuation requirements for the overhead crew rest area. When applicable, the proposed requirements parallel the existing requirements for a lower deck service compartment and would provide an equivalent level of safety to that provided for main deck occupants.

Due to the location and configuration of the crew rest area, occupancy during taxi, takeoff, and landing be prohibited and occupancy is limited to crewmembers.

Two-way voice communications and public address speaker(s) would be required to alert the occupants to an in-flight emergency.

To prevent the occupants from being isolated in a dark area due to loss of the crew rest lighting, either a scond independent source of normal lighting or emergency lighting would be required. An emergency lighting system which is activated under the same conditions as the main deck emergency lighting system would also be required.

Since there are in-flight emergencies that may require the occupants of the crew rest area to return to the main deck and to prevent the occupants from being trapped in the event the stairway is blocked, two evacuation routes including a stairway would be required. These escape routes must provide for the removal of an incapacitated person from the crew rest area to the main deck.

Since the crew rest area may not always be occupied, a smoke detection system and equipment for fire fighting would be required to minimize the hazards associated with a fire in the crew rest area.

In addition, passenger information signs, supplemental exygen, and a seat or berth for each occupant would be required. These items are necessary because of turbulence and/or decompression.

The crew rest areas may also be installed in certain new model 747–400 airplanes. The Model 747–400 is a new model that is derived from the previously type certificated models of the 747 series. The Boeing Commercial Airplane Company has separately applied for a change to Type Certificate No. A20WE to include the new Model 747–400, and the certification basis for those airplanes will be established under the provisions of § 21.101. That certification basis will include any special conditions adopted for the installation for the crew rest area.

Conclusion

This action affects only certain unusual or novel design features on one model series of airplanes. It is not a rule of general applicability and effects only the manufacturer who applies to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Parts 21 and 25

Air transportation, Aircraft, Aviation safety.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration proposes the following special conditions for Boeing Model 747 series airplanes with overhead crew rest areas installed.

PARTS 21 AND 25—[AMENDED]

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2), 42 U.S.C. 1857f–10, 4321 et seq., E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

1. Occupancy of the overhead crew rest area is limited to a maximum of 10 crewmembers. Occupancy during taxi, takeoff, or landing is not permitted.

2. There must be a stairway between the main deck and the crew rest area and there must be an alternate evacuation route for occupants of the crew rest area.

The stairway and alternate evacuation route must be located on opposite sides of the crew rest area or have sufficient separation within the compartment. The stairway and

VOL
52
ISS
200
OC
16
1987
UMI

the alternate evacuation route must provide for evacuation of an incapacitated person, with assistance, from the crew rest area to the main deck, must not be dependent on any powered device, and must be designed to minimize the possibility of blockage which might result from fire, mechanical or structural failure. The crewmember procedures for carriage of an incapacitated person must be established.

3. An exit sign meeting the requirements of § 25.812(b)(1)(i) must be provided in the crew rest area near the stairway.

4. In the event airplane's main power system should fail, emergency illumination of the crew rest area must be automatically provided. Unless two independent sources of normal lighting are provided, the emergency illumination of the crew rest area must be automatically provided if the crew rest area normal lighting system should fail. The illumination level must be sufficient for the occupants of the crew rest area to locate, and descend to the main deck by means of the stairway and/or the alternate evacuation route, and to read any required operating instructions.

5. There must be a means for two-way voice communication between crewmembers on the flight deck and occupants of the crew rest area, and between crewmembers at least one flight attendant seat on the main deck and occupants of the crew rest area.

6. There must also be either public address speaker(s), or other means of alterting the occupants of the crew rest area to an emergency situation, installed in the crew rest area.

7. There must be a means, readily detectable by occupants of the crew rest area, that indicates when seat belts should be fastened and when smoking is prohibited.

8. For each occupant permitted in the crew rest area, there must be an approved seat or berth that must be able to withstand the maximum flight loads when occupied.

9. The following equipment must be provided:

a. At least one approved fire extinguisher appropriate to the kinds of fires likely to occur.

b. One protective breathing device, having TSO–C99 authorization or equivalent, suitable for firefighting.

c. One flashlight.

10. A smoke detection system that annunciates in the flight deck and is audible in the crew rest area must be provided.

11. A supplemental oxygen system equivalent to that provided for main deck passengers must be provided for each seat and berth.

12. There must be a limitation in the Airplane Flight Manual or other suitable means requiring that crewmembers be trained in the use of the evacuation routes.

Issued in Seattle, Washington, on October 1, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 87–NM–128–AD]

Airworthiness Directives: Hamburger Flugzeugbau (HFB) 320 Hansa Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to HFB 320 Hansa series airplanes, that would require an inspection for corrosion, and replacement, as necessary, on the drive shafts and rotary selectors of the landing flaps and slats of both wings, as well as the bolts and drive shafts of the speed brakes and slats. This proposal is prompted by a report of corrosion found on the bolts on the inner area of the air brake flap drive shaft on an aircraft which was being repaired. This condition, if not corrected, could lead to degradation of lateral control.

DATE: Comments must be received no later than December 7, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–128–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Messerschmitt-Bolkow-Blohm BmbH, Postfach 95 01 09, D–2103 Hamburg 95, Federal Republic of Germany. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT:. Ms. Judy Golder, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, D–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–128–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority of the Federal Republic of (West) Germany, has notified the FAA of an unsafe condition which may exist on HFB 320 Hansa series airplanes.

During a repair on an airplane, corrosion was found on the bolts and inner area of an air brake flap drive shaft. It has been determined that it is possible for similar severe corrosion to occur in the bolts and drive shafts associated with the wing flaps, slats and speed brakes. This condition, if not corrected, could lead to an asymmetric configuration which may cause degradation of lateral control.

Messerschmitt-Bolkow-Blohm BmbH has issued Service Bulletin 27–74, dated July 1, 1986, which describes an inspection for corrosion, and replacement, if necessary, of the bolts, and drive shafts and rotary selectors for the wing flaps, slats and speed brakes for this model airplane. The LBA has issued an AD requiring compliance with this service bulletin.

This airplane model is manufactured in the Federal Republic of Germany and type certificated in the United States under the provisions of section 21.29 of the Federal Aviation Administration and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this same type design registered in the United States, an AD is proposed which would require inspection, and replacement if

necessary, in accordance with the service bulletin previously mentioned.

It is estimated that 15 airplanes of U.S. registry would be affected by this AD, that it would take approximately 70 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $42,000.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($2800). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Hamburger Flugzeugbau: Applies to Model HFB–320–HANSA series airplanes, Serial Numbers 1021; 1023, 1026, 1030, 1033, 1035, 1040, 1045, and 1050–1057, certificated in any category. Compliance required as indicated, unless previously accomplished:

To prevent asymmetric configuaration which may cause degradation of lateral control, accomplish the following:

A. Within 30 days after the effective date of this AD, inspect, and replace, as necessary, the bolts, drive shafts and rotary selectors for the wing flaps, slats and speed brakes on the HFB 320 HANSA airplane in accordance with Messerschmitt-Bo!kow-Blohm GmbH Service Bulletin 27–74, dated July 1, 1986.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Messerschmitt-Bolkow-Blohm GmbH, Postfach 95 01 09, D–2103 Hamburg 95, Federal Republic of Germany. These documents may be examined at the FAA, Nowthwest Mountain Region 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director Northwest Mountain Region.

14 CFR Part 39

[Docket No. 87–NM–121–AD]

Airworthiness Directives; Airbus Industrie Model A300 B2 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to certain Airbus Industrie Model A300 B2 series airplanes, that would require inspection of the main landing gear (MLG) lower tie rods for cracks, and replacement, if necessary. This proposal is promoted by a report of cracks in the blending radius under the head of a lower tie rod. This condition, if not corrected, could lead to collapse of the main landing gear.

DATE: Comments must be received no later than December 7, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–121–Ad), 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South Seattle. Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire, Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention; ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–121–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain Airbus Industrie A300 Model B2 series airplanes. Cracks have been detected in

VOL
52
ISS
200
OC
16
1987
UMI

the MLG lower tie rods at the base of the blending radius under the head during overhaul of A300 airplanes. This condition, if not corrected, could lead to collapse of the MLG.

Airbus Industrie issued Service Bulletin A300–32–369, dated December 12, 1986, which describes ultrasonic inspection of the tie rods, and replacement, if necessary. The service bulletin references Messier-Hispano-Bugatti Service Bulletin 470–32–420, Revision 1, dated December 15, 1986, for explicit directions. The DGAC has issued an airworthiness directive, requiring compliance with the Airbus Industrie service bulletin.

This airplane model is manufactured in France and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require inspection for cracks, and replacement, if necessary, of the main landing gear (MLG) lower tie rods, in accordance with the Airbus Industrie service bulletin previously mentioned.

It is estimated that 2 airplanes of U.S. registry would be affected by this AD, that it would take approximately 1 manhour per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this Ad to U.S. operators is estimated to be $80.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($40). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 B2 series airplanes, as listed in Airbus Industrie (AI) Service Bulletin A300–32–369, dated December 12, 1986, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent collapse of the main landing gear (MLG), accomplish the following:

A. Prior to each lower tie rod accumulating 7,000 landings or within the next 500 landings, whichever occurs later, and thereafter at intervals not to exceed 1,500 landings, perform an ultrasonic inspection of the MLG lower tie rods, in accordance with AI Service Bulletin A300–32–369, dated December 12, 1986. Replace defective lower tie rods before further flight.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 86–ANE–21]

Airworthiness Directives; General Electric (GE) CT7–5A, –5A1, and –5A2 Turbopropeller Engines as Installed in Saab-Fairchild SF340A Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would require the installation of a second overspeed protection system on certain GE CT7–5A series turbopropeller engines as installed in Saab-Fairchild SF340A aircraft. The proposed AD would also supersede AD 86–10–51, Amendment 39–5473. The proposed AD is needed to prevent engine power turbine (PT) overspeed and resulting uncontained failure caused by reaction of the fuel control to an erroneous PT speed signal during ground operation with the bottoming governor enabled.

DATE: Comments must be received on or before December 14, 1987.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Regional Council, Attention: Rules Docket Number 86–ANE–21, 12 New England Executive Park, Burlington, Massachusetts 01803, or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: "Docket Number 86–ANE–21".

Comments may be inspected at the New England Region, Office of the Regional Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

The applicable service bulletins (SB's) may be obtained from Dowty Rotol Limited, Cheltenham Road East, Gloucester, England GL2 9QH; General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01910; and Saab-Scania AB, S–581 88, Linkoping, Sweden.

A copy of each SB is contained in Rules Docket Number 86–ANE–21, in the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Barbara Garian, Engine Certification Branch, ANE–141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New

England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7086.

SUPPLEMENTARY INFORMATION:
Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, at the address given above, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 86–ANE–21". The postcard will be date/time stamped and returned to the commenter.

AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986), issued November 18, 1986, requires that the engine bottoming governor be disabled when the aircraft power lever is positioned in the beta range (below flight idle). The AD was needed to prevent PT overspeed and resulting uncontained failure caused by reaction of the fuel control to an erroneous PT speed signal during ground operation with the bottoming governor enabled.

AD 86–10–51 provides interim instructions to prevent PT overspeed and uncontained failure. Since these instructions require special aircraft and engine operating procedures which increase crew workload and invalidate the constant torque on takeoff function, the FAA has determined that a second overspeed protection system with an improved level of safety precludes the need for these interim instructions and returns the aircraft and engine to pre-AD 86–10–51 operation.

This proposed AD also would require incorporation of engine bottoming governor deactivation switches to prevent an adverse yaw condition in the aircraft that could occur due to a mismatched aircraft power condition resulting from an uncommanded power increase of one engine. This would also prevent the crew from misinterpreting the uncommanded power increase of one engine as a failure of the other engine.

Since this condition is likely to exist in other engines of the same type design, the proposed AD would require installation of a second overspeed protection system on GE CT7–5A series turbopropeller engines as installed in Saab-Fairchild SF340A aircraft, and incorporation of engine bottoming governor deactivation switches in the power lever quadrant, and in addition, supersede AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986).

Conclusion

The FAA has determined that this proposed regulation involves only five aircraft with a total cost of approximately $10,000. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by Reference.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD) which supersedes AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986):

General Electric: Applies to General Electric (GE) CT7–5A, –5A1, and –5A2 turbopropeller engines as installed in Saab Fairchild SF340A aircraft.

Compliance is required as indicated, unless already accomplished.

To prevent power turbine (PT) overspeed resulting in an uncontained failure or adverse aircraft yaw due to reaction of the fuel control to an erroneous PT speed signal during ground operation with the bottoming governor (BG) enabled, accomplish the following no later than January 31, 1988:

(a) Remove propeller overspeed governor (OSG) Dowty Totol (DR) Part Numberf (P/N) 661001001 and replace with OSG DR P/N 661001002 in accordance with procedures contained in Dowty Rotol Service Bulletin (SB) SF340–61–11, dated October 8, 1986.

(b) Install cable P/N 6068T47P01 between the propeller OSG and the hydromechanical unit in accordance with GE CT7 turboprop series SB 74–09, dated October 10, 1986.

(c) Install engine BG deactivation switches, Mod Kit Saab SF340–76–018–01, in the power lever quadrant in accordance with procedures contained in Saab SB SF340–76–018, dated October 24, 1986.

(c) Upon accomplishment of paragraphs (a) through (c) above:

(1) Remove from the SF340A Aircraft Flight Manual (AFM) the BG disabling procedures required by AD 86–10–51, paragraphs (a) (1) and (2).

(2) Discontinue operating in accordance with the procedures listed in AD 86–10–51, paragraph (b).

Note: Subsequent to compliance with this AD, aircraft operation shall be conducted in accordance with the latest AFM revision.

Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance time specified in this AD.

Should this proposed rule be adopted, the FAA will request the approval of the Federal Register to incorporate by reference the manufacturers' SB's identified and described in this document.

This proposed AD would supersede AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986).

Issued in Burlington, Massachusetts, on September 24, 1987.

Jack A. Sain,

Acting Director, New England Region.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 4, 292, and 375

[Docket No. RM87-13-000]

Implementation of Section 8 of the Electric Consumer Protection Act of 1986; Hydroelectric Applicants With New Dam or Diversion Projects Seeking Benefits Under the Public Utility Regulatory Policies Act of 1978

October 5, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission (Commission) proposes to amend its regulations governing applicants for hydroelectric licenses and exemptions that seek benefits under section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). The proposed amendments only govern applicants that have projects located at a new dam or diversion. In proposing these amendments, the Commission continues to implement section 8 of the Electric Consumers Protection Act of 1986 (ECPA).

Specifically, the Commission is proposing to require every applicant for a license or exemption for a hydroelectric project with a power capacity of 80 megawatts or less to state whether benefits will be sought under PURPA and, if so, whether the project will be located at a new dam or diversion. In addition, the Commission is also proposing to establish procedures for the filing and processing of a petition pursuant to section 8(b)(4)(C) of ECPA.

DATE: Written comments on this proposed rule must be filed with the Commission by November 16, 1987. An original and fourteen copies should be filed. All filings should refer to Docket No. RM87-13-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Roger E. Smith, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Federal Energy Regulatory Commission (Commission) proposes to amend its regulations governing applicants for hydroelectric licenses and exemptions that seek benefits under section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA).[1] The proposed amendments only govern applicants that have projects located at a new dam or diversion. In proposing these amendments, the Commission continues to implement the provisions of the Electric Consumers Protection Act of 1986 (ECPA) [2].

In this notice of proposed rulemaking (NOPR), the Commission is proposing to require every application for a license or exemption for a hydroelectric project with a power capacity of 80 megawatts or less to state whether PURPA benefits will be sought and, if so, whether the project will be located at a new dam or diversion. In addition, the Commission is also proposing to establish procedures for the filing and processing of a petition pursuant to section 8(b)(4)(C) of ECPA.

Section 8 of ECPA establishes three new requirements that a hydroelectric project located at a new dam or diversion must satisfy before it can qualify for PURPA benefits.[3] In addition, section 8 imposes a moratorium on PURPA benefits for such projects.The purpose of the moratorium is to allow Congress time to evaluate whether PURPA benefits should continue to be extended to hydroelectric projects located at new dams or diversions. ECPA requires the Commission to study whether PURPA benefits should be available to these facilities. The Commission will submit the results of its study to Congress, and Congress will then have one full session to consider the issue.

While section 8 of ECPA establishes three new requirements for PURPA benefits, it also creates four exceptions to the new requirements and to the moratorium. Any project which qualifies for one of the exceptions may seek PURPA benefits without complying with one or more of the new requirements. Any project that qualifies for one of the exceptions is also exempted from the moratorium.[4]

[1] 16 U.S.C. 824a-3 (1982).

[2] Pub. L. No. 99-495; 100 Stat. 1243 (Oct. 16, 1986).

[3] The term "PURPA benefits" refers to the provision in section 210 of PURPA which requires electric utilities to purchase electricity from, and sell electricity to, any qualifying facility.

[4] The result of this framework is that the new requirements can have immediate application even though there is a moratorium on PURPA benefits. For example, one of the exceptions only excepts a project from one of the new requirements. Such a project would be exempt from the moratorium and would be able to seek PURPA benefits. However, the project still would have to comply with the remaining new requirements for PURPA benefits added by section 8 of ECPA.

II. Background

Section 210 of PURPA requires electric utilities to sell electricity to, and purchase electricity from, qualifying small power production facilities. The Federal Power Act (FPA) defines "small power production facility" to include facilities with a power production capacity of 80 megawatts or less that produce electric energy solely by the use of renewable resources.[5] The Commission has interpreted "renewable resources" to include water used at hydroelectric projects located at either an existing dam or a new dam or diversion.[6] Therefore, small hydroelectric projects qualify for, or may seek, PURPA benefits.

In section 8(e) of ECPA, enacted on October 16, 1986, Congress imposed a moratorium of approximately two-to-three years on the availability of PURPA benefits for hydroelectric projects located at new dams or diversions. The purpose of this moratorium is to allow Congress time to evaluate whether PURPA benefits should continue to be extended to hydroelectric projects that create new dams or diversions of water.[7]

A. Section 8 of ECPA

Section 8 of ECPA amends section 210 of PURPA to add a new section 210(j) and establishes a moratorium on the availability of PURPA benefits. Section 210(j) only applies to projects located at new dams or diversions that seek PURPA benefits. Section 210(j) establishes three new environmental conditions which must be satisfied before such projects can qualify for PURPA benefits. The three new environmental requirements in section 210(j) are:

(1) *No Substantial Adverse Effects.* At the time of issuance of the license or exemption for the project, the Commission finds that the project will not have substantial adverse effects on the environment, including recreation and water quality. Such finding shall be made by the Commission after taking into consideration terms and conditions

[5] 16 U.S.C. 796(17)(A) (1982).

[6] Small Power Production and Cogeneration Facilities—Qualifying Status, 45 FR 17,959 at 17,966 (Mar. 20, 1980), FERC Stats. and Regs. [Regulations Preambles 1977-1981] ¶ 30,134 (Mar. 13, 1980).

[7] In order to develop a factual record on the impact of extending PURPA benefits to hydroelectric projects located at new dams or diversions, section 8(d) of ECPA required the Commission to study whether PURPA benefits should be available to these projects. The commission will then submit the results of its study to Congress, and Congress will have one full session to consider the issue. The moratorium will end at the expiration of the first full session of Congress following the session in which the Commission submits its report to Congress.

imposed under either paragraph (3) of this subsection or section 10 of the Federal Power Act (whichever is appropriate as required by that Act or the Electric Consumers Protection Act of 1986) and compliance with other environmental requirements applicable to the project.

(2) *Protected Rivers.* At the time the application for a license or exemption for the project is accepted by the Commission (in accordance with the Commission's regulations and procedures in effect on January 1, 1986, including those relating to environmental consultation), such project is not located on either of the following:

(A) Any segment of a natural watercourse which is included in (or designated for potential inclusion in) a State or national wild and scenic river system.

(B) Any segment of a natural watercourse which the state has determined, in accordance with applicable State law, to possess unique natural, recreational, cultural, or scenic attributes which would be adversely affected by hydroelectric development.

(3) *Fish and Wildlife Terms and Conditions.* The project meets the terms and conditions set by fish and wildlife agencies under the same procedures as provided for under section 30(c) of the Federal Power Act.

While section 8 of ECPA establishes these new requirements for PURPA benefits,[8] it also creates four exceptions to one or more of the new requirements and to the moratorium. Any project that qualifies for one of the exceptions is exempted from the moratorium and can seek PURPA benefits without complying with one or more of the new requirements.[9]

The first exception is embodied in section 210(j) itself, since the section does not apply to any new dam or diversion project that is located at a government dam where non-Federal hydroelectric development is permissible. Any project in this category is exempted from the moratorium and can seek PURPA benefits without complying with any of the new requirements.[10]

[8] This notice will refer to the three requirements as: (a) The "adverse environmental effects" requirement (section 210(j)(1)), (b) the "protected rivers" requirement (section 210(j)(2)), and (c) the "fish and wildlife agency" requirement (section 210(j)(3)).

[9] If a project is excepted from one or two of the new requirements, it must still comply with the remaining requirements in section 210(j) of PURPA. However, the project would be exempted from the moratorium and could seek PURPA benefits.

[10] This exception, unlike the other exceptions, is a categorical exception and is not keyed to the timing of any event. Section 210(j) only applies, by definition, to new dams and diversions that are not located at government dams where non-Federal hydroelectric development is permissible. This notice will refer to this exception as the "government dam" exception.

The remaining exceptions are located in section 8(b) of ECPA. These exceptions are intended to provide relief for developers who had relied on existing law and who, at the time of ECPA's enactment, had expended significant amounts of money and effort on their projects. Congress recognized that the new environmental requirements in section 210(j) of PURPA could impose hardships on these developers. In order to alleviate the potential hardships, Congress created three exceptions for developers who were well on their way toward gaining regulatory approval of their projects at the time ECPA was enacted. The three remaining exceptions to the new requirements in section 210(j) of PURPA are:

1. None of the three new requirements applies if the application was filed, and accepted for filing by the Commission, before October 16, 1986, the date of ECPA's enactment. (section 8(b)(2) of ECPA)

2. Only the protected rivers requirement applies (section 210(j)(2) of PURPA) if the application was filed before October 16, 1986, and accepted for filing by the Commission between October 16, 1986, and October 16, 1989. (section 8(b)(3) of ECPA) [11]

3. The fish and wildlife agency requirement (section 210(j)(3) of PURPA) does not apply if the application was filed on or after October 16, 1986, and if the Commission finds, based on a petition filed by the applicant before April 16, 1988, that prior to ECPA's enactment the applicant had committed substantial monetary resources to the development of the project and to the diligent and timely completion of all filing requirements of the Commission. (section 8(b)(4) of ECPA)

The last exception, in section 8(b)(4) of ECPA, is available only if the Commission affirmatively grants the exception upon application, in the form of a petition. It is a portion of this last exception, in section 8(b)(4) of ECPA, that is the subject of this notice.

B. Section 8(b)(4) of ECPA

Section 8(b)(4) sets forth a series of specific steps that a qualifying applicant must take in order to satisfy, or be excepted from, the fish and wildlife agency requirement and the adverse environmental effects requirement in section 210(j) of PURPA. An applicant would qualify for section 8(b)(4) if its application was filed on or after October 16, 1986, and if the Commission finds that before October 16, 1986, the applicant committed substantial monetary resources to the development of the project and to the diligent and timely completion of all the filing requirements of the Commission. The applicant must file a "commitment of resources petition" which demonstrates the commitment of substantial monetary resources prior to the enactment of ECPA.[12] If the commitment of resources petition is denied by the Commission all the new requirements in section 210(j) of PURPA apply, and the applicant is not exempted from the moratorium. If the commitment of resources petition is granted, the applicant is excepted from the fish and wildlife agency requirement in section 210(j)(3) of PURPA.[13] In addition, the applicant may file a second petition and receive a preliminary determination whether the project satisfies the adverse environmental effects requirement in section 210(j)(1) of PURPA. It is this second petition, the adverse environmental effects (AEE) petition, that is the subject of this notice. By filing an AEE petition the applicant, who is already excepted from the fish and wildlife agency requirement, would receive a preliminary determination from the Commission on whether the project satisfies the adverse environmental effects requirement. If, on the basis of the AEE petition, the Commission initially decides that the project will have a substantial adverse effect, it must give the applicant a reasonable opportunity to provide for mitigation of such adverse effects before making a final determination. If the Commission initially decides that the

[11] For projects that qualify for this exception, the Commission is contacting the appropriate state agencies and requesting that the agencies determine if such projects are located on any natural watercourse as described in section 210(j)(2) of PURPA.

[12] The Commission issued an interim rule on February 13, 1987, which set forth what an applicant must demonstrate to show a commitment of substantial monetary resources. The interim rule also set forth procedures for the filing and processing of a commitment of resources petition. Docket No. RM87-8-000 52 FR 5276 (Feb. 20, 1987), III FERC Stats. & Regs. ¶ 30,729 (Feb. 13, 1987).

[13] If an applicant qualifies for the exception from section 210(j)(3) of PURPA, the applicant would still be subject to either recommended terms and conditions set by fish and wildlife agencies under section 10(j) or mandatory terms and conditions set by fish and wildlife agencies under section 30(c) of the FPA. There are two reasons for this interpretation. First, Congress intended FPA section 10(j) to apply to all applications for licenses except for those applications covered by PURPA section 210(j)(3). The Conference report which accompanies ECPA states,

Section 10 of the Federal Power Act, as amended by [ECPA], shall apply to *all* projects * * * for which a license is issued * * * except that section 10(j) will not apply if section 210(j)(3) of PURPA * * * applies to the project." H.R. Rep. No. 934, 99th Cong., 2nd Sess. 32 (1986) (emphasis added).

Second, Congress did not intend to alter the application of section 30(c) of teh FPA. Section 8(c) of ECPA requires that, "Nothing in this Act [ECPA] shall affect the application of section 30(c) of the Federal Power Act to any *exemption* issued after the enactment of this Act." H.R. Rep. No. 934, 99th Cong., 2nd Sess. 32 (1986) (emphasis added).

VOL 52 ISS 200 OCT 16 1987 UMI

project will not have a substantial adverse effect, it will afford interested state(s) a reasonable opportunity to make any determinations under the protected rivers requirement before making a final determination. The Commission is proposing to notify the appropriate Federal and state agencies of its initial finding. The Commission must make a final determination on the AEE petition at the time the license or exemption is issued. If a state has not taken any action before the Commission makes its final determination, the failure to take such action gives rise to a presumption that the project has no substantial adverse effect on the environment for those environmental attributes listed in section 210(j((2) of PURPA.

III. The Commission's Proposal

In this notice of proposed rulemaking (NOPR), the Commission proposes to require every application for license or exemption for a hydroelectric project with a power capacity of 80 megawatts or less to state whether PURPA benefits will be sought and, if so, whether the project will be located at a new dam or diversion. In addition, the Commission also proposes to establish procedures for the filing and processing of an "adverse environmental effects" (AEE) petition. This petition may be filed, under certain circumstances, by applicants who qualify for the specific exception in section 8(b)(4) of ECPA.[14]

A. Changes in Filing Requirements for Applications for License and Exemption

The Commission is proposing to amend its filing requirements to require every application for license or exemption for a hydroelectric project with a power capacity of 80 megawatts or less to state whether PURPA benefits will be sought, and if so, whether the project is located at a new dam or diversion. If the project is located at a new dam or diversion, it must satisfy the new environmental requirements in section 210(j) of PURPA. These proposed changes are intended to aid the Commission in its efforts to comply with ECPA and to promote the efficient use of Commission resources.

Prior to ECPA there was no distinction for obtaining PURPA benefits between new dams and diversions, and existing dams. ECPA introduces this distinction, imposing three new environmental requirements on projects located at new dams or diversions. Applicants may not always be able to determine if their project is a new dam or diversion or is reconstruction at an existing dam. If an applicant makes an incorrect determination of a projects' status, regardless of whether the mistake was inadvertent or deliberate, the applicant could avoid the requirements of section 210(j) of PURPA.[15] Therefore, in order to comply with ECPA, the Commission must verify whether or not the project is located at a new dam or diversion.

Although the new environmental requirements in section 210(j) of PURPA apply only to projects at new dams or diversions, the Commission's proposal would require all applications for projects with a power capacity of 80 megawatts or less to state whether or not PURPA benefits will be sought. This requirement is necessary to prevent applicants from circumventing or avoiding the new requirements.

Specifically, requiring an applicant with a hydroelectric project with a power capacity of 80 megawatts or less to state in its application whether or not it will seek PURPA benefits will allow the Commission to determine which projects require verification. If, prior to the issuance of a license or exemption, an applicant files a statement reversing its intent not to seek PURPA benefits, the Commission proposes to treat the statement as an amendment to the application which materially amends the proposed plans of development. This would encourage an applicant, at the outset, to decide whether to seek PURPA benefits. Treating a reversal of intent in this manner would also change the acceptance date of the application to the date on which the amendment was filed. The Commission would then consider the amended application a new filing for the following purposes:

(1) Reissuing public notice of the application (§ 4.32 of the Commission's regulations—Acceptance for filing or rejection) 18 CFR 4.32 (1987),

(2) Timeliness (§ 4.36 of the Commission's regulations (Competing applications) 18 CFR 4.36 (1987), and

(3) Disposal of competing applications (§ 4.37 of the Commission's regulations—Rules of preference among competing applications) 18 CFR 4.37 (1982).

The Commission also would rescind any acceptance letter for the application if it had issued one. As a consequence, the applicant would be subject to a new notice period and might lose priority among competing applicants.

The Commission is proposing to prohibit an applicant who reverses its intent not to seek PURPA benefits after a license or exemption has been issued from obtaining PURPA benefits. This proposal would prevent an applicant from deliberately avoiding the requirements in section 210(j) of PURPA by initially stating its intention not to seek PURPA benefits and then, after the license or exemption had been issued, attempting to seek PURPA benefits as a project at an "existing dam."

The Commission requests comments on this proposal or other suggestions on how to prevent an applicant from circumventing the new requirements in section 210(j) of PURPA.

If an applicant states its intent to seek PURPA benefits but is not successful, the Commission will have specifically considered the issue of PURPA benefits and will have an adequate record.[16] Therefore, if circumstances were to change, and the applicant could demonstrate that the changed circumstances negated the Commission's reasons for initially denying PURPA benefits, it might qualify for PURPA benefits.

B. Substantial Adverse Environmental Effects Petition

The Commission is proposing standards and procedures for filing an adverse environmental effects (AEE) petition. As explained before, the Commission can only make a determination on the AEE petition for an applicant whose commitment of resources petition was granted by the Commission. Such an applicant is excepted from the fish and wildlife requirements in section 210(j)(3) of PURPA.

---

[14] The Commission implemented portions of section 8 of ECPA in an interim rule issued on February 13, 1987. Hydroelectric Applicants Seeking Benefits Under section 210 of the Public Utility Regulatory Policies Act of 1978 for Projects Located at a New Dam or Diversion (Docket No. RM87-8-000), 52 FR 5276 (Feb. 20, 1987), III FERC Stats. & Regs. ¶ 30,729 (Feb. 13, 1987). This NOPR proposes to implement the remaining portions of section 8.

[15] It is important to note that section 8(a) of ECPA defines what a new dam or diversion is for section 210 of PURPA. This definition tracks, or coincides with, the definition of an "existing dam" in section 408(a)(6) of PURPA and in §§4.30(b)(6) (i) and (ii) of the Commission's regulations. However, under section 210(k) of PURPA, the addition of flashboards would not preclude a project from seeking PURPA benefits as an "existing dam." In contrast, the addition of flashboards or similar adjustable devices precludes a project from qualifying for an exemption as an existing dam under the FPA. The Commission is proposing to continue to restrict exemptions to projects which do not provide for the addition of flashboards. However, it is apparently the intent of Congress to apply a more liberal rule regarding flashboards to qualifications for PURPA benefits. Therefore, under PURPA, "existing dams" can include projects which raise the existing impoundment level by the addition of flashboards.

[16] This example assumes that the applicant receives the license or the exemption and that the applicant is only unsuccessful in obtaining PURPA benefits.

If the Commission has granted the commitment of substantial monetary resources petition, and if the applicant has filed an AEE petition, the Commission will make an initial determination whether the project will satisfy the adverse environmental effects requirement in section 210(j)(1) of PURPA. Therefore, the AEE petition should simply identify the project and request that the Commission make an initial determination on the adverse environmental effects requirement. The Commission will make a final determination on the AEE petition at the time it issues the license or grants the exemption. If the appropriate state(s) has not taken any action before the Commission makes a final determination, a presumption arises that there are no substantial adverse effects. In other words, it will be presumed that for those environmental attributes listed in section 210(j)(2) of PURPA, the project has no substantial adverse effect on the environment.[17] The state must act before the Commission makes a final determination on the AEE petition (i.e., when the Commission issues the license or grants the exemption) to prevent the presumption from arising.

The Commission anticipates that the state will be well aware of all projects subject to section to section 8(b)(4) of ECPA and will have ample opportunity to comment on the initial determination. First, the Commission will notify the state when it issues an initial determination on the AEE petition. Second, before any application for a license or exemption can be submitted to the Commission, applicants must complete the requisite prefiling consultation requirements.[18] These requirements include consultation with state agencies. Therefore, since a state is given ample notice under these circumstances, it is reasonable to presume that the state's inaction indicates that the state does not object to the project.

1. *Definition of Substantial Adverse Environmental Effects*

The Commission proposes to define "substantial adverse environmental effects" as follows:

Substantial adverse environmental effects—are, for purposes of the Public Utility Regulatory Policy Act (PURPA), those effects which are characterized by substantial adverse alteration of natural features, existing habitat, recreational uses, water quality or other environmental resources. For the purposes of this rule, "substantial adverse alteration" of a particular resource means a change in the resource which results in a modification of the continued use of that resource. The Commission will determine if a project would result in substantial adverse environmental effects. In making this determination the Commission will consider, among other things, the following:

(1) The proposed mitigative measures;

(2) The consistency of the proposal with local, regional, and national resource plans and programs;

(3) The mandatory terms and conditions of fish and wildlife agencies under section 210(j) of PURPA, or section 30(c) of the Federal Power Act; or the recommended terms and conditions of fish and wildlife agencies under 10(j) of the Federal Power Act, whichever is appropriate; and

(4) Any other information which the Director believes is relevant to consider.

This definition tracks the language and the legislative history of section 210(j)(1) of PURPA.[19]

The Commission is proposing to incorporate its determination of substantial adverse effects into its environmental review process. Specifically, the Commission would review the application; require any additional information necessary to assess the impacts of the project on any environmental resource; assess the impacts of the project; and decide whether the project, even with the proposed mitigation, substantially alters the existing habitat, recreational uses, water quality or other environmental resources.

The Commission believes that the determination under section 210(j)(1) is specific to PURPA and does not affect any findings under the National Environmental Policy Act of 1969 (NEPA). NEPA is a procedural statute, while PURPA is a substantive statute. That is, NEPA mandates that certain procedures must be followed when the government proposes to take any action that significantly affects the quality of the human environment. NEPA does not deny or prohibit any Government action, it only mandates that certain processes be followed. Section 210(j)(1) of PURPA, however, contains a substantive standard which, if it is not satisfied, will result in the denial of PURPA benefits.

2. Review of the Substantial Adverse Environmental Effects Petition

Although the Commission would make the final determination on the AEE petition when it issues the license or grants the exemption, the Commission proposes to delegate to the Director of the Office of Hydropower Licensing (Director) the authority to make an initial determination on the AEE petition. The Director would make an initial finding on the petition after the close of the public notice period. The Director would also provide written notice of this finding to the applicant and to the appropriate Federal and state agencies.[20]

If the Director's initial determination is that the project would not have any adverse environmental effects, the Commission is proposing that a final determination could not be made any sooner than 45 days after the initial determination. The Commission believes that 45 days is sufficient time to allow the state to take any action it deems necessary. Similarly, the Commission proposes to provide an applicant with 45 days in which to file proposed mitigative measures. If an applicant files mitigative measures, the Commission proposes to give the state 45 days to review and comment on the mitigative measures.

The proposed mitigative measures filed by an applicant could contain changes in the development plan that would, in other circumstances, amount to the filing of a material amendment. Since the proposed mitigation measures are filed at the Commission's request and pursuant to ECPA, the Commisson proposes that such measures would not have the consequences of filing a material amendment. However, an applicant could not use the opportunity to provide mitigative measures as a pretext to materially amend its application and avoid the consequences of filing a material amendment. If the

---

[17] While Congress used the attributes listed in the protected rivers requirement (section 210(j)(2) of PURPA) to define the scope of the presumption, the presumption arises only for the purposes of the adverse environmental effects requirement in section 210(j)(1) of PURPA.

[18] See 18 CFR 4.38 for the Commission's prefiling consultation requirements.

[19] *See*, 16 U.S.C. 823a–3(j)(1) (1982) (Section 210(j)(1) of PURPA), and the House Report which concluded that,

> • • • the Commission must determine that the project will not have substantial effects on the environment, including recreation or water quality. This requirement for cumulative impact analysis is intended to prevent PURPA benefits from being extended to new dam or diversions projects which *substantially alter, even with mitigation, existing habitat, recreational uses or water quality.* (emphasis added).

H.R. Rep. No. 507, 99th Cong., 2d Sess. 43 (1986).

[20] Congress intended the Commission to notify the state(s) of its preliminary finding on the AEE petition. The Conference Report which accompanied ECPA states, "If FERC issues a preliminary finding that the project would result in such adverse effects, the developer would be provided a reasonable opportunity to mitigate such effect. It is expected that FERC would notify the State of this finding." H.R. Rep. No. 934, 99th Cong., 2d Sess. 32 (1986).

proposed measures exceed the scope of mitigating substantial adverse environmental effects, the Commission will treat such measures as a material amendment to the application.

IV. Written Comment Procedure

The Commission invites all interested persons to submit written data, views, and other information on the matters proposed in this notice. Submit all comments to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, and refer to Docket No. RM87–13–000. Please file an original and fourteen copies. All comments received prior to 4:30 p.m. EST on November 16, 1987 will be considered by the Commission.

Written submissions will be placed in a public file established for this docket and will be available for public inspection during regular business hours in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act [21] requires a notice of proposed rulemaking to either contain an analysis of the impact the rulemaking would have on small entities,[22] or certify that the rule would not have a significant economic impact on a substantial number of small entities. This notice proposes a petitioning procedure that would assist certain applicants in meeting one of the new requirements in section 210(j) of PURPA. Section 210(j) applies to hydroelectric projects located at new dams or diversions that seek PURPA benefits. This notice also proposes regulations that would require applicants for hydroelectric projects with a power capacity of 80 megawatts or less to state whether PURPA benefits will be sought and, if so, whether the project will be located at a new dam or diversion. The Commission recognizes that these proposed regulations would have an economic impact on small entities. That impact, however, would be a beneficial one. The proposed regulations will help small entities comply with ECPA and new section 210(j) of PURPA. The Commission does not believe that the term "significant economic impact on a substantial number of small entities" as used in the Regulatory Flexibility Act, was intended to include regulations having a beneficial, rather than negative, impact on small entities. Accordingly, the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities.

VI. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) [23] and the Office of Management and Budget's (OMB) regulations [24] require that OMB approve certain information collection requirements imposed by agency rule. The information collection provisions in this notice will be submitted to OMB for its approval. Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington DC 20426 (attention: Ellen Brown (202) 357–5311). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (attention: Desk Officer for the Federal Energy Regulatory Commission).

List of Subjects

18 CFR Part 4

Electric power, Reporting and recordkeeping requirements.

18 CFR Part 292

Electric power plants, Electric utilities, Natural gas, Reporting and recordkeeping requirements.

18 CFR Part 375

Authority delegations (Government agencies), Seals and insignia, Sunshine Act.

In consideration of the foregoing, the Commission proposes to amend Parts 4, 292 and 375, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 4—LICENSES, PERMITS, EXEMPTIONS, AND DETERMINATION OF PROJECT COSTS

1. The authority citation for Part 4 is revised to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791a–825r, as amended by the Electric Consumers Protection Act of 1986. PUb. L. 99–495; Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601–2645 (1982), as amended; Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); EO 12009, 3 CFR 1978 Comp., p. 142, unless otherwise noted.

2. In § 4.30, a new paragraph (b)(28) is added to read as follows:

§ 4.30 Applicability and definitions.

* * * * *

(b) * * *

(28) "PURPA benefits" mean benefits under section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA), as amended. Section 210 of PURPA requires electric utilities to purchase electricity from, and to sell electricity to, qualifying facilities.

3. In § 4.32, paragraphs (c) through (i) are redesignated as paragraphs (d) through (j), and a new paragraph (c) is added to read as follows:

§ 4.32 Acceptance for filing or rejection.

* * * * *

(c) Every application for license or exemption for a project with a capacity of 80 megawatts or less must state:

(1) Whether benefits under section 210 of PURPA will or will not be sought;

(2) If benefits under section 210 of PURPA will be sought, the application must also state:

(i) That the project meets the criteria for qualifying small power production facilities contained in §§ 292.201 through 292.210 of this chapter, and

(ii) Whether the project would impound or divert the water of a natural watercourse by means of a new dam or diversion.

* * * * *

4. In redesignated paragraph, (d) through (f) of § 4.32, remove the words "(a) and (b)" where they appear and add, in their place, the words "(a), (b), and (c)".

5. In § 4.32 paragraphs (b) (1) and (2) and redesignated (e)(1)(ii), remove the words, "paragraph (c)" and add, in their place, the words "paragraph (d)".

6. In § 4.32 redesignated paragraph (e)(1)(iii), remove the words "paragraph (d)(2)(iii)" and add, in their place, the words "paragraph (e)(2)(iii)".

7. In § 4.32 redesignated paragraph (e)(2)(ii)(B), remove the words "paragraph (d)(1)" and add, in their place, the words "paragraph (e)(1)".

8. In § 4.32 redesignated paragraph (f), remove the words "paragraph (d)" and add, in their place, the words "paragraph (e)".

9. In § 4.33(d)(3), remove the words "§ 4.32(c)(2)" and add, in their place, the words "§ 4.32(d)(2)".

10. In § 4.35 paragraphs (a)(1), (a)(2)(i), (a)(2)(iii), and (a)(2)(iv) are revised and a new paragraph (a)(2)(v) is added to read as follows:

[21] 5 U.S.C. 601–612 (1982).

[22] 5 U.S.C. 603 (1982).

[23] 44 U.S.C. 3501–3520 (1982).

[24] 5 CFR 1320.13 (1987).

§ 4.35 Amendment of application; date of acceptance.

(a) *General rule.* (1) Except as provided in paragraph (a)(2) of this section, if an amendment to an application is filed, the Commission, in determining the date of acceptance of the application under § 4.32(f) of this part, will consider the date on which the amendment to the application was filed to be the date on which the application was filed with the Commission. The Commission will also consider the amended application as a new filing for the purposes of determining its timeliness under § 4.36 of this part, for disposing of competing applications under § 4.37 of this part, and for reissuing public notice of the application under § 4.32(d)(2) of this part. The Commission will also rescind any acceptance letter already issued for the application. This general rule applies in the following circumstances:

(i) If an applicant amends its filed license or preliminary permit application in order to change the status or identity of the applicant or to materially amend the proposed plans or development; or

(ii) If an applicant amends its filed application for exemption from licensing in order to materially amend the proposed plans of development; or

(iii) If an applicant, with a project that has a capacity of 80 megawatts or less, amends its filed application by changing its statement of intent whether or not to seek benefits under section 210 of PURPA as originally filed under § 4.32(c)(1) of this chapter.

(2) *Exceptions.* This section does not apply to:

(i) Any corrections of deficiencies made pursuant to § 4.32(e)(1);

* * * * *

(iii) Any amendments made pursuant to § 4.37(c)(2) of this chapter by a priority applicant to amend its proposed plans of development to make them as well adopted as the proposed plans of an applicant that is not a priority applicant;

(iv) Any amendments made by a license or an exemption applicant to amend its proposed plans of development to satisfy requests of fish and wildlife agencies submitted after an applicant has consulted adequately under § 4.38 of this chapter; and

(v) Any license or exemption applicant with a project located at a new dam or diversion who is seeking PURPA benefits and who:

(A) Has filed an adverse environmental effects (AEE) petition pursuant to § 292.210 of this chapter and,

(B) Has proposed measures to mitigate the adverse environmental effects which the Commission, in its initial determination on the AEE petition, stated the project will have. This exception does not protect any proposed mitigative measures that the Commission finds are pretext to avoid the consequences of materially amending the application or are outside the scope of mitigating the adverse environmental effects.

* * * * *

§ 4.38 [Amended]

11. In § 4.38(b)(3), remove the words "§ 4.32(d)(1)" and add, in their place, the words "§ 4.32(e)(1)".

§ 4.40 [Amended]

12. In § 4.40(b), remove the words "§ 4.32(g)" and add, in their place, the words "§ 4.32(h)".

§ 4.50 [Amended]

13. In § 4.50(b), remove the words "§ 4.32(g)" and add, in their place, the words "§ 4.32(h)".

§ 4.82 [Amended]

14. In § 4.82(b), remove the words "§ 4.32(c)(2)(i)" and add, in their place, the words "§ 4.32(d)(2)(i)".

PART 292—REGULATIONS UNDER SECTIONS 201 AND 210 OF THE PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978 WITH REGARD TO SMALL POWER PRODUCTION AND COGENERATION

15. The authority citation for Part 292 is revised to read as follows:

Authority: Electric Consumers Protection Act of 1986, Pub. L. No. 99–495; Department of Energy Organiztion Act, 42 U.S.C. 7101–7352 (1982); EO 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriations Act, 31 U.S.C. 9701 (1982); Federal Power Act, 16 U.S.C. 791a–825r (1982); Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982), unless otherwise noted.

16. In § 292.101 a new paragraph (b)(12) is added to read as follows:

§ 292.101 Definitions.

* * * * *

(b) * * *

(12) "New dam or diversion" means a dam or diversion which requires, for the purposes of installing any hydroelectric power project, any construction, or enlargement of any impoundment or diversion structure (other than repairs or reconstruction or the addition of flashboards or similar adjustable devices).

17. Section 292.210 is added to read as follows:

§ 292.210 Petition for initial determination of no substantial adverse environmental effects (AEE petition).

(a) An applicant that has filed a petition under § 292.209 of this part may also file an AEE petition with the Commission for an initial determination that the project will not cause substantial adverse environmental effects pursuant to § 292.203(c)(1)(ii) of this part. The Commission will act on the AEE petition only if the Commission has granted the applicant's commitment of resources petition under § 292.209 of this part.

(b) Substantial adverse environmental effects are, for purposes of the Public Utility Regulatory Policies Act of 1978 (PURPA), those effects which are characterized by substantial alteration, of natural features, existing habitat, recreational uses, water quality or other environmental resources. For the purposes of this section, "substantial alteration" for a particular resource means a change in the resource which results in a modification of the continued use of that resource. The Director of the Office of Hydropower Licensing will determine if a project will result in substantial adverse environmental effects. In making this determination that Director will consider, among other things, the following:

(1) The proposed mitigative measures;

(2) The consistency of the proposal with local, regional, and national resource plans and programs;

(3) The mandatory terms and conditions of fish and wildlife agencies under section 210(j) of PURPA, or section 30(c) of the Federal Power Act; or the recommended terms and conditions of fish wildlife agencies under 10(j) of the Federal Power Act, whichever is appropriate; and

(4) Any other information which the Director believes is relevant to consider.

(c) *Time of filing petition.* The applicant may:

(1) File the AEE petition with the application for license or exemption, or

(2) Submit with the application for license or exemption a request for an extension of time, not to exceed 90 days

or April 16, 1988, whichever occurs first, in which to file the AEE petition.

(d) *Contents of petition.* The AEE petition must identify the project and request that the Commission make an initial determination on the adverse environmental effects requirement in § 292.203(c)(ii) of the Commission's regulations.

(e) *Initial finding on the petition.* The Director of the Office of Hydropower Licensing will make the initial determination on the AEE petition after the close of the public notice period for the accepted application. If the Director's initial determination finds:

(1) No substantial adverse effects, then the Commission must wait at least 45 days before making a final determination that the project satisfies the requirements of § 292.203(c)(1)(ii) of this chapter;

(2) Substantial adverse environmental effects, within 45 days of the initial finding that the project does not satisfy the requirements § 292.203(c)(1)(ii) of this chapter, the applicant may file proposed measures to mitigate the adverse environmental effects found. The state will have 45 days to review any mitigative measures filed by an applicant.

(f) *Notification of finding.* The Commission will provide written notice of the Director's initial finding on the petition to the applicant and to the Federal and state agencies that the applicant must consult under § 4.38 of this chapter.

(g) *Material amendments to application.* The proposed mitigative measures filed under paragraph (e)(2) of this section will not be considered a material amendment to the application unless the Commission finds that the measures proposed by the applicant are unnecessary to, or exceed the scope of, mitigating substantial adverse effects. If the Commission finds the proposed mitigative measures constitute a material amendment, the application will be considered filed with the Commission on the date on which the applicant filed the proposed mitigative measures, and all other provisions of § 4.35(a) of this chapter will apply.

(h) *Final determination on the petition.* The Commission will make a final determination on the petition at the time the Commission issues a license or exemption for the project.

(i) *Presumption of no substantial adverse environmental effects.*—(1) *Presumption.* If, at the time the Commission makes a final determination on the AEE petition (the substantial adverse effect requirement in § 292.203(c)(ii) of this chapter), the state has not taken any action under paragraph (i)(2) of this section, the Commission will presume that, as for those attributes listed in § 292.203(c)(1)(iii) of this chapter, the project will not cause substantial adverse environmental effects.

(2) *Rebuttal.* In order to rebut the presumption described in paragraph (i)(1) of this section the state must, before the Commission issues a license, come forward with evidence to show that, at the time the application for license or exemption was accepted, the project was:

(i) Located on any segment of a natural watercourse which is included in (or designated for inclusion in) a State or National Wild and Scenic River System; or

(ii) Located on any segment of a natural watercourse which the state has determined, in accordance with applicable state law, to possess unique natural, recreational, cultural or scenic attributes that will be adversely affected by hydroelectric development.

§ 292.203 [Amended]

18. In § 292.203(c)(1)(iii) introductory text, remove the words "§ 4.32(e)" and add, in their place, the words § 4.32(f)".

§ 292.209 [Amended]

19. In § 292.209(b), remove the words "§ 4.32(e)" and add, in their place, the words "§ 4.32(f)".

20. In § 292.209(d)(8), remove the words "§ 4.32(d)" and add, in their place, the words "§ 4.32 (e)".

PART 375—THE COMMISSION

21. The authority citation for Part 375 is revised to read as follows:

Authority: Electric Consumers Protection Act of 1986, Pub. L. No. 99–495; Department of Energy Organization Act, 42 U.S.C. 7101–7532, EO 12009, 3 CFR 1978 Comp., p. 142; Administrative Procedure Act, 5 U.S.C. 553; Federal Power Act, 16 U.S.C. 791a–828c, as amended; Natural Gas Act, 15 U.S.C. 717–717w, Natural Gas Policy Act of 1978, 15 U.S.C. 3301 *et seq.*; Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601 *et. seq.*, as amended.

22. In § 375.314 paragraph (hh) is revised to read as follows:

§ 375.314 Delegations to the Director of the Office of Hydropower Licensing.

* * * * *

(hh) Pass upon petitions filed under §§ 292.209 and 292.210 of this chapter.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Parts 404 and 416

[Regulations Nos. 4 and 16]

Federal Old-Age, Survivors, and Disability Insurance; Supplemental Security Income for the Aged, Blind, and Disabled; Decisions by Administrative Law Judges in Cases Remanded by the Courts

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rule.

SUMMARY: We propose to amend the regulations to provide that where a court remands a case to the Secretary and the Appeals Council subsequently remands the case to an administrative law judge (ALJ) for further proceedings, and a new decision, the ALJ may issue an initial decision. The initial decision will become the decision of the Secretary unless the Appeals Council takes jurisdiction of the case. Under the regulations currently in effect for court remands, the ALJ must issue a recommended decision and the Appeals Council must review that decision and take further action in every case before the decision becomes final.

Following adoption of the proposed change, favorable ALJ decisions that are not reviewed by the Appeals Council should be effectuated on a more timely basis (i.e., claimants should receive benefits earlier) because it will not be necessary for the Appeals Council to issue an adoption decision in most cases. Agency final action on those unfavorable decisions not requiring further action by the Appeals Council will also be accomplished more expeditiously.

DATE: Your comments will be considered if we receive them no later than December 15, 1987.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–B–4, Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during those same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Philip Berge, Legal Assistant, 3–B–4

Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594–7452.

SUPPLEMENTARY INFORMATION:

Background

Under the current regulations, if a Federal court remands a case to the Secretary, the Appeal Council receives the case on behalf of the Secretary. In most instances, the Appeals Council in turn remands the case to an ALJ for further proceedings. Generally, the ALJ holds a supplemental hearing at which the parties may present their arguments and provide any additional evidence. The ALJ then returns the case to the Appeal Council with a recommended decision (20 CFR 404.953, 404.983, 416.1453, and 416.1483). The parties are sent a copy of the recommended decision, and may file briefs or other written statements with the Appeals Council (20 CFR 404.977 and 416.1477). When the Appeals Council receives an ALJ's recommended decision, it must issue a decision adopting, modifying or rejecting an ALJs recommended decision, or again remand the case to an ALJ for further proceedings (20 CFR 404.979 and 416.1479). Thus, the current policy requires Appeal Council action in each case involving a court remand, even if the ALJ's recommended decision is completely free from error and even where the parties do not object to the recommended decision.

A recent review of our policy with respect to court remands indicated that the current procedures could be modified to ensure the more timely processing of court remands. Under present procedures, the issuance of the Appeals Council decision often takes a substantial period from the date ALJ issues the recommended decision. In addition, the Appeals Council adopts ALJ's recommended decisions without substantive revision in a high percentage of cases. In view of these findings, we propose to eliminate the requirement that the ALJ issue a recommended decision in court remand cases. However, ALJs will continue to issue recommended decisions in certain cases involving the application of circuit court case law as interpreted in an Acquiescence Ruling. Regulations covering this policy are being developed.

Proposed Policy

We propose to amend the regulations to eliminate the requirement that ALJs must issue recommended decisions in court remand cases. ALJs would issue initial decisions which would become final unless: (1) Within 30 days after the decision is received, the parties submit written exceptions to the Appeals Council disagreeing with the ALJ's action or within that period submit a written request for an extension of time to file exceptions and, based on these exceptions, the Appeals Council assumes jurisdiction of the case; or (2) the Appeals Council decides to take jurisdiction of the case within 60 days after the date of the decision. If the Appeals Council assumes jurisdiction, the ALJ's decision does not become final, and the Appeals Council's review is not limited to the scope of the ALJ's decision but may encompass all aspects and issues of the case, When parties have filed written exceptions to an ALJ's decision, the Appeals Council may assume jurisdiction at any time, even after the 60-day limit which applies when no such exceptions have been filed. We propose to amend the current regulations at 20 CFR 404.955 and 416.1455 which discuss the binding effect of an ALJ's decision to accommodate these procedures.

Pursuant to 20 CFR 404.901 and 416.1401, the date of receipt of ALJ's decision by the parties is presumed to be 5 days after the date on the notice of the decision. Proposed §§ 404.984(b) and 416.1484(b) provide 30 days after receipt of the ALJ's decision for a party to file written exceptions with the Appeals Council with a 30-day extension to be granted automatically by the Appeals Council when timely requested.

The reason for providing that the parties have 30 days in which to submit written exceptions to the ALJ's decision (with a possible 30-day extension) while the Appeals Council has 60 days to decide whether to assume jurisdiction of the case is that the Appeals Council must be in a position to review every decision within 60 days after the ALJ's decision is issued. In deciding whether or not to assume jurisdiction, it is preferable for the Appeals Council to have the benefit of the parties' exceptions. Because of this, the Appeals Council will usually not decide whether to assume jurisdiction until written exceptions have been submitted or the period for submitting them has expired. If, however, no such exceptions are submitted, there must be a period during which the Appeals Council can decide whether to assume jurisdiction before the 60-day period following the ALJ's decision expires. Hence the 30/60-day differential provides a mechanism that ensures that (1) in the great majority of cases, the Appeals Council will be able to consider the parties' exceptions at the time it decides whether or not to assume jurisdiction and (2) if no exceptions are submitted, the Appeals Council will have time to decide whether to assume jurisdiction before the 60 days for doing so expires. This privision allows more time than the current regulations which provide a 20-day period in which to file briefs or other written statements when an ALJ issues a recommended decision.

If a party indicates in writing the he or she disagrees with the ALJ's decision, the Appeals Council will either take jurisidiction of the case and issue a decision; remand the case to an ALJ for further proceedings; or, in the alternative, issue a notice to the parties explaining why it believes the ALJ's deicision is correct.

Under the proposed policy, if the Appeals Council decides to take jurisdiction (where no exceptions are filed), notice will be sent to the parties and the parties' representatives within 60 days after the date of the ALJ's decision. The notice will inform them of the Appeals Council's proposed action and provide the opportunity to file a brief or other written statement with the Appeals Council relating to the proposed action. All other decisions fully favorable to the parties will be forwarded immediately by the Appeals Council to the appropriate agency component for effectuation with respect to the matters which were decided by the ALJ. ALJ's do not always make decisions regarding all the factors involved in a claim. Determination on factors of eligibility or entitlement not addressed in the ALJ's decision will be made by the apropriate SSA component.

If the ALJ issues a decision unfavorable to the parties and (1) the parties or the parties' representatives do not file written exceptions within the specified time period or within any extension of time disagreeing with the decision, and (2) the Appeals Council does not assume jurisdiction of the case, the ALJ's decision will be the final decision of the Secretary. However, the Appeals Council will continue to ensure that each case is appropriately handled and fully complies with the court remand order. In all cases where further action is necessary, the Appeals Council will so advise the parties and the parties' representatives.

Under the proposed regulations, an ALJ could still issue a recommended decision if he or she chose to do so, or the Appeals Council, at its discretion, may order the ALJ to issue a recommended decision. In any case where the ALJ issues a recommended decision, the parties will continue to have the right to file briefs or other written statements with the Appeals Council within 20 days and the Appeals Council will issue the final decision. 20 CFR 404.977(d) and 416.1477(d).

The procedures set forth in these regulations apply to cases under titles II and XVI of the Social Security Act. They will also apply to cases involving remands by the courts in which the Secretary's final decision was issued under the appeals procedures set forth in 42 CFR Part 405, Subpart G, Reconsiderations and Appeals Under the Hospital Insurance Program (Part A of Medicare). The appeals covered under that subpart involve whether an individual is entitled to Hospital Insurance or Supplementary Medical Insurance under title XVIII of the Act or the amount payable under Hospital Insurance. Those regulations incorporate the regulations in 20 CFR Part 404, Subpart J by reference. Therefore, the amendments to 20 CFR Part 404, Subpart J set forth in this Notice of Proposed Rulemaking would apply to procedures in 42 CFR Part 405, Subpart G. These procedures will not apply to appeals under 42 CFR Part 405, Surpart O. That subpart primarily governs appeals by providers of services and other entities as to participation in the Medicare program. Under that subpart the ALJ is not required to issue a recommended decision in a case remanded by a court unless directed to do so by the Appeals Council. Thus, that subpart of the regulations is consistent with the procedures to be implemented in these regulations.

These procedures will also not apply to appeals pursuant to 20 CFR Part 410, Subpart G. That subpart of the regulations sets forth the procedure for appeals in claims under the Federal Coal Mine Health and Safety Act, Title IV, Black Lung Benefits for which the SSA still has jurisdiction. We are not amending that subpart because ongoing jurisdication for Black Lung claims is now in the Department of Labor. Moreover, there are few remaining cases now within SSA jurisdiction and the number remaining should continue to diminish. Thus, there is no need to change the procedures for these cases.

Regulatory Procedures

Executive Order 12291

The Secretary has determined that this is not a major rule under Executive Order 12291 because the issuance of these regulations is not expected to result in significant costs. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

These regulations impose no new reporting or recordkeeping requirements requiring Office of Management and Budget clearance.

Regulatory Flexibility Act

We certify that these proposed regulations will not, if promulgated, have a significant economic impact on a sustantial number of small entities because these rules will affect only individuals. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required.

Subpart J of Part 404 and Subpart N of Part 416 of Chapter III of Title 20 of the Code of Federal Regulations are amended as follows:

PART 404—[AMENDED]

1. The authority citation for Subpart J of Part 404 continues to read as follows:

Authority: Secs. 201(j), 205 (a), (b), and (d)–(h), 221(d), and 1102 of the Social Security Act; 42 U.S.C. 401(j), 405 (a), (b), and (d)–(h), 421(d), and 1302; sec. 5 of Pub. L. 97-455, 96 Stat. 2500; sec. 6 of Pub. L. 98-460, 98 Stat. 1802.

2. Paragraph (b) of § 404.953 is revised to read as follows:

§ 404.953 The decision of an administrative law judge.

* * * * *

(b) *Recommended decision.* Although an administrative law judge will usually make an initial decision, he or she may send the case to the Appeals Council with a recommended decision where appropriate. The administrative law judge shall mail a copy of the recommended decision to the parties at their last known address and send the recommended decision to the Appeals Council.

3. Paragraphs (d) and (e) are revised and a new paragraph (f) is added to § 404.955 to read as follows:

§ 404.955 The effect of an administrative law judge's decision.

* * * * *

(a) The expedited appeals process is used;

(e) The decision is a recommended decision directed to the Appeals Council; or

(f) In a case remanded by a Federal court, the Appeals Council assumes jurisdiction under the procedures in § 404.984.

4. An undesignated center heading is added immediately before § 404.983 and new § 404.984; and § 404.983 is revised to read as follows:

Court Remand Cases

§ 404.983 Case remanded by a Federal court.

When a Federal court remands a case to the Secretary for further consideration, the Appeals Council, acting on behalf of the Secretary, may make a decision, or it may remand the case to an administrative law judge with instructions to take action and issue a decision or return the case to the Appeals Council with a recommended decision. If the case is remanded by the Appeals Council, the procedures explained in § 404.977 will be followed.

5. A new § 404.984 is added to read as follows:

§ 404.984 Appeals Council review of administrative law judge decision in a case remanded by a Federal court.

(a) *General.* In a case remanded by a Federal court for further consideration, the administrative law judge's decision will become the final administrative decision on your case unless the Appeals Council assumes jurisdiction of the case. The Appeals Council may assume jurisdiction based on written exceptions to the administrative law judge's decision filed by you or your representative or based on its authority to take jurisdiction pursuant to paragraph (c) of this section. If the Appeals Council assumes jurisdiction of your case, all issues relating to your claim whether or not they were considered by the administrative law judge will be before the Appeals Council. The Appeals Council will make a new, independent decision based on the entire record or remand the case to an administrative law judge for further proceedings.

(b) *You file exceptions disagreeing with the administrative law judge's*

decision. (1) If you disagree with the administrative law judge's decision, in whole or in part, you may file exceptions to the decision with the Appeals Council. Exceptions may be filed by submitting a written statement to the Appeals Council setting forth your reasons for disagreeing with the administrative law judge's decision. The exceptions must be filed within 30-days of the date you receive the administrative law judges decision or an extension of time in which to submit exceptions must be requested in writing within the 30 day period. A timely request for a 30-day extension will be granted by the Appeals Council. A request for an extension of more than 30 days should include a statement of reasons as to why you need the additional time.

(2) If written exceptions are timely filed, the Appeals Council will consider your reasons for disagreeing with the administrative law judge's decision and all the issues presented by your case. If the Appeals Council concludes that there is no reason to change the administrative law judge's decision, it will issue a notice to you addressing your exceptions and explaining why no change in the administrative law judge's decision is warranted. The administrative law judge's decision is the final decision of the Secretary unless the decision is revised.

(3) When you file written exceptions to an administrative law judge's decision, the Appeals Council may assume jurisdiction at any time, even after the 60-day limit which applies when no exceptions have been filed. If the Appeals Council assumes jurisdiction, it will make a new, independent decision based on review of the entire record affirming, modifying or reversing the decision of the administrative law judge or remand the case to an administrative law judge for further proceedings, including a new decision.

(c) *Appeals Council assumes jurisdiction without exceptions being filed.* Anytime within 60 days after the date of the administrative law judge's decision, the Appeals Council may decide to assume jurisdiction of your case even though no written exceptions have been filed. Notice of this action will be mailed to all parties at their last known address. You will be provided with the opportunity to file briefs or other written statements with the Appeals Council about the facts and law relevant to your case. After the briefs or other written statements have been received or the time allowed (usually 30 days) for submitting them has expired, the Appeals Council will issue a decision affirming, modifying or reversing the decision of the administrative law judge, or remand the case to an administrative law judge for further proceedings, including a new decision.

(d) *Exceptions are not filed and the Appeals Council does not otherwise assume jurisdiction.* If no exceptions are filed and the Appeals Council does not assume jurisdiction of your case, the administrative law judge's decision becomes the final decision of the Secretary.

PART 416—[AMENDED]

6. The authority citation for Subpart N of Part 416 continues to read as follows:

Authority: Secs. 1102, 1631, and 1633 of the Social Security Act; 42 U.S.C. 1302, 1383, and 1383b; sec. 6 of Pub. L. 98–460, 98 Stat. 1802.

7. Paragraph (c) of §416.1453 is revised to read as follows:

§416.1453 The decision of the administrative law judge.

* * * * *

(c) *Recommended decision.* Although an administrative law judge will usually make an initial decision, he or she may send the case to the Appeals Council with a recommended decision where appropriate. The administrative law judge shall mail a copy of the recommended decision to the parties at their last known address and send the recommended decision to the Appeals Council.

8. Paragraphs (d) and (e) are revised and a new paragraph (f) is added to §416.1455 to read as follows:

§416.1455 The effect of an administrative law judge's decision.

* * * * *

(d) The expedited appeals process is used;

(e) The decision is a recommended decision directed to the Appeals Council; or

(f) In a case remanded by a Federal court, the Appeals Council assumes jurisdiction under the procedures in §416.1484.

9. An undesignated center heading is added immediately before §416.1483 and new §416.1484, and §416.1483 is revised to read as follows:

Court Remand Cases

§416.1483 Case remanded by a Federal court.

When a Federal court remands a case to the Secretary for further consideration, the Appeals Council, acting on behalf of the Secretary, may make a decision, or it may remand the case to an administrative law judge with instructions to take action and issue a decision or return the case to the Appeals Council with a recommended decision. If the case is remanded by the Appeals Council, the procedures explained in §416.1477 will be followed.

10. A new §416.1484 is added to read as follows:

§416.1484 Appeals Council review of administrative law judge decision in a case remanded by a Federal court.

(a) *General.* In a case remanded by a Federal court for further consideration, the administrative law judge's decision will become the final administrative decision on your case unless the Appeals Council assumes jurisdiction of the case. The Appeals Council may assume jurisdiction based on written exceptions to the administrative law judge's decision filed by you or your representative or based on its authority to take jurisdiction pursuant to paragraph (c) of this section. If the Appeals Council assumes jurisdiction of your case, all issues relating to your claim whether or not they were considered by the administrative law judge will be before the Appeals Council. The Appeals Council will make a new, independent decision based on the entire record or remand the case to an administrative law judge for further proceedings.

(b) *You file exceptions disagreeing with the administrative law judge's decision.* (1) If you disagree with the administrative law judge's decision, in whole or in part, you may file exceptions to the decision with the Appeals Council. Exceptions may be filed by submitting a written statement to the Appeals Council setting forth your reasons for disagreeing with the administrative law judge's decision. The exceptions must be filed within 30 days of the date you receive the administrative law judge's decision or an extension of time in which to submit exceptions must be requested in writing within the 30-day period. A timely request for a 30-day extension will be granted by the Appeals Council. A request for an extension of more than 30 days should include a statement of

BEST COPY AVAILABLE

VOL 52 ISS 200 OCT 16 1987 UMI

reasons as to why you need the additional time.

(2) If written exceptions are timely filed, the Appeals Council will consider your reasons for disagreeing with the administrative law judge's decision and all the issues presented by your case. If the Appeals Council concludes that there is no reason to change the administrative law judge's decision, it will issue a notice to you addressing your exceptions and explaining why no change in the administrative law judge's decision is warranted. The administrative law judge's decision is the final decision of the Secretary unless the decision is revised.

(3) When you file written exceptions to an administrative law judge's decision, the Appeals Council may assume jurisdiction at any time, even after the 60-day limit which applies when no exceptions have been filed. If the Appeals Council assumes jurisdiction, it will make a new, independent decision based on review of the entire record affirming, modifying or reversing the decision of the administrative law judge or remand the case to an administrative law judge for further proceedings, including a new decision.

(c) *Appeals Council assumes jurisdiction without exceptions being filed.* Anytime within 60 days after the date of the administrative law judge's decision, the Appeals Council may decide to assume jurisdiction of your case even though no written exceptions have been filed. Notice of this action will be mailed to all parties at their last known address. You will be provided with the opportunity to file briefs or other written statements with the Appeals Council about the facts and law relevant to your case. After the briefs or other written statements have been received or the time allowed (usually 30 days) for submitting them has expired, the Appeals Council will issue a decision affirming, modifying or reversing the decision of the administrative law judge, or remand the case to an administrative law judge for further proceedings, including a new decision.

(d) *Exceptions are not filed and the Appeals Council does not otherwise assume jurisdiction.* If no exceptions are filed and the Appeals Council does not assume jurisdiction of your case, the administrative law judge's decision becomes the final decision of the Secretary.

[FR Doc. 87-23828 Filed 10-15-87; 8:45 am]
BILLING CODE 4190-11-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

24 CFR Part 965

[Docket No. R-87-1326; FR-2260]

PHA-Owned or Leased Projects; Maintenance and Operation; Tenant Allowances for Utilities

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Proposed rule.

SUMMARY: HUD's procedures for the establishment and administration by Public Housing Agencies (PHAs) of Allowances for PHA-Furnished Utilities and Allowances for Tenant-Purchased Utilities are contained in 24 CFR Part 965, Subpart E. This subpart also governs the imposition by PHAs of Surcharges for the consumption of Utilities in excess of the Allowance for PHA-Furnished Utilities where Checkmeters have been installed, and of Surcharges for imputed consumption attributable to certain equipment and functions in dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed. This proposed rule would amend Subpart E to clarify how the Utility consumption attributable to air conditioning equipment (whether provided by the PHA or the tenant) and certain tenant-provided major appliances will be treated under the Allowance and Surcharge provisions.

DATE: Comments must be submitted on or before December 15, 1987.

ADDRESS: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

Comments should refer to the above docket number and title. A copy of each comment received will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Charles R. Ashmore, Utilities Officer, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone (202) 755-6640. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Hud historically has considered "rent" in the public housing program to include shelter cost plus a reasonable amount for Utilities. As a result, the Department has provided for a system under which Allowances are established showing the amounts of Utilities or Utility-type services whose cost is to be covered by "rent." This system is described in 24 CFR Part 965, Subpart E. As amended on August 7, 1984 (49 FR 31399), this part treats tenant Utilities differently depending on whether the Utilities are purchased by the tenant directly from the Utility Company, whether the Utilities are furnished to the tenant by the PHA and whether Checkmeters have been installed for the individual dwelling units. As background for the consideration of this proposed rulemaking, major features of the Department's existing Utility regulations are summarized below.

For Tenant-Purchased Utilities, the regulations require the PHA to establish an Allowance for Tenant Purchase Utilities—a fixed dollar amount that is deducted from the amount the tenant must pay for rent under the statutory formula in section 3(a) of the U.S. Housing Act of 1937 and 24 CFR 913.107. The tenant pays the actual Utility charge directly to the Utility supplier, whether this charge is more or less than the amount of the Allowance. The Allowance is based on the reasonable consumption of Utilitiers by an energy conservative household of modest circumstances consistent with the requirements of a safe, sanitary and healthful living environment. Since excess Utility consumption by the tenant is paid directly to the Utility company, the regulations contain no provisions for PHA Surcharge for excess consumption.

For PHA-Furnished Utilities where Checkmeters for the Utilities are installed for the individual dwelling units, the rule requires the PHA to establish an Allowance for PHA-Furnished Utilities—an amount of consumption units (*e.g.*, kilowatt hours of electricity) for the dwelling unit. The Allowance is based on the same reasonableness standard discussed above. The regulation requires a Surcharge (a dollar amount based on a rate and level of excess consumption) on the tenant by the PHA for consumption in excess of the Allowance.

For PHA-Furnished Utilities where Checkmeters are not installed for the individual dwelling units (and thus no means exists for the PHA to monitor actual consumption of PHA-Furnished Utilities), the regulation simply requires the PHA to establish schedules of Surcharges indicating additional

amounts that tenants will be required to pay to the PHA for imputed Utility consumption attributable to tenant-owned major equipment or to optional functions of PHA-furnished equipment.

In recent months, uncertainty has arisen concerning the proper treatment of Utility consumption by air conditioning equipment (whether provided by the PHA or by the tenant) and by certain tenant-provided major appliances, such as washing machines, clothes dryers, and food freezers. *I.e.*, should reasonable Utility consumption attributable to such equipment be included within the Allowance for PHA-Furnished and Tenant-Purchased Utilities? Can the PHA establish a Surcharge for the imputed Utility consumption attributable to such equipment in dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed?

The current regulation does not make it absolutely clear that the inclusion of such consumption in Utility Allowances is not permitted or that the establishment of a Surcharge is required for consumption in dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed. The discussion in the preamble to the final rule published August 7, 1984, on the other hand, suggests that Allowances for consumption attributable to air conditioning and laundry equipment (washers and dryers) are within the PHA's discretion (51 FR 31399, 31404). The preamble also implied that air conditioning could be considered a necessity in some climates (51 FR 31399, 31404).

The existing regulation places the entire responsibility for the establishment of Allowances and Surcharges on the PHA. The Federal Government, for the most part, carries the full cost of Utility Allowances either through reduced Tenant Rents (Tenant-Purchased Utilities) or by Utility reimbursement under the performance funding system (PHA-Furnished Utilities). Since Utility costs represent a substantial element of Federal subsidization of PHAs, the Department is proposing, in this proceeding, to clear up any ambiguities that exist for PHAs regarding Utility consumption attributable to PHA- or tenant-provided air conditioning equipment and to tenant-provided major appliances.

Air Conditioning

In general, the Department does not believe that it is necessary to furnish Allowances for air conditioning in order to ensure the provision of decent, safe and sanitary housing. Accordingly, this proposed rule would (1) revise § 965.476(b) to provide that the Allowances for PHA-Furnished and Tenant-Purchased Utilities shall not include imputed consumption attributable to air conditioning equipment; and (2) revise § 965.477(b) to provide that for dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed, the Surcharge schedule must indicate additional dollar amounts that tenants will be required to pay by reason of imputed Utility consumption attributable to air conditioning equipment.

The proposed rule would, however, also recognize that there are some circumstances which require the PHA to include air conditioning Utility consumption in the Utility Allowance or exclude such consumption from the Surcharge provisions of § 965.477(b).

Many project designs *require* tenant use of PHA-provided air conditioning equipment. The most obvious example of this situation occurs where a PHA provides air conditioning to dwelling units from a central facility and tenants are unable to control (*i.e.*, turn on or off or otherwise regulate) the flow of air into individual dwelling units. Another example occurs where a PHA furnishes air conditioning equipment for a dwelling unit and the tenant is compelled by project design (*i.e.*, sealed windows) to use the provided air conditioning.

In recognition of these situations where the avoidance of Utility consumption is not reasonably within the control of the tenant, § 965.476(b) would provide that the Allowance for PHA-Furnished and Tenant-Purchased Utilities shall be designed to include reasonable consumption for air conditioning equipment if the air conditioning equipment is provided by the PHA and the project design either (1) does not provide for natural ventilation of the dwelling unit because of sealed windows or (2) does not permit the tenant to control (*i.e.*, turn on or off or otherwise regulate) the flow of conditioned air into the dwelling unit. Similarly, for dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed, the PHA would be prohibited from establishing a Surcharge under such circumstances. (§ 965.477(b)). However, for dwelling units subject to Allowances for PHA-Furnished Utilities where Checkmeters *have* been installed, the provisions for Surcharge for Utility consumption in *excess of the Allowance* would continue to be applicable. (§ 965.477(a)).

Tenant-Provided Major Appliances (Except Air Conditioning)

As noted above, in addition to questions concerning air conditioning Utility consumption, there has been some uncertainty concerning the treatment of Utility consumption for tenant-provided major appliances, such as washing machines, clothes dryers and food freezers. To clarify this area, HUD is proposing to make revisions to Subpart E. These revisions would apply to all tenant-provided major appliances except the tenant-provided air conditioning equipment discussed above.

Section 965.476(b) would be amended to state specifically that Utility Allowances shall not be designed to include the Utility consumption attributable to major appliances (*i.e.*, washing machines, clothes dryers, food freezers) provided by the tenant. Consistent with the existing regulation, the proposed rule, however, would provide that the Allowances shall be designed to include the Utility consumption attributable to one range and refrigerator per dwelling unit, whether or not the equipment is provided by the PHA.

Similarly, the Surcharge provisions of § 965.477(b) for dwelling units served by PHA-Furnished Utilities without Checkmeters would require that the Surcharge schedule include dollar amounts that tenants would be required to pay by reason of imputed consumption attributable to tenant-provided major appliances. (See § 965.477(b)(2)(i)(A).) Again, Surcharges would not be made for consumption attributable to one range and refrigerator per dwelling unit, whether or not these appliances are provided by the PHA. (See § 965.477(b)(2)(i)(C).)

As noted above, the proposed rule attempts to eliminate the uncertainty in this area by citing, as examples, the most common types of tenant-provided major appliances. This is not intended as an exhaustive list. There may be other major appliance items (such as broilers, microwaves, stereo components and space heaters) that should also be cited in the regulation. Public comment is specifically requested on this issue.

Rights and Duties of PHAs and Tenants

The purpose of this proposed rule is to clarify how Utility consumption for certain equipment items is to be treated under the Utility Allowance and Surcharge provisions of Part 965. The rule will not alter the existing rights and responsibilities of the tenant and the

VOL 52 ISS 200 OCT 16 1987 UMI

PHA with regard to the installation, maintenance, use or removal of PHA- or tenant-provided equipment. The decision to install PHA-provided air conditioning equipment or to provide facilities that permit tenants to install their own air conditioning units (subject to HUD-approvals, if provided in connection with modernization under the Comprehensive Improvement Assistance Programs under Part 966) would remain within the sole discretion of the PHA. Nothing in this rule, however, would empower tenants to compel PHAs to furnish such facilities. Moreover, this rule would not alter the basic obligation under the lease of tenants and PHAs with regard to the installation, maintenance, use or removal of air conditioning equipment or tenant-provided major appliances (*see* § 966.4). (*E.g.*, the exclusion of air conditioning consumption from the utility allowance would have no effect on the tenant's election to use air conditioning in the unit.)

The proposed rule would add provisions to §§ 965.476 and 965.477 stating that nothing in the proposed rule shall alter the rights and duties of the PHA and the tenant with regard to the installation, maintenance, use or removal of equipment and appliances under the terms of the lease and other applicable Hud regulations.

Individual Relief

This proposed rule would provide specific guidance to PHAs regarding Allowances and Surcharges for Utility consumption by air conditioning equipment or by tenant-provided major appliances. While this rule would prescribe specific standards to govern the provision of such Allowances, the Department is not unmindful of the possibility that individual needs or specific circumstances may exist which could support Utility Allowances otherwise prohibited by the rule, on an individual basis.

Such situations may be handled on a case-by-case basis under the provisions of § 965.479 of HUD's existing regulations. This section permits the PHA to grant requests for relief from Surcharges for excess consumption of PHA-Furnished Utilities, or from payment of Utility-supplied billings in excess of the Allowance for Tenant-Purchased Utilities, based on reasonable grounds, such as the special needs of certain elderly, ill or handicapped persons.

Transition Provision

The proposed rule includes a transition provision at § 965.480. This section would provide that Allowances and Surcharges in accordance with the revisions to Subpart E made by this rule must be established and in effect for the PHAs first fiscal year that begins 90 or more days after the effective date of the final rule. This transition period would permit the coordination of the Surcharge and Allowance provisions with the PHAs budget process and should be sufficient to permit PHAs to complete the procedural requirements for the establishment of Allowances and Surcharges (*See* 965.473). The proposed rule also permits the Assistant Secretary for Public and Indian Housing to extend the period for the establishment of Allowance and Surcharges, for good cause shown.

Miscellaneous additional revisions to Subpart E have been made for clarity.

Findings

The Department has determined that this rule does not constitute a "major rule" as defined in Executive Order 12291. Analysis of the proposed rule indicates that it would not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations in 24 CFR Part 50, which implements section 102(c) of the National Environmental Policy Act of 1969 (47 FR 35253). The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of General Counsel, Rules Docket Clerk, at the address listed above.

In accordance with the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act,) the Undersigned certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule merely clarifies for PHAs when the costs of certain Utility consumption will be borne by the tenant or borne by HUD (through reduced tenant rents or Utility reimbursements under the performance funding system).

This rule was listed as item 1040 in the Department's Semiannual Agenda of Regulations published April 27, 1987 (52 FR 14362, 14401) in accordance with Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number and title are 14.146, Low-Income Housing—Assistance Program (Public Housing).

List of Subjects in 24 CFR Part 965

Public housing, Utilities, Energy conservation.

Accordingly, Title 24, Part 965 would be amended as follows:

PART 965—PHA-OWNED OR LEASED PROJECTS—MAINTENANCE AND OPERATION

1. The authority citation for Part 965 would continue to read as follows:

Authority: Secs. 2, 3, 6 and 9, United States Housing Act of 1937 (42 U.S.C. 1437, 1437a, 1437d, and 1437g); sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d). Subpart H is also issued under the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821–4846).

2. In § 965.471, the reference in paragraph (a) to 24 CFR Part 800 would be revised to refer instead to 24 CFR Part 900, and paragraph (b) would be revised to read as follows:

§ 965.471 Applicability.

* * * * *

(b) This subpart does not apply to dwelling units served by PHA-Furnished Utilities, unless Checkmeters have been installed to measure actual Utilities consumption of the individual units. However, tenants served by PHA-Furnished Utilities in units without checkmeters shall be subject to charges for Utilities consumed by certain described equipment and functions in accordance with the Surcharge provisions of § 965.477(b).

3. Section 965.472 would be amended to revise the definition of "Surcharge" to read as follows:

§ 965.472 Definitions.

* * * * *

Surcharge. The amount charged by the PHA to a tenant, in addition to the Tenant Rent, for consumption of Utilities in excess of the Allowance for PHA-Furnished Utilities or for imputed consumption attributable to certain described equipment and functions. Surcharges calculated under § 965.477(b), based on imputed consumption where Checkmeters have not been installed, are referred to as "scheduled Surcharges."

4. Section 965.476(b) would be revised to read as follows:

§ 965.476 Standards for allowances for utilities.

* * * * *

(b)(1) Except as specifically provided in paragraph (b)(2) of this section (governing Utility consumption attributable to air conditioning equipment), the Allowances for PHA-Furnished and Tenant-Purchased Utilities:

(i) Shall be designed to include reasonable consumption for the following items provided by the PHA: (A) Major equipment or Utility functions furnished by the PHA for all tenants (*e.g.*, heating system and hot water heater); and (B) essential equipment (*e.g.*, one range and one refrigerator per dwelling unit);

(ii) Shall be designed to include reasonable consumption for the following items provided by the tenant: (A) One range and one refrigerator per dwelling unit, if such equipment is not provided by the PHA; and (B) minor items of equipment (such as toasters and radios); and

(iii) Shall not be designed to include consumption for major appliances (*e.g.*, washing machines, clothes dryers, food freezers) provided by the tenant or for optional functions of PHA-provided equipment.

(2) The Allowances for PHA-Furnished or Tenant-Purchased Utilities shall not be designed to include consumption attributable to air conditioning equipment, except where the air conditioning equipment is provided by the PHA and the project design either (i) does not provide for natural ventilation of the dwelling unit because of sealed windows or (ii) does not permit the tenant to control (*i.e.*, turn on and off or otherwise regulate) the flow of conditioned air into the dwelling unit.

(3) The Surcharge provisions of § 965.477(a) apply to Utility consumption for equipment and Utility functions that are excluded from the Allowance for PHA-Furnished Utilities under this paragraph (b).

(4) Nothing in this paragraph (b) shall alter the rights and duties of the PHA and tenant with regard to the installation, maintenance, use, and removal of equipment and appliances under the terms of the lease and other applicable provisions of this Chapter IX.

* * * * *

5. Section 965.477(b) would be revised to read as follows:

§ 965.477 Surcharges for excess consumption of PHA-furnished utilities.

* * * * *

(b)(1) For dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed, the PHA shall establish schedules of Surcharges indicating additional dollar amounts that tenants will be required to pay by reason of imputed Utility consumption attributable to the equipment or functions described in paragraph (b)(2) of this section. The Surcharge schedule shall state the equipment or function for which Surcharges shall be made and the amounts of any such charges. These amounts shall be based on the cost to the PHA of the Utility consumption estimated to be attributable to reasonable usage of such equipment.

(b)(2)(i) Except for Utility consumption for air conditioning equipment described in paragraph (b)(2)(ii) of this section, the Surcharge schedule for dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed:

(A) Shall include dollar amounts that tenants will be required to pay by reason of imputed consumption attributable to the use of (*1*) major appliances provided by the tenant (including washing machines, clothes dryers, and food freezers), and (*2*) optional functions of PHA-provided equipment;

(B) Shall not inlcude Surcharges for imputed consumption attributable to the following items provided by the PHA: (*1*) Major equipment or Utility functions furnished by the PHA for all tenants (*e.g.*, heating system and hot water heater); and (*2*) essential equipment (*e.g.*, one range and one refrigerator per dwelling unit);

(C) Shall not include Surcharges for imputed consumption attributable to the following items provided by the tenant: (*1*) One range and one refrigerator, if such equipment is not provided by the PHA and (*2*) minor items of equipment (such as toasters and radios).

(ii) The Surcharge schedule for dwelling units served by PHA-Furnished Utilities where Checkmeters have not been installed shall include dollar amounts that tenants will be required to pay by reason of imputed consumption attributable to air conditioning equipment, except that the Surcharge schedule shall exclude such Surcharges where air conditioning equipment is provided by the PHA and the project design either (i) does not provide for the natural ventilation of the dwelling unit because of sealed windows or (ii) does not permit the tenant to control (*i.e.*, turn on or off or otherwise regulate) the flow of conditioned air into the dwelling unit.

(3) Nothing in this paragraph (b) shall alter the rights and duties of the PHA and tenant with regard to the installation, maintenance, use and removal of equipment and appliances under the terms of the lease and other applicable regulations in this Chapter IX.

6. Section 965.480 would be revised to read as follows:

§ 965.480 Transition provisions.

Each PHA shall establish Allowances and Surcharges in accordance with this Subpart, as revised on [*insert the effective date of the final rule*]. These Allowances and Surcharges must be in effect for the PHA's fiscal year beginning after [*insert date 90 days after the effective date of the final rule*]. The Assistant Secretary for Public and Indian Housing may extend the period for establishing Allowances and Surcharges, for good cause shown.

Dated: September 10, 1987.

James E. Baugh,

General Deputy Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210-33-M

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

29 CFR Parts 1 and 5

Procedures; Predetermination of Wage Rates; Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction (Also Labor Standards Provisions Applicable to Nonconstruction Contracts Subject to the Contract Work Hours and Safety Standards Act)

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document extends the period for filing comments for 30 additional days on the Department of Labor's proposed rule governing the use of semi-skilled "helpers" on federally financed and assisted construction contracts subject to the prevailing wage standards of the Davis-Bacon and Related Acts (29 CFR Parts 1 and 5), which was published in the Federal Register on August 19, 1987 (52 FR 31366).

DATE: Comments are due November 18, 1987.

ADDRESS: Submit written comments (preferably in triplicate) to Paula V. Smith, Administrator, Wage and Hour Division, Employment Standards

Administration, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue, NW., Washington, DC 20210. Any commenters desiring notification of receipt of comments should include a self-addressed, stamped post card.

FOR FURTHER INFORMATION CONTACT: Herbert J. Cohen, Deputy Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue NW., Washington, DC 20210, Telephone: 202–523–8305.

SUPPLEMENTARY INFORMATION: On August 19, 1987, the Department of Labor published in the **Federal Register** (52 FR 31366) proposed revisions to its regulations on labor standards applicable to federally financed and assisted construction contracts subject to the prevailing wage standards of the Davis-Bacon and Related Acts (29 CFR Parts 1 and 5). The proposed rule would permit contractors to expand their use of semi-skilled classifications of helpers on Davis-Bacon projects if the use of a helper classification is a prevailing practice on construction projects in the area. Commenters were requested to submit their comments by October 19, 1987. The Department has been requested to allow additional time for commenters to prepare full responses to the proposal's options and its request for detailed supporting information. Upon reconsideration, the Department believes that the proposal warants extending the comment period longer than the initial 60 days.

Accordingly, this notice extends the public comment period for this rulemaking until November 18, 1987. Comments on the proposal must be submitted on or before that date.

Signed at Washington, DC, on this 14th day of October 1987.

Paula V. Smith,

Administrator, Wage and Hour Division, Employment Standards Administration.

BILLING CODE 4510–27–M

VETERANS ADMINISTRATION

38 CFR Part 1

Fees Charged When Responding To Requests for Records; Release of Records and Other Information Customarily Furnished the Public

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration (VA) is amending its regulations to change the fees that the VA can assess for responding to requests for records, and the procedures for determining the fees that can be charged. In addition, the regulation that requires the VA to process all requests for records under the FOIA, other than those requests made under other specific disclosure statutes, is being clarified to allow the VA more flexibility in releasing records or information outside the Agency.

DATES: Comments must be received on or before November 16, 1987. Comments will be available for public inspection until November 30, 1987.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All comments received will be available for public inspection only in the Veterans Service Unit, Room 132, of the above address between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until November 30, 1987.

FOR FURTHER INFORMATION CONTACT: Doneld R. Howell, Management Analyst, Paperwork Management and Regulations Service (733), Office of Information Management and Statistics, (202) 233–3648.

SUPPLEMENTARY INFORMATION: Sections 1.526, 1.555, and 1.577(f) of Title 38, Code of Federal Regulations, establish the fees that the VA may charge when responding to requests for records subject to the VA confidentiality statue (38 U.S.C. 3301), the Freedom of Information Act (FOIA), and the Privacy Act of 1974. These regulations also establish certain requirements for determining the fees that will be charged.

In accordance with The Freedom of Information Reform Act of 1986 (Pub. L. 99–570), the Office of Management and Budget (OMB) published the Uniform Freedom of Information Act Fee Schedule and Guidelines in the **Federal Register**, dated March 27, 1987, on pages 10012–10020. The proposed changes to § 1.555 incorporate the OMB guidelines. In addition, the VA is adding to § 1.555 the six factors which the Department of Justice has recommended be considered in determining when fees should be waived or reduced under the new statutory standard.

The VA is also amending the regulations governing fees that can be charged when responding to requests for records subject to the Privacy Act and VA confidentiality statute (38 U.S.C. 3301) so that they are consistent with the FOIA fee regulations. These regulations are being revised also to conform to VA policy that a VA beneficiary or applicant for VA benefits will be given on complete set of his/her own beneficiary records free. Previously, giving a set of records free was discretionary. The change removes the VA discretion.

Besides changing its fee regulation, the VA is amending § 1.553, Public Access to Other Reasonably Described Records. As currently written, the regulation requires the Agency to treat all requests for disclosure of records as requests for records under FOIA, even though they are made pursuant to other, specific information disclosure statutes, i.e., 38 U.S.C. 3301, 3305, and 4132. As a result, even though the Agency has released a copy of a document customarily furnished to the public in the performance of official duties, the regulation requires any other request for the document to be made in writing and processed as a FOIA request. For example, many audit reports prepared by the VA Office of Inspector General concern subjects already in the news or are newsworthy themselves, and members of the news media may request copies of individual reports. Instead of requiring each requester to ask for the report in writing, it is preferable to release the report, with reductions where appropriate, without subjecting the requester to existing requirements. The proposed regulation will accomplish this purpose, yet ensure that furnishing such records will not violate any law or regulation governing access to, or confidentiality of, records or information. The Agency will be able to respond more promptly to requests from news media as well as other requesters under appropriate circumstances.

The Administrator has certified that these regulations will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that these changes simply implement, and make VA regulations consistent with, the requirements of Pub. L. 99–570; they impose no new administrative or paperwork burdens, independent of the requirements of the law. They will have no significant direct impact on small

entities (i.e., small businesses, small private and nonprofit organizations, and small governmental jurisdictions).

In accordance with Executive Order 12291, Federal Regulation, the VA has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

There are no Catalog of Federal Domestic Assistance numbers involved.

List of Subjects in 38 CFR Part 1

Administrative practice and procedures, Claims, Employment, Government employees, Government property, Freedom of Information Act, Privacy.

Approved: September 22, 1987.

Thomas K. Turnage,

Administrator.

PART 1—[AMENDED]

38 CFR Part 1, General, is proposed to be amended as follows:

1. In § 1.526, paragraph (e)(3) is removed; paragraph (e)(4) is redesignated as paragraph (e)(3); and paragraphs (b)and (i) are revised and an authority citation is added to paragraph (i) to read as follows:

§ 1.526 Copies of records and papers.

* * * * *

(b) The types of services provided by the Veterans Administration for which fees will be charged are identified in § 1.526(i) of this section.

* * * * *

(i) *Fees to be charged.*

(1) *Schedule of fees:*

Activity	Fees
(i) Duplication of document by any type of reproduction process to produce plain one-sided paper copies of a standard size (8–1/2" x 11"; 8–1/2" x 14"; 11" x14").	$0.15 per page after first 100 one-sided pages.
(ii) Duplication of non-paper records, such as microforms, audiovisual materials (motion pictures, slides, laser optical disks, video tapes, audiotapes, etc.) computer tapes and disks, diskettes for personal computers, and any other automated media output.	Actual direct cost to the Agency as defined in § 1.555(a)(2) of this title to the extent that it pertains to the cost of duplication.
(iii) Duplication of documents by any type of reproduction process not covered by, by paragraphs (i)(1)(i) and (ii) of this section to produce a copy in a form reasonably usable by a requester.	Actual direct cost to the Agency as defined in § 1.555(a)(ii) of this title to the extent it pertains to the cost of duplication.
(iv) Providing special information, statistics, reports, drawings, specifications, lists of names and addresses (either in paper or machine readable form), computer or other machine readable output.	Actual cost to the Agency including computer and manual search costs, copying costs, labor, and material and overhead expenses.
(v) Attestation under the seal of the Agency.	$3.00 per document so certified.
(vi) Providing abstracts or copies of medical and dental records to insurance companies for other than litigation purposes..	$10.00 per request.
(vii) Providing files under court subpoena.	Actual direct cost to the Agency.

(Note: If the VA regularly contracts for duplicating services related to providing the requested records, such as the duplication of microfilm or architect's plans and drawings, the contractor fees may be included in the actual direct cost to the Agency.)

(2) *Benefit records.* When VA benefit records are requested by a VA beneficiary or applicant for Va benefits, the duplication fee for one complete set of such records will be waived.

(Authority: 38 U.S.C. 3302(b))

* * * * *

2. Section 1.553 is revised and an authority citation is added to read as follows:

§ 1.553 Public access to other reasonably described records.

(2) Except for requests for records which are processed under §§ 1.551 and 1.552, unless otherwise provided for in title 38, Code of Federal Regulations, all requests for records shall be processed under paragraph (b) of this section, as well as under any other VA law or regulation governing access to or confidentiality of records or information. Records or information customarily furnished to the public in the regular course of the performance of official duties may be furnished to the public without reference to paragraph (b) of this section. To the extent permitted by other laws and regulations, the VA will also consider making available records which it is permitted to withhold under the FOIA if it determines that such disclosures could be in the public interest.

(b) Reasonably described records in VA custody, or copies thereof, other than records made available to the public under provisions of §§ 1.551, and §§ 1.552, or unless otherwise provided for in title 38, Code of Federal Regulations, requested in accordance with published rules stating the time, place, fees (if any), and procedures to be followed, will be made promptly available, except as provided in § 1.554, to any person upon request. Such request must be in writing, over the signature of the requester, and must contain a reasonable description of the record desired so that it may be located with relative ease. The request should be made to the office concerned (having jurisdiction of the record desired) or, if not known, to the Director or Veterans Services Officer in the nearest VA regional office the Director, or Chief, Medical Administration Service, or other responsible official of the VA medical facility where most recently treated; or to the Veterans Administration Central Office, 810 Vermont Avenue NW., Washington DC 20420. Personal contacts should normally be made during the regular duty hours of the office concerned, which are 8 a.m. to 4:30 p.m. Monday through Friday for VA Central Office and most field stations.

(Authority: 5 U.S.C. 552(a)(3))

3. Section 1.555 is revised and an authority citation is added to read as follows:

§ 1.555 Fees.

(a) *Definition of terms.* For the purpose of this section, the following definition apply:

(1) *Commercial use request* means a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade or profit interests of the requester or the person on whose behalf the request is made. To determine whether a request properly belongs in this category, consideration must be given to the use to which a requester will put the

VOL
52
ISS
200
OC
16
1987
UMI

documents requested. Where the use of the records sought is not clear in the request or where there is reasonable cause to doubt the use to which the requester will put the records sought, additional information may be sought from the requester before assigning the request to a specific category.

(2) *Direct costs* means those expenditures which the VA actually incurs in searching for and duplicating (and in the case of commercial use requests, reviewing) documents to respond to a Freedom of Information Act (FOIA) request. Direct costs include, for example, the salary of the employee performing work, i.e., the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits, and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting of the facility in which the records are stored.

(3) *Duplication* means the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of paper copy, microform, audiovisual materials or machine readable documentation (e.g., magnetic tape or disk), among others. The copy provided must be in a form that is reasonably usable by requesters.

(4) *Educational institution* means a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research. To determine whether a request properly belongs in this category, the request must be evaluated to ensure that it is apparent from the nature of the request that it serves a scholarly research goal of the institution, rather than an individual goal of the requester or a commercial goal of the institution.

(5) *Non-commercial scientific institution* means an institution that is not operated on a "commercial" basis (as that term is referenced under "Commercial use request" of this paragraph) and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(6) *Representative of the news media* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers or periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. These examples are not intended to be all inclusive. As traditional methods of news delivery evolve (e.g., electronic dissemination of newspapers through telecommunications services), such alternative media will be included in this category. "Freelance" journalists may be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but the requester's past publication history can be considered also. In any case, freelancers who do not qualify for inclusion in the "representative of the news media" category may seek a reduction or waiver of fees under paragraph (f) of this section.

(7) *Review* means the process of examining documents located in response to a "commercial use request" (see definition of commercial use request in this section) to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure in response to a "commercial use request," e.g., doing all that is necessary to excise them and otherwise prepare them for release. The term "review" does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(8) *Search* means all the time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches may be done manually or by computer using existing programs. The most efficient and least expensive manner of searching for material will be used to minimize costs to the VA and the requester. For example, line-by-line searches will not be conducted when duplicating an entire document is the least expensive and quicker method of complying with a request. The term "search" does not cover the time spent to review documents to determine whether all or portions thereof can be withheld under one of the nine categories of exemptions identified in § 1.554.

(b) *Fees to be charged.* (1) Except as provided in paragraphs (c), (d), (f) and (g) of this section, the Veterans Administration will charge fees that recoup the full allowable direct costs for responding to each request from the public. Such fees will be charged in accordance with the schedule of fees in paragraph (e) of this section, and other requirements or restrictions in this regulation. The most efficient and least costly methods will be used to comply with requests for documents made under the FOIA.

(2) If it is estimated that charges for duplication determined by using the fee schedule in § 1.555(e) of this title are likely to exceed $25, the requester will be notified of the estimated amount of fees, unless the requester has indicated in advance his or her willingness to pay fees as high as those anticipated. Such notice will offer the requester the opportunity to confer with Agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(3) Each department and staff office upon approval of the Administrator is authorized to contract with private sector services to locate, reproduce, and disseminate records in response to FOIA requests when that is the most efficient and least costly method. If a contractor is used, the ultimate cost to the requester can be no greater than it would if the department, staff office, or field station performed the task, itself. In no case may a department, staff office, or field station contract out responsibilities which the FOIA provides that they alone may discharge, such as determining the applicability of an exemption, or determining whether to waive or reduce fees.

(4) When documents that would be responsive to a request are maintained for distribution by agencies operating statutory-based fee schedule programs, in which the agency is required to set the level of fees for particular types of records, such as the National Technical Information Service or the Government Printing Office, the requester of such documents will be informed of the steps necessary to obtain records from those sources, rather than from the VA.

(c) *Restrictions on assessing fees.* With the exception of commercial use requests no charges will be assessed for the first 100 pages of duplication and the first two hours of search time. Moreover, no fees are to be charged any requester, including commercial use requesters, if the cost of collecting the fee is equal to or greater than the fee itself. These provisions work together so that, except for commercial use requests, fees will not be assessed until the free search and duplication have been provided. For example, if a request takes two hours and ten minutes of search time and results in 105 reproduced pages of

documents, fees can be charged for only 10 minutes or search time and for only five pages of reproduction. If this cost were equal to or less than the cost to the VA of billing the requester and processing the fee collected, no charges would be assessed.

Note: The cost of collecting fees are VA's administrative costs of receiving and recording a requester's remittance, and processing the fee for deposit in the Treasury Department's special account. The cost is determined to be negligible. The per-transaction costs to the Treasury to handle such remittances is negligible and will not be considered in the Agency's determination.

(1) For purposes of the restriction on assessing fees, the word "pages" refers to one-sided paper copies of the standard sizes 8½" x 11" or 8½" x 14" or 11" x 14". Accordingly, requesters will not be entitled to 100 microfiche or 100 computer disks free. One microfiche containing the equivalent of 100 pages or 100 pages of computer printout might meet the terms of the restriction.

(2) The term "search time" in this context is based on manual searches. To calculate the "computer search time" for the purpose of applying the two-hour search restriction, the hourly cost of operating the computer's central processing unit will be combined with the operator's hourly salary, plus 16 percent of the salary. When the cost of the search (including the operator time and the cost of the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the person performing the search, i.e., the operator, charges will begin to be assessed for a computer search.

(d) *Categories of requesters and fees to be charged each category.* There are four categories of FOIA requesters: Commercial use requesters; educational and non-commercial scientific institutional requesters; requesters who are representatives of news media; and all other requesters. Specific levels of fees will be charged for each of these categories as follows:

(1) *Commercial use requesters.* When a request for documents for commercial use is received, the full direct costs of searching for, reviewing for release, and duplicating the records sought will be charged to the requester. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduced documents. Moreover, the commercial use requester will be charged the cost of searching for and reviewing records even if there is ultimately no disclosure of records. The requester must reasonably describe the records sought.

(2) *Educational and non-commercial scientific institution requesters.* These requesters will be charged only for the cost of reproduction, excluding charges for the first 100 pages. In order to be considered a member of this category, a requester must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use. If the request is from an educational institution, the requester must show that the records sought are in furtherance of scholarly research. If the request is from a non-commercial scientific institution, the requester has to show that the records are sought in furtherance of scientific research. Information necessary to support a claim of being categorized as an educational or non-commercial scientific institution requester will be provided by the requester, and the requester must reasonably describe the records sought.

(3) *Representatives of news media.* These requesters will be charged for the cost of reproduction, only, excluding charges for the first 100 pages. To be included in this category, a requester must fall within the definition of a representative of the news media specified in paragraph (a)(6) of this section, and the request must not be made for commercial use. A request for records supporting the news dissemination function of the requester will not be considered to be a request that is for commercial use. Requesters must reasonably describe the records sought.

(4) *All other requesters.* Any requester that does not fit into any of the categories in this section will be charged fees which recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search will be furnished without charge. In addition, under certain circumstances specified in paragraph (f) of this section, fees will be waived or reduced at the discretion of field station heads or responsible Central Office officials. Requests from VA beneficiaries, applicants for VA benefits, or other individuals for records retrievable by their name or other personal identifier will initially be processed under 38 U.S.C. 3301 and 5 U.S.C. 552a and will be assessed fees in accordance with the applicable fee provisions of § 1.526(i) or 1.577(f) of this title. To the extent that records are not disclosable under these provisions, the disclosure of such records will be evaluated under §§ 1.550 through 1.559, and fees will be assessed under paragraph (e) of this section. Requesters must reasonably describe the records sought.

(e) *Schedule of fees:*

Activity	Fees
(1) Duplication of documents by any type of reproduction process to produced plain one-sided paper copies of a standard size (8½" x 11"; 8½" x 14"; 11" x 14").	$0.15 per page.
(2) Duplication of non-paper records, such as microforms, audiovisual materials (motion pictures, slides, laser optical disks, video tapes, audiotapes, etc.) computer tapes and disks, diskettes for personal computers, and any other automated media output.	Actual direct cost to the Agency. (See paragraph (a)(ii) of this section and, if costs are likely to exceed $25.00, paragraph (b)(2) of this section.
(3) Duplication of documents by any type of reproduction process not covered by paragraphs (e)(1) and (2) of thjis section to produce a copy in a form reasonably usable by the requester.	Actual direct cost to the Agency. (See paragraph (a)(ii) of this section and, if costs are likely to exceed $25.00, paragraph (b)(2) of this section.
(4) Document search by manual (non-automated) methods.	Basic hourly salary rate of the employee(s) performing the search, plus 16 percent. (If costs are likely to exceed $25.00, see paragraph (g)(2) of this section.)
(NOTE: If a department, staff office or field station uses exclusively a single class of personnel, e.g., all administrative/clerical or all professional/executive, an average rate for the range of grades involved may be used.)	
(5) Document search using automated methods, such as by computer.	Actual direct cost to perform search. (See paragraph (c)(2) of this section, and, if costs are likely to exceed $25.00, see paragraph (g)(2) of this section.)

VOL 52 ISS 200 OC 16 1987 UMI

Activity	Fees
(6) Document review (use only for commercial use requesters).	Basic hourly salary rate of employee(s) performing initial review to determine whether to release document(s) or portions of records, plus 16 percent.
(NOTE: Charge for document reviews covers only the time spent reviewing the document(s) at the initial administrative level to determine applicability of a specific FOIA exemption to a particular record or portion of a record. It does not cover any review incurred at the administrative appeal level once the initial exemptions are applied. However, records or portions of records withheld in full under an exemption which is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The cost for such a subsequent review may be properly assessed.)	
(7) Other charges: Certifying that records are true copies; Sending records by special methods such as express mail.	Where applicable, assess under provisions of §§ 1.526(i) and (j) of this title, otherwise, actual direct cost of service performed.

(f) *Waiving or reducing fees.* Under the following circumstances, records and services provided in response to a FOIA request will be waived or reduced:

(1) When it is determined by responsible Central Office officials or field station heads that furnishing the document(s) is in the pubic interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(2) Factors that will be considered in determining whether disclosure of information is in the public interest because it is likely to contribute signficantly to the public understanding of the operations or activities of the government are:

(i) *The subject of the request:* whether the subject of the requested records concerns the operations of the government;

(ii) *The informative value of the information to be disclosed:* Whether the disclosure is likely to contribute to an understanding of government operations or activities;

(iii) *The contribution to an understanding of the subject by the general public likely to result from disclosure:* Whether the disclosure of the requested information will contribute to public understanding; and

(Iv) *The significance of the contribution to public understanding:* Whether the disclosure is likely to contribute significantly to public understanding of government operations or activities.

(3) Factors that will be considered in determining whether disclosure of information is not primarily in the commercial interest of the requester are:

(i) *The existence and magnitude of a commerical interest:* Whether the requester has a commerical interest that would be furthered by the requested disclosure; and if so

(ii) *The primary interest in disclosure:* Whether the magnitude of the identified commerical interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is primarily in the commerical interest of the requester.

(4) An appeal from an adverse waiver or reduction determination will be processed in the same manner as described in § 1,557 of this title.

(g) *Other administrative considerations to improve assessment and collection of fees*—(1) *Charging interest—notice and rate.* The Veterans Administration may charge interest to those requesters who fail to timely pay fees assessed in accordance with these regulations. Determination to charge interest will be made by the responsible Central Office official or field station head. Interest will be assessed on the unpaid bill beginning on the 31st day following the day on which the original billing was sent. Interest will be at the rate prescribed in section 3717 of Title 31 United States Code and will accrue from the date of the billing. Accounting procedures ensure that a requester who has remitted the full amount within the time period is properly credited with the payment. The fact that fee has been received by the VA, even if not processed, will suffice to stay the accrual of interest.

(2) *Charges for unsuccessful search.* When it is determined by the responsbile Central Office official or field station head, charges for searching may be assessed, even if records are not located to satisfy a request or if records located are determined to be exempt from disclosure. It if is determined that search charges are likely to exceed $25, the requester will be notified of the estimated amount of fees, unless the requester has indicated in advance a willingness to pay fees as high as those anticipated. Such notice will offer the requester the opportunity to confer with agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(3) *Aggregating requests.* When the responsible Central Office official or field station head reasonably believes that a requester or, on rare occasions, a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, the responsible Central Office official or field station head may aggregate (combine) any such requests and charge accordingly. One element to consider in determining whether a belief would be reasonable is the time period in which the requests occurred. For example, it is reasonable to presume that multiple requests within a 30-day period that seek portion(s) of the same document(s) is an attempt to aviod payment of charges. For requests made over a longer period, however, such presumption becomes harder to sustain. In each case, there must be a solid basis for determining that aggregation is warranted. Caution will be exercised before aggregating requests from more than one requester. There must be a concrete basis on which to conclude that the requesters are acting in concert and are acting specifically to avoid payment. In no case will the multiple requests on unrelated subjects from one requester be aggregated.

(4) *Advance payments.* At the discretion of the responsible Central Office official or field station head a requester may be requested to make an advance payment of fees. The Agency may request advance payments only when:

(i) The allowable charges to be assessed a requester are likely to exceed $250.00. The requester will be notified of the likely charge and asked to provide satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or required to make payment of an amount up to the full estimated charges in the case of requesters with no history of payment.

(ii) A requester has previously failed to pay a fee charged in a timely fashion, i.e., within 30 days of the date of the billing. In these cases, the requester may be required to pay the full amount owed, plus any applicable interest or demonstrate that he or she has, in fact, paid the fee and to make an advance payment of the estimated fee before the Agency begins to process a new request or a pending request.

(iii) If a requester is required to make advance payments, as described in this section, the time limits prescribed in § 1.553a, for responding to initial requests and appeals from initial denials plus permissible extensions will begin only after the Agency has received the advance fee payments.

(5) *Debt collection.* In the event of non-payment of billed charges for disclosure of records, the procedures authorized by the Debt Collection Act of 1982 (Pub. L. 97–365) may be used. This may include disclosure to consumer reporting agencies and use of collection agencies.

(Authority: 5 U.S.C. 552(a)(4)(A))

4. In § 1.577, paragraph (f) is revised and paragraph (g) and an authority citation are added to read as follows:

§ 1.577 Access to records.

* * * * *

(f) Fees to be charged, if any, to any individual for making copies of his or her record, excluding the cost of any search for and the review of the record, will be as follows:

Activity	Fees
(1) Duplication of documents by any type of reproduction process to produce plain one-sided paper copies of a standard size (8½" x 11"; 8-1/2" x 14"; 11" x 14").	$0.15 per page after first 100 one-sided pages.
(2) Duplication of non-paper records, such as microforms, audiovisual materials (motion pictures, slides, laser optical disks, video tapes, audio tapes, etc.), computer tapes and disks, diskettes for personal computers, and any other automated media output.	Actual direct cost to the Agency as defined in § 1.555(a)(i) of this title to the extent that it pertains to the cost of duplication
(3) Duplication of document by any type of reproduction process not covered by paragraphs (f)(1) or (2) of this section to produce a copy in a form reasonably usable by the requester..	Actual direct cost to the Agency as defined in § 1.555(a)(ii) of this title to the extent that it pertains to the cost of duplication.

(**Note:** Fees for any activities other than duplication by any type of reproducing process will be assessed under the provisions of § 1.526(i) or (j) or any other applicable law.)

(g) When VA benefit records, which are retrievable by name or individual identifier of a VA beneficiary or applicant for VA benefits, are requested by the individual to whom the record pertains, the duplication fee for one complete set of such records will be waived.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 3275–7]

Approval of the State of Delaware Stack Height Declarations

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: EPA is proposing to approve a declaration by the State of Delaware that the recent revisions to EPA's stack height regulations do not require revisions to any emission limitation in the State Implementation Plan (SIP). The intent of this action is to formally document that Delaware has satisfied part of its obligation under section 406 of the Clean Air Act (CAA). This action announces the results of the State's review of all existing potential sources. The remaining obligations under section 406 are covered by another notice.

DATE: Comments must be received on or before November 16, 1987.

ADDRESSES: Comments may be mailed to: David L. Arnold, Chief, Delmarva/DC Section (3AM13), US EPA, Region III, Air Management Division, 841 Chestnut Building, Philadelphia, PA 19107.

Copies of the submissions are available for public inspection during normal business hours at the Environmental Protection Agency's address above or at the following State office: Delaware Department of Natural Resources and Environmental Control, Air Resources Section, 89 Kings Highway, P.O. Box 1401, Dover, DE 19901.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin A. Magerr (3AM13), at the EPA Region III address above or call (215) 597–6863.

SUPPLEMENTARY INFORMATION:

Background

On February 8, 1982 (47 FR 5864), EPA promulgated final regulations limiting stack height credits and other dispersion techniques as required by section 123 of the Clean Air Act. These regulations were challenged in the U.S. Court of Appeals for the D.C. Circuit by the Sierra Club Legal Defense Fund, Inc., the Natural Resources Defense Council, Inc., and the Commonwealth of Pennsylvania in *Sierra Club v. EPA*, 719 F.2d 436 (DC Cir. 1983). On October 11, 1983, the Court issued its decision ordering EPA to reconsider portions of the stack height regulations, reversing certain portions and upholding other portions.

On February 28, 1984, the electric power industry filed a petition for a writ of certiorari with the U.S. Supreme Court. On July 2, 1984, the Supreme Court denied the petition (104 S.Ct. 3571), and on July 18, 1984, the Court of Appeals' mandate was formally issued, implementing the Court's decision and requiring EPA to promulgate revisions to the stack height regulations within six months. The promulgation deadline was ultimately extended to June 27, 1985. Revisions to the stack height regulations were proposed on November 9, 1984 (49 FR 44878) and promulgated on July 8, 1985 (50 FR 27892). The revisions redefine a number of specific terms including "excessive concentrations," "dispersion techniques," "nearby," and other important concepts, and modify some of the criteria for determining Good Engineering Practice (GEP) stack height.

Pursuant to section 406(d)(2) of the Act, all States were required to (1) review and revise, as necessary, their State Implementation Plans (SIPs) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations; and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, States were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to EPA within nine months of promulgation, as required by section 406.

Subsequently, EPA issued detailed guidance on carrying out the necessary reviews. For the review of emission limitations, the States were to prepare inventories of stacks greater than 65 meters in height and sources with emissions of sulfur dioxide (SO_2) in excess of 5,000 tons per year. These limits correspond to the *de minimis* GEP stack height and the *de minimis* SO_2 emission exemption from prohibited dispersion techniques. These sources were then subjected to a detailed review for conformance with the revised regulations.

State Submission

EPA received Delaware's inventory on March 18, 1986. Additional material was received from the State on April 15, 1986. The State submittal concluded that existing emission limitations have not been affected by stack height credits above GEP or any other prohibited dispersion techniques. Delaware identified 2 stacks (Delmarva Power and Light, Edgemoor Unit #5 and Indian River Unit #4) that emit 5,000 tons per year. In both cases neither source used merged stacks or any other prohibited dispersion technique. The findings for all the stacks are summarized in Table 1.

The State review found eighteen potential stacks. Of the eighteen, fifteen stacks were "grandfathered" and exempt from any regulatory action under EPA's final stack height regulations. Three sources, Delmarva Power and Light (DP&L) Edgemoor #5, Indian River Unit #4 and Texaco's Sulfur Recovery Unit were shown to be at or below GEP. The following is a summary of the States' GEP analysis.

Delmarva Power and Light Edgemoor Unit #5

The State did not find evidence to show reliance on the traditional Hg=2.5H formula and as such, determained GEP stack height using the Hg=H+1.5L formula where,

Hg=Good Engineering Practice stack height measured from the ground-level elevation at the base of the stack.
H=Height of the nearby structure(s) measured from the ground-level elevation at the base of the stack.
L=Lesser dimension, height or projected width, of nearby structure(s).

Using this formula, GEP was found to be 425 ft., where *H=170 ft. and L=170 ft. The actual stack height was determined to be 275 ft.

TABLE 1.—A SUMMARY OF APPLICABLE SOURCES AND THE STATES REVIEW

Name of Company	Grandfathered [1]	GEP [2]	Documentation
Wilmington Finishing Company	X		Map of Wilmington 1927.
Delmarva Power & Light (Edgemoor):			
Unit #3	X		FERC report 1954 .[3]
Unit #4	X		FERC report 1966.
Unit #5		X	State Air Permit.
Delaware City	X		FERC report 1956.
Indian River:			
Unit #1	X		FERC report 1957.
Unit #2	X		FERC report 1959.
Unit #3	X		FERC report 1970.
Unit #4		X	Strate Air Permit.
Dupont Seaford	X		Drawing dated 1939.
Texaco:			
Sulfur Recovery Unit		X	State Air Permit.

Allied Corporation Boiuler Stack East	X		Drawing dated 9/28/59.
Delaware Trust Building	X		Drawing dated 1/12/59.
American International Building	X		Drawing dated 10/8/65.

[1] Stack was in place or binding contract before 12/31/70.
[2] Source Follow Good Engineering Practice in accordance with the July 8, 1985 FEDERAL REGISTER notice.
[3] Federal Energy Regulatory Commission (FERC).

Delmarva Power and Light Indian River Unit #4

The State determined GEP stack height using the Hg=H+1.5L formula for the same reason as for DP&L Edgemoor Unit #5. GEP was found to be 500ft., where *H=200ft. and L=200ft. The actual stack height was determined to be 400ft.

* "H" is the height of the boiler house as documented in the State's air permit. "L" is the same value because the boiler house projected widths are greater than the boiler house height.

Texaco Sulfur Recovery Unit

Based on EPA's GEP definition § 51.100(ii), the State considered this source to be acceptable. In this case, the GEP stack height was found to be 65m. The actual stack height is 3.7m greater than 65m. However, ambient air quality modeling was conducted at the GEP Height. Therefore, the source was not given credit for the additional height.

Public Participation

Since this action is not considered a revision to the SIP, the State was not required to hold a public hearing. However, since the State's findings are presently being published in this Notice, the public will have an opportunity to comment before EPA takes final action.

Conclusion

As discussed in the summary, the State has satisfied part of its obligation under section 406 of the CAA, by reviewing sources to determine compliance with the July 8, 1985, GEP stack height regulation. The State has also met its obligations under section 406, for complying with 40 CFR 51.118 and 51.164 by adopting regulations required to review sources constructed, reconstructed or modified subsequent to December 31, 1970. This latter action is covered in another Notice.

EPA has reviewed the State submission and finds that the documentation adequately supports the conclusion as expressed in Table 1. Therefore, EPA is proposing approval of Delaware's declaration that no revisions to emission limitations for existing sources are required under EPA's final stack height regulations or the terms of the Delaware SIP adopting these stack height regulations.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (See 46 FR8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

40 CFR Part 52

[FRL–3278–1; KY–045]

Approval and Promulgation of Implementation Plans; Kentucky

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is today proposing to approve revisions to 401 KAR 50:015, Documents incorporated by reference, submitted by the Commonwealth of Kentucky on March 23, 1987. This regulation incorporates by reference the methods required for demonstrating compliance with the regulations of the Kentucky Division of Air Pollution. The amendments being proposed for approval today adopt reference methods incorporated in 40 CFR Parts 60 and 61 that are used to demonstrate compliance with the federal regulations which the Kentucky Division of Air Pollution has already adopted or is adopting by reference. In addition, another amendment to 401 KAR 50:015 proposed for approval in this notice adopts EPA's revised "Guideline on Air Quality Models (Revised)," EPA—450/2–78–027R, OAQPS No. 1.2–080R, July, 1986.

DATE: Comments must be received on or before November 16, 1987.

ADDRESSES: Copies of the State submittal and other relevant documents are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Kentucky Natural Resources and Environmental, Protection Cabinet, Department for Environmental Protection, 18 Reilly Road, Frankfort Office Park, Frankfort, Kentucky 40601.

Comments should be addressed to Ms. Pamela E. Adams, at the EPA address above.

FOR FURTHER INFORMATION CONTACT: Ms. Pamela E. Adams, U.S. Environmental Protection Agency, Region IV, Air Programs Branch, at the above listed address or at (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: On January 27, 1987, the Kentucky Natural Resources and Environmental Protection Cabinet conducted a public hearing in Frankfort, Kentucky to receive comments on revisions to Kentucky regulation 401 KAR 50:015, Documents incorporated by reference. Since no adverse comments regarding the revisions were received, the amended regulation became effective, as proposed, on February 10, 1987. Kentucky regulation KAR 50:015 was amended to add reference methods that are required in the federal New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP), that Kentucky has adopted, or will soon be adopting, by reference.

Kentucky regulation 401 KAR 50:015, Documents incorporated by reference, was revised to incorporate by reference the following reference methods from 40 CFR Part 60: Method 3A, Determination of oxygen and carbon dioxide concentrations in emissions from stationary sources (instrumental analyzer procedure); Method 6C, Determination of sulfur dioxide emissions from stationary sources (Instrumental analyser procedure); and Method 7E, Determination of nitrogen oxides emissions from stationary sources (instrumental analyzer procedure). In addition, the following NESHAP test methods from 40 CFR Part 61 were incorporated by reference into the revised 401 KAR 50:015: Method 108, Determination of particulate and gaseous arsenic emissions; Method 108A, Determination of arsenic content in ore samples from nonferrous smelters; and Method 111, Determination of polonium—210 emissions from stationary sources. Finally, Kentucky amended 401 KAR 50:015 to incorporate the updated version of one of the documents on air quality models that was published by EPA and which has been recently revised. The "Guideline on Air Quality Models (Revised)," EPA–450/2–78–027R, OAPQS 1.2–080R, July 1986, was added under Section 5, entitled Environmental Protection Agency, of 401 KAR 50:015.

Kentucky regulation 401 KAR 50:015 merely incorporates the methods for determining compliance which are required by federal regulations which Kentucky has already adopted or is adopting by reference. Therefore, Kentucky's compliance requirements in 401 KAR 50:015 are the same as the federal compliance requirements. Simply incorporating these compliance methods does not affect any source or other entities. Any impact would occur in the individual regulation where the methods are required.

Proposed Action

EPA is today proposing to approve revisions to Kentucky regulation 401 KAR 50:015, Documents incorporated by reference. These revisions simply adopt reference methods that are used to demonstrate compliance with the federal regulations. Another amendment also being proposed for approval in this notice adopts EPA's "Guideline on Air Quality Models (Revised)," EPA–450/2–78–027R, OAQPS No. 1.2–080R, July 1986.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Maritime Administration

46 CFR Part 249

[Docket No. R–101]

Approval of Underwriters for Marine Hull Insurance

AGENCY: Maritime Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Maritime Administration (MARAD) proposes to issue regulations governing the placement of hull insurance on subsidized and Title XI program vessels. The proposed regulations would afford companies participating in MARAD programs wider opportunity to obtain hull insurance coverage from financially sound underwriters with minimal regulatory constraints. Specifically, they would eliminate the current requirement that 75 percent of the required hull insurance coverage be placed in the American market, provide for the approval under certain conditions of additional foreign

underwriters to participate in the writing of hull insurance on MARAD program vessels, and modify the current regulations limiting an underwriter's risk on any single vessel.

DATE: Comments must be received on or before December 15, 1987.

ADDRESS: Send original and two copies of comments to the Secretary, Maritime Administration, Room 7300, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. To expedite review of the comments, the agency requests, but does not require, submission of an additional ten copies of the comments. All comments will be made available for inspection during normal business hours at this address. Commenters wishing MARAD to acknowledge receipt should enclose a self-addressed and stamped envelope or postcard.

FOR FURTHER INFORMATION CONTACT: William B. Ebersold, Office of the Associate Administrator for Maritime Aids, Maritime Administration, 400 Seventh Street SW., Washington, DC 20590, Tel: (202) 366–0364.

SUPPLEMENTARY INFORMATION: On October 11, 1985, MARAD published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (50 FR 41531) concerning its existing policies of (1) accepting only American or certain British underwriters as hull insurers of subsidized or Title XI program vessels; (2) requiring that 75 percent of the required hull insurance coverage be placed in the American market when the rates and conditions are competitive; and (3) limiting an underwriter's risk on any single vessel.

The purpose of the ANPRM was to elicit opinions and data that would be used in the formulation of a proposed rule. However, the comments received tended to be general in nature and did not provide MARAD with sufficient information to make a decision.

There was, however, general support from the ship operators and previously non-admitted foreign underwriters, and opposition from the American marine insurance industry. Consequently, MARAD decided to conduct a public inquiry to give all interested parties an opportunity to provide more information and to support their positions.

Notice of the Inquiry was published in the **Federal Register** on March 18, 1986 (51 FR 9230). The Notice included a series of questions which was intended to provide a focus for the meeting. The Inquiry was held on April 17, 1986, and included presentations by thirteen speakers.

Based on the presentations made and all material submitted in connection with this proceeding, MARAD has decided to proceed with a rulemaking defining MARAD's policy with respect to approval of underwriters to participate in hull insurance placed on subsidized or Title XI program vessels.

It is the intent of the Maritime Administration that its policies afford companies which participate in the subsidy and ship financing (Title XI) programs the widest possible opportunity to obtain hull insurance coverage from financially sound underwriters with minimal regulatory constraints. It is the policy of the Maritime Administration to require those companies subject to its requirements for the placement of hull insurance to afford the American marine insurance market the opportunity to compete for each such placement. However, the placement of hull insurance coverage on MARAD program vessels is ultimately the responsibility of the vessel owner, and MARAD is not responsible for guaranteeing the security of the underwriter. Rather, it is incumbent upon MARAD to provide a regulatory environment which does not impose undue costs upon program participants or a regulatory burden upon owners or the marine insurance industry. The proposed regulation must therefore be viewed as deregulation which is intended to stimulate competition without placing undue risk upon the various MARAD programs.

MARAD's review of all pertinent legislative authority in the Shipping Act, 1916 (46 App. U.S.C. 811), Merchant Marine Act, 1920 (46 U.S.C. 855), and Merchant Ship Sales Act of 1946 (50 U.S.C. 1735) has failed to provide any basis for concluding that Congress ever intended to require that *priority* be given to American marine insurers in underwriting hull or any other form of marine insurance for any U.S.-flag vessels. With respect to marine insurance, the sole intent expressed in the 1916 Act was to "ascertain what steps may be necessary to develop an *ample marine insurance system* as an aid in the development of an American merchant marine." Based on the findings of Congress, it was deemed necessary to provide an antitrust exemption to American marine insurers in the 1920 Act to assure that they would achieve a significant role in the marine insurance market, and provide insurance for U.S. merchant vessels at competitive rates. At that time, the marine insurance market was dominated by British insurance companies.

In 1920, Congress saw the need to develop a strong and independent American marine insurance industry to combat the ills that its absence had caused, especially during World War I. The American marine insurance market developed, became competitive and remains so today.

An administrative agency has the right to change its policy in an area of discretion squarely committed to it by Congress and to apply the new policy to parties to which the old policy had been applied. Without the right to make changes, agencies could not adjust to varying social and economic conditions. *Maxwell Co.* v. *NLRB*, 414 F.2d 477 (6th Cir. 1969).

MARAD is proposing to revoke its current informal policy which reserves 75 percent of the hull insurance market for MARAD program vessels to American hull insurers. However, recognizing the importance of a sound American marine insurance market to a healthy U.S. merchant marine, MARAD would continue to support the American market by requiring owners and brokers to offer American underwriters adequate opportunity to compete for each placement of insurance. While not imposing a regulatory burden to submit documentation of all such offers, MARAD would monitor compliance with this requirement in the manner described in § 249.9 MARAD thus hopes the proposal would ensure the very "level playing field" which the American underwriters have so consistently sought.

MARAD has also concluded that there is no basis upon which to preclude participation by additional underwriters simply because they are not in the American or London markets. If there are other financially sound underwriters subject to adequate regulation in their country of domicile, they should not be excluded from participation or subject to unwarranted regulation. Regulation for the sake of protectionism can only result in added costs for the ultimate insurance purchaser. MARAD's commitment to meaningful regulatory reform calls for elimination not only of unnecessary impediments to competitive maritime operations, but also of restrictive regulatory constraints. MARAD also supports a business environment in which open competition can exist. Consequently, the proposed rule does provide in §§ 249.6 and 249.7 a mechanism for approval of additional foreign underwriters on the basis of their financial soundness, the suitability of the regulatory regime in the country of domicile, and the principle of mutual non-discrimination.

In order not to discriminate against the American marine insurance industry in favor of the British or other foreign markets and to insure the broadest base

of competition within the American market, the proposed rule requires, in § 249.5(a), that American underwriters have an A.M. Best rating of B (Good) or better. This is not to say that individual owners or their brokers should not have more stringent standards if they believe that such standards are appropriate. In order to encourage the broadest range of competition, MARAD does not want to preclude American underwriters who might be otherwise qualified and acceptable to the owners and brokers. Although it is expected that owners and brokers would have certain requirements of their own, MARAD is also not specifying a minimum financial size category.

Underwriters at Lloyd's would remain eligible to participate without further consideration because of their huge resources, the size of the Lloyd's American Trust Fund, and the protection provided by the Lloyd's Central Fund. Member companies of the Institute of London Underwriters and the Liverpool Underwriters Association would generally be eligible to participate without further consideration. However, MARAD would require that the member company actually underwriting the risk maintain a U.S. trust fund for the benefit of its U.S. policyholders in a amount at least equal to the amount which would be required of newly approved underwriters. Also, the amount of insurance written could not exceed the limitation on risk specified in the regulation. These requirements are specified in § 249.5(b).

In order to minimize the administrative burden of monitoring compliance with the proposed rule, MARAD would not require owners and brokers to submit supporting documents to demonstrate that each participating underwriter is approved by MARAD and has adequate surplus to meet MARAD's requirements. Instead, the proposed regulation clearly states in § 249.5(c) that it is the responsibility of the vessel owner and its broker to ensure that the underwriters with whom the coverage is placed meet the specified eligibility criteria. MARAD would then need to monitor such compliance only on the basis of a random sample. MARAD would continue to require timely, full and complete written confirmation of the coverage actually placed.

The application procedures (§ 249.6) for foreign underwriters seeking to participate in marine hull insurance placed on MARAD program vessels involve the submission of (1) financial data, (2) an English language version of the insurance regulatory regime in the country of domicile, (3) a certification that similar market access is available to U.S. insurers seeking to write hull insurance in the applicant's country of domicile and, (4) possibly the details of the reinsurance program.

It is MARAD's intention to evaluate the financial strength of applicant foreign underwriters on the basis of the material submitted, or such additional information as may be required. To the extent possible, comparable evaluation criteria would be used for all underwriters. It is also MARAD's intention that approval be granted only to those foreign underwriters which are financially sound and whose participation does not create any undue risk for either the assets insured or the MARAD programs involved. MARAD does not intend by this deregulation to allow participation by foreign underwriters which are less suitable than participating American underwriters. These requirements would not apply to foreign underwriters who establish a branch or subsidiary in this country and become licensed by a state because such companies are already eligible to participate in the insurance of MARAD program vessels as part of the American market.

MARAD is still considering what financial reporting requirements should be imposed upon insurance companies seeking to write hull insurance on MARAD program vessels. MARAD recognizes the fact that differences exist between insurance accounting systems in this country and abroad. However, because MARAD does not need to precisely compare such systems, it may be possible to assess the financial strength of individual underwriters without requiring them to recast their accounting system to adapt to American norms. Alternatively, submission of financial data in the NAIC format could ensure that all underwriters are evaluated on the basis of comparable data. Consequently, § 249.6(b)(1), dealing with financial data requirements, is presented in two alternative forms. Interested parties are urged to express a preference, and in so doing to provide detailed support for the choice. They should explain precisely what benefits would accrue to MARAD's evaluation effort if all data is submitted in NAIC format, or alternatively, what burdens and difficulties such a requirement would create. Such comments should also address the question of whether three or five years of data should be required, and what type of certification requirement would ensure the accuracy and completeness of the data submitted. MARAD would also welcome any suggestions aimed at ensuring fair and accurate evaluation of applicant foreign underwriters.

MARAD believes that the strength of the insurance industry in this country is partly due to the adequate system of regulation of insurance companies. MARAD also believes that in countries which lack a national rating scheme comparable to A.M. Best's, a review of the national insurance regulatory regime under which the foreign insurer operates can indicate whether there is adequate regulation to maintain high quality security. This approach is preferable to imposing unnecessary regulations which would not actually improve the quality of the foreign security, and would only increase the cost of insurance—a result inconsistent with MARAD's policy. MARAD would, of course, retain the discretionary authority to impose reasonable terms and conditions upon any foreign underwriters which it approves.

The record from the ANPRM and the Inquiry indicates concern among the American underwriters that MARAD's proposal would allow participation by foreign underwriters from countries that discriminate against American insurers. MARAD would not approve access to the American hull insurance market for any underwriters from countries in which American underwriters are denied similar access to their hull insurance markets. MARAD's proposed rule might thus prove beneficial to the American market in its efforts to remove any discriminatory practices which mau inhibit its expansion worldwide. At this time, MARAD does not have any definitive evidence of specific discriminatory practices. The proposed rule requests that the American marine insurance industry specifically identify any discriminatory practices occurring in the foreign marine hull markets. MARAD will then consider whether additional safeguards are necessary and appropriate.

MARAD would grant approvals to foreign underwriters on an annual basis only, to enable periodic assessments of the results and impact of the proposed rule. As a condition of approval, newly approved foreign underwriters would be required to set up a $1 million trust fund in the United States for the benefit of domestic policyholders. The amount would be reviewed annually and adjusted as appropriate. All policies issued by foreign underwriters would be required to contain the latest MARAD-approved American Institute of Marine Underwriters' forms, as well as New York Suable or Service of Suit (USA)

VOL

UMI

Clause. To maintain their approvals, newly approvewd foreign underwriters would be required to file annual financial statemens with MARAD, in the same level of detail as required for the original approval.

There was considerable discussion at the Inquiry regarding the amount of surplus necessary for adequate security, and, as a collateral issue, the extent to which an insurer should be exposed on a single risk. In an attempt to balance the interests of all insurers, MARAD has tentatively concluded that the standard should be based upon the level of *net* retention (after reinsurance) and its relation to policyholders surplus, and the level of concentration of reinsurance among reinsurers. By *net* retention is meant the amount of each risk which is retained by the primary direct insurer after a portion of the original total amount insured is passed on to a secondary insurer (the reinsurer).

The standard being proposed in § 249.8 is that an underwriter's *net* retention (after reinsurance) of insurance coverage on a single risk should not exceed five percent of its policyholders' surplus, a level which MARAD believes does not represent too great a concentration of risk. The proposed rule only requires MARAD's consideration if the total amount insured by one underwriter on any single vessel (before reinsurance) exceeds five percent of the underwriters policyholders' surplus.

Since policyholders' surplus data is or will be readily available, it is expected that in most cases a simple comparison between the total amount insured and the underwriter's surplus will obviate the need for MARAD to consider the reinsurance involved, or for the underwriter to submit any documentation concerning its reinsurance arrangements. This procedure minimizes the administrative burden on all parties.

However, if the total amount insured by an underwriter on any single vessel exceeds five percent of its policyholders' surplus, then the underwriter must rely on its reinsurance to meet the standard. Underwriters expecting to consistently rely on reinsurance to meet the standard would be required to state this in their applications. In such case, MARAD would require the underwriter to submit the details of its reinsurance program for MARAD's evaluation prior to granting approval. Because the entire issue of limitation centers on preventing excessive exposure on a single risk, the evaluation of the reinsurance program would be concerned with concentration of reinsurance as well as the quality of reinsurance. MARAD would not approve an underwriter if its reinsurance is so concentrated as to create an undue risk to the underwriter's solvency.

MARAD's failure to specifically adopt certain evaluative criteria suggested by the American marine insurance industry (such as the NAIC Insurance Regulatory Information System) is not a rejection of such proposals, but is a recognition of the evaluation process as a highly inexact science. Even within the insurance industry, the ratios and standards which have been suggested are advisory and not determinative. Consequently, it would be inappropriate to cast all the NAIC criteria into the rigidity of a regulation. However, in the course of its evaluation of applications, MARAD would certainly use such ratios and standards suggested by the marine insurance industry which it considered appropriate to the evaluation being conducted. MARAD would also welcome at this stage any additional suggestions for other evaluation criteria.

E.O. 12291, Statutory and DOT Requirements

The Maritime Administrator has determined that this proposed rulemaking is not major, as defined in E.O. 12291, but is significant under DOT regulatory policies and procedures (DOT Order 2100.5) due to controversy and considerable public interest. This proposed rule has also been deemed a significant regulatory action in the Administration's 1987 Regulatory Program. A Regulatory Evaluation has been prepared to assess the economic impact of the proposed rule, and is available upon request.

Various alternatives were considered in connection with whether to (1) retain the 75 percent American market reservation, (2) permit any of the insurance to be placed with foreign underwriters outside the London market, and (3) limit the amount of risk which an underwriter may take on any single vessel. The Regulatory Evaluation concludes that the proposed rule will help to improve the competitive posture of the U.S.-flag fleet by providing the U.S.-flag owner participating in MARAD programs with the broadest opportunity to obtain sound hull insurance coverage with minimal regulatory constraints. Market restraints tend to reduce competition and create an unnecessary impediment to a competitive U.S.-flag merchant marine, and with the antitrust exemption, create the potential for higher insurance costs. Economical and efficient operation of vessels is critical for survival in a highly competitive environment, and the operators must be afforded the opportunity to obtain the best possible coverage at the lowest possible cost. Rate regulation is an undesirable alternative inconsistent with the goals of deregulation and increasing competition.

The maximum potential impact of the proposed regulatory changes on the American underwriters would be the virtually impossible scenario of total loss of market, which is estimated by MARAD staff at $42–$63 million in annual premiums. However, MARAD business may account for as little as 25 percent of the total hull pr ·nium written by American underwriters, who are able to effectively compete for international hull business, presumably with the same foreign underwriters who are now ineligible to participate in MARAD business. Consequently, MARAD does not expect that the proposed rule would have any significant adverse effect upon the American market's ability to compete effectively.

The only anticipated impact is a general reduction of premium levels in response to an increase in competition. In fact, to the extent that there is a loss of premium to the American underwriters, it will be the result of premium savings accruing to American vessel owners.

However, in order to ensure that MARAD's ultimate decision on this matter is based upon the best data available, commenters are specifically invited to submit detailed estimates of the impact of the proposed rule upon their business.

Finally, the Regulatory Evaluation concludes that the proposed rule would balance support of the American marine insurance industry with equity for U.S.-flag vessel owners, and that the various impacts and consequences of implementation would not jeopardize the soundness of either MARAD's subsidy and ship financing programs or the American marine insurance industry.

Since this proposal would principally affect ship operator and insurance companies with substantial annual revenues, the Maritime Administrator certifies that, if finalized, this regulation would not exert a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*). The proposed rulemaking contains new information collection requirements in §§ 249.6(b) and 249.7(g). They will be submitted to the Office of Management and Budget for approval pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 46 CFR Part 249

Grant programs—transportation insurance, Insurance companies, Maritime carrier.

Accordingly, it is proposed to add a new Part 249 to Subchapter C of Chapter II, Title 46, Code of Federal Regulations, to read as follows:

PART 249—APPROVAL OF UNDERWRITERS FOR MARINE HULL INSURANCE

Sec.

249.1 Purpose.
249.2 Policy.
249.3 Amounts of insurance.
249.4 Eligibility.
249.5 Eligibility criteria.
249.6 Application procedures.
249.7 Approval.
249.8 Limitation on risk.
249.9 American market participation.
249.10 Non-discrimination policy.

Authority: Sec. 204(b), 1109, Merchant Marine Act, 1936, as amended (46 App. U.S.C. 1114(b), 1279(b)); 49 CFR 1.66.

§ 249.1 Purpose.

This part prescribes certain regulations governing the placement of marine hull insurance on vessels built or operated with subsidy or covered by vessel obligation guarantees issued pursuant to Title XI of the Merchant Marine Act, 1936, as amended.

§ 249.2 Policy.

(a) It is the policy of the Maritime Administration (MARAD) that companies subject to requirements for the placement of marine hull insurance shall be afforded the widest possible opportunity to obtain the necessary coverage, with minimal regulatory constraints, and that while the placement of such insurance should be with financially sound underwriters, such placement should not create any unnecessary impediments to competitive maritime operations.

(b) It is also the policy of the Maritime Administration to require owners of vessels with ODS or Title XI obligation guarantees, before placing marine hull insurance on these vessels, to allow the American marine insurance market the opportunity to compete for each such placement.

§ 249.3 Amounts of insurance.

MARAD will inform the owner of each vessel that is subsidized or covered by vessel obligation guarantees, prior to initial placement and at least annually thereafter, of the minimum amount of insurance required to be placed on the vessel.

§ 249.4 Eligibility.

(a) *In general.* All required marine hull insurance must be placed with:

(1) Underwriters licensed to do business in one or more of the United States;

(2) Underwriters at Lloyds;

(3) Member companies of the Institute of London Underwriters or the Liverpool Underwriters Association; or

(4) Other underwriters specifically approved in advance by the Maritime Administration.

§ 249.5 Eligibility criteria.

(a) *U.S. underwriters.* Underwriters licensed to do business in a state are eligibile to participate without further consideration, provided they have at least a B security rating, as published in the latest edition of A.M. Best's Insurance Reports, and the amount of insurance does not exceed the limitation on risk prescribed in § 249.8.

(b) *Foreign underwriters.* (1) Underwriters at Lloyds are eligible to participate without further consideration.

(2) Underwriters which are members of the Institute of London Underwriters (ILU) (*member* companies, not parents or affiliates of the member companies) are eligible to participate without consideration, provided that the ILU member company actually underwriting the risk maintains a trust fund in the United States for the benefit of its U.S. policyholders in an amount at least equal to the minimum provided in § 249.7(c), and the line taken does not exceed the limitation on risk prescribed in § 249.8.

(3) Member companies of the Liverpool Underwriters Association are eligible to participate without further consideration, provided that the member company actually underwriting the risk maintains a trust fund in the United States for the benefit of its U.S. policyholders in an amount at least equal to the minimum provided in § 249.7(c), and the line taken does not exceed the limitation of risk prescribed in § 249.8.

(c) *Documentation of eligibility.* it shall be the responsibility of the vessel owner and its broker to ensure that the requirements of this section are met, and they should be able to provide MARAD, upon request, with documentation to that effect.

(d) *Other foreign underwriters.* Foreign underwriters other than those specified in (b)(1) through (b)(3) of this section may also be eligible to participate in the writing of marine hull insurance on MARAD program vessels of approved to do so in accordance with the procedures contained in §§ 249.6 and 249.7.

§ 249.6 Application procedures.

(a) MARAD may grant specific approval for underwriters described in § 249.5(d) to participate in the writing of marine hull insurance on MARDA program vessels only on an annual basis in advance of any actual placement.

(b) To seek approval, an applicant shall submit to MARAD:

(1) Annual financial statements for the preceding five (three) years in the format used by the National Association of Insurance Commissioners; [or]

(1) Financial data for the three (five) previous years in sufficient detail to enable MARAD to assess the financial strength and solvency of the applicant. MARAD may request additional data (for example, that the financial reports be submitted in the form prescribed by the National Association of Insurance Commissioners for admitted U.S. insurers) if the applicant's submissions are considered inadequate;

(2) An English language version of the insurance regulatory regime that is in place in the insurer's country of domicile (after review MARAD may contact the foreign national regulatory authorities, as appropriate);

(3) An affidavit in writing, executed by an agent of the applicant who is a domiciliary of the United States, and supported by appropriate documentation, to demonstrate that there is nothing to preclude a U.S. insurer from obtaining the same access to the applicant's home market as the applicant is seeking to the U.S. market, and

(4) The details of its reinsurance program, if it expects that any risk assumed or likely to be assumed will exceed five percent of its policyholders' surplus.

§ 249.7 Approval.

(a) Approval of the applicant will be based upon an assessment of the applicant's financial condition and solvency, suitability of the regulatory regime under which the applicant must operate in its home country (in lieu of a national rating scheme), and on the principle of reciprocal non-discrimination.

(b) Notice of Application will be published in the **Federal Register** for each application received from foreign underwriters described in § 249.5(d), affording interested persons an opportunity to comment on the application, and in particular, on any discriminatory practices which might

VOL
52
ISS
200
OC
16
1987
UMI

exist in the applicant's country of domicile.

(c) In granting approval, MARAD will consider all materials available to it, and may impose reasonable terms and conditions upon any such approvals granted.

(d) Upon approval, applicant will be required to establish a U.S. trust fund for the benefit of its U.S. policyholders in the amount of $1 million, such amount to be reviewed annually in connection with renewal of approval, and adjusted as appropriate.

(e) All policies, at the time of issuance, must contain the latest American Institute of Marine Underwriters' forms, as approved by MARAD.

(f) All policies issued by foreign underwriters shall include New York Suable Clause or Service of Suit (USA) Clause.

(g) To maintain approval, foreign underwriters, other than those specified in § 249.5(b), must file annual financial statements in the same level of detail as required for original approval.

§ 249.8 Limitation on risk.

Underwriters may take a line on any single risk in excess of five percent of its Policyholders' Surplus only with the prior approval of MARAD. Such approval will be based upon a review of the underwriter's reinsurance. The standard to be applied in such review shall be that the underwriter's *net* retention on any single risk may not exceed five percent of its Policyholders' Surplus, and that the reinsurance should not be so concentrated as to create an undue risk to the underwriter's solvency.

§ 249.9 American market participation.

(a) Owners of vessels receiving ODS or Title XI vessel obligation guarantees, or their brokers, shall offer to the American marine insurance market the opportunity to compete for the placement of marine hull insurance on each vessel.

(b) Such companies and their brokers shall provide, upon request by MARAD, evidence of having offered the risk to an adequate cross section of the American marine insurance market.

(c) If, in the opinion of MARAD, the American marine insurance market has not been offered adequate opportunity to participate in the risk, MARAD may require that the risk be reoffered and that the existing placement be modified, as deemed appropriate.

§ 249.10 Non-discrimination policy.

To assist MARAD to effectively administer the policy regarding non-discrimination against U.S. insurers in other countries, as described in §§ 249.6(b)(3) and 249.7(a), it will be the responsibility of the American marine insurance industry to bring to MARAD's attention any discriminatory practices in the marine hull insurance market abroad which are inconsistent with MARAD policy. Upon receipt of such information, MARAD will take whatever action it deems appropriate.

Dated: October 13, 1987.

By Order of the Maritime Administration.

James E. Saari,

Secretary, Maritime Administration.

[FR Doc. 87-23932 Filed 10-15-87; 8:45 am]

BILLING CODE 4910-81-M

[Docket No. R-115]

46 CFR Part 308

War Risk Insurance

AGENCY: Maritime Admninistration, Department of Transportaton.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Maritime Administration (MARAD) is proposing to amend the war risk insurance regulations (46 CFR Part 308) to allow certain vessels registered in the Commonwealth of the Bahamas (Bahamas) to become eligible to apply for war risk insurance. MARAD administers these regulations as a standby emergency program, which now allows only vessels registered under the laws of the United States, as well as certain vessels that are owned or controlled by U.S. citizens and registered under the laws of Panama, Honduras, and Liberia, to apply for available risk insurance interim binders. These interim binders insure vessels against liabilities resulting from war or warlike actions when commercial war risk insurance is unavailable on reasonable terms and conditions. The proposed amendment would make certain vessels registered in the Bahamas eligible for war risk insurance and subject to the same considerations now applicable to vessels registered under the laws of Panama, Honduras or Liberia. This proposed rulemaking would also make editorial amendments, including those that reflect MARAD organizational changes.

DATES: Comments must be received on or before December 15, 1987.

ADDRESS: Send original and two copies of comments to the Secretary, Maritime Administration, Room 7300, Department of Transportation, 400 7th Street SW., Washington, DC 20590. To expedite review of the comments, the agency requests, but does not require, submission of an additional ten copies of the comments. All comments will be made available for inspection during normal business hours at this address. Commenters wishing MARAD to acknowledge receipt should enclose a self-addressed and stamped envelope or postcard.

FOR FURTHER INFORMATION CONTACT: Edmond J. Fitzgerald, Director, Office of Trade Analysis and Insurance, Maritime Administration, Washington, DC 20590 or telephone (202) 366-2400.

SUPPLEMENTARY INFORMATION: The authority of the Secretary of Transportation (Secretary) to provide insurance and reinsurance under Title XII, Mechant Marine Act, 1936, as amended, 46 U.S.C. 1281-1293 (Act), was reinstated by Pub. L. 99-59, which was encted into law on July 3, 1985, and which will expire on June 30, 1990. The implementing war risk insurance regulations were reissued on December 9, 1985 (50 FR 50165) to provide the terms and conditions under which war risk insurance interim binders are issued for U.S.-flag vessels and certain foreign-flag vessels owned or controlled by U.S. citizens.

As authoroized by section 1203, of the Act, as amended (46 U.S.C. 1283), the Secretary of Transportation may provide war risk insurance adequate for the needs of the waterborne commerce of the United States, if such insurances cannot be obtained on reasonable terms and conditions from companies authorized to do an insurance business in a state of the United States. The U.S. government's war risk insurance program is a standby emergency program. It becomes effective simultaneously with the automatic termination of ocean marine commercial war risk insurance policies. Those policies are automatically terminated upon the outbreak of war, whether declared or not, between any of the five great powers (United States, United Kingdom, France, People's Republic of China, or the Union of Soviet Socialist Republics) or upon the hostile detonation of a weapon of war employing atomic or nuclear fission.

This program makes it possible for applicants to obtain war risk insurance, underwritten by the U.S. government, when such insurance is unavailable on reasonable terms and conditions in the commercial market. It assures the continued flow of essential U.S. trade, while protecting the shipowner from loss due to risks of war.

A war risk insurance interim binder is a contract under which the U.S. government agrees to provide the

applicant with war risk insurance coverage in the interim period, after termination of commercial insurance coverage, for a fee and upon the conditions set forth in 46 App. U.S.C. section 1282. An agent of MARAD issues the interim binders.

In 1976, Pub. L. 94–523 amended the prior war risk authority (45 App. U.S.C. 1283) by requiring that the Secretary shall determine whether to grant war risk insurance or reinsurance foreign-flag vessels based upon consideration of "the characteristics, the employment, and the general management of the vessel by the owner or charter," (46 U.S.C. 1283). That authority was reinstated in 1979 and 1985, and has been implemented by regulations published in the **Federal Register** on April 3, 1980, (45 FR 22041) and December 9, 1985 (50 FR 50165), respectively.

MARAD has issued implementing regulations restricting foreign-flag vessel eligibility for war risk insurance interim binders. MARAD's regulations provide for a case-by-case review of foreign-flag vessels applying for war risk insurance binders to assure the continued delivery of important U.S. cargoes when commercial war risk insurance is unavailable and to make it possible for the U.S. government to obtain the use of certain foreign-flag vessels under the Voluntary Contract of Commitment (VCC).

Vessels now eligible to apply under MARAD regulations are those that are documented under the laws of the United States (except sport fishing vessels), as well as vessels not more than 20 years old that are registered under the laws of Panama, Honduras, and Liberia. Vessels registered under the laws of the Bahamas would become eligible under this proposed rule.

Owners of these foreign-flag vessels must be U.S. citizens, or U.S. citizen owned corporations, or the vessels must be under the operational control of U.S. citizens. These vessels cannot be subject to requisition for title or use by any national government, other than the U.S. government. Further, the foreign country in which the vessel is registered may not have a statutory restraint preventing the U.S. government from requisitioning a U.S. citizen-owned or controlled vessel registered in that foreign country.

Eligible foreign-flag vessels that qualify for war risk insurance interim binders are those that are: (1) Substantially engaged in the foreign commerce of the U.S. (considered to be so if they carry thirty (30) percent of net cargo tonnage on a semiannual basis in the U.S. foreign commerce); (2) product tankers up to 90,000 deadweight tons; (3) dry cargo vessels; (4) heavy lift vessels; (5) refrigerated vessels; (6) and other classes of vessels in short supply in the U.S.-flag fleet, with special capabilities.

If a vessel meet any of these criteria, the owner must affirm that it will: (2) Make the vessel available during a U.S. national emergency to serve the U.S. economy or cooperate with U.S. military authorities under section 902 of the Act (46 App. U.S.C. 1242); (2) maintain it in its eligible category; and (3) report its location to the U.S. Coast Guard.

Vessels owned or controlled by U.S. citizens and registered under the laws of a foreign government are subject to the laws of the country of registry. Such laws may prevent U.S. citizens or U.S. operators of a foreign-flag vessel from making that vessel available to the U.S. government during periods of U.S. national emergency. MARAD's regulations require that applicants for war risk insurance on a foreign-flag vessel submit with their application a certified copy of the evidence of any official action or approval required by the government of the country of registry as a prerequisite to the execution of a VCC with the U.S. government (46 CFR 308.3(d)(4)). The VCC between the U.S. government (MARAD) and the vessel's U.S. citizen applicant makes that vessel available to the U.S. during any period in which vessels may be requisitioned under section 902 of the Act (46 App. U.S.C. 1242), i.e., whenever the President proclaims that there is a national emergency or that security or the national defense make it advisable.

This NPRM is issued in recognition of legislation enacted by the Bahamian government in 1983 as amendments to the Bahama Merchant Shipping Act, 1976, (MSA). These amendments allow U.S. citizen-owned or controlled Bahamian-flag vessels to comply with the foregoing MARAD requirements and otherwise meet MARAD criteria, approved by the U.S. Navy, to become eligible for war risk insurance. Section 286 of the MSA provides that the Bahamian registrar may grant written permission to the vessel's owner to transfer operating control of that vessel to another country's government during a state of emergency or time of war in the country where the owner resides or is a citizen. Thus, the Bahamian government would allow a U.S. citizen-owned or controlled vessel registered in the Bahamas to be made available to serve the U.S. national economy or U.S. national defense in times of U.S. national emergency under applicable U.S. laws.

This change in Bahamian law has removed the basis for objection by the U.S. Department of the Navy, Office of the Chief of Naval Operations (Navy), which previously objected to approving U.S. citizen-owned or operated vessels registered in the Bahamas as transport vessels to complement U.S. strategic sealift capability. The Navy objected to certain provisions in the prior Bahamian law, e.g. the requirement that all equity owners and mortgagees consent to the requisitioning of the vessel, and the provision that the country requesting title or use of the vessel declare that a state of emergency exists before the Bahamian government would allow the vessel's operational control to be transferred to another country.

Bahamian law now requires that vessels registered under its MSA must comply with numerous safety standards. For example, foreign-owned vessels are eligible for registration in the Bahamas if they are less than 12 years old at the time of first registry and if they are oceangoing vessels of 1,600 or more net registered tons engaged in "foreign-going trade." Foreign-going trade is defined as not trading exclusively within the Bahamian Islands or between the Bahamas and the East Coast of Florida. Under the MSA, a foreign-owner can hold direct title to a Bahamian-flag vessel and such vessel is considered "foreign-owned" unless its ownership is entirely in the hands of citizens of the Bahamas.

The MSA provides that six international classification societies can survey Bahamian-registered vessels, including The American Bureau of Shipping. In addition, the Bahamian Maritime Division of the Ministry of Transport, located in Nassau, London, and New York makes its inspection service available to shipowners. Four of the approved classification societies are members of the International Association of Classification Societies (IACS), based in London.

The willingness of the Bahamian government to include members of the IACS to survey Bahamian-flag vessels shows a desire to impose strict safety inspection standards that vessels under its registry will be operated in class. Further, all Bahamian-registered vessels must be inspected before the vessel is put into service, on an annual basis, whenever an accident occurs which affects the safety of the ship or whenever either important repairs are made or registration renewals are requested. The Bahamian MSA adheres to worldwide shipping safety concerns as its regulations have been modeled after United Kingdom shipping legislation. The Bahamian government has also joined the International

VOL 52 ISS 200 OC 16 1987 UMI

Maritime Organization (IMO) and has been a party to conventions sponsored by the IMO.

As a result of the changes in Bahamian law, the U.S. Navy now regards U.S. citizen-owned or controlled vessels registered in the Bahamas as providing available cargo capacity to be relied upon to contribute to the cargo sealift capability support complementing U.S. strategic defense requirements. The U.S. Navy has requested that MARAD provide war risk insurance for certain Bahamian vessels, as appropriate.

An additional reason for allowing Bahamian-flag vessels to qualify for war risk insurance is that U.S. citizens are now registering their vessels under the Bahamian flag. Preliminary MARAD statistics now being compiled for publication in the document entitled *Foreign Flag Merchant Ships Owned by U.S. Parent Companies,* to be effective January 1, 1987, indicate that there are 26 U.S. citizen-owned vessels registered in the Bahamas. Seventeen of these 26 vessels would be eligible to apply for an interim binder. Approximately 58 percent of these 17 vessels were formerly registered under the Liberian or Panamanian flag and eligible for war risk insurance interim binders.

Accordingly, MARAD is proposing to amend its regulations at 46 CFR Part 308 to provide that certain vessels registered in the Bahamas be eligible to apply for war risk insurance interim binders. Such vessels could serve the national economy and the national defense needs of the United States.

E.O. 12291 Statutory and DOT Requirements

The Maritime Administration has determined that this proposed rule is not major as defined in E.O. 12291, and is not significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). Bahamian law now allows entities registering their vessels in the Bahamas to qualify for U.S. government issued war risk insurance binders, subject to enabling amendments to MARAD regulations. Available data indicates that if all eligible U.S. citizen-owned or controlled vessels registered in the Bahamas applied for war risk insurance binder coverage, such coverage would involve a total of 17 vessels under the control of three companies. More than half of these 17 vessels were previously eligible for an interim binder while registered under either the Liberian flag or Panamanian flag. Accordingly, the economic impact has been found to be minimal. Since the rule affects principally the owners and operators of large commercial ships, the Maritime Administrator certifies that it will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*).

This rule would amend the regulations at 46 CFR Part 308, which contain information collection requirements in §§ 308.3 and 308.6. The information collection for vessels that are registered in the Bahamas will be identical to that which has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). In March 1986, (under OMB Control No. 2133–0011) these new forms were approved for use and are now entitled: War Risk Insurance Application (Form MA–528); War Risk Insurance Binder, Form MA–942; Vessel Data, Form MA–828; and Underwriting Agency Agreement, Form MA 355.

List of Subjects in 46 CFR Part 308

Maritime carriers, War risks insurance.

Accordingly, 46 CFR Part 308 is proposed to be amended as follows:

PART 308—[AMENDED]

1. The citation of authority for Part 308 is revised to read as follows:

Authority: Secs. 204, 1202, 1203, 1209, Merchant Marine Act of 1936, as amended (46 App. U.S.C. 1114, 1282, 1283, 1289; 49 U.S.C. 1.66).

§ 308.2 [Amended]

2. Section 308.2(a) is amended by inserting between the word "Honduran," and the word "or," the word "Bahamian."

§§ 308.3(c) and (g), 308.6(d), 308.304, 308.404, and 308.410 [Amended]

3. Sections 308.3(c) and (g), 308.6(d), 308.304, 308.404, and 308.410 are amended by replacing the title of Director, Office of Marine Insurance with the title of Director, Office of Trade Analysis and Insurance.

§ 308.5 [Amended]

4. Section 308.5 is amended by deleting the phrase "and General Order 75, as revised" and deleting the phrase "(General Order 75)".

§ 308.205 [Amended]

5. Section 308.205 is amended by replacing the title the Office of Marine Insurance with the title the Office of Trade Analysis and Insurance.

§ 308.404 [Amended]

6. Section 308.404 is amended by replacing the title, Chief, Division of Insurance with the title, Director, Office of Trade Analysis and Insurance.

(Catalog of Federal Domestic Assistance Program No. 20.803 War Risk Insurance)

By Order of the Maritime Administrator.

Date: October 9, 1987.

Joel C. Richard,

Assistant Secretary.

BILLING CODE 4910–81–M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 87–10; Notice 1]

Federal Motor Vehicle Safety Standards; Power-Operated Window Systems

AGENCY: National Highway Tarffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposed to amend Standard No. 118 *Power-Operated Window Systems,* in several respects. First, this proposal would include light trucks among the classes of vehicles to which the Standard applies. This change is proposed because power windows in light trucks would appear to present the same prospect for injury to vehicle occupants as power windows in vehicles already subject to the standard. Second, this proposal would eliminate the current limitation on circumstances in which power windows may be *opened.* It would not change the current limitation on the circumstances in which those windows may be *closed.* NHTSA proposes this change because the greatest risk of injury by a moving power window occurs during the such *closing* of a window. Third, this notice proposes to eliminate the requirement that power windows be operable outside of a vehicle only with a *key* locking system. Several vehicle designs now use some kind of numeric or alphanumeric code sequence to lock and unlock the vehicle from the exterior. NHTSA is not aware of any safety reason to treat these locking systems any differently from *key* locking systems. In the alternative, the agency seeks comment on whether the Standard should prohibit closing a power window via *any* external controls. Recently, the agency has received a small number of reports of children injuring themselves by activating an external power window control. One of these reports involved a fatality. Finally, this notice proposes to expand Standard 118's purpose and

scope specifically to include power-operated roof devices.

DATES: Comment closing date: November 30, 1987. Proposed effective date: 180 days after publication of the final rule in the **Federal Register.**

ADDRESSES: Comments should refer to Docket No 87–10; Notice 1, and submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. Docket hours are 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Kenneth Rutland, Crash Avoidance Division, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Telephone #: (202) 366–5267.

SUPPLEMENTARY INFORMATION: This notice proposes several changes to Standard No. 118, *Power-Operated Window Systems* (49 CFR 571.118). The Standard's purpose is to minimize the risk of personal injury that may result if a person, particularly a young one, is caught between a closing power-operated window and the window frame. The agency's experience is that children are the group of people most likely at risk of injury from inadvertent or unsupervised operation of power windows.

The first proposed change is to expand the Standard's applicability to include light trucks (less than 10,000 lbs. gross vehicle weight rating or "GVWR"). Currently, Standard 118 applies to passenger cars and multipurpose passenger vehicles (MPVs) only. Some types of light trucks (e.g., pick-up trucks) are frequently used by their owners in the same way a passenger car or MPV is used, to transport passengers (including small children), even though the principal intended use of these light trucks may be for hauling cargo. While there are no data directly demonstrating that a closing power window has caused significant safety problems in light trucks, the agency believes that the same dangers from inadvertent or unsupervised closing of windows are present in those vehicles. NHTSA believes further that light trucks with power-operated window systems should offer protection equal to other vehicles commonly used for passenger transport.

The second proposed change is to amend the introductory portion of subparagraph S3 of Standard 118 to narrow its limitation on the circumstances under which a power window may be operable so that the limitation would apply only to *closing* a power window. Standard 118 currently limits the circumstances under which a power window may be "operable." Because that term includes any movement of the window, regardless of the direction of movement, the Standard governs both opening and closing a window. However, the agency has tentatively decided that the potential harm created by power windows is likely to occur only when a closing power window catches an occupant's head or other body part between the closing window and door frame. Opening a power window seems unlikely to cause adverse safety consequences.

The third proposed change contemplated is to paragraph S3(c), and involves either amending or eliminating this provision. NHTSA is considering whether to expand the circumstances under which a power window may be operable by replacing the term "key-locking system" in subparagraph S3(c) with the less restrictive term "locking system." The current narrower term discriminates between the traditional key-locking systems and newer locking systems, such as those which are keyless and permit a person to control entry and other aspects of vehicle operation through punching numeric or alpha numeric codes on a touchpad control. If there is no adverse safety impact, it may be appropriate to adopt the broader term in the interest of facilitating technological innovation.

The agency requests comment on whether adopting the term "locking system" would permit any locking systems that would be overly susceptible to misuse or inadvertent activation by children. The agency foresees no risk from any locking system whose design or mode of operation would likely necessitate an adult to be present when a power window is closed. On the other hand, there may be other systems which do not offer such protections.

In the alternative, the agency is considering whether to eliminate subparagraph S3(c) entirely. The effect of eliminating this provision would be that an exterior control could lower, but not raise, a power-operated window. NHTSA is raising this issue because of a small number of recent reports that children have been harmed by power windows that have been externally activated—either by a child inside the vehicle reaching outside, or by a person outside the vehicle. One of these reports concerned a fatal accident in which an unsupervised child reached out of a vehicle, activated a power-operated window, and strangled between the closing window and the door-frame. The agency seeks comment on this possible change.

The final proposed change is to expand Standard 118's purpose and scope to include power-operated sunroofs. NHTSA believes that operating a sunroof presents the same risk of injury as operating traditional windows and partitions, and that children again are the likely victims of unsupervised or inadvertent operation. An informal survey reveals that most (and perhaps all) power sunroofs currently comply with Standard 118. However, expressly including sunroofs in the Standard will minimize the risk of a manufacturer's installing a power-operated sunroof or similar device that does not provide protection for the technical reason that the device is neither a "window" or "partition." The agency would amend the title of Standard 118 to reflect this expansion.

Impacts

A. Costs and Benefits

NHTSA has determined that this rule is not a major rule under Executive Order 12291 nor a significant rule within the meaning of Department of Transportation regulatory policies and procedures. Therefore, neither a regulatory impact analysis nor a full regulatory evaluation is required. For passenger cars and multipurpose passenger vehicles, the proposed changes would enhance design flexibility and user convenience. For light trucks, NHTSA understands that all light trucks equipped with power-operated window systems currently meet existing 118 requirements, and that there would be no significant cost impact as a consequence of extending this Standard's applicability to cover light trucks.

B. Small Business Impact

NHTSA has considered the effects of this rulemaking action under the Regulatory Flexibility Act. Based upon the agency's evaluation, I certify that this proposed rule would not have a significant economic impact on a substantial number of small entities. The agency believes that few, if any, of the vehicle manufacturers would qualify as small entities. This amendment would affect small businesses, small organizations, and small governmental units only to the extent that these entities purchase motor vehicles. The preceding section reflects the agency's assessment that this amendment will have no significant cost impact to the industry, and therefore it will not result in significant increases in consumer prices.

C. Environmental Impact

As it is required to do under the National Environmental Policy Act of 1969, NHTSA has considered the environmental impact of this proposal, and determined that this rule would not have any significant impact on the quality of the human environment.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR Part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, NHTSA proposes to amend Title 49 CFR 571.118 as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

2. The title of § 571.118 would be revised to read as follows:

§ 571.118 Standard No. 118; Power-operated window and roof systems.

3. S1 would be revised to read as follows:

S1. *Purpose and scope.* This standard specifies requirements for power-operated window, partition, and roof systems to minimize the risk of death or injury from accidental operation.

4. S2 would be revised to read as follows:

S2. *Application.* This standard applies to passenger cars, multipurpose passenger vehicles, and trucks with a gross vehicle weight rating of 10,000 pounds or less.

5. S3 would be amended to read as follows:

S3. *Operating Requirements.* Power window, partition, or roof systems may be closed only in the following circumstances:

(a)

* * * * *

(c) Upon activation by a locking system on the exterior of the vehicle; or

* * * * *

Issued on: October 9, 1987.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 681

[Docket No. 70751-7217]

Western Pacific Crustacean Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: NOAA reopens the period for public comments on a proposed rule to implement Amendment 5 to the Fishery Management Plan for the Crustacean Fisheries of the Western Pacific Region (FMP). This rule was published on July 27, 1987, at 52 FR 28028. The amendment was adopted by the Western Pacific Regional Fishery Management Council (Council) at its 57th meeting in Honolulu, Hawaii on June 4–5, 1987. It was disapproved by the Secretary of Commerce on August 7, 1987, but was subsequently revised by the Council, adopted on July 29–30, 1987, and resubmitted on September 21, 1987.

Amendment 5 would implement a size limit for slipper lobster, require escape vent panels for all lobster traps, and change existing reporting requirements. The intent is to protect the spiny and slipper lobster resources of the Western Pacific. The amendment also changes the name of the existing FMP from the Spiny Lobster Fishery Management Plan of the Western Pacific Region to the Crustacean Fishery Management Plan of the Western Pacific Region. Also included in the document is an updated estimate of maximum sustainable yield of spiny lobster based upon knowledge gained from the fishery since 1983.

DATE: The public comment period on the proposed rule reopens October 13, 1987. Written comments will be received until November 2, 1987.

ADDRESS: Send comments to E. Charles Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, CA 90731. A copy of the resubmitted version of Amendment 5 may be received from the Regional Director.

FOR FURTHER INFORMATION CONTACT: Doyle E. Gates, Administrator, Western Pacific Program Office, 2570 Dole Street, Room 106, Honolulu, HI 96822-2396, 808-955-8831.

SUPPLEMENTARY INFORMATION: Amendment 5 was disapproved by the Secretary of Commerce because it lacked specifications for optimum yield (OY) and total allowable level of foreign fishing (TALFF). The resubmitted amendment contains specifications for OY and TALFF and a revised description of the habitat of slipper lobsters. The management measures in the resubmitted version of Amendment 5 are identical to those in the original amendment and original proposed rule. Therefore, the public is referred to the original proposed rule that was published on July 27, 1987 (52 FR 28028). A notice of availability of the resubmitted version of Amendment 5 was published on September 30, 1987 (52 FR 36598).

Classification

Section 304(b)(3)(B) (ii) and (iii) of the Magnuson Act, as amended by Pub. L. 99–659, requires that the Secretary publish a notice stating that a revised plan or amendment is available and comments should be submitted within 30 days and that the Secretary publish the proposed rules to implement the amendment. At this time, the Secretary has not determined that the FMP amendment that this rule would implement is consistent with the national standards, other provisions of the magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the data, views, and comments received during the comment period.

The relationship of the proposed rule to the National Environmental Policy Act, Executive Order 12291, the Regulatory Flexibility Act and the Paperwork Reduction Act was described when the proposed rule was published at 52 FR 28028.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Meeting of the Committee on Rulemaking

ACTION: Committee on Rulemaking; Notice of Public Meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of two meetings of the Committee on Rulemaking of the Administrative Conference of the United States. The committee has scheduled these meetings to develop a proposed recommendation of OSHA regulation, based upon a study conducted for the Conference by Professors Thomas O. McGarity and Sidney A. Shapiro. Copies of the consultants' report and a draft committee recommendation may be obtained from the contact person named in this notice.

DATE: Tuesday, November 3, 1987, at 9:30 a.m., Friday, November 13, 1987 at 9:30 a.m.

Location: Library of the Administrative Conference, 2120 L Street, NW., Suite 500, Washington, DC.

Public participation: The committee meetings are open to the interested public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days prior to the meetings. The committee chairman may permit members of the public to present oral statements at the meetings. Any member of the public may file a written statement with the committee before, during, or after the meetings. Minutes of the meetings will be available on request.

FOR FURTHER INFORMATION CONTACT: Michael W. Bowers, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC 20037. Telephone (202) 254–7065.

Dated: October 13, 1987.

Import Limitation; Country of Origin Quota Adjustment

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice of country of origin adjustment for certain lowfat chocolate crumb from Ireland.

SUMMARY: This notice adjusts the country of origin for the quota quantity of Lowfat Chocolate Crumb assigned to Ireland.

EFFECTIVE DATE: October 19, 1987.

FOR FURTHER INFORMATION CONTACT: Richard P. Warsack, Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, Room 6616 South Building, Department of Agriculture, Washington, DC 20250 or telephone at (202) 447–5270.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be "nonmajor" since it will not have any of the significant effects specified in those documents. Furthermore, to the extent, if any, that the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) apply to this notice, the Administrator, Foreign Agricultural Service, hereby certifies that this notice will not have a significant economic impact on a substantial number of small entities. The adjustment of the country of origin from which the quota item specified herein may be entered does not affect the ability of importers to import this quota item, but only expands the number of countries from which the item may be imported. Also, since this action is being taken in recognition of changes in the market which have already occurred, this action will not cause any new economic impact.

Notice

Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS) sets forth import limitations imposed on certain dairy products, including certain Lowfat Chocolate Crumb. Headnote 3(a)(iii) of Part 3 of the Appendix allows for reallocating the quota amount of a dairy article listed in that Appendix among the countries of origin specified for a given article if it is determined that the quota amount assigned to a particular country is not likely to be entered from that country within a given calendar year. I hereby determine that it is not likely that the amount of Lowfat Chocolate Crumb specified in TSUS Item 950.16 for Ireland will be entered from that country during calendar year 1987.

Notice is hereby given that 3,000,000 pounds of the 1987 quota quantity of Lowfat Chocolate Crumb specified in TSUS Item 950.16 for Ireland may be imported from the United Kingdom, New Zealand, and Ireland for the remainder of the 1987 quota year.

This quota quantity for TSUS Item 950.16 will revert to the original supplying country on January 1, 1988

Issued at Washington, DC, this 5th day of October 1987.

Leo V. Mayer,

Acting Administrator.

Forest Service

Mt. Graham Astrophysical Proposal; Revised Release of Environmental Impact Statement; Coronado National Forest

As announced on July 16, 1985 and later amended on May 30, 1986, the Department of Agriculture, Forest Service is preparing an environmental impact statement for a proposal astrophysical area on the Safford Ranger District, Coronado National Forest, Graham County, Arizona.

The draft environmental impact statement was released for public comment in October 1986. The public comment period ended on January 20, 1987. More time is needed to incorporate additional information into the environmental analysis process. The revised schedule for releasing the final environmental impact statement is August 1, 1988.

A range of alternatives for future management of this area is being

considered. Several alternatives include no astrophysical development as required by the Agency and also suggested by the public. Other alternatives include different levels of astrophysical development and different locations for support facilities.

Sotero Muniz, Regional Forester of the Southwest Region in Albuquerque, New Mexico is the responsible official.

Questions concerning the analysis and schedule should be addressed to Robert Tippeconnic, Forest Supervisor, Coronado National Forest, 300 W. Congress, Tucson, Arizona 85701; telephone 602–629–6483.

Dated: October 2, 1987.

Sotero Muniz,

Regional Forester.

[P & S Docket No. D–88–2]

Packers and Stockyards Administration

Complaint and Notice of Inquiry; St. Joseph Stockyards

Before the Secretary of Agriculture; In reference to Market Agencies at St. Joseph Stock Yards; St. Joseph Stock Yards, et al. vs. Emmet M. Connolley, d/b/a/ St. Joseph Livestock Commission Company.

Notice is hereby given that on October 7, 1987, the Packers and Stockyards Administration, United States Department of Agriculture, filed a "Complaint and Notice of Inquiry", the contents of which are as follows:

This proceeding is instituted pursuant to the provisions of Title III of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), hereinafter referred to as "the Act."

I

(a) Complainant St. Joseph Stock Yards, hereinafter referred to as "the stockyard," is a division of United Stockyards Corporation, which corporation is now, and at all times material herein was, engaged in the business of providing stockyard services at various locations, including St. Joseph, Missouri 64505. The stockyard is a posted stockyard subject to the provisions of the Act.

(b) The remaining named complaints, hereinafter referred to as "the commission firm complaints," and respondent are now, and at all times material herein were:

(1) Engaged in the business of selling livestock on a commission basis at the stockyard, and

(2) Registered with the Secretary of Agriculture as market agencies to sell livestock on a commission basis at the stockyard.

II

In accordance with the requirements of the Act, the commission firm complaints and respondent have heretofore filed and presently have in effect a joint schedule of rates and charges for their services at the stockyard. Pursuant to the schedule of rates and charges presently in effect, charges for their market agency services have been and are uniform.

III

On August 11, 1987, respondent filed with the Secretary an amendment to the schedule referred to in paragraph II above entitled, "Tariff II, Item II of the Tariff Number 27," hereinafter referred to as the "amendment." Such amendment, with a stated effective date of August 26, 1987, contains rates and charges different from the schedule of rates and charges presently being assessed by the commission firm complaints and respondent at the stockyard.

IV

On August 17, 1987, the stockyard and the commission firm complaints each filed a written complaint with the Secretary urging the Secretary to reject respondent's amendment because, *inter alia*, it contravenes the long standing practice of market agencies at the stockyard to charge for their services according to a uniform tariff, it establishes charges lower than the cost of providing selling services, and it would disrupt the orderly and efficient solicitation and marketing of livestock at the stockyard.

V

Accordingly, there is reason to believe that certain rates and charges in respondent's amendment are unjust and unreasonable within the meaning of section 305 of the Act (U.S.C. 206). Further, there is reason to believe that rates and charges for market agency services at the stockyard should be assessed according to a uniform tariff, and that non-uniform rates and charges would be unjust and unreasonable in violation of sections 305 and 307 of the Act (7 U.S.C. 206, 208).

VI

On August 25, 1987, pending further inquiry into this matter, the Acting Administrator of the Packers and Stockyards Administration, pursuant to section 306 of the Act (7 U.S.C. 207), suspend and deferred the operation and application of respondent's amendment for a period of thirty (30) days from its stated effective date. The operation and application of the amendment was suspended and deferred an additional thirty (30) days by the Acting Administrator on September 24, 1987, as authorized by section 306 of the Act.

VII

It is concluded, therefore, that a proceeding under Title III of the Act should be instituted for the purpose of inquiring into the reasonableness and lawfulness of the rates and charges set forth in respondent's amendment, and for the purpose of determining the rates and charges to be assessed by all market agencies operating at the stockyard.

It is Therefore Ordered that notice to complainants and respondent shall be and is hereby given that a hearing concerning the matters set forth herein will be held before an administrative law judge of the Department at a time and place to be specified at a later date, of which complaints and respondent will receive adequate notice. At such hearing complaints and respondent and all other interested persons will have a right to appear and present such evidence with respect to this matter as may be relevant and material.

It is Further Ordered that any and all interested persons who may wish to appear and present evidence relative to the issues in this proceeding shall give notice thereof by filing a statement to that effect with the Hearing Clerk, United States Department of Agriculture, Washington, DC 20250–1400 within 20 days from the date of the publication hereof in the **Federal Register**.

It is Further Ordered that copies hereof shall be served upon complainants and respondent.

Thomas C. Heinz, Attorney for Packers and Stockyards, Administration, (202) 447–2869.

Done at Washington, DC this 13th day of October, 1987.

Calvin W. Watkins,

Acting Administrator, Packers and Stockyards Administration.

Soil Conservation Service

Environmental Statement on Fall Creek Watershed, KY; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

VOL 52 ISS 200 OCT 16 1987 UMI

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1959; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Fall Creek Watershed, Wayne County, Kentucky.

FOR FURTHER INFORMATION CONTACT: T. Allan Heard, Assistant State Conservationist, Soil Conservation Service, 333 Waller Avenue, Lexington, KY 40504, telephone: 606–233–2747.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Randall W. Giessler, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for watershed protection. The planned action is to install conservation practices on approximately 5,200 acres of excessively eroding cropland that will remain in cultivation and 250 acres of excessively eroding cropland that will be converted to permanent vegetative cover. This planned action will reduce upland erosion and downstream sedimentation and pollution.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies, and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Date: October 7, 1987.

Randall W. Giessler,

State Conservationist.

Nebraska Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given; pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Nebraska Advisory Committee to the Commission will convene at 9:00 a.m. and adjourn at 5:00 p.m., on November 16, 1987, at the Ramada Inn-Airport, 2002 East Locust Street, Omaha, Nebraska. The purpose of the meeting is to provide additional orientation for new SAC members and to develop program activities for FY 1988. It will review information collected during an earlier meeting in Scottsbluff for transmittal to Headquarters. The Committee will also hear presentations on the status of civil rights in Omaha from representatives of the City of Omaha, the American Indian Center of Omaha, the Chicago Awareness Center, the Urban League and the Jewish community.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Richard F. Duncan, or Melvin Jenkins, Director of the Central Regional Division (816) 374–5253, (TDD 816/374–5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, October 9, 1987.

DEPARTMENT OF COMMERCE

International Trade Administration

[Docket No. 7105–01]

Actions Affecting Export Privileges; Robert Almori

Summary

Pursuant to the Default Decision and Order of the Administrative Law Judge, which Order is modified by me, Robert Almori, with an address at 80–82 Rue Saint Dominique, Paris 7, France, is denied all export privileges for an indefinite period from the date of this order.

Order

On September 8, 1987, the Administrative Law Judge (ALJ) entered a Default Decision and Order in the above referenced matter. The Default Decision and Order was referred to me pursuant to the Export Administration Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

I hereby modify Paragraph II of the ALJ's Order by deleting that paragraph and inserting in lieu thereof the following:

"II. All outstanding individual validated export licenses in which Almori appears or partsicipates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Almori's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked."

I hereby modify Paragraph V of the ALJ's Order by inserting after the words "specific authorization" the following: ". . . from the Office of Export Licensing . . . ."

Having examined the record and based on the facts adduced in this case, I affirm the Default Decision and Order of the ALJ as thus modified.

This constitutes final agency action in this matter.

Date: October 8, 1987.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

United States Department of Commerce, Office of Administrative Law Judge, Suite 6716, Washington, DC 20230

In the matter of: Robert Almori, Respondent; Docket No. 7105–01.

Appearance for respondent: Robert Almori, 80–82 Rue Saint Dominique, Paris 7, France.

Appearance for agency: Thomas C. Barbour, Esq., Attorney-Advisor, U.S. Department of Commerce, Room H–3845, Washington, DC 20230.

Default Decision and Order

On January 20, 1987, the Acting Director, Office of Export Enforcement, International Trade Administration, United States Department of Commerce (the Agency), issued a Charging Letter alleging that Robert Almori (Respondent) had violated §§ 387.3, 387.4, 387.5 and 387.6 of the Export Adminstration Regulations (15 CFR Parts 368–399) (the Regulations). The Agency established that service of the charging letter was made on the Respondent on January 29, 1987. Respondent failed to submit any answer.

Section 388.8 of the Regulations provides:

Default

(a) General

If a timely answer is not filed, the Department shall file with the administrative law judge a proposed order together with supporting evidence for the allegations in the charging letter. The administrative law judge may require further submissions and shall issue any order he deems justified by the evidence of record. Any order so issued shall have the same force and effect as an order issued following the disposition of contested charges.

In accordance with this section, Agency counsel filed such a motion for a default order on July 22, 1987. The Agency also submitted documentary evidence to support the allegations made in the charging letter. On July 30, 1987, the undersigned Administrative Law Judge issued an Order to Show Cause why the Respondent should not be held in default. The Respondent has failed to file an answer to the charges alleged or a response to the Order issued.

Facts

From a period beginning on or about June 2, 1980 to on or about April 23, 1982, Almori conspired and acted in concert with Michel d'Ormigny, Jean-Jaques Gayant, Marcel Goldfarb, Jean-Michel Didat and others to bring about acts that constituted violations of the Act and the Regulations.[1] The purpose of the conspiracy was to acquire U.S.-origin goods in the United States for export to ultimate proscribed destinations. This was accomplished by representing that France was the intended country of ultimate destination, while in fact, the conspirators intended to, and on at least one occasion did in fact, reexport the goods from France to proscribed destinations without reexport authorization from the Agency.

The conspiracy to fraudulently obtain U.S.-origin goods for ultimate destination in proscribed destinations was directed by Almori. Specifically, Almori established a firm called Hedera (sometimes referred to as "Hedera Establishment"), in Vaduz, Lichtenstein, to sell those goods to customers in the Union of Soviet Socialist Republics (U.S.S.R.) and Czechoslovakia. Almori, in order to implement this scheme, directed Didat, of the firm Cotricom,[2] to obtain a fictitious customer of good standing reputation in France. Didat contacted one of his connections, Goldfarb, who provided Didat with a copy of a blank order form from the genuine French company C.G.E.E. Alsthom. The Respondents then proceeded to pose as representatives of this reputable French company, knowing that C.G.E.E. Alsthom had no interest in any of their transactions.

Duplicates of this blank order form were also used by the Respondents to obtain International Import Certificates (IC's) from the French government. In turn these IC's were presented by Respondents to U.S. exporters to support applications seeking authorization from the Agency to export U.S.-origin equipment to C.G.E.E. Alsthom.[3] These documents were necessary to conceal from the Agency the true destination of these U.S.-origin goods. Each of the applications made to the French government were for an IC and included a representation that C.G.E.E. Alsthom was importing U.S.-origin goods into France. Each was signed "LEFEBVRE" and included the following notation: "For this matter dial number 355–0346 Mr. LEFEBVRE." In fact, as established in a French court proceeding, "LEFEBVRE" was an alias adopted by Goldfarb and the telephone number was for a commercial enterprise

[1] Michel d'Ormigny died in 1985. Thus, he is no longer a Respondent in these administrative proceedings. In addition, after further review of the evidence respecting Mr. Gayant's alleged involvement in the conspiracy, the Agency chose not to pursue any charges against him.

[2] Cotricom was a French forwarding firm who was the usual freight forwarder for Hedera.

[3] In applying for an export license seeking authorization to export from the United States to France any U.S.-origin commodity identified by the code letter A following the Export Control Commodity Number (ECCN) for that commodity, the applicant must include with his license application an IC issued by the French Government. *See* 15 CFR 375.3.

directed by Goldfarb.[4] In fact, as established by the French court proceeding, the address provided on the application for the firm C.G.E.E. Alsthom as the place of delivery for the goods, 13 Parc du Biches, 91000 Evry-France, was not even a C.G.E.E. Alsthom facility.

On June 2, 1980, an order (SA/SCED–80–1234) was placed with the French subsidiary of a U.S. company for a memory test system (Govt. Exh. 2). That purchase order directed that all letters concerning that order were to be sent to "Monsieur Gerard LEFEBVRE" at the "fictitious" C.G.E.E. Alsthom facility (Govt. Exh. 1). On or about January 9, 1981, the U.S. exporter of the memory test system, unaware that the information provided to him by Didat was false, submitted to the Agency validated export license application A531976 [5], identifying C.G.E.E. Alsthom as the ultimate consignee of the memory test system.[6]

Based on the information provided in export application A531976, the Agency issued a validated export license authorizing the export of the U.S.-origin memory test system to C.G.E.E. Alsthom (Govt. Exh. 5). The validated export license required that a delivery verification certificate be returned to the Agency in connection with the export of this equipment.[7] The U.S.-origin memory test system was exported from the United States to France on or about January 22, 1981 (Govt. Exh. 6, 7). On May 12, 1981, the U.S. exporter submitted to the Agency a copy of the IC covering the export of the memory test system to C.G.E.E. Alsthom, stating that it had been unable to obtain a delivery verification certificate with respect to the shipment (Govt. Exh. 8). C.G.E.E. Alsthom, in fact, never ordered the memory test system. (Govt. Exh. 9).

On or about August 10, 1981, following the refusal of the U.S. manufacturer involved in the shipment of the memory test system to fill additional orders because of the failure to obtain delivery verification certificates, Almori orchestrated the attempt by Didat to obtain through d'Ormigny's company, Technica Ltd. (Technica), a U.S.-origin pattern generator and a photorepeater in the United States for export to France without the validated export licenses required by § 372.1(b) of the Regulations. Almori, through his company, Hedera, ordered these U.S.-origin commodities from Technica (Govt. Exh. 11, 12).[8] D'Ormigny notified the U.S. company from whom he was purchasing the goods that the goods would have to be released "exclusively" to Technica's freight forwarder. On November 27, 1981, Technica's freight forwarder took possession of the goods (Govt. Exh. 13, 14).

A Shipper's Export Declaration (SED) was filed with the U.S. Customs Service stating that the goods were subject to general license G–DEST and that they were being shipped for ultimate consignment to Didat's firm, Cotricom. Acting in accordance with instructions received from Didat and d'Ormigny, on or about December 8, 1981, the U.S. freight forwarder attempted to export the pattern generator and photorepeater from the United States to Didat's company, Cotricom, in France without the required validated export license (Govt. Exh. 17, 18, 19, 20). On December 8, 1981, the U.S.-origin equipment was seized in New York and subsequently forfeited to the United States. (Govt. Exh. 21, 22, 23).

Following the December, 1981 seizure, Almori and Didat attempted, through a new U.S. exporter, to procure additional U.S.-origin equipment, using the fradulently obtained C.G.E.E. Alshtom purchase orders in an attempt to give the transaction an appearance of bona fides. On or about January 4, 1982 and January 19, 1982, based on information provided by Didat, a U.S. exporter submitted two separate export license applications to the Agency (Govt. Exh. 24). [9] Both export license applications stated that C.G.E.E. Alsthom was the intended ultimate consignee of the U.S.-origin equipment identified. Each application was accompanied by International Import Certificates from France, which had been provided to the U.S. exporter by Didat, supporting the representation that the goods were being purchased by C.G.E.E. Alsthom.

On January 19, 1982, the U.S. exporter and Didat met with Agency officials to discuss these applications (Govt. Exh. 26). During that interview, Didat stated that he was an agent for C.G.E.E. Alsthom, and that C.G.E.E. Alsthom had ordered the U.S.-origin goods for its own use. Thus, Didat made false and misleading statements of material fact to the Agency in connection with these transactions. Becasue of the questions raised after the December seizure, neither application was approved.

At the same time Didat was making these statements to the Agency in the United States, Almori and Goldfarb were making false and misleading statements of matertial fact to U.S. Embassy officials in Paris. In the course of an official United States Government investigation conducted in connection with the goods seized, on or about December 22, 1981, Almori made false and miselading statements of material fact to an official of the United States Embassy in Paris by stating that the goods had been purchased for C.G.E.E. Alsthom, when Almori knew that C.G.E.E. Alsthom had no interest in the transaction.

Further, on December 23, 1981,[10] "LEFEBVRE" contacted U.S. Embassy officials to discuss C.G.E.E. Alsthom's purchase of the pattern generator and photorepeater (Govt. Exh. 28).[11] Lefebvre also contacted the Embassy on February 5, April 2, and April 6, 1982 (Govt. Exh. 31). During these contacts, Lefebvre represented that he was acting on behalf of C.G.E.E. Alsthom.[12]

The Agency alleges that the Respondents, acting in accordance with the scheme devised by Almori, conspired to acquire U.S.-origin goods on the representation that a reputable end-user in France was the intended ultimate recipient of such equipment. In fact, the evidence supports the finding that the Respondents intended to, and on at least one occasion did in fact, reexport the goods from France to a proscribed destination without obtaining

---

[4] While not addressing the same allegations, a French court proceeding established facts against these Respondents linked to the charges made by the Agency in the January 20, 1987 charging letters. These included the forging of trade records and improper procurement of administrative documents (Govt. Exh. 1).

[5] The charging letter of January 20, 1987, erroneously identified this number as A531926.

[6] Since the memory test system was classified under ECCN 1355A (Govt. Exh. 4), an IC was required to be submitted with the license application. However, the U.S. exporter requested a waiver of this requirement until the IC was received at its facility. The Agency granted this requested waiver and issued the validated export license prior to receipt of the IC. The IC was submitted to the Agency on May 12, 1981 (Govt. Exh. 8).

[7] A delivery verification certificate may be requested by the government of the exporting country. If it is requested for a particular export, the verification is issued by the government of the country of ultimate destination after the export has taken place and the commodities have either entered the export jurisdiction of the recipient country or are otherwise accounted for by the importer to the issuing government. 15 CFR 375.3(a)(2).

[8] Although the purchase order form from d'Ormigny to GCA Corporation indicates that d'Ormigny intended to install the equipment in Pittsburgh, Pennsylvania, the other documentary evidence relating to this transaction reveals that statement on the purchase order to be false. (Govt. Exh. 11, 12, 13–20)

[9] These applications were date stamped by the Agency as January 12, 1982 and January 20, 1982, respectively.

[10] The charging letter issued to Repondent Godfarb incorrectly states December 13, 1981.

[11] Gov. Exh. 28 contains a typographical error, reporting the date as February 3, 1983 instead of 1982.

[12] In his Janaury 6, 1982 contact with the Embassy, Lefebvre cautioned the officials to contact him only at his personal number because knowledge of the transaction was restricted to only a few senior officials at C.G.E.E. Alsthom (Govt. Exh. 28).

the required reexport authorization from the Agency.

The facts are not therefore in dispute and Respondent is not entitled to a fact-finding hearing under such circumstances (*Spawr Optical Research, Inc. v. Baldrige*, Civ. No. 86–0880, D.D.C. Dec. 16, 1986; *In the Matter of Spawr*, 51 FR 7477–7479, 7481 (1986). Cf. also, Order in Gregg (52 FR 13279 (1987), where in an Agency subaltern denied that individual and a related person export previleges for 10 years without notice or opportunity to comment or be heard, under the Export Administration Act for a violation of the Arms Export Control Act. A procedure proposed to be made applicable to convictions for violations of the Export Administration Act as well, under present congressional consideration).

Based on the foregoing, I find that the Respondents violated the Regulations, as alleged in the charging letter of January 20, 1987. Each of these violations involving U.S.-origin goods controlled under section 5 of the Act for national security reasons. I find that an Order denying export privileges to the Respondent for an idefinite period from the date a final order is entered in this proceeding in reasonably necessary to protect the public interest and to achieve effective enforcement of the Export Administrion Act, and the Regulations.

Accordingly, pursuant to the authority delegated to me by Part 388 of the Regulations, it is therefore:

Ordered

I. For an indefinite period from the date this Order becomes final, Respondent: Robert Almori, 80–82 Rue Saint Dominique, Paris 7, France, all successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. All outstanding validated export licenses in which Respondent or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation.

III. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include but not be limited to participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data that are subjet to the Act and the Regulations.

IV. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

V. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transhipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to or for respondent or related party denied export privileges, or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

VI. By Order of April 5, 1983 (48 FR 15935, April 13, 1983), Robert Almori and others were temporarily denied all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data. The temporary denial order was to remain in effect until the final disposition of any administrative or judical proceedings initiated as a result of the then on-going investigation. Upon approval, this order will constitute such final disposition of the administrative proceeding initiated by the Agency as a result of its investigation relating to the matters which gave rise to the temporary denial order. The Temporary Denial Order of April 5, 1983 (48 FR 15935, April 13, 1983) will thereby be superceded and revoked. Review of the record relating to the Respondents originally named in that Order reflect that all have now been addressed, except for Michel d'Ormigny, a related party. As stated in footnote 1 on page three, Mr. d'Ormigny has since died. Therefore there is no basis for his name to continue to be listed on the table. The following entries will be deleted from the said table: Almori, Robert, a/k/a Mathurin Almori, and Bernard Almori, 75008 Paris, France, Technica Ltd. Technica, S.A., and d'Ormigny, Michel Daniel, 22202 North 84th Place, Scottsdale, Arizona.

From the effective date of this Order it alone will be the basis for any entry on the Table of Denied Orders until modified (15 CFR Part 388 (Supp. No. 1 1987)).

VII. This Order as affirmed or modified, shall become effective upon entry of the Secretary's final action in the proceeding pursuant to this Act (50 U.S.C. app. 2412(c)(1)).

Dated: September 8, 1987.

Hugh J. Dolan,

Administrative Law Judge.

[FR Doc. 87–23975 Filed 10–15–87; 8:45 am]

BILLING CODE 3510–DT–M

[Docket Nos. 7105–03 and 7105–04]

Actions Affecting Export Privileges; Jean-Michel Didat, Individually and Doing Business as Cotricom S.A.

Summary

Pursuant to the Default Decision and Order of the Administrative Law Judge, which Order is modified by me, Jean-Michel Didat, individually and doing business as Cotricom S.A., both with addresses at 4 Alles des Mesanges, Yerres, France, is denied all export privileges for an indefinite period from the date of this Order.

Order

On September 8, 1987, the Administrative Law Judge (ALJ) entered a Default Decision and Order in the above referenced matter. The Default Decision and Order was referred to me pursuant to the Export Administration Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

I hereby modify Paragraph II of the ALJ's Order by deleting that paragraph and inserting in lieu thereof the following:

"II. All outstanding individual validated export licenses in which Didat or Cotricom S.A. appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Didat's and Cotricom's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked."

I hereby modify Paragraph V if the ALJ's Order by inserting after the words "specific authorization" the following: ". . . from the Office of Export Licensing . . ."

Having examined the record and based on the facts adduced in this case, I affirm the Default Decision and Order of the ALJ as thus modified.

This constitutes final agency action in this matter.

Date: October 8, 1987.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

United States Department of Commerce, Office of Administrative Law Judge, Suite 6716, Washington, DC 20230

In the matter of: Jean-Michel Didat, Cotricom S.A., Respondent; Docket Nos. 7105–03 and 7105–04.

Appearance for respondents: Jean-Michel Didat, 4 Alles des Mesanges, Yerres, France, and Cotricom S.A., 4 Alles des Mesanges, Yerres, France.

Appearance for agency: Thomas C. Barbour, Esq., Attorney-Advisor, U.S. Department of Commerce, Room H–3845, Washington, DC 20230.

Default Decision and Order

On January 20, 1987, the Acting Director, Office of Export Enforcement, International Trade Administration, United States Department of Commerce (the Agency), issued a Charging Letter alleging that Jean-Michel Didat, individually and doing business as Cotricom S.A., (Respondent), had violated Sections 387.3, 387.4, 387.5 and 387.6 of the Export Administration Regulations (15 C.F.R. Parts 368–399) (the Regulations). The Agency established that service of the charging letter was made on the Respondent on January 29, 1987. Respondent failed to submit any answer.

Section 388.8 of the Regulations provides:

Default

(a) General

If a timely answer is not filed, the Department shall file with the administrative law judge a proposed order together with supporting evidence for the allegations in the charging letter. The administrative law judge may require further submissions and shall issue any order he deems justified by the evidence of record. Any order so issued shall have the same force and effect as an order issued following the disposition of contested charges.

In accordance with this section, Agency counsel filed such a motion for a default order, supported by documentary evidence, on July 22, 1987. On July 30, 1987, the undersigned Administrative Law Judge issued an Order to Show Cause why the Respondent should not be held in default. Respondent has failed to file an answer to the charges alleged or response to the Order issued.

Facts

From a period beginning on or about June 2, 1980 to on or about April 22, 1982, Didat conspired and acted in concert with Robert Almori, Michel d'Ormigny, Jean-Jaques Gayant, Marcel Goldfarb and others to bring about acts that constituted violations of the Act and the Regulations.[1] The purpose of the conspiracy was to acquire U.S.-origin goods in the United States for export to ultimate proscribed destinations. This was accomplished by representing that France was the intended country of ultimate destination, while in fact, the conspirators intended to, and on at least one occasion did in fact, reexport the goods from France to proscribed destinations without reexport authorization from the Agency.

The conspiracy to fraudulently obtain U.S.-origin goods for ultimate destination in proscribed destinations was directed by Almori. Specifically, Almori established a firm called Hedera (sometimes referred to as "Hedera Establishment"), in Vaduz, Lichtenstein, to sell those goods to customers in the Union of Soviet Socialist Republics (U.S.S.R.) and Czechoslovakia. Almori, in order to implement this scheme, directed Didat, of the firm Cotricom,[2] to obtain a fictitious customer of good standing reputation in France. Didat contacted one of his connections, Goldfarb, who provided Didat with a copy of a blank order form from the genuine French company C.G.E.E. Alsthom. The Respondents then proceeded to pose as representatives of this reputable French company, knowing that C.G.E.E. Alsthom had no interest in any of their transactions.

Duplicates of this blank order form were also used by the Respondents to obtain International Import Certificates (IC's) from the French government. In turn these IC's were presented by Respondents to U.S. exporters to support applications seeking authorization from the Agency to export U.S.-origin equipment to C.G.E.E. Alsthom.[3] These documents were necessary to conceal from the Agency the true destination of these U.S.-origin goods. Each of the applications made to the French government were for an IC and included a representation that C.G.E.E. Alsthom was importing U.S.-origin goods into France. Each was signed "LEFEBVRE" and included the follwing notation: "for this matter dial number 355–0346 Mr. LEFEBVRE." In fact, as established in a French court proceeding, "LEFEBVRE" was an alias adopted by Godlfarb and the telephone number was for a commercial enterprise directed by Goodfarb.[4] In fact, as established by the French court proceeding, the address provided on the application for the firm C.G.E.E. Alsthom as the place of delivery for the goods, 13 Parc du Biches, 91000 Evry-France, was not even a C.G.E.E. Alsthom facility.

On June 2, 1980, an order (SA/SCED–80–1234) was placed with the French subsidiary of a U.S. company for a memory test system (Govt. Exh. 2). That purchase order directed that all letters concerning that order were to be sent to

[1] Michel d'Ormigny died in 1985. Thus, he is no longer a Respondent in these administrative proceedings. In addition, after further review of the evidence respecting Mr. Gayant's alleged involvement in the conspiracy, the Agency chose not to pursue any charges against him.

[2] Cotricom was a French forwarding firm who was the usual freight forwarder for Hedera.

[3] In applying for an export license seeking authorization to export from the United States to France any U.S.-origin commodity identified by the code letter A following the Export Control Commodity Number (ECCN) for that commodity, the applicant must include with his license application an IC issued by the French Government. *See* 15 CFR 375.3.

[4] While not addressing the same allegations, a French court proceeding established facts against these Respondents linked to the charges made by the Agency in the January 20, 1987 charging letters. These included the forging of trade records and improper procurement of administrative documents (Govt. Exh. 1).

"Monsieur Gerard LEFEBVRE" at the "fictitious" C.G.E.E. Alsthom Facility (Govt. Exh. 1). On or about January 9, 1981, the U.S. exporter of the memory test system, unaware that the information provided to him by Didat was false, submitted to the Agency validated export license application A531976,[5] identifying C.G.E.E. Alsthom as the ultimate consignee of the memory test system.[6]

Based on the information provided in export application A531976, the Agency issued a validated export license authorizing the export of the U.S.-origin memory test system to C.G.E.E. Alsthom (Govt. Exh. 5). The validated export license required that a delivery verification certificate be returned to the Agency in connection with the export of this equipment.[7] The U.S.-origin memory test system was exported from the United States to France on or about January 22, 1981 (Govt. Exh. 6, 7). On May 12, 1981, the U.S. exporter submitted to the Agency a copy of the IC covering the export of the memory test system to C.G.E.E. Alsthom, stating that it had been unable to obtain a delivery verification certificate with respect to the shipment (Govt. Exh. 8). C.G.E.E. Alsthom, in fact, never ordered the memory test system. (Govt. Exh. 9).

On or about August 10, 1981, following the refusal of the U.S. manufacturing involved in the shipment of the memory test system to fill additional order because of the failure to obtain delivery verification certificates, Almori orchestrated the attempt by Didat to obtain through d'Ormigny's company, Technica Ltd. (Technica), a U.S.-origin pattern generator and a photorepeater in the United States for export to France without the validated export licenses required by § 372.1(b) of the Regulations. Almori, through his company, Hedera, ordered these U.S.-origin commodities from Technica (Govt. Exh. 11, 12).[8] D'Ormigny notified the U.S.company from whom he was purchasing the goods that the goods would have to be released "exclusively" to Technica's freight forwarder. On November 27, 1981, Technica's freight forwarder took possession of the goods (Govt. Exh. 13, 14).

A Shipper's Export Declaration (SED) was filed with the U.S. Customs Service stating that the goods were subject to general license G-DEST and that they ere being shipped for ultimate consignment to Didat's firm, Cotricom. Acting in accordance with instructions received from Didat and d'Ormigny, on or about December 8, 1981, the U.S. freight forwarder attempted to export the pattern generator and photorepeater from the United States to Didat's company, Cotricom, in France without the required validated export license (Govt. Exh. 17, 18, 19, 20). On December 8, 1981, the U.S.-origin equipment was seized in New York and subsequently forfeited to the United States. (Govt. Exh. 21, 22, 23).

Following the December, 1981 seizure, Almori and Didat attempted, through a new U.S. exporter, to procure additional U.S.-origin equipment, using the fraudulently obtained C.G.E.E. Alsthom purchase orders in an attempt to give the transactions an appearance of *bona fides*. On on about January 4, 1982 and January 19, 1982, based on information provided by Didat, a U.S. exporter submitted two separate export license applications to the Agency (Govt. Exh. 24).[9] Both export license applications stated that C.G.E.E. Alsthom was the intended ultimate consignee of the U.S. origin equipment identified. Each application was accompanied by IC's from France, which had been provided to the U.S. exporter by Didat, supporting the representation that the goods were being purchased by C.G.E.E. Alsthom.

On January 19, 1982, the U.S. exporter and Didat met with Agency officials to discuss these applications (Govt. Exh. 26). During that interview, Didat stated that he was an agent for C.G.E.E. Alsthom, and that C.G.E.E. Alsthom had ordered the U.S.-origin goods for its own use. Thus, Didat made false and misleading statements of material fact to the Agency in connection with these transactions. Because of the questions raised after the December seizure, neither application was approved.

At the same time Didat was making these statements to the Agency in the United States, Almori and Goldfarb were making false and misleading statements of material fact to U.S. Embassy officials in Paris. In the course of an official United States Government investigation conducted in connection with the goods sized, on or about December 22, 1981, Almori made false and misleading statements of material fact to an official of the United States Embassy in Paris by stating that the goods had been purchased for C.G.E.E. Alsthom, when Almori knew that C.G.E.E. Alsthom had no interest in the transaction.

Further, on December 23, 1981,[10] "LEFEBVRE" contacted U.S. Embassy officials to discuss C.G.E.E. Alsthom's purchase of the pattern generator and photorepeater (Govt. Exh. 28).[11] Lefebvre also contacted the Embassy on February 5, April 2, and April 6, 1982 (Govt. Exh. 31). During these contacts, Lefebvre represented that he was acting on behalf of C.G.E.E. Alsthom.[12]

The Agency Alleges that the Respondents, acting in accordance with the scheme devised by Almori, conspired to acquire U.S.-origin goods on the representation that a reputable end-user in France was the intended ultimate recipient of such equipment. In fact, the evidence supports the finding that the Respondents intended to, and on at least one occasion did in fact, reexport the goods from France to a proscribed destination without obtaining the required reexport authorization from the Agency.

The facts are not therefore in dispute and Respondent is not entitled to a fact-finding hearing under such circumstances (*Spawr Optical Research, Inc. v. Baldrige*, Civ. No. 86–0880, D.D.C. Dec. 16, 1986; *In the Matter of Spawr*, 51 Fed. Reg. 7477–7479, 7481 (1986). Cf. also, Order in Gregg (52 Fed. Reg. 13279 (1987), wherein an Agency subaltern denied that individual and a related person export privileges for 10 years without notice or opportunity to comment or be heard, under the Export Administration Act for a violation of the Arms Export Control Act. A procedure

[5] The charging letter of January 20, 1987, erroneously identified this number as A531926.

[6] Since the memory test system was classified under ECCN 1355A (Govt. Exh. 4), an IC was required to be submitted with the license application. However, the U.S. exporter requested a waiver of this requirement until the IC was received at its facility. The Agency granted this requested waiver and issued the validated export license prior to receipt of the IC. The IC was submitted to the Agency on May 12, 1981 (Govt. Exh. 8).

[7] A delivery verification certificate may be requested by the government of the exporting country. If it is requested for a particular export, the verification is issued by the government of the country of ultimate destination after the export has taken place and the commodities have either entered the export jurisdiction of the recipient country or are otherwise accounted for the importer to the issuing government. 15 CFR 375.3(a)(2)

[8] Although the purchase order form from d'Ormigny to GCA Corporation indicates that d'Ormigny intended to install the equipment in Pittsburgh, Pennsylvania, the other documentary evidence relating to this transaction reveals that statement on the purchase order to be false. (Govt. Exh. 11, 12, 13–20)

[9] These applications were date stamped by the Agency as January 12, 1982 and January 20, 1982, respectively.

[10] The charging letter issued to Respondent Goldfarb incorrectly states December 13, 1981.

[11] Gov. Exh. 28 contains a typographical error, reporting the date as February 3, 1983 instead of 1982.

[12] In his January 6, 1982 contact with the Embassy, Lefebvre cautioned the officials to contact him only at his personal number because knowledge of the transactions was restricted to only a few senior officials at C.G.E.E. Alsthom (Govt. Exh. 28).

proposed to be made applicable to convictions for violations of the Export Administration Act as well, under present congressional consideration).

Based on the foregoing, I find that the Respondents violated the Regulations as alleged in the charging letter of January 20, 1987. Each of these violations involving U.S.-origin goods controlled under section 5 of the Act for national security reasons. I find that an Order denying export privileges to the Respondent for an indefinite period from the date a final order is entered in this proceeding is reasonably necessary to protect the public interest and to achieve effective enforcement of the Export Administration Act and the Regulations.

Accordingly, pursuant to the authority delegated to me by Part 388 of the Regulations, it is therefore:

Ordered

I. For an indefinite period from the date this Order becomes final, Respondent: Jean-Michel Didat, 4 Alles des Mesanges, Yerres, France, and Cotricom S.A., 4 Alles des Mesanges, Yerres, France, all successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. All outstanding validated export licenses in which Respondent or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation.

III. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include but not be limited to participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data that are subject to the Act and the Regulations.

IV. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

V. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transhipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to or for respondent or related party denied export privileges, or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

VI. By Order of April 5, 1983 (48 FR 15935, April 13, 1983), Jean-Michel Dedat, individually and doing business as Cotricom, and others were temporarily denied all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data. The temporary denial order was to remain in effect until the final disposition of any administrative or judicial proceedings initiated as a result of the then on-going investigation. Upon approval, this Order will constitute such final disposition of the administrative proceeding initiated by the Agency as a result of its investigation relating to the matters which gave rise to the temporary denial order. The Temporary Denial Order of April 5, 1983 (48 FR 15935, April 13, 1983) will thereby be superceded and revoked. Review of the record relating to the Respondents originally named in that Order reflect that all have now been addressed. The following entries will be deleted from the said table: Didat, Jean, c/o Cotricom, Orly Fret 661, 94393 Orly Airport, Cedex, France, and Cotricom S.A., Orly Fret 661, 94393 Orly Airport Cedex and 90 Rue La Fayette, Paris, France.

From the effective date of this Order it alone will be the basis for any entry on the Table of Denied Orders until modified [15 CFR Part 388 (Supp. No. 1 1987)].

VII. This Order as affirmed or modified, shall become effective upon entry of the Secretary's final action in the Proceeding pursuant to this Act (50 U.S.C. app. 2412(c)(1)).

Dated: September 8, 1987.

Hugh J. Dolan,

Administrative Law Judge.

[FR Doc. 87-23976 Filed 10-15-87; 8:45 am]

BILLING CODE 3510-DT-M

[Case No. OEE-3-86]

Order Renewing Temporary Denial of Export Privileges; Bollinger GmbH, et al.

In the matter of: Bollinger GmbH, Rosseggergasse 34, 1160 Vienna, Austria, and c/o Bollinger Gmbth, Roseggergasse 34, 1160 Vienna, Austrice, Dietmar Ulrichshofer, with addresses at Kirchenstrasse 1, 3061 Ollersbach, Austria, and Vrablicz and Company, Steinergasse 11, 1170 Vienna, Austria, Respondents.

The Office of Export Enforcement, Export Administration, United States Department of Commerce (Department), pursuant to the provisions of § 388.19 of the Export Administration Regulations, 15 CFR Parts 368 through 399 (1986) (the Regulations), issued pursuant to the Export Administration Act of 1979, 50 U.S.C. app. 2401–2420 (1982), as amended by the Export Administration Amendments Act of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) (the Act), has asked the Deputy Assistant Secretary for Export Enforcement to renew an order temporarily denying all United States export privileges to Dietman Ulrichshofer; Bollinger GmbH, which is owned by Dietmar Ulrichshofer; and, Vrablicz and Company (hereinafter collectively referred to as respondents). Ulrichshofer, who is subject to an outstanding indictment in the U.S. District Court for the Central District of

California for conspiracy to violate U.S. export controls and is a fugitive from U.S. justice, resides in Ollersbach, Austria; the other respondents reside in Vienna, Austria.[1] The initial order was issued on August 12, 1986 (51 FR 29509, August 18, 1986) and renewed on October 11, 1986 (51 FR 37210, October 20, 1986), December 10, 1986 (51 FR 44655, December 11, 1986) February 8, 1987 (52 FR 4632, February 13, 1987) and April 9, 1987) (52 FR 12576, April 17, 1987) June 8, 1987 (52 FR 22665, June 15, 1987) and August 7, 1987 (52 FR 30418, August 14, 1987).

In its renewal request dated September 16, 1987, the Department states that, as a result of an ongoing investigation, it has reason to believe that respondents have conspired and acted in concert to violate the Act and the Regulations. The Department has reason to believe that the purpose of the conspiracy is to obtain U.S.-origin goods from third countries for ultimate destination in proscribed countries, without obtaining the required authorization from the Department for such shipments. The Department has reason to believe that respondents have participated in the unauthorized reexport of U.S.-origin commodities, including computer equipment and peripherals, from Austria to proscribed destinations, without authorization from the Department.

As shown in exhibit one of the Department's request, the U.S. Customs Service states that the investigation is still ongoing. Based on the information contained in the initial request and the subsequent renewal requests, the Department believes that the general circumstances surrounding the past activities of Bollinger and its owner, Ulrichshofer and Vrablicz establish that the violations under investigation are significant, deliberate, covert, and likely to occur again, unless appropriate action is taken to reduce the likelihood that they can continue to acquire U.S.-origin goods from the United States and abroad.

The Department submits that renewal of the temporary denial order naming all respondents is necessary for the purpose of giving notice to companies in the United States and abroad to cease dealing with respondents in goods and technical data subject to the Act and the Regulations in order to reduce the likelihood that respondents will continue to engage in activities which are in violation of the Act and the Regulations.

Inasmuch as no opposition was received from any correspondent and based on the showing by the Department, I find that renewal of the order temporarily denying export privileges to respondents Ulrichshofer, Bollinger and Vrablicz is necessary in the public interest to prevent an imminent violation of the Act and the Regulations and to give notice to companies in the United States and abroad to cease dealing with respondents in goods and technical data subject to the Act and the Regulations in order to reduce the substantial likelihood that respondents will continue to engage in activities which are in violation of the Act and the Regulations. However, I find a mere assertion without more, that an investigation is on-going and that no respondent has opposed the denial, inadequate to justify indefinite extension. While I have no reservations respecting the past record and apparent intentions of these respondents, temporary denial orders must not become a substitute for effective, timely investigation and due process. Accordingly, I will look for evidence of investigative progress during the next 60 days when I consider any further extension.

Accordingly, it is hereby ordered:

I. All outstanding validated export licenses in which any respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation.

II. The respondents, their successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported or to be exported from the United States in whole or in part, or that are otherwise subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participating, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to any export license application submitted to the Department, (b) in preparing or filing with the Department any export license application or reexport authorization, or any document to be submitted therewith, (c) in obtaining or using any validated or general export license or other export control document, (d) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial may be made applicable to any person, firm, corporation, or business organization with which any respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Licensing shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any respondent or any related party, or whereby any respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of § 388.19(e) of the Regulations, any respondent may, at any time, appeal this order by filing with the Office of the Administrative Law Judges, U.S. Department of Commerce, Room H–6716, 14th Street and Constitution Avenue NW., Washington, DC 20230, a full written statement in support of the appeal.

[1] Werner Bruchhausen, a co-defendant named in the indictment along with Ulrichshofer, was recently convicted and sentenced in May 1987 to a substantial term of imprisonment, by the U.S. District Court, Los Angeles, California in connection with some of the export control violation activities underlying the Ulrichshofer indictment.

VI. This order is effective October 6, 1987, and shall remain in effect for 60 days.

VII. In accordance with the provisions of § 388.19(d) of the Regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose any request to renew this temporary denial order by filing a written submission with the Deputy Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

A copy of this order shall be served upon each respondent and published in the **Federal Register.**

Dated: October 6, 1987.

William V. Skidmore,

Acting Deputy Assistant Secretary for Export Enforcement.

[FR Doc. 87-24033 Filed 10-15-87; 8:45 am]

BILLING CODE 3510-DT-M

[Docket No. 7105-02]

Actions Affecting Export Privileges; Marcel Goldfarb

Summary

Pursuant to the Default Decision and Order of the Administrative Law Judge, which Order is modified by me, Marcel Goldfarb, with an address at 71 Avenue du Commandant Barre, Viry-Chatillon, France, is denied all export privileges for an indefinite period from the date of this Order.

Order

On September 8, 1987, the Administrative Law Judge (ALJ) entered a Default Decision and Order in the above referenced matter. The Default Decision and Order was referred to me pursuant to the Export Administration Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

I hereby modify Paragraph II of the ALJ's Order by inserting after the words "All outstanding" the following:

* * * individual * * *

I hereby modify Paragraph V of the ALJ's Order by inserting after the words "specific authorization" the following:

* * * from the Office of Export Licensing * * *

Having examined the record and based on the facts adduced in this case, I affirm the Default Decision and Order of the ALJ as thus modified.

This constitutes final agency action in this matter.

Dated: October 8, 1987.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

In the Matter of: Marcel Goldfarb, Respondent, Docket No. 7105-02.

Appearance for Respondent: Marcel Goldfarb, 71 Avenue du Commandant Barre, Viry-Chatillon, France.

Appearance for Agency: Thomas C. Barbour, Esq., Attorney-Advisor, U.S. Department of Commerce, Room H-3845, Washington, DC 20230.

Default Decision and Order

On January 20, 1987, the Acting Director, Office of Export Enforcement, International Trade Administration, United States Department of Commerce (the Agency), issued a Charging Letter alleging that Marcel Goldfarb (Respondent), had violated §§ 387.2, 387.3, and 387.5 of the Export Administration Regulations (15 CFR Parts 368 through 399) (the Regulations). The Agency established that service of the charging letter was made on the Respondent on January 29, 1987. Respondent failed to submit any answer.

Section 388.8 of the Regulations provides:

DEFAULT

(a) General

If a timely answer is not filed, the Department shall file with the administrative law judge a proposed order together with supporting evidence for the allegations in the charging letter. The administrative law judge may require further submissions and shall issue any order he deems justified by the evidence of record. Any order so issued shall have the same force and effect as an order issued following the disposition of contested charges.

In accordance with this section, Agency counsel filed such a motion for a default order on July 22, 1987. The Agency also submitted documentary evidence to support the allegations made in the charging letter. On July 30, 1987, the undersigned Administrative Law Judge issued an Order to Show Cause why the Respondent should not be held in default. Respondent has failed to file an answer to the charges alleged or response to the Order issued.

Facts

From a period beginning on or about June 3, 1980 to on or about April 22, 1982, Goldfarb conspired and acted in concert with Robert Almori, Michel d'Ormigny, Jean-Jaques Gayant, Jean-Michel Didat and others to bring about acts that constituted violations of the Act and the Regulations.[1] The purpose of the conspiracy was to acquire U.S.-origin goods in the United States for export to ultimate proscribed destinations. This was accomplished by representing that France was the intended country of ultimate destination, while in fact, the conspirators intended to, and on at least one occasion did in fact, reexport the goods from France to proscribed destinations without reexport authorization from the Agency.

The conspiracy to fraudulently obtain U.S.-origin goods for ultimate destination in proscribed destinations was directed by Almori. Specifically, Almori established a firm called Hedera (sometimes referred to as "Hedera Establishment"), in Vaduz, Lichtenstein, to sell those goods to customers in the Union of Soviet Socialist Republics (U.S.S.R.) and Czechoslovakia. Almori, in order to implement this scheme, directed Didat, of the firm Cotricom,[2] to obtain a fictitious customer of good standing reputation in France. Didat contacted one of his connections, Goldfarb, who provided Didat with a copy of a blank order form from the genuine French company C.G.E.E. Alsthom. The Respondents then proceeded to pose as representatives of this reputable French company, knowing that C.G.E.E. Alsthom had no interest in any of their transactions.

Duplicates of this blank order form were also used by the Respondents to obtain International Import Certificates (IC's) from the French government. In turn these IC's were presented by Respondents to U.S. exporters to support applications seeking authorization from the Agengy to export U.S.-origin equipment to C.G.E.E. Alsthom.[3] These documents were necessary to conceal from the Agency the true destination of these U.S.-origin goods. Each of the applications made to the French government were for an International Import Certificate and included a representation that C.G.E.E. Alsthom was importing U.S.-origin goods into France. Each was signed "LEFEBVRE" and included the following notation: "for this matter dial number 355-0346 Mr. LEFEBVRE." In fact, as

---

[1] Michel d'Ormigny died in 1985. Thus, he is no longer a Respondent in these administrative proceedings. In addition, after further review of the evidence respecting Mr. Gayant's alleged involvement in the conspiracy, the Agency chose not to pursue any charges against him.

[2] Cotricom was a French forwarding firm who was the usual freight forwarder for Hedera.

[3] In applying for an export license seeking authorization to export from the United States to France any U.S.-origin commodity identified by the code letter A following the Export Control Commodity Number (ECCN) for that commodity, the applicant must include with his license application an IC issued by the French Government. *See* 15 CFR 375.3

established in a French court proceeding, "LEFEBVRE" was an alias adopted by Goldfarb and the telephone number was for a commercial enterprise directed by Goldfarb.[4] In fact, as established by the French court proceeding, the address provided on the application for the firm C.G.E.E. Alsthom as the place of delivery for the goods, 13 Parc du Biches, 91000 Evry-France, was not even a C.G.E.E. Alsthom facility.

On June 2, 1980, an order (SA/SCED–80–1234) was placed with the French subsidiary of a U.S. company for a memory test system (Govt. Exh. 2). That purchase order directed that all letters concerning that order were to be sent to "Monsieur Gerard LEFEBVRE" at the "fictitious" C.G.E.E. Alsthom facility (Govt. Exh. 1). On or about January 9, 1981, the U.S. exporter of the memory test system, unaware that the information provided to him by Didat was false, submitted to the Agency validated export license application A531976 [5], identifying C.G.E.E. Alsthom as the ultimate consignee of the memory test system.[6]

Based on the information provided in export application A531976, the Agency issued a validated export license authorizing the export of the U.S.-origin memory test system to C.G.E.E. Alsthom (Govt. Exh. 5). The validated export license required that a delivery verification certificate be returned to the Agency in connection with the export of this equipment.[7] The U.S.-origin memory test system was exported from the United States to France on or about January 22, 1981 (Govt. Exh. 6, 7). On May 12, 1981, the U.S. exporter submitted to the Agency a copy of the IC covering the export of the memory test system to C.G.E.E. Alsthom, stating that it had been unable to obtain a delivery verification certificate with respect to the shipment (Govt. Exh. 8). C.G.E.E. Alsthom, in fact, never ordered the memory test system. (Govt. Exh. 9).

On or about August 10, 1981, following the refusal of the U.S. manufacturer involved in the shipment of the memory test system to fill additional orders because of the failure to obtain delivery verification certificates, Almori orchestrated the attempt by Didat to obtain through d'Ormigny's company, Technica Ltd. (Technica), a U.S.-origin patern generator and a photorepeater in the United States for export to France without the validated export licenses required by Section 372.1(b) of the Regulations. Almori, through his company, Hedera, ordered these U.S.-origin commodities from Technica (Govt. Exh. 11, 12).[8] D'Ormigny notified the U.S. company from whom he was purchasing the goods that the goods would have to be released "exclusively" to Technica's freight forwarder. On November 27, 1981, Technica's freight forwarder took possession of the goods (Govt. Exc. 13, 14).

A Shipper's Export Declaration (SED) was filed with the U.S. Customs Service stating that the goods were subject to general license G–DEST and that they were being shipped for ultimate consignment to Didat's firm, Cotricom. Acting in accordance with instructions received from Didat and d'Ormigny, on or about December 8, 1981, the U.S. freight forwarder attempted to export the pattern generator and photorepeater from the United States to Didat's company, Cotricom, in France without the required validated export license (Govt. Exh. 17, 18, 19, 20). On December 8, 1981, the U.S.-origin equipment was seized in New York and subsequently forfeited to the United States. (Govt. Exh. 21, 22, 23).

Following the December, 1981 seizure, Almori and Didat attempted, through a new U.S. exporter, to procure additional U.S.-origin equipment, using the fraudulently obtained C.G.E.E. Alsthom purchase orders in an attempt to give the transactions an appearance of *bona fides*. On or about January 4, 1982 and January 19, 1982, based on information provided by Didat, a U.S. exporter submitted two separate export license applications to the Agency (Govt. Exh. 24).[9] Both export license applications stated that C.G.E.E. Alsthom was the intended ultimate consignee of the U.S. origin equipment identified. Each application was accompanied by IC's from France, which had been provided to the U.S. exporter by Didat, supporting the representation that the goods were being purchased by C.G.E.E. Alsthom.

On January 19, 1982, the U.S. exporter and Didat met with Agency officials to discuss these applications (Govt. Exh. 26). During that interview, Didat stated that he was an agent for C.G.E.E. Alsthom, and that C.G.E.E. Alsthom had ordered the U.S.-origin goods for its own use. Thus, Didat made false and misleading statements of material fact to the Agency in connection with these transactions. Because of the questions raised after the December seizure, neither application was approved.

At the same time Didat was making these statements to the Agency in the United States, Almori and Goldfarb were making false and misleading statements of material fact to U.S. Embassy officials in Paris. In the course of an official United States Government investigation conducted in connection with the goods seized, on or about December 22, 1981, Almori made false and misleading statements of material fact to an official of the United States Embassy in Paris by stating that the goods had been purchased for C.G.E.E. Alsthom, when Almori knew that C.G.E.E. Alsthom had no interest in the transaction.

Further, on December 23, 1981,[10] "LEFEBVRE" contacted U.S. Embassy officials to discuss C.G.E.E. Alsthom's purchase of the pattern generator and photorepeater (Govt. Exh. 28).[11] Lefebvre also contacted the Embassy on February 5, April 2, and April 6, 1982 (Govt. Exh. 31). During these contacts, Lefebvre represented that he was acting on behalf of C.G.E.E. Alsthom.[12]

The Agency alleges that the Respondents, acting in accordance with the scheme devised by Almori, conspired to acquire U.S.-origin goods on the representation that a reputable end-user in France was the intended

---

[4] While not addressing the same allegations, a French court proceeding established facts against these Respondents linked to the charges made by the Agency in the January 20, 1987 charging letters. These included the forging of trade records and improper procurement of administrative documents (Govt. Exh. 1).

[5] The charging letter of January 20, 1987, erroneously identified this number as A531926.

[6] Since the memory test system was classified under ECCN 1355A (Govt. Exh. 4), an IC was required to be submitted with the license application. However, the U.S. exporter requested a waiver of this requirement until the IC was received at its facility. The Agency granted this requested waiver and issued the validated export license prior to receipt of the IC. The IC was submitted to the Agency on May 12, 1981 (Govt. Exh. 8).

[7] A delivery verification certificate may be requested by the government of the exporting country. If it is requested for a particular export, the verification is issued by the government of the country of ultimate destination after the export has taken place and the commodities have either entered the export jurisdiction of the recipient country or are otherwise accounted for by the importer to the issuing government. 15 CFR 375.3(a)(2).

[8] Although the purchase order form from d'Ormigny to GCA Corporation indicates that d'Ormigny intended to install the equipment in Pittsburgh, Pennsylvania, the other documentary evidence relating to this transaction reveals that statement on the purchase order to be false. (Govt. Exh. 11, 12, 13–20)

[9] These applications were date stamped by the Agency as January 12, 1982 and January 20, 1982, respectively.

[10] The charging letter issued to Respondent Goldfarb incorrectly states December 13, 1981

[11] Gov Exh. 28 contains a typographical error reporting the date as February 3, 1983 instead of 1982.

[12] In his January 6, 1982 contact with the Embassy, Lefebvre cautioned the officials to contact him only at his personal number because knowledge of the transactions was restricted to only a few senior officials at C.G.E.E. Alsthom (Govt. Exh. 28).

1987
UMI

ultimate recipient of such equipment. In fact, the evidence supports the finding that the Respondents intended to, and on at least one occasion did in fact, reexport the goods from France to proscribed destination without obtaining the required reexport authorization from the Agency.

The facts are not therefore in dispute and Respondent is not entitled to a fact-finding hearing under such circumstances *(Spawr Optical Research, Inc. v. Baldrige,* Civ. No. 86–0880, D.D.C. Dec. 16, 1986; *In the Matter of Spawr,* 51 F.R. 7477–7479, 7481 (1986). Cf. also, Order in Gregg (52 F.R. 13279 (1987), wherein an Agency subaltern denied that individual and a related person export privileges for 10 years without notice or opportunity to comment or be heard, under the Export Administration Act for a violation of the Arms Export Control Act. A procedure proposed to be made applicable to convictions for violations of the Export Administration Act as well, under present congressional consideration).

Based on the foregoing, I find that the Respondents violated the Regulations, as alleged in the charging letter of January 20, 1987. Each of these violations involving U.S.-origin goods controlled under section 5 of the Act for national security reasons. I find that an Order denying export privileges to the Respondent for an indefinite period from the date a final order is entered in this proceeding is reasonably necessary to protect the public interest and to achieve effective enforcement of the Export Administration Act and the Regulations.

Accordingly, pursuant to the authority delegated to me by Part 388 of the Regulations, it is therefore:

Ordered

I. For an indefinite period from the date this Order becomes final, Respondent: Marcel Goldfarb, a/k/a Lefebvre, 71 Avenue du Commandant Barre, Viry-Chatillon, France, all successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. All outstanding validated export licenses in which Respondent or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Respondent's privileges of participating in any manner or capacity, in any special licensing procedure, including but not limited to, distribution licenses are hereby revoked.

III. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include but not be limited to participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data that are subject to the Act and the Regulations.

IV. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

V. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or any related party may obtain any benefits therefrom or have any interest or participate therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to or for respondent or related party denied export privileges, or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

VI. By Order of April 5, 1983 (48 FR 15935, April 13, 1983), Marcel Goldfarb and others were temporarily denied all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data. The temporary denial order was to remain in effect until the final disposition of any administrative or judicial proceedings initiated as a result of the then on-going investigation. Upon approval, this Order will constitute such final disposition of the administrative proceeding initiated by the Agency as a result of its investigation relating to the matters which gave rise to the temporary denial order. The Temporary Denial Order of April 5, 1983 (48 FR 15935), April 13, 1983) will thereby be superceded and revoked. Review of the record relating to the Respondents originally named in that Order reflect that all have now been addressed. The following entries will be deleted from the said Table:

Marcel Goldfarb,
a/k/a Marcel LeFevre,
and Gerard LeFevre,
71 Avenue du Commandant Barre
and
Farb et Cie,
4 Boulevard Voltaire, Paris, France.

VII. This Order as affirmed or modified, shall become effective upon entry of the Secretary's final action in the proceeding pursuant to this Act (50 U.S.C. app. 2412 (c)(1)).

Dated: September 8, 1987.

Hugh J. Dolan,

Administrative Law Judge.

BILLING CODE 3510–DT–M

National Oceanic and Atmospheric Administration

Deep Seaped Mining; Proposed Revisions to Mine Site Areas; Republication

[Editorial Note: The following document was originally published at page 37490 in the issue of Wednesday, October 7, 1987. The document is being republished in its entirety because of typesetting errors.]

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of proposed amendments to Deep Seabed Mining Exploration Licenses and request for comments.

SUMMARY: Pursuant to the Deep Seabed Hard Mineral Resources Act (Pub. L. 96–283) and 15 CFR Part 970, the National Oceanic and Atmospheric Administration (NOAA) published notice on September 13, 1984, at 49 FR 35973, of issuance of licenses to Ocean Minerals Company (OMCO), Ocean Management, Inc. (OMI), and Ocean Mining Associates (OMA), to engage in deep seabed mining exploration activities, subject to terms, conditions, and restrictions. These license sites, designated USA–1, USA–2 and USA–3, respectively, are located in the Clarion-Clipperton Fracture Zone of the North-eastern Equatorial Pacific Ocean. At the request of the deep seabed mining consortia, and pursuant to 15 CFR 970.902(d)(5), NOAA published the precise locations of the licensed areas on November 13 and 30, 1984, at 49 FR 44938 and 49 FR 47081, December 11, 1984, at 49 FR 48205, and January 8, 1985 at 50 FR 994.

The above U.S. licensees have agreed recently to several small adjustments to their respective boundaries in order to resolve conflicts with foreign mining interests. Each of these licensees has requested that NOAA approve proposed modifications to its exploration area and otherwise revise its license in order to carry out the conflict resolution. Under the provisions of 15 CFR 970.512 through 970.514, NOAA has determined, as to each license, that the proposed modifications are not significant changes and that the procedures in 15 CFR 970.514(b) apply. Accordingly, NOAA gives notice of its intention to accommodate these area adjustments by means of modifications of license terms, conditions and restrictions (TCRs), as well as relinquishment and revision as appropriate.

Each proposed exploration plan revision consists of boundary changes. Exploration strategies, the proposed schedule of activities, and other basic plan elements generally are not affected. The revision to license USA–1 includes the addition of new area to compensate for agreed-to adjustments in the original area. The revision to license USA–2 includes relinquishment of a small area which is proposed to be added to the area covered by the license designated USA–1. NOAA proposes to accomplish other area adjustments by means of modification of license TCRs to restrict exploration activities in areas to be used by another operator, and to establish measures to oversee, and to provide for contingencies relating to, implementation of conflict resolution. All existing license TCRs would remain in effect.

USA–1, Issued to Ocean Minerals Company

The license would be amended, resulting in a change in operating area from approximately 165,533 square kilometers to approximately 168,841 square kilometers; an addition of approximately 3,308 square kilometers.

USA–2, Issued to Ocean Management, Inc.

The license would be amended, resulting in a change in operating area from approximately 135,100 square kilometers to aproximately 112,500 square kilometers; a reduction of approximately 22,600 square kilometers.

USA–3 Issued to Ocean Mining Associates.

The license would be amended, resulting in a change in operating area from approximately 156,060 square kilometers to approximately 150,310 square kilometers; a reduction of approximately 5,750 square kilometers.

Subject to 15 CFR 970.902, which excludes confidential information from public disclosure, interested persons are permitted to examine the materials relevant to these revisions. Comments on this notice should be received on or before December 7, 1987.

FOR FURTHER INFORMATION CONTACT: John W. Padan, Ocean Minerals and Energy Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue, NW., Suite 710, Washington, DC. 20235. (202) 673–5117.

Dated: October 1, 1987.

National Technical Information Service

Intent To Grant Exclusive Patent License; Monsanto Co., St. Louis, MO

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Monsanto Company of St. Louis, MO, an exclusive right in the United States and certain foreign countries to practice the invention embodied in U.S. Patent 4,456,684, "Method for Screening Bacteria and Application Thereof for Field Control of Diseases Caused by *Gaeumannomyces Graminis*." The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments and other materials relating to the intended license must be submitted to Douglas J. Campion, Associate Director, Office of

Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas. J. Campion,

Associate Director, Office of Federal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in Pakistan

October 9, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 19, 1987. For further information contact Pamela Smith, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343-6498. For information on embargoes and quota reopenings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the previously established restraint limits for cotton textile products in Categories 331, 334-336, 338-342, 347/348, 351 and 352, produced or manufactured in Pakistan and exported during 1987. As a result, the import limit for Category 351, which is currently filled, will re-open.

Background

A CITA directive dated July 24, 1987 (52 FR 28325) established import restraint limits for certain cotton and man-made fiber textile products, produced or manufactured in Pakistan and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Under the terms of the Bilateral Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated May 20, 1987 and June 11, 1987, and at the request of the Government of Pakistan, the limits for Categories 331, 334-336, 338-342, 347/348, 351 and 352 are being increased by application of swing. The limit for Category 315 is being reduced to account for the swing applied to the foregoing categories.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of The United States Annotated* (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 9, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel the directive of July 24, 1987, concerning imports into the United States of certain cotton and man-made fiber textile products, produced or manufactured in Pakistan and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 19, 1987, the directive of July 24, 1987 is hereby amended to include adjustments to the previously established restraint limits for cotton textile products in the following categories, as provided under the terms of the bilateral agreement, effected by exchange of notes dated May 20, 1987 and June 11, 1987 [1]:

Category	Adjusted 12-mo limit [1]
315	45,206,580 sq. yards.
331	695,500 doz. pairs.
334	41,195 doz.
335	53,500 doz.
336	140,255 doz.
338	2,889,000 doz.
339	695,500 doz.
340	150,073 doz.
341	259,489 doz.
342	85,600 doz.
347/348	337,664 doz.
351	42,800 doz.
352	214,000 doz.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee for the Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-23989 Filed 10-15-87; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Singapore

October 9, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 16, 1987. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535-6736. For information on embargoes and quota reopenings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the import restraint limits for cotton and man-made fiber textile products in Categories 338/339, 340, 342, 346/348, 634, 635, 638, 639, 640, 647 and

[1] The agreement provides, in part, that (1) specific limits may be exceeded by designated percentages, provided that the amount of increase is compensated by an equivalent square yard decrease in another specific limit within the same group; (2) the specific limits for categories may be increased by designated percentages for carryover or carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

648, produced or manufactured in Singapore and exported during the period January 1, 1987 through December 31, 1987.

Background

A CITA directive dated December 16, 1986 (51 FR 45797) established import restraint limits for certain cotton, wool and man-made fiber textile products, including Categories 338/339, 340, 342, 347/348, 634, 635, 638, 639, 640, 647 and 648, produced or manufactured in Singapore and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 31 and June 5, 1986, as amended, between the Governments of the United States and Singapore, provides, among other things, for percentage increases in certain categories, provided a corresponding reduction in equivalent square yards in one or more other specific limits during the agreement year (swing); for the carryover of shortfalls in certain categories from the previous agreement year (carryover); and for the borrowing of yardage from the succeeding year's limit with the amount used being deducted from the limit in the succeeding year (carryforward).

In accordance with the terms of the bilateral agreement and at the request of the Government of Singapore, flexibility in the form of swing, carryover and carryforward is being applied, variously, to Categories 338/339, 340, 342, 347/348, 634, 635, 638, 639, 640, 647 and 648 for the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

October 9, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 16, 1986, issued to you by the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 16, 197, the directive of December 16, 1986 is hereby amended to include adjusted limits for cotton and man-made fiber textile products in the following categories, pursuant to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 31 and June 5, 1986, as amended [1]:

Category	12-mo limit [1]
338/339	814,448 doz.
340	549,830 doz.
342	89,880 doz.
347/348	793,512 doz.
634	134,635 doz.
635	226,161 doz.
638	468,393 doz.
639	3,173,220 doz.
640	77,500 doz.
647	265,326 doz.
648	1,462,567 doz.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 53(a)(1).

Sincerely,

James J. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-23988 Filed 10-15-87; 8:45 am]

BILLING CODE 3510-DR-M

[1] The agreement provides, in part, that specific limits may be increased by not more than seven percent during an agreement year, provided that an equal quantity in squre yards equivalent is deducted from another specific limit.

Request for Public Comment on Bilateral Textile Consultations with the Government of the Hungarian People's Republic Concerning Category 442

October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on categories on which consultations have been requested call (202) 377-3740.

On October 2, 1987, the Government of the United States, under Article 3 of the Arrangement Regarding International Trade in Textiles, and in accordance with section 204 of the Agricultural Act of 1956, as amended, requested the Government of the Hungarian People's Republic to enter into consultations concerning exports to the United States of wool skirts in Category 442, produced or manufactured in Hungary.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of the Hungarian People's Republic, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of textile products in Category 442, produced or manufactured in Hungary and exported to the United States during the twelve-month period which began on October 2, 1987 and extends through October 1, 1988 at a level of 14,932 dozen.

A summary market statement concerning this category follows this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26662), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Anyone wishing to comment or provide data or information regarding the treatment of Category 442, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. James H. Babb, Chairman, Committee for the Implementation of Textile Agreements, International Trade

Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

James H. Babb.

Chairman, Committee for the Implementation of Textile Agreements.

Hungary—Market Statement

Category 442—Wool Skirts

September 1987.

Summary and Conclusions

U.S. imports of Category 442 from Hungary were 13,774 dozen during the year ending June 1987, over five times the 2,509 dozen imported a year earlier. During the first six months of 1987, imports of Category 442 from Hungary reached 5,245 dozen, 29 times the 179 dozen imported during the same period of 1986. In 1986, Category 442 wool skirts imports from Hungary were 8,708 dozen; in 1985 imports totaled 2,330 dozen.

The market for Category 442 has been disrupted by imports. The sharp and substantial increase in imports from Hungary has contributed to this disruption.

U.S. Production and Market Share

U.S. production of wook skirts has been on the decline, falling from 1,415 thousand dozen in 1982 to 791 thousand dozen in 1986, a decline of 44 percent. The U.S. producers' share of this market fell from 92 percent in 1982 to 53 percent in 1986.

U.S. Imports and Import Penetration

U.S. imports of Category 442 were 700 thousand dozen in 1986, over five times the 131 thousand dozen imported in 1982. Category 442 imports were up 34 percent in the year ending June 1987. The ratio of imports to domestic production increased from 9 percent in 1982 to 89 percent in 1986.

Duty Paid Value and U.S. Producer Price

All of Category 442 imports from Hungary during the first six months of 1987 entered under TSUSA number 384.7522—women s girls' and infants' woven wool skirts, not ornamented. These skirts entered the U S. at landed duty-paid values below U.S. producers' prices for comparable skirts.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB)

Dates of Meeting: 4-5 November 1987

Times of Meeting: 0800-1600 hours daily

Place: Pentagon, Washington, D.C.

Agenda: The Army Science Board's Ad Hoc Committee on Implementing Competitive Strategies will meet. Objectives of this meeting will be twofold. First, the panel will review results of the last meeting/working session and will consolidate their information into their report. Second, they will begin formulating their report into a final format in preparation for final presentation. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER88-9-000, et al.]

Georgia Power Co. et al.; Electric Rate and Corporate Regulation Filings

October 8, 1987.

Take notice that the following filings have been made with the Commission:

1. Georgia Power Co.

[Docket No. ER88-9-000]

Take notice that Georgia Power Company on April 21, 1987 and October 2, 1987, tendered for filing proposed changes in its FERC Rate Schedule No. 704, the Interchange Agreement between Georgia Power Company and the Tennessee Valley Authority. The proposed changes provide for an additional delivery point between the parties and substitution of a 14% return on equity in calculating Georgia Power's carrying costs instead of a varying rate based on Georgia Power's most recent wholesale rate case. Georgia Power has requested an effective date of January 1, 1987 for the changes.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Kentucky Utilities Co.

[Docket No. ER88-11-000]

Take notice that on October 2, 1987, Kentucky Utilities Company (KU) tendered for filing a unilateral filing for an amendment to the Interconnection Agreement between KU and Tennessee Valley Authority (TVA) which agreement is designated KU Rate Schedule FERC No. 93. KU states that the filing is in compliance with § 35.23 of the Commission's Regulations as promulgated by Order 84.

KU states that copies of the filing have been sent to TVA and to the Public Service Commission of Kentucky.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Nevada Power Co.

[Docket No. ER88-10-000]

Take notice that on October 2, 1987, Nevada Power Company tendered for filing a proposed change in its FPC Electric Service Tariff No. 41. The change reduces the energy charge on this tariff from 1.820 cents per kwh to 1.676 cents per kwh.

The change to this tariff is a result of Nevada Power Company's compliance with [Docket No. RM87-4-000; Order No. 475, issued June 26, 1987. This Order allows electric utilities to make an abbreviated filing to file for certain rate decreases under section 205 of the Federal Power Act (FPA) to reflect a decrease in the Federal income tax rate from 46 percent to 34 percent.

Copies of the filing were served upon the City of Needles, California, the Public Service Commission of Nevada, the Nevada Office of Consumer Advocate, the California Public Utilities Commission and the Federal Energy

Regulatory Commission, San Francisco Office.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Orange and Rockland Utilities, Inc.

Docket No. ER88-7-000]

Take notice that on October 2, 1987, Orange and Rockland Utilities, Inc. (Orange and Rockland) tendered for filing as a rate schedule and executed agreement dated April 1, 1987, between Orange and Rockland and Public Service Electric and Gas Company (PSE&G) for the purchase or sale, on a prescheduled basis, system capacity and/or energy in excess of customer requirements from their system to the other on an hourly, daily, weekly or monthly basis.

The rate schedule provides for a system capacity charge to be paid by the buyer to the seller which will be the system capacity charge per megawatt for each hour of the scheduled firm capacity which is negotiated at arms length to the Agreement by the parties prior to each transaction, but which shall not exceed $6.74 per megawatt for each hour when Orange and Rockland is the seller and $8.20 per megawatt for each hour when PSE&G is the seller. The system energy charge to be paid by the buyer is calculated as the product of (i) the megawatt hour scheduled by the buyer actually delivered by the seller to the point of interchange and (ii) the applicable energy charge rate on the system of the seller, as agreed to by the parties.

Orange and Rockland requests waiver of the notice requirements of § 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective April 1, 1987 in accordance with the anticipated utilization by the parties.

Orange and Rockland states that a copy of its filing was served on Public Service Electric and Gas Company.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

5. Portland General Electric Co.

[Docket No. ER88-6-000]

Take notice that on October 2, 1987, Portland General Electric Company (PGE) tendered for filing its revised Average System Cost (ASC) which reflects PGE's Power Cost Adjustment (PCA) rate change which became effective with meter readings on and after January 30, 1987. This filing includes a revised Schedule 4 to Appendix 1, Exhibit C of the Residential Purchase and Sale Agreement along with the authorization to implement this rate change from the Public Utility Commission of Oregon.

PGE states that the filing shows that the first quarter PCA adjustment to the current base ASC is 0.88 mills/kWh credit, which when added with the base ASC results in a net ASC rate effective for this period.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

6. San Diego Gas & Electric Co.

[Docket No. ER87-658-000]

Take notice that on October 2, 1987, San Diego Gas & Electric Company (SDG&E) tendered for filing a Certificate of Concurrence assenting to and concurring with Southern California Edison Company's (Edison) filing of the San Onofre Refueling Exchange Agreement (Agreement) between Edison, SDG&E, the City of Anaheim, California, and the City of Riverside, California (collectively "Parties").

The Agreement provides for an arrangement whereby, for system reliability purposes, a planned refueling outage can be changed to either an early refueling outage or a delayed refueling outage at the request of one or more Parties and the nonparticipating Parties will receive an exchange of energy and capacity as if the changed refueling outage had not occurred.

Copies of the filing were served upon the Public Utilities Commission of the State of California, Edison, Anaheim, and Riverside.

Comment date: October 22, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project Nos. 9779-001 et al.]

Trafalgar Power, Inc., et al; Surrender of Preliminary Permits

October 9, 1987.

Take notice that the following preliminary permits have been surrendered effective as described in Standard Paragraph I at the end of this notice.

1. Trafalgar Power, Inc.

[Project No. 9779-001]

Take notice that Trafalgar Power, Inc., permittee for the Niverville Project No. 9779 located on the Valatiekill River in Columbia County, New York has requested that its preliminary permit be terminated. The preliminary permit was issued on June 13, 1986, and would have expired on May 31, 1989. The permittee states that analysis of the North Hoosic Project did not indicate feasibility for development.

The permittee filed the request on August 31, 1987.

2. Independence Electric Corporation

[Project No. 8814-002]

Take notice that Independence Electric Corporation, permittee for the W.B. Oliver Hydropower Project No. 8814, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 8814 was issued on August 9, 1985, and would have expired on July 31, 1988. The project would have been located on the Black Warrior River near Tuscaloosa, Tuscaloosa County, Alabama.

The permittee filed the request on September 29, 1987.

3. J K Inc.

[Project No. 9963-001]

Take notice that the J K Inc., permittee for the Andro Project No. 9963, has requested that the preliminary permit be terminated. The preliminary permit for Project No. 9963 was issued on November 7, 1986, and would have expired on October 31, 1989. The project would have been located on the Androscoggin River, in Oxford County, Maine.

The permittee filed the request on July 6, 1987.

4. Mr. Louis P. Migliozzi

[Project No. 10075-001]

Take notice that Mr. Louis P. Migliozzi, permittee for the Holyoke Project No. 10075, has requested that the preliminary permit be terminated. The preliminary permit for Project No. 10075 was issued on February 24, 1987, and would have expired on January 31, 1990.

BEST COPY AVAILABLE

The project would have been located on the Holyoke Canal System, in Hampton County, Massachusetts.

The permittee filed the request on September 8, 1987.

5. Modesto Irrigation District

[Project No. 5382–001]

Take notice that the Modesto Irrigation District, permittee for the proposed Little Pine Creek Hydro Project No. 5382, has requested that its preliminary permit be terminated. The preliminary permit was issued on January 13, 1987, and would have expired on December 31, 1989. The project would have been located on Little Pine Creek in Inyo County, California.

The permittee filed the request on August 28, 1987.

6. Modesto Irrigation District

[Project No. 5384–001]

Take notice that the Modesto Irrigation District, permittee for the proposed Baker Creek Hydro Project No. 5384, has requested that its preliminary permit be terminated. The preliminary permit was issued on January 13, 1987, and would have expired on December 31, 1989. The project would have been located on Baker Creek County in Inyo County, California.

The permittee filed the request on August 28, 1987.

7. Modesto Irrigation District

[Project No. 4879–002]

Take notice that the Modesto Irrigation District, permittee for the proposed Butter Creek Hydro Project No. 4879, has requested that its preliminary permit be terminated. The preliminary permit was issued on January 14, 1987, and would have expired on December 31, 1989. The project would have been located on Butter Creek in Trinity County, California.

The permittee filed the request on August 28, 1987.

8. Modesto Irrigation District

[Project No. 5385–001]

Take notice that the Modesto Irrigation District, permittee for the proposed Big Pine Creek Hydro Project No. 5285, has requested that its preliminary permit be terminated. The preliminary permit was issued on January 13, 1987, and would have expired on December 31, 1989. The project would have been located on Big Pine Creek in Inyo County, California.

The permittee filed the request on August 28, 1987.

9. Taft Hydropower, Inc.

[Project No. 9740–001]

Take notice that the Taft Hydropower, Inc., permittee for the Caughdenoy Lock 23 Hydro Project No. 9740, has requested that the preliminary permit be terminated. The preliminary permit for Project No. 9740 was issued on June 6, 1986, and would have expired on May 31, 1989. The project would have been located on the Oneida River, in Onondaga and Oswego Counties, New York.

The permittee filed the request on August 31, 1987.

10. Trafalgar Power, Inc.

[Project No. 9778–002]

Take notice that Trafalgar Power, Inc., permittee for the North Hoosic Project No. 9778 located on the Walloomsac River in Rennselaer County, New York has requested that its preliminary permit be terminated. The preliminary permit was issued on April 24, 1986, and would have expired on March 31, 1989. The permittee states that analysis of the North Hoosic Project did not indicate feasibility for development.

The permittee filed the request on August 31, 1987.

11. Trafalgar Power, Inc.

[Project No. 9769–002]

Take notice that Trafalgar Power, Inc., permittee for the Castleton Project No. 9769 located on the Moordenerkill River in Rennselaer County, New York has requested that its preliminary permit be terminated. The preliminary permit was issued on April 24, 1986, and would have expired on March 31, 1989. The permittee states that analysis of the Castleton Project did not indicate feasibility for development.

The permittee filed the request on August 31, 1987.

Standard Paragraph

I. The preliminary permit shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007 in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TA87–13–20–001]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

October 13, 1987.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on October 6, 1987, tendered for filing to its FERC Gas Tariff, Second Revised Volume No. 1 the following tariff sheets:

Substitute Twentieth Revised Sheet No. 201
Substitute Twenty-first Revised Sheet No. 201
Substitute Twenty-second Revised Sheet No. 201
Second Substitute Thirteenth Revised Sheet No. 205
Substitute Fourteenth Revised Sheet No. 205
Substitute Fifteenth Revised Sheet No. 205

Algonquin states such tariff sheets are being filed pursuant to Algonquin's Purchased Gas Adjustment Provision as set forth in Section 17 of the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1 and pursuant to Section 7 of its Rate Schedule F–4 to reflect a change in purchased gas cost to be charged by its supplier, Texas Eastern Transmission Corporation ("Texas Eastern").

Algonquin proposes the effective date of Second Substitute Thirteenth Revised Sheet No. 205 to be August 1, 1987. The proposed effective date of Substitute Twentieth Revised Sheet No. 201 is September 1, 1987.

Algonquin states that the proposed effective date of Substitute Twenty-first Revised Sheet No. 201, Substitute Twenty-second Revised Sheet No. 201, Substitute Fourteenth Revised Sheet No. 205 and Substitute Fifteenth Revised Sheet No. 205 is October 1, 1987.

Algonquin states that since notice of its rate change was not received from Texas Eastern 30 days prior to the proposed effective date, it is making this filing within 15 days of receipt of notice as permitted under its gas tariff.

Algonquin notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987.

Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA87-14-20-001]

Algonquin Gas Transmission Co.; Proposed Change in FERC Gas Tariff

October 13, 1987.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on October 6, 1987, tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, six (6) copies of the following tariff sheets:

Substitute Alternate Twentieth Revised Sheet No. 203
Substitute Twenty-first Revised Sheet No. 203
Substitute Twenty-second Revised Sheet No. 203

Algonquin states that such tariff sheets are being filed to reflect in its Rate Schedule F-2 changes in the underlying rates of Consolidated Gas Transmission Corporation ("Consolidated"), as set forth in Consolidated's filing of September 23, 1987, proposed to be effective September 1, 1987.

Algonquin proposes the effective date of Substitute Alternate Twentieth Revised Sheet No. 203 to be September 1, 1987, and the effective date of Substitute Twenty-first Revised Sheet No. 203 and Substitute Twenty-second Revised Sheet No. 203 to be October 1, 1987.

Algonquin notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Tennessee states that it is filing these revised tariff sheets in compliance with the Commission's Order in this proceeding issued on August 21, 1987.

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions and all parties in Docket No. RP87–26. Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP88–8–000]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

October 13, 1987.

Take notice that on October 2, 1987, United Gas Pipe Line Company (United) tendered for filing, pursuant to section 311 of the Natural Gas Policy Act of 1978 and Section 4 of the Natural Gas Act, the following revised tariff sheets to its FERC Gas Tariff First Revised Volume No. 1 with a proposed effective date of November 1, 1987, as set forth on Appendix A to the filing.

United states that these tariff sheets, consisting of revised Rate Schedules ITS and FTS and Transportation General Terms and Conditions, together with additions to United's G, DB, and PL Rate Schedules to provide for purchase nominations, are intended to permit United to continue to operate as an open access pipeline after November 1, 1987 consistent with the provisions of Order Nos. 436 and 500.

United further states that the tendered tariff sheets are designed to follow as closely as possible the Commission's interpretation of the requirements of Order No. 436 as reflected in detail in its "Order Approving Contested Settlement Subject to Conditions and Issuing Blanket Certificate", issued May 8, 1987 in Docket No. CP86–526–000, and to conform to the revisions to the Order 436 regulations effected by Order No. 500, issued August 7, 1987.

United indicates that it is also filing concurrently herewith a certificate application for transportation authority under Subpart G of Part 284 of the Commission's Regulations to permit United to offer Order No. 436/500 transportation to interstate pipelines and other parties not eligible for transportation under section 311 of the Natural Gas Policy Act.

Any person desiring to be heard or to protest said filings should file a motion to intervene or protest with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Such motions or protests should be filed on or before October 20, 1987. Protestants will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–24026 Filed 10–15–87; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP88–006–000]

United Gas Pipe Line Co.; Application

October 9, 1987.

Take notice that on October 2, 1987, United Gas Pipe Line Company (United), P.O. Box 1478 Houston, Texas 77251–1478, filed in Docket No. CP88–006–000 an application pursuant to Section 7(c) of the Natural Gas Act and Section 284.221 of the Commission's Regulations (18 CFR 284.221) for a blanket certificate of public convenience and necessity authorizing the transportation of natural gas, on a self-implementing basis, interruptible and firm transportation service on behalf of interstate pipelines and on behalf of shippers other than interstate pipelines, and to abandon sales service to the extent United's customers exercise options to convert firm-service entitlements to firm transportation service pursuant to Section 284.10 and Section 3 of United's FTS Rate Schedule, filed concurrently herewith, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United has requested that the Commission permit the requested certificate authority to become effective November 1, 1987. United states that following the issuance of certificate authorization, such service would be provided pursuant to the terms of the revised ITS and FTS Rate Schedules which United, in its contemporaneous filing, has requested that the Commission permit to become effective on November 1, 1987. In that transporation tariff filing United has requested a November 1, 1987, effective date to provide for ongoing and new transportation service under Section 311 of the Natural Gas Policy Act.[1] United states that it is requesting the issuance of certificate authorization effective that same date in order that it may have authorization to self-implement transportation service for interstate pipelines and for other shippers not covered by Section 311 of the Natural Gas Policy Act. The authorization is particularly required to permit United's pipeline and direct industrial customers the opportunity to timely exercise the options to convert their firm-sale service to firm-transportation service, as provided by Section 3 of the revised FTS rate schedule, it is stated.

United states that the actual rates to be charged for transportation services provided under the ITS and FTS rate schedules are set forth on United's currently effective tariff sheets 4–D and 4–E. United states that the rates applicable to service under the ITS rate schedule are currently in effect as a result of the Commission's order of June 27, 1986, in United's Docket No. RP86–93, accepting interim transportation rates subject to refund. United states that the rates applicable to service under the fTS rate schedule are in effect as a result of the Commission's order of September 29, 1986, in United's Docket No. RP86–158. Both the Its and FTS rates are subject to refund pending the outcome of United's general rate proceeding in Docket No. RP85–209 and will be subject to further adjustment once United's next general rate filing is filed and made effective, it is stated.

---

[1] By order dated August 7, 1987, issued in conjunction with Order No. 500, the Commission terminated, effective November 1, 1987, the waiver which it grant to United in Docket No. RP86–93, and pursuant to which United has provided transportation service under Section 311 of the Natural GAs Policy Act, as implemented by § 284.102 of the Regulations.

United states that no new facilities are presently required to perform the services requested.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 29, 1987, filed with Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for United to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. ID-2311-000]

Gary L. Countryman; Filing

October 13, 1987.

Take notice that on October 6, 1987, Gary L. Countryman, filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

President and Chief Executive Officer,
Liberty Mutual Insurance Company
Member of the Board of Directors,
Liberty Mutual Insurance Company
Member of the Board of Directors,
Boston Edison Company

The need for this filing arises out of Liberty Mutual's ownership, through two subsidiaries, of a 70% interest in Liberty Securities Corporation, which is a broker-dealer participating in the marketing of securities. This filing requests a determination as to whether authorizations under section 305(b) of the Federal Power Act are required for Mr. Countryman, and, if they are, authorization to hold the interlocking positions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 27, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings.

Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA87-3-15-000]

Mid Louisiana Gas Co.; Proposed Change of Rates

October 13, 1987.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on October 7, 1987, tendered for filing as a part of First Revised Volume No. 1 of its FERC Gas Tariff, Fifty-Eighth Revised Sheet No. 3a to become effective September 1, 1987.

Mid Louisiana states that the purpose of the filing of Fifty-Eighth Revised Sheet No. 3a is to reflect a 7.83¢ per Mcf reduction in its gas cost, a Purchased Gas Cost Surcharge of 0.86¢ per Mcf and to comply with Article VI of the Stipulation and Agreement approved by the Commission in Docket Nos. RP86-69-000, TA86-2-15-000 et al., RP82-51-000 et al., RP86-138-000 and GP82-31-000.

Mid Louisiana requests a waiver of § 154.38(d)(iv)(a) of the Commission's Regulations to change its PGA effective dates to September 1 and March 1. Mid Louisiana also requests a waiver of the 30 day prior notice provisions contained in § 154.38(d)(iv)(d)(v) of the Commission's Regulations to allow Fifty-Eighth Revised Sheet No. 3a to become effective September 1, 1987, in compliance with the Commission's Order approving the Stipulation and Agreement in Docket No. RP86-69-000.

Mid Louisiana states that this filing is being made in accordance with Section 19 of its FERC Gas Tariff. Copies of this filing have been mailed to Mid Louisiana's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the approximate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. RP86-69-006]

Mid Louisiana Gas Co.; Compliance Filing

October 13, 1987.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on October 7, 1987, tendered for filing as a part of First Revised Volume No. 1 of its FERC Gas Tariff the following Tariff Sheets to become effective September 1, 1987:

Ninth Revised Sheet No. 1
Fifty-Eighth Revised Sheet No. 3a
First Revised Sheet No. 3a.1
Original Sheets Nos. 12k, 12l and 12m
Fifth Revised Sheet No. 23a
Sixth Revised Sheet No. 26a
First Revised Sheet No. 26g
Original Sheet No. 28a
Third Revised Sheet No. 34

Mid Louisiana states that the purpose of the filing of these Tariff Sheets is to comply with the Commission's Final Letter Order issued August 23, 1987, in the above referenced dockets. Copies of this filing have been mailed to Mid Louisiana's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Notice is hereby given of the following meeting:

Name: Natural Gas Transportation Task Group, Coordinating Subcommittee on Petroleum Storage & Transportation of the National Petroleum Council

Date and Time: Thursday, October 29, 1987, 10 am.

Place: Enron Corp., 1400 Smith, Rm. 49C1, Houston, Texas.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE-1), Washington, D.C. 20585. Telephone: 202/586-4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss Task Group organization and individual assignments.

Tentative Agenda

—Opening remarks by Chairman and Government Cochairman.
—Establish the Task Group organization.
—Discuss the individual assignments.
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Task Group is empowered to conduct the meeting in a fashion what will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 am and 4:00 pm Monday through Friday, except Federal holidays.

Donald L. Bauer,

Principal Deputy Assistant Secretary, Fossil Energy.

Science Advisory Board Research Strategies Committee; Health Effects Group; Open Meeting

Under Pub. L. 92–463, notice is hereby given that a one-day meeting of the Health Effects Group of the Research Strategies Committee of the Science Advisory Board will be held on October 28, 1987, in Conference Room 729G of the Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. The meeting will be conducted from 9:00 a.m. to 3 p.m.

The purpose of the meeting will be to continue the development of the research strategy for health effects research.

The meeting will be open to the public. Any member of the public wishing to attend the meeting must contact Dr. C. Richard Cothern, Executive Secretary to the Committee, by telephone at (202) 382–2552 or by mail to Science Advisory Board (A–101–F), 401 M Street, SW., Washington, DC., 20460 no later than c.o.b. October 21, 1987.

Dated: October 6, 1987.

Kathleen Conway,

Acting Director, Science Advisory Board.

BILLING CODE 6560–50–M

[OPTS–140088; FRL–3278–4]

Access to Confidential Business Information by Technical Resources Incorporated

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, Technical Resources Incorporated (TRI) of Rockville, MD, for access to information which has been submitted to EPA under sections 5 & 8 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATE: Access to the confidential data submitted to EPA will occur no sooner than October 26, 1987.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Room E–543, 401 M Street, SW., Washington, DC 20460, (202–554–1404).

SUPPLEMENTARY INFORMATION: Under TSCA, EPA must determine whether the manufacture, processing, distribution in commerce, use, or disposal of certain chemical substances or chemical mixtures may present an unreasonable risk of injury to human health or the environment. New chemical substances, i.e., those not listed on the TSCA Chemical Substances Inventory, are evaluated by EPA under section 5 of TSCA. Existing chemical substances, i.e., those listed on the TSCA Inventory, are evaluated by the Agency under sections 4, 6, and 8 of TSCA.

Under contract number 68–02–4289, EPA's contractor TRI, 3202 Monroe Street, Suite 300, Rockville, MD will assist the Office of Toxic Substances' Economics and Technology Division in analyzing the properties and uses of new and existing chemicals under sections 5 and 8 of TSCA. TRI will generate information on selected chemicals through literature search reviews and other activities.

In accordance with 40 CFR 2.306(j), EPA has determined that under contract number 68–02–4289 TRI will require access to CBI submitted to EPA under TSCA to successfully perform the duties specified under the contract. Authorization for access by TRI to TSCA CBI for similar purposes under contract number 68–02–3971 was previously announced in the **Federal Register** of May 3, 1985 (50 FR 18915). Under contract number 68–02–4289, TRI personnel will require access to CBI data submitted to EPA under sections 5 and 8 of TSCA. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under sections 5 & 8 of TSCA that EPA may provide TRI access to these CBI materials on a need-to-know basis. All access to TSCA CBI under this contract will take place at EPA Headquarters facilities.

Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1988.

TRI personnel will be required to sign non-disclosure agreements, will be briefed on appropriate security procedures and must pass a test on those security procedures before they are permitted access to TSCA CBI. Access is authorized on a yearly basis.

Dated: October 8, 1987.

Charles L. Elkins,

Director, Office of Toxic Substances.

Environmental Impact Statements and Regulations; Availability of EPA Comments

This notice announces the Availability of EPA comments prepared September 28, 1987 through October 2, 1987 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act (CAA) and Section

VOL
52
ISS
200
OC
16
1987
UMI

102(2)(c) of the National Environmental Policy Act (NEPA) as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5076/73. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 24, 1987 (52 FR 13749).

Draft EISs

ERP No. D–AFS–L65109–AK, Rating EC2, Cleveland Peninsula Resources Mgmt. Plan, Tongass Nat'l Forest, AK, SUMMARY: EPA's major concern is the effect of the action alternatives on water quality. The Forest Service preferred Alternative 2 does appear to have the least effects on water quality and fisheries. Although the draft EIS states that the monitoring plan will be prepared as part of the final EIS, the lack of a water quality monitoring plan for review makes it difficult to assure that Alaska Water Quality Standards will be met.

ERP No. DB–COE–K35012–CA, Rating EC2, Sacramento River Bank Protection Project, Butte Basin Reach (River Miles 176 to 194) Stabilization, Updated Information, CA. SUMMARY: EPA expressed environmental concerns because further information is needed on: (1) The effectiveness of existing mitigation; (2) the State of California's success in acquiring three parcels of land as mitigation that are outstanding for their riparian habitat values; and (3) project impacts to two colonies of bank swallows which could potentially be lost.

ERP No. DC–COE–K35012–CA, Sacramento River Bank Protection, Erosion Control, Collinsville to Chico Landing, River Miles 0 to 194, Updated Information, CA. SUMMARY: EPA expressed environmental concerns because past efforts to mitigate the loss of Sacramento River riparian habitat have been largely unsuccessful, and this fourth supplemental draft EIS did not provide sufficient mechanisms to mitigate or prevent further losses. EPA requested that the Corps commit to a policy of "no net loss" of riparian habitat when undertaking bank protection actions, and implement an environmentally superior bank protection scenario whenever possible, rather than a least-maintenance scenario. EPA also announced its intention to participate in the activities of the Mitigation Task Force with the Corps and the California Reclamation Board.

ERP No. D–FHW–C40121–NY, Rating EC2, Southwest Lockport Bypass Construction, Robinson Road to NY 31, 404 and 10 Permits, NY. SUMMARY: EPA's review of the draft EIS highlights potential impacts to wetlands, water quality, and hazardous waste sites, and about secondary impacts that may result from implementing the proposed project. Accordingly, EPA requests additional information in the final EIS regarding these concerns.

ERP No. D–FHW–F40292–IN, Rating EC2, US 231/Wabash River Crossing Relocation and Construction, County Road 350S to West Lafayette, 404 Permit, IN. SUMMARY: EPA's review found that although several alternatives are addressed in the draft EIS, a preferred alignment is not specified. In general, EPA's concerns relate to potential impacts upon water quality and wetlands. EPA's major concern is the presence of PCB's in water samples, fish, and sediment of Elliott Ditch and Wea Creek, and would like to review a plan for the handling or any PCB contaminated sediment that might be disturbed. The draft EIS does not include a mitigation plan, although all alternatives involve the acquisition of wetlands, and one should be developed as part of the final EIS. Finally, EPA is concerned about highway noise generated by the proposed project.

ERP No. D–FHW–K40162–CA, Rating E02, Ventura County Routes 23 and 118 Freeway Gap Closure, Rt. 23 Freeway at New Los Angeles Ave. to Rt. 118 Freeway at College View Ave., 404 Permit, CA. SUMMARY: EPA expressed environmental objections because the draft EIS did not adequately discuss potential adverse impacts to wetlands, riparian areas and endangered species. The draft EIS did not adequately discuss a full range of alternative alignments and mitigation measures to avoid or reduce impacts to sensitive habitats and endangered species. EPA requested that the FHWA contact the COE to obtain guidance on compliance with section 404 of the Clean Water Act (CWA), which regulates the discharge of dredge or fill material into waters of the US, including wetlands. EPA requested that the final EIS contain a more complete CWA section 404 alternatives analysis and mitigation plan to fully determine project compliance with the CWA.

ERP No. DS–NRC–A22091–IL, Rating E02, Rare Earths Permenent Waste Disposal Facility Decommissioning, Alternative Site Analysis, License, IL. SUMMARY: EPA's review found environmental impacts associated with the project are both non-radiological and radiological in nature. EPA's most serious concern is that the projected organ doses for the proposed action and all alternatives show exceedence of 4–15 times over the 25 millirem annual dose equivalent in 40 CFR 192 Health and Environmental Protection Standards for Uranium and Thorium Mill Tailings, which USEPA promulgated under the Uranium Mill Tailings Control Act of 1978. EPA rated this project an EO (environmental objections) with significant reservations, due to a possibility that modifications can be implemented that would assure compliance in at least some alternatives. Unless documentation can be provided demonstrating mitigation measures will be employed that will meet these regulations, EPA will have to rate the project an EU (environmental unsatisfactory) FINAL EISs

ERP No. F–AFS–J61069–CO, East Fork Ski Area Development, Special Use Permit, San Juan Nat'l Forest, 404 Permit, CO. SUMMARY: EPA believes the final EIS has adequately identified environmental issues associated with the proposed action. Although some of the issues result in significant environmental results, appropriate mitigation has been committed to reduce impacts.

ERP No. F–COE–C32032–NY, Shinnecock Inlet Navigation Project, Erosion Control and Water Quality Improvement, 404 Evaluation, NY. SUMMARY: EPA's concerns regarding changing salinity levels and grain sizes of dredged materials used for beach nourishment have been satisfactorily addressed in the final EIS. Accordingly, EPA has no objection to the proposed project.

ERP No. F–FHA–B32008–ME, Jonesport Harbor Navigation Improvement Project, ME (Adoption of COE final EIS, filed 4–19–76). SUMMARY: EPA is concerned that the information in the 14-year old EIS is outdated and not in compliance with current environmental review requirements. Therefore, EPA believes that the FmHA or the lead agency should prepare a supplemental draft EIS or supplemental information report.

ERP No. F–FHW–E40695–GA, GA–400 Extension, I–85 to I–285, Construction, 404 Permit, GA. SUMMARY: EPA was primarily concerned about predicted noise impacts and the proposed channel relocation of Nancy Creek. EPA requested a follow-up letter addressing additional noise mitigation, alternatives to channelization, creation of more water quality detention basins, and other areas of concern.

Dated: October 18, 1987.

Richard E. Sanderson,

Director, Office of Federal Activities.

Transfer of Data to Contractor

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractor, Industrial Economics, Inc. (IEC) information which has been, or will be, submitted to EPA under section 3007 of the Resource Conservation and Recovery Act (RCRA). Some of the information may have a claim of business confidentiality. This firm is working, in support of the Waste Characterization Branch, on reevaluating the approach used to define wastes as hazardous under RCRA.

DATE: The transfer of the confidential data submitted to EPA will occur no sooner than October 23, 1987.

ADDRESSES: Comments should be sent to Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4670.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The U.S. Environmental Protection Agency is conducting a program to characterize waste and assess waste management practices within the organic chemicals, inorganic chemicals, petroleum refining, plastics, pesticides, dyes and pigments, coke by-products, wood preserving, rubber processing, chlorinated organics, used oil recycling, electroplating, ink formulation, metal heat treating, solvents, explosives, and secondary lead industries. The Agency will use the results to identify and list hazardous waste under the authority of section 3001 of the Resource Conservation and Recovery Act (RCRA), and to develop appropriate waste management standards under section 3004.

Under EPA Contract No. 68-01-7047, IEC, will assist the Waste Characterization Branch of the Office of Solid Waste in reevaluating the approach used to define wastes as hazardous under RCRA. The information being transferred to IEC was previously, or is currently being, collected by other agency contractors and is specific to the above-noted industries. Some of the information being transferred may have been, or will be claimed as confidential business information.

In accordance with 40 CFR 2.305(h), EPA has determined that IEC requires access to confidential business information (CBI) submitted to EPA under section 3007 of RCRA to perform work satisfactorily under the above-noted contract. EPA is issuing this notice to inform all submitters of information under section 3007 of RCRA that EPA may transfer to this firm, on a need-to-know basis, CBI specific to the organic chemicals, inorganic chemicals, petroleum refining, plastics, pesticides, dyes & pigments, coke by-products, wood preserving, rubber processing, chlorinated organics, used oil recycling, electroplating, ink formulation, metal heat treating, solvents, explosives, and secondary lead industries. Upon completing their review of materials submitted for these industries, IEC will return all such materials to EPA.

IEC has been authorized to have access to RCRA CBI under the EPA "Contractors Requirements for the Control and Security of RCRA Confidential Business Information" security manual. EPA has approved their security plan and will inspect their facility and approve it prior to RCRA CBI being transmitted to the contractor. Personnel from this firm will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to confidential information, in accordance with the "RCRA Confidential Business Information Security Manual" and the Contractor Requirements Manual.

List of Subjects in 40 CFR Part 2

Transfer of Data to Contractor

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractor, ICF, Inc., information which has been submitted under the "Rulemaking Petition" Regulations (40 CFR 260.20 and 260.22) and under the Hazardous and Solid Waste Amendments (HSWA) of 1984. Some of the information may have a claim of business confidentiality. This firm will use this information to review and assess the completeness of the delisting petitions submitted, based on parameters specified in the Code of Federal Regulations (40 CFR 260.20 and 260.22, as amended by HSWA). The information was previously managed by ICF under Contract No. 68-01-6861.

DATE: The transfer of the confidential data submitted to EPA will occur no sooner than October 23, 1987.

ADDRESSES: Comments should be sent to Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: Dina Villari, Document Control Officer, Information Management Staff (WH-563), Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4670.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The U.S. Environmental Protection Agency is conducting a program to review and evaluate delisting petitions received under the "Rulemaking Petitions" Regulations (40 CFR 260.20 and 260.22) and under the Hazardous and Solid Waste Amendments (HSWA) of 1984. The Agency will make a decision whether to grant or deny each delisting petition under the authority of 40 CFR 260 Subpart C and HSWA.

Under EPA Contract No. 68-01-7259, ICF, Inc. of Washington, DC will assist the Variances Section of the Assistance Branch of the Office of Solid Waste in reviewing and assessing the completeness of the delisting petitions submitted, based on the parameters specified in the Code of Federal Regulations (40 CFR 260.20 and 260.22, as amended by HSWA), including: the description of manufacturing/treatment processes; the content of petitioned residual streams; the integrity of sampling data; and the list of raw materials and corresponding Material Safety Data Sheets.

In accordance with 40 CFR 2.305(h), EPA has determined that ICF requires access to confidential business information (CBI) submitted to EPA under 40 CFR 260.20 and 260.22, as amended by HSWA, to perform work satisfactorily under the above-noted contract. EPA is issuing this notice to inform all submitters of information under the above-noted authority that EPA may transfer to this firm, on a need-to-know basis, CBI necessary for the evaluation of delisting petitions which were submitted in response to 40 CFR 260.20 and 260.22, as amended by HSWA. Upon completing their review of materials submitted, ICF will return all such materials to EPA.

ICF has been authorized to have access to RCRA CBI under the EPA "Contractor Requirements for the Control and Security of RCRA Confidential Business Information" security manual. EPA has approved the security plan of the contractor and will inspect the contractor's facility and approve it prior to the transmittal of any RCRA CBI. Personnel from this firm will be required to sign non-disclosure agreements and be briefed on appropriate security procedures before they are permitted access to confidential information, in accordance with the "RCRA Confidential Business Information Security Manual" and the Contract Requirements Manual.

Transfer of Data to Contractor

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractor, Research Triangle Institute (RTI), information which has been, or will be, submitted to EPA under section 3007 of the Resource Conservation and Recovery Act (RCRA). Some of the information may have a claim of business confidentiality. This firm is developing information bases for and conducting regulatory impact analyses, regulatory flexibility analyses, environmental impact statements, and other analyses for regulatory development within the organic chemicals, inorganic chemicals, petroleum refining, plastics, pesticides, dyes & pigments, coke by-products, wood preserving, rubber processing, chlorinated organics, used oil recycling, electroplating, ink formulation, metal heat treating, solvents, explosives, and secondary lead industries.

DATE: The transfer of the confidential date submitted to EPA will occur no sooner than October 23, 1987.

ADDRESSES: Comments should be sent to Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-4670.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The U.S. Environmental Protection Agency is conducting regulatory impact analyses, regulatory flexibility analyses, environmental impact statements, and other analyses for regulatory deveopment in support of the policies and programs established for solid and hazardous waste management under the authority of the Resource Conservation and Recovery Act of 1976 (RCRA), including subsequent amendments through 1984.

Under EPA Contract Nos. 68-01-7266 and 68-01-7075, RTI will assist the Information Management Staff of the Office of Solid Waste in conducting regulatory impact analyses, regulatory flexibility analyses, environmental impact statements and other analyses within the organic chemicals, inorganic chemicals, petroleum refining, plastics, pesticides, dyes & pigments, coke by-products, wood preserving, rubber processing, chlorinated organics, used oil recycling, electroplating, ink formulation, metal heat treating, solvents, explosives, and secondary lead industries.

The information being transferred to RTI was previously, or is currently being, collected by other agency contractors and is specific to the above-noted industries. Some of the information being transferred may have been, or will be claimed as confidential business information (CBI).

In accordance with 40 CFR 2.305(h), EPA has determined that RTI requires access to CBI submitted to EPA under section 3007 of RCRA to perform work satisfactorily under the above-noted contracts. EPA is issuing this notice to inform all submitters of information under section 3007 of RCRA that EPA may transfer to this firm, on a need-to-know basis, CBI specific to the organic chemicals, inorganic chemicals, petroleum refining, plastics, pesticides, dyes & pigments, coke by-products, wood preserving, rubber processing, chlorinated organics, used oil recycling, electroplating, ink formulation, metal heat treating, solvents, explosives, and secondary lead industries. Upon completing their review of materials submitted for these industries, RTI will return all such materials to EPA.

RTI has been authorized to have access to RCRA CBI under the EPA "Contractors Requirements for the Control and Security of RCRA Confidential Business Information" security manual. EPA has approved their security plan and will inspect their facility and approve it prior to the transmittal of any RCRA CBI. Personnel from this firm will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to confidential information, in accordance with the "RCRA Confidential Business Information Security Manual" and the Contractor Requirements Manual.

Transfer of Data to Contractors

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractors, Dynamac Corporation, and their subcontractors: Research Triangle Institute (RTI); S-Cubed; Jacobs Engineering Group; ENSECO, Inc.; and

Sobotka, Inc.; and Midwest Research Institute (MRI), and their subcontractors: ICF, Inc.; Radian Corporation; Romar Consultants; Science Applications International Corporation (SAIC); Versar, Inc.; and Walk, Haydel & Associates (WH&A), information which has been, or will be, submitted to EPA under the authority of the Resource Conservation and Recovery Act (RCRA) in the following surveys:

- National Screening Survey of Hazardous Waste Treatment, Storage, Disposal, and Recycling Facilities;
- National Detailed Survey of Hazardous Waste Treatment, Storage, Disposal, and Recycling Facilities;
- Solid Waste (Municipal) Landfill Survey;
- Subtitle D Industrial Facilities Telephone Screening Survey;
- Subtitle D Industrial Facilities Mail Survey; and
- National Survey of Hazardous Waste Generators.

These firms are developing and maintaining information bases for and conducting waste characterization studies, regulatory impact anaylses, regulatory flexibility analyses, environmental impact statements, and other analyses for regulatory development for the Office of Solid Waste. Some of the information may have a claim of business confidentiality.

DATE: The transfer of the confidential data submitted to EPA will occur no sooner than October 23, 1987.

ADDRESSES: Comments should be sent to Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments should be identified as "Transfer for Confidential Data."

FOR FURTHER INFORMATION CONTACT: Dina Villari, Document Control Officer, Office of Solid Waste, Information Management Staff (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4670.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The U.S. Environmental Protection Agency is conducting waste characterization studies, regulatory impact analyses, regulatory flexibility analyses, environmental impact statements and other analyses for regulatory development in support of the policies and programs established for solid and hazardous waste management under the authority of the Resource Conservation and Recovery Act of 1976 (RCRA), including subsequent amendments through 1984.

Dynamac, and their subcontractors (EPA Contract No. 68-01-7286), and MRI, and their subcontractors (EPA Contract No. 68-01-7287), are developing and maintaining information bases for and conducting waste characterization studies, regulatory impact analyses, regulatory flexibility analyses, environmental impact statements, and other analyses for regulatory development for the Office of Solid Waste. Some of the information being transferred may have been, or will be claimed as confidential business information (CBI).

In accordance with 40 CFR 2.305(h), EPA has determined that Dynamac, and their subcontractors, and MRI, and their subcontractors, require access of CBI submitted to EPA under the authority of RCRA to perform work satisfactorily under the above-noted contracts. EPA is issuing this notice to inform all submitters of CBI that EPA may transfer to these firms, on a need-to-know basis, CBI collected under the authority of RCRA in the above-noted surveys. Upon completing their review of materials submitted, the contractors will return all such materials to EPA.

Dynamac, and their subcontractors, and MRI, and their subcontractors, have been authorized to have access to RCRA CBI under the EPA "Contractors Requirements for the Control and Security of RCRA Confidential Business Information" security manual. EPA has approved the security plan of the contractors and will inspect their facilities and approve them prior to RCRA CBI being transmitted to the contractors. Personnel from these firms will be required to sign non-disclosure agreements and be briefed on appropriate security procedures before they are permitted access to confidential information, in accordance with the "RCRA Confidential Business Information Security Manual" and the Contract Requirements Manual.

List of Subjects in 40 CFR Part 2

Administrative practice and procedure, Freedom of information, Confidential business information.

Date: September 28, 1987.

J.W. McGraw

Acting Assistant Administrator.

BILLING CODE 6560-50-M

[FRL-3275-6; Notice No. 87; FL115]

Proposed 404(C) Determination to Prohibit, Deny, or Restrict the Specification of Use of Three East Everglades Areas as Disposal Sites; Notice and Public Hearing Announcement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Proposed Section 404(c) determination and notice of public hearing.

SUMMARY: Section 404(c) of the Clean Water Act (CWA) (33 U.S.C. 1251 *et seq.*) authorizes the Administrator of the EPA to prohibit, deny or restrict the specification or use of any defined area as a disposal site, whenever he determines, after notice and opportunity for public hearing, that the discharge of dredged or fill materials into such an area will have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, or recreation areas. EPA's procedures for implementing section 404(c) are set forth in 40 CFR Part 231. This notice of proposed 404(c) determination and public hearing is being published by the Regional Administrator of the EPA's Region IV office in Atlanta, Georgia. This notice includes the Regional Administrator's proposal for three section 404(c) actions involving three separately-owned wetland properties in the East Everglades area of southern Florida.

These three properties are located in the Taylor Slough drainage area west of Miami in Dade County, Florida. All three are wetland areas with similar ecological values, each being part of the East Everglades wetlands complex. Taylor Slough is the major drainage way of waters entering the eastern portion of Everglades National Park (ENP). Proposals to "rockplow" these wetland areas to convert them for agricultural use have been made or can reasonably be expected in the near future. Such rockplowing activities would destroy the wetland ecological values which these tracts possess and, if permitted, would encourage future rockplowing of other nearby wetland areas in the East Everglades.

The first of the three properties for which a 404(c) determination is being proposed is a 60-acre tract owned by the Henry Rem Estate (the "Rem site"). The Rem site consists of the southern 60 acres of a 160-acre tract owned by Henry Rem Estate which is located in the western quarter of Section 5,

UMI

Township 56 South, Range 38 East, or about 1 mile south of SW. 168th St. (Richmond Drive) and about 1.8 miles west of Levee L–31N. In December 1986, the Corps of Engineers, Jacksonville District, gave notice of is intention to issue a Section 404 permit to Henry Rem Estate for rockplowing of the 60-acre Rem site.

The second of the three wetland areas is another 60-acre tract located adjacent to and east of the Rem site, and jointly owned by Mrs. Marian Becker, Mrs. Bilba Burk, Mr. Irving Sonnenschein, Mr. Euval Barrekette and Mr. Paul Yanowitz (the "Becker site"). In its permit documentation covering the Rem site, the Corps of Engineers indicated that it was anticipating a future application to permit rockplowing on this 60-acre Becker site, which the Corps viewed as substantially similar to the Rem site for permitting purposes.

The third property totals approximately 312 acres owned by Senior Corporation (collectively the "Senior Corp. site"), within a larger piece of Senior Corp. property which begins about 2.5 miles south of the Rem and Becker sites and extends along SW. 232nd Avenue and south to SW 304th Street in Dade County. The 312-acre Senior Corp. site on which this 404(c) action is being proposed consists of three separate parcels of wetlands: One of approximately 132 acres within Section 7, Township 57 South, Range 38 East; another of approximately 150 acres within Section 30, Township 56 South, Range 38 East; and the third of approximately 30 acres within Section 6, Township 57 South, Range 38 East. A Senior Corp. application to the Corps for a permit to rockplow these three wetland parcels remains pending at this time.

EPA Region IV concluded, because the Rem, Becker and Senior Corp. tracts are essentially similar pieces of the East Everglades wetlands complex with similar ecological values, that the initiation of one 404(c) action embracing all three tracts would be an efficient and appropriate way for the Federal government to address the serious environmental concerns arising from potential rockplowing in these wetland areas. Individual decisions, however, will be made with respect to the three properties.

EPA Region IV proposes to prohibit, deny or restrict the specification or use of the wetland properties described herein as disposal sites for dredged or fill materials resulting from rockplowing under provisions of section 404(c) of the CWA. This 404(c) determination is being proposed because there is reason to believe that rockplowing these wetlands will result in unacceptable adverse effects on fishery (including spawning and breeding areas for forage fishes), wildlife and recreational areas. In accordance with 40 CFR 231.4, it would be in the public interest to hold a hearing on this proposed determination.

Purpose of Public Notice

This serves as a notice of proposed section 404(c) determinations and public hearing covering the Rem site, the Becker site, and the Senior Corp. site, as above described. This hearing will be held to obtain comments on EPA's proposal to prohibit or restrict discharge of fill material from rockplowing these wetland areas and receive data or observations concerning whether the rockplowing of all or part of these approximately 432 acres of East Everglades wetlands in the Taylor Slough drainage area would cause an unacceptable adverse effect as described in section 404(c) of the CWA.

Hearing Date: November 18, 1987, beginning at 7:00 p.m.

Hearing Location: Homestead Senior High School Auditorium, 2351 SE 12th Ave. Homestead, Dade County, Florida, 33035.

Comments may be submitted prior to the hearing or presented at the hearing. The hearing record will remain open after the hearing until close of business, December 3, 1987, for the addressed of written comments. Comments submitted prior to or after the hearing or requests for copies of the proposed determination should be submitted to EPA Region IV's designated Record Clerk, Suzanne Potter, Office of Congressional and External Affairs, EPA, 345 Courtland Street, Atlanta, Georgia 30365, (404)347–3004. Comments should directly address whether the proposed determination should become the final determination or whether corrective action could be taken to reduce the adverse impact of the discharge. All such comments will be considered in reaching a decision to either withdraw the proposed determination or prepare a recommended determination to prohibit, deny or restrict the specification or use of all or portions of the Rem site, the Becker site and/or the Senior Corp. site as disposal sites for rockplowing. A Regional recommendation and the administrative record will be forwarded to the EPA Assistant Administrator for Water in Washington, DC, for review and the final determination. The procedures to be used in making the final determination are specified at 40 CFR 231.6.

Copies of all comments submitted in response to this notice will be available for public inspection during normal working hours (8:00 a.m. to 5:00 p.m.) at the EPA Region IV office.

Hearing Procedures

a. The Regional Administrator of EPA's Region IV, or his designee, will be the Presiding Officer at the hearing.

b. Any person may appear at the hearing and submit oral and/or written statements or data and may be represented by counsel or other authorized representative. Any person may present written statements or recommendations for the hearing file prior to the time the hearing file is closed to public submissions. The Presiding Officer shall afford the participants an opportunity for rebuttal.

c. The Presiding Officer will establish reasonable limits on the nature, amount or from of presentation of documentary material and oral presentations. No cross examination of any hearing participant shall be permitted, although the Presiding Officer may make appropriate inquiries of any such participant.

d. The hearing file will be open for submission of written comments until close of business, December 3, 1987.

Supplementary Information and Background

A. Section 404(c) Authority and Criteria

Under section 404 of the CWA (33 U.S.C. 1251 *et seq.*), any person who proposes to discharge dredged or fill material into the waters, including wetlands, of the United States must first obtain a permit from the Secretary of the Army, acting through the Chief of Engineers. However, CWA section 404(c) authorizes the EPA Administrator to prohibit or restrict such permitting within any area defined by him if he determines that discharges of dredged or fill material there would have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, or recreational areas.

EPA's regulations define "unacceptable adverse effect" in 40 CFR 231.2(e) as:

> Impact on an aquatic or wetland ecosystem which is likely to result in significant degradation of municipal water supplies or significant loss of or damage to fisheries, shellfishing, or wildlife habitat or recreation areas. In evaluating the unacceptability of such impacts, consideration should be given to the relevant portions of the section 404(b)(1) Guidelines (40 CFR Part 230).

The preamble to 40 CFR Part 231 explains that one of the basic functions of section 404(c) is to police the

application of the section 404(b)(1) Guidelines. Those portions of the Guidelines relating to significant degradation of waters of the United States (40 CFR 230.10(c)), as well as consideration of cumulative impacts (40 CFR 230.11(g)), are of particular importance in the evaluation of the unacceptability of environmental impacts in this case. Section 230.10(c) of the Guidelines requires that no discharge of dredged or fill material shall be permitted that contributes to significant degradation of waters of the United States. Section 230.11(g) requires that the permitting authority collect, analyze, consider and document information relevant to cumulative impacts within the decision-making process. Thus, it is appropriate under section 404(c) to take into account whether significant degradation of waters of the United States will occur as a result of individual and/or cumulative rockplowing activities.

The Administrator's section 404(c) authority may be used either to "veto" a permit which the Corps has determined it would issue (as in the case of the Rem site) or to preclude permitting either before the Corps has made its decision (as in the case of the Senior Corp. site), or in the absence of an application (as in the case of the Becker site). Under his section 404(c) authority, the Administrator may totally prohibit all discharges of dredged or fill material to a defined area or he may impose some partial prohibition, such as a restriction from a particular type of activity. This proposed section 404(c) determination is limited to a prohibition on discharges resulting from rockplowing the three East Everglades sites under consideration.

B. Nature of Proposed Discharge

"Rockplowing" is a process frequently used in the past to convert East Everglades wetlands into fields suitable for agriculture. In this process, a bulldozer is used to drag a plow-like implement over the pinnacle rock surface of these wetlands, breaking up that surface. The crushed rock and other materials are used to fill the wetlands' characteristic solution holes so that the area is made sufficiently smooth and level to allow a kind of hydroponic farming. EPA is particularly concerned about the continuation of rockplowing in the East Everglades area because this activity, by its nature, completely destroys the irregular surface characteristics which allow these wetlands to perform their most valuable ecological functions.

C. Characteristics of the Sites Under Consideration

The Rem, Becker and Senior Corp. sites encompass some 432 acres of seasonally inundated graminoid prairie wetlands with irregular rocky limestone substrates, typical of wetlands on the eastern margin of Taylor Slough. In their natural state, wetlands of this type provide fish and wildlife habitat, food chain production, groundwater recharge, water storage, and biological and geochemical nutrient and pollutant uptake. In addition, functional muhlygrass/pinnacle rockprairie wetlands in this area have recreational value as sites for bird watching and other nature study.

The elevation of the rocky substrate surface at the Rem and Becker sites is approximately 7 to 7.5 feet NGVD (i.e., above sea level) and approximately 6 to 8 feet NGVD in various locations within the Senior Corp. project site. Solution holes with depths of one to three feet below the rocky surface are common throughout these prairie wetlands. The dominant vegetable community found is described as wetland prairie, muhly/muhly-beardgrass in the Dade County East Everglades Management Plan. The dominant wetland plant species in the solution holes located throughout the wetland prairies is sawgrass, *Cladium jamaicensis*. The predominant wetland plant species on the rocky surface of the prairie is muhlygrass, *Muhlenbergia capillaris*, along with *Flaveria linearis*, *Pluchea* spp., *Dichromena colorata*, *Aristida* spp. and *Hypericum* spp. There is a thin (1"—2") layer of marl soil over portions of the rockland surface of the wetland prairie. During the summer wet season, water accumulates in the solution hole depressions and is held long enough for algal periphyton populations to grow. Numerous EPA and U.S. Fish and Wildlife Service (FWS) inspections over the past five years confirm the presence of standing water and periphyton in the solution holes during the summer rainy season as well as periphyton occurring over much of the rocky ground surface.

Scattered throughout the Rem, Becker and Senior Corp. site muhlygrass prairies are hardwood tree hammocks composed predominantly of red bay, wax myrtle, willow bustic and coco plum. Many of the tree islands have been invaded by exotic tree species, Brazilian pepper and Australian pine. The tree hammocks provide valuable cover and resting areas for a large number of reptiles, amphibians, small mammals and birds. Another type of tree island located in the Rocky Glades is known as a willow head, which normally contains standing water depressions. The willow heads provide very valuable dry season aquatic refuge for numerous aquatic faunal species.

The seasonally flooded solution holes and the normally flooded willow heads provide valuable habitat for numerous amphibians, invertebrates and small fish, which utilize the periphyton-based food web as a food source. These pinnacle rock solution holes and willow heads greatly increase the heterogeneity of the muhlygrass prairies and provide valuable micro-habitats within the prairies for lower trophic level animals to feed, breed and seek refuge. Populations of valuable prey species such as snails, aquatic insects, crayfish, tadpoles, frogs, snakes, turtles, mosquito fish, killifishes, flagfish, sunfish and other small fishes substantially expand in size in the solution holes and willow heads during the summer wet season and disperse across the adjacent prairies. The presence of aquatic food source organisms has been documented at the proposed rockplowing sites. As the wet season ends, the solution holes gradually dry down providing a concentrated food source for reptiles, small mammals and wading birds such as herons and egrets.

The wildlife inhabiting the East Everglades area, which includes these sites, is one of the most valuable and unique natural features of south Florida. Approximately 350 animal species are known to occur in the area including: 34 species of fish, 18 species of amphibians, 44 species of reptiles, 28 species of mammals, and 230 species of birds. These species depend on the diversity of habitats that offer opportunities for feeding, reproduction, and cover. Valuable habitats occur throughout the East Everglades and animals using these natural habitats move freely to other natural areas within the East Everglades, Everglades National Park and throughout south Florida. Some of the animals utilizing these natural habitats have large home ranges requiring free movement to, and use of, a broad array of south Florida habitats types. Migratory birds (e.g., woodstork, warblers, great white heron) utilize parts of the East Everglades as well as Everglades National Park on a seasonal basis.

Although all wildlife is considered a valuable resource, some species have been given special distinction because of their recreational value or because they have been placed on protected lists by Federal or State governments. A total of 33 species which are on various protected lists occur in the East Everglades. Several of the nation's

rarest and most unique animals survive in the East Everglades, two of which are the federally endangered Cape Sable sparrow and Florida panther. The wetland area immediately north of the Rem and Becker tracts was recently used by a radio collared male Florida panther.

The wetlands herbaceous vegetation and periphyton mats serve to filter surface waters removing nutrients and pollutants. This water purification function is important in maintaining the quality of the surficial Biscayne Aquifer, a designated "sole source" aquifer for drinking water supply to residents of southeast Florida.

D. Adverse Impacts of Permit Issuance

Rockplowing the Rem, Becker and Senior Corp. sites would destroy some 432 acres of functional and productive East Everglades muhlygrass-sawgrass prairie wetlands and thereby eliminate virtually all of the habitat value it now provides. The farm fields that would replace these wetlands after rockplowing would be a low quality habitat for wildlife. Cotton rats are the prime resident animals in such fields with some marsh rabbits found around field edges. This paucity of lower food chain prey is fed on by an occasional visiting marsh hawk or kestrel. A dearth of wildlife would be caused both by the seasonal nature of vegetable crops grown in rockland fields and by rockplowing's reduction of a "two-story" habitat system (surface rock/solution holes) to a flat dry plain. EPA Region IV believes that the direct loss of 432 acres of functional East Everglades muhlygrass prairie may represent a significant and unacceptable environmental loss.

The individual and cumulative losses of East Everglades wetlands pose a threat to groundwater quality, specifically the "sole source" designated Biscayne Aquifer. EPA Region IV's concerns for potential impacts to the groundwater quality is based on two factors: (1) The loss of the surface filtration of surface waters which are hydrologically contiguous with the Biscayne Aquifer, and (2) the potential for the transport of nutrients, herbicides, pesticides, oils and grasses and other contaminants that might be associated with agricultural or other development on the altered glade wetlands.

EPA Region IV is also very concerned about cumulative impacts of continuing destruction of East Everglades prairie wetlands which are located along the eastern border of Everglades National Park. According to the FWS, about 25,000 acres of prairie wetlands once occupied the East Everglades area, and approximately 8,000 acres of those wetland areas have now been disturbed or destroyed. Human activities (e.g., rockplowing, drainage, residential development) in the East Everglades have continued to degrade, threaten or eliminated large acreages of East Everglandes wetlands and are instrumental in adversely changing wildlife populations. Loss of functional wetland habitat is recognized by wildlife experts as a major contributing factor to reduction in size of wildlife populations. These cumulative adverse impacts may also be unacceptable.

Additionally, EPA Region IV is also aware that permitting the rockplowing of fully functional prairie wetlands at the Rem, Becker and Senior Corp. sites may be viewed as precedent to stimulate future wetland conversion projects in this area. The owners of these three sites also own approximately another 600 acres of very similar wetlands in the immediate vicinity of the 432 acres of wetlands under consideration. EPA Region IV anticipates that Corps rockplowing permits may be sought for these additional wetland areas if permits are issued for the areas covered by this proposed determination.

Other nearby East Everglades prairie wetlands might also be expected to come under intense pressure for agricultural development if rockplowing is allowed to convert the Rem, Becker and Senior Corp. sites. For example, approximately 585 of muhlygrass-sawgrass wetlands between the Fem and Senior Corp. sites were subject to past rockplowing proposals which were later either withdrawn or rejected on procedural grounds by the Corps. In addition, approximately 2,000 acres of privately owned muhlygrass wetland prairie, very similar in nature to the Henry Rem Estate, Becker and Senior Corp. wetlands are located in Sections 5, 6, 31 and 32, adjacent and north of the Rem and Becker wetland sites, south of SW 168th St. (Richmond Drive) and east of SW. 237th Ave. An additional 2,000 acres of similar muhlygrass wetland prairies exist along the northwest perimeter of the 8.5 square miles East Everglades residential area north of SW 168th St. EPA anticipates that these additional muhlygrass wetland prairies (totaling approximately 5,000 acres) would come under intense agricultural development pressure if the current rockplowing proposals were authorized. The potential cumulative loss of an additional nearby 5,000 acres of similarly classed wetlands would be devastating to the ecological integrity of the East Everglades ecosystem and the eastern border of Everglades National Park and may not be in the public interest.

E. Procedural Background

(1) The Rem and Becker Sites

On April 11, 1985, the Corps of Engineers, Jacksonville District, gave public notice that Henry Rem Estate had applied for a section 404 permit to rockplow 160 acres of East Everglades wetlands including the 60-acre "Rem site". EPA and FWS, in letters dated May 6 and 7, 1985, each objected to permit issuance citing the potential adverse environmental impacts of project construction.

The South Florida Regional Planning Council, in a letter dated May 7, 1985, indicated that the activity was inconsistent with local land planning. The Dade County Department of Environmental Resource Management (DERM), in a letter dated June 28, 1985, recommended denial of the project based upon inconsistency with local zoning and the implementation plan of the Everglades National Park-East Everglades Resources Planning and Management Committee.

On April 14, 198, after negotiations with the applicant, the Corps wrote to EPA and requested EPA's official comment on the applicant's revised proposal to rockplow the southern 60 acres of wetlands at the site. On June 12 and July 2, 1986, FWS and EPA respectively expressed continued opposition to permitting the southern 60 acres of wetlands of the Rem tract based on the project's environmental impacts and inconsistency with the section 404(b)(1) Guidelines. EPA stated that the decision to segment the project into a 60-acre southern portion lacked any biological basis because the 160-acre wetland tract owned by the Henry Rem Estate was essentially homogeneous in nature from north to south.

On December 22, 1986, the Jacksonville Corps District Engineer, forwarded to EPA Region IV its formal notice of intent to issue to 60-acre Rem permit.

On January 22, 1987, Lawrence Jensen, EPA Assistant Administrator for Water, wrote to Robert Dawson, then Assistant Secretary of the Army for Civil Works (ASACW) requesting his review of the Henry Rem Estate permit matter under the provisions of the EPA-Corps Memorandum of Agreement (MOA) pursuant to section 404q of the CWA. EPA restated its environmental concerns

and indicated that review of the Rem permit decisions was justified due to the failure of the Corps to resolve EPA concerns regarding compliance with section 404(b)(1) Guidelines. EPA expressed specific concerns relative to the inadequacy of the Corps' cumulative impacts assessment and the inappropriateness of the Corps' assessment of the significance of impacts associated with rockplowing 60 acres of wetlands at the Rem site, which EPA concluded would result in significant degradation of the waters of the U.S.

On January 23, 1987, William Horne, Assistant Secretary for U.S. Fish and Wildlife and Parks, Department of Interior (DOI), also requested that Mr. Robert Dawson, ASACW, review the Henry Rem Estate permit decision.

On February 12, 1987, Mr. Dawson determined that the issues that EPA discussed in its January 22, 1987, referral request letter should be addressed by the DE without elevation to higher bureaucratic levels prior to final permit action. In Mr. Dawson's letter to Mr. Horne he restated the determination that he made in his letter to EPA.

In the Corps documentation supporting its formal notice of intent to issue the Rem site permit, the Corps indicated that it anticipated that a rockplowing application would be received covering the adjacent 60 acres of wetlands to the east of the Rem property, owned by Mrs. Marian Becker et al. The Corps further indicated that it viewed the 60-acre Becker site as being a substantially similar situation for permitting purposes to the Rem site. In fact, the Corps predicted that the rockplowing of the Becker site would be one of the impacts of permitting the Rem site. Therefore, EPA Region IV believes that inclusion of the Becker site in this 404(c) action is appropriate, even though no application for rockplowing this site has been made at this time.

(2) The Senior Corp. Site

On May 14, 1986, the Corps gave public notice of a section 404 permit application consolidating four rockplowing proposals by Senior Corporation that had been advertised separately by the Corps during 1982 and 1983 into one application proposing 1,028 acres of rockplowing of East Everglades prairie wetlands.

On June 13, 1986, EPA Regional Administrator Jack Ravan, recommended that the Corps deny approximately 716 acres of the 1,028 acre Senior Corp. proposal, based on environmental concerns essentially similar to those expressed in EPA's comments to the Henry Rem Estate project. On June 13, 1986, the FWS wrote to the Corps, recommending denial of 716 acres of the Senior Corp. proposal based on adverse impacts to fish and wildlife habitat.

On April 7, 1987, Senior Corp. provided the Corps with project modifications, reducing wetland impacts at the project site. Corps staff indicated that Senior Corp. project modifications eliminated rockplowing in critical habitat for the federally endangered Cape Sable sparrow, but continued to propose rockplowing activities on approximately 312 acres of wetlands which EPA and FWS had previously recommended permit denial for rockplowing activities.

On April 22, 1987, EPA Region IV initiated this proposed 404(c) determination by notifying the Jacksonville Corps DE and the Rem and Becker site owners of the proposed action. On the same day EPA Region IV also notified Senior Corp. of its intention to initiate a 404(c) action on the approximate 720 acres of wetlands for which this Agency had earlier recommended permit denial. Because of Senior Corporation's April 7, 1987 permit modification, which eliminated approximately 400 acres of proposed wetland rockplowing to which EPA had objected, this 404(c) action addresses only the remaining approximate 312 acres of rockplowing still pending before the Corps of Engineers. On August 3, 1987, the Jacksonville Corps issued a permit to Senior Corp. authorizing 307 acres of rockplowing in wetland areas which were not opposed for rockplowing by EPA and FWS and which are not subject to the current 404(c) action.

Following his review of responses from the owners of the three sites, the Regional Administrator was not persuaded that there would be no unacceptable adverse effects from proposed or anticipated rockplowing at the three sites subject to this proposed 404(c) determination.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIOINS COMMISSION

Formation of Advisory Committee on Advanced Television Service and Announcement of First Meeting

The Federal Communications Commission has established an advisory committee to assist the Commission in considering the issues surrounding the introduction of advanced television service in the United States. The committee is expected to advise the Commission on the facts and circumstances regarding advanced television systems and to recommend policies, standards, and regulations that could accommodate the orderly and timely introduction of advanced television service. The charter for the committee is attached.

The first meeting of the Advisory Committee on Advanced Television Service will be held on November 17, 1987, in the Commision Meeting Room, Room 856, 1919 M Street, N.W., Washington, D.C. The meeting will start at 2:00 P.M. All interested parties are invited to attend.

The agenda for the first meeting will consist of:

1. FCC Chairman's Remarks;
2. Administrative Matters;
3. Committee Charter;
4. Committee Work Plan—
   Proposed Schedule
   Discussion and Approval;
5. Designation of Subsequent Meetings;
6. Concluding Remarks.

Any questions regarding this meeting should be directed to Mr. William Hassinger at (202) 632–6460 or Mr. Victor Tawil at (202) 653–8162.

Charter for Advisory Committee on Advanced Television Service

A. The Committee's Official Designation

Advisory Committee on Advanced Television Service

The Advisory Committee will have no more than twenty-five members and will function as a Parent Committee. These members will be chosen by the Commission so as to obtain diverse and representative viewpoints. The Advisory committee Chairman will direct the activities of the Committee and Subcommittees and will receive guidance, advice and instructions from the Chairman of the Federal Communications Commission.

B. Name of Subcommittee(s)

Three Subcommittees: Planning Subcommittee, Systems Subcommittee, Implementation Subcommittee.

Membership of Subcommittees will be open to all interested parties.

C. Committee's Objectives and Scope of its Activity

Parent Committee

Objective: The Committee will advise the Federal communications Commission on the facts and circumstances regarding advanced televsion systems for Commission consideration of the technical and public policy issue. In the event that the Commission decides that adoption of some form of advanced broadcast television is in the public interest, the Committee would also recommend policies, standards and regulations that would facilitate the orderly and timely introduction of advanced television services in the United States.

Scope of activity: All steps necessary to assemble information, analyze information, deliberate upon appropriate policies and actions, and develop recommendations regarding the introduction of terrestrial advanced television service. Includes technical, economic, legal and regulatory issues.

Planning Subcommittee

Objective: To plan the attributes of advanced television service in the United States.

Scope of Activity: All steps necessary to provide advice on desired features of terrestrial advanced television service.

(a) Define the desirable characteristics of advanced television service; for example, in terms such as picture quality, population served, costs to broadcaster/consumer/manufacturers, relationship to existing broadcast service, relationship to non-broadcast services.

(b) Review the technical planning factors for the existing television service and recommend planning factors for advanced television service, including consideration of factors such as coverage area, quality of service, frequency reuse criteria, receiver quality, spectrum allocations.

Systems Subcommittee

Objective: To specify the transmission/reception facilities appropriate for providing advanced television service in the United States.

Scope of Activity: All steps necessary to provide advice on the parameters of systems to provide terrestrial advanced television service.

(a) Evaluate, on technical and economic bases, advanced television systems now under development for the purpose of determining feasibility for implementation in the United States.

(b) Recommend advanced television system(s) now under development as candidate(s) for implementation, or specify the design of an appropriate system.

(c) Advise on the appropriate transmission/reception technical standards and spectrum requirements for the recommended system(s).

Implementation Subcommittee

Objective: To establish a scheme for implementation of advanced television service in the United States.

Scope of Activity: All steps necessary to provide advice on policies, regulations and standards for implementation of terrestrial advanced television service.

(a) Develop a transition scheme for implementation of advanced television service in the United States.

(b) Recommend appropriate FCC policies and regulations to oversee implementation of advanced television service and develop guidelines for industry activities.

D. Period of Time Necessary for the Committee To Carry out its Purposes

An initial written report containing recommendations of the Committee on fundamental parameters and spectrum requirements must be submitted by 6 months from the date of the first meeting.

E. Official to Whom the Committee Reports

The Chairman of the Federal Communication Commission.

F. Agency Responsible for Providing Necessary Support for the Committee

The Federal Communications Commission will furnish necessary administrative support, including facilities needed for conducting meetings of the Committee.

G. Description of Duties for Which the Committee is Responsible

The duties of the Committee and its Subcommittees will be to assemble information, to conduct deliberations and to prepare and submit recommendations appropriate to the attainment of the objectives listed under (C) above.

H. Estimated Annual Operating Costs in Dollars and Person Years

The estimated operating costs are $10,000 for the FCC. Estimated person-years are 3.0 for the FCC and 25.0 for non-government participants.

I. Estimated Number and Frequency of Committee Meetings

The Committee will meet three times per year or at such intervals as the Committee decides. Subcommittees are expected to meet on a monthly basis until completion of their tasks.

J. Committee's Termination Date

The Committee will terminate September 30, 1989.

Federal Communications Commission.

William J. Tricarico,

Secretary.

FEDERAL HOME LOAN BANK BOARD

[No. 87-1056]

Report For Wholly-Owned Service Corporation

Date: October 13, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Board") has submitted for extension, without revision, an information collection request, "Report For Wholly-Owned Service Corporation" to the Office of Management and Budget for approval in accordance with the Paperwork Reduction act (44 U.S.C. Chapter 35).

This information is necessary to monitor the financial condition of the Service Corporations. The Bank Board estimates that it requires four hours to complete this report.

Comments on the information collection request are welcome and should be received on or before November 2, 1987.

ADDRESS: Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Officer for the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed information collection requests and supporting documentation are obtainable at the Bank Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G

Street NW., Washington, DC 20552, Phone: 202–377–6933.

FOR FURTHER INFORMATION CONTACT: Cathern Smith, Office of Regulatory Policy, Oversight and Supervision, (202) 778–2567, Federal Home Loan Bank System, 900 Nineteenth Street NW., Washington, DC 20006.

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

program is supported by Federal funds authorized by the Labor-Management Cooperation Act of 1978, subject to annual appropriations.

DATE: Comments are due on or before November 15, 1987.

ADDRESS: Send comments to: Peter L. Regner, Director, Staff Operations and Programs, FMCS, 2100 K Street, NW., Washington, DC 20427.

FOR FURTHER INFORMATION CONTACT: Peter L. Regner, 202/653–5320.

Labor-Management Cooperation Program Application Solicitation-FY 1988

A. Introduction

The following is the draft solicitation for the Fiscal Year 1988 cycle of the Labor-Management Cooperation Program. These guidelines represent the continuing efforts of the Federal Mediation and Conciliation Service to implement the provisions of the Labor-Management Cooperation Act of 1978 which was initially implemented in Fiscal year 1981. The Act generally authorizes FMCS to provide assistance in the establishment and operation of plant, area, public sector, and industry-wide labor and management committee which:

(A) Have been organized jointly by employers and labor organizations representing employees in that plant, area, government agency, or industry; and

(B) Are established for the purpose of improving labor management relationships, job secrity, organizational effectivensess, enhancing economic development or involving workers in decisions affecting their jobs including improving communication with respect to subjects of mutual interest and concern.

The Program Description and other sections that follow as well as a separately published FMCS Financial and Administrative Grants Manual make up the basic guidelines, criteria, and program elements a potential applicant for assistance under this program must know in order to develop an application for funding consideration for either a plant, area-wide, industry, or public sector labor-management committee. Directions for obtaining an application kit may be found in section I.

B. Program Description Objectives

The Labor Management Cooperation Act of 1978 identifies the following seven general areas for which financial assistance would be appropriate:

(1) To imporve communications between representatives of labor and management;

(2) To provide workers and employers with opportunities to study and explore new and innovative joint approaches to achieving organizational effectiveness;

(3) To assist workers and employers in solving problems of mutual concern not susceptible to resolution within the collective bargaining process;

(4) To study and explore ways of eliminating potential problems which reduce the competitiveness and inhibit the economic development of the plant, area, or industry;

(5) To enhance the involvement or workers in making decisions that affect their working lives;

(6) To expand and improve working relationships between workers and managers; and

(7) To encourage free collective bargaining by establishing continuing mechanisms for communication between employers and their employees through Federal assistance to the formation and operation of labor-management committees.

The primary objective of this program is to encourage and support the establishment and operation of joint labor-management committees to carry out specific objectives that meet the aforementioned general criteria. The term "labor" refers to employees represented by a labor organization and covered by a formal collective bargaining agreement. These committees may be found at either the plant (worksite), area, industry, or public sector levels. A plant or worksite committe is generally characterized as restricted to one or more organizational or productive units operated by a single employer. An area committee is generally composed of multiple employers of diverse industries as well as multiple labor unions operating within and focusing upon city, county, contiguous multicounty, or statewide jurisdictions. As industy committe generally consists of a collection of agencies or enterprises and related labor unions producing a common product or service in the private sector on a local, State, regional, or nationwide level. A public sector committee consists of government employees and managers in one or more units of a local or State government. Those employees must be covered by a formal collective bargaining agreement. Employees covered by so-called "meet and confer" agreements are not eligible under this program. In deciding whether an application is for an area or industry committee, consideration should be given to the above definitions as well as to the focus of the committee.

In FY88, competition will be open to plant, area, private industry, and public sector committees. In-plant committee applications should offer an innovative or unique effort. All application budget requests should focus directly on supporting the committee. Applicants should avoid seeking funds of activities that are clearly available under other Federal programs (e.g., job training, mediation of contract disputes, etc.).

Required Program Elements

1. *Problem Statement*—The application, which should have mumbered pages, must discuss in detail what specific problem(s) face the plant, area, government, or industry and its workforce that will be addressed by the committee. Applicants must document the problems using as much relevant data as possible and disuss the full range of impacts these problems could have or are having on the plant, government, area, or industry. An idustrial or economic profile of the area and workforce might prove useful in explaining the problems. The section basically discusses *WHY* the effort is needed.

2. *Results or Benefits Expected*—By using specific goals and objectives, the application must disuss in detail *WHAT* the labor-management committee as a demonstration effort will accomplish during the life of the grant. While a goal of "improving communication between employers and and employees" may suffice as one over-all goal of a project, the objectives must, whenever possible, be expressed in measurable terms. Applicants should focus on the impacts or changes that the committee's efforts will have. Existing committee should focus on *expansion* efforts/results expected from FMCS funding. The goals, objectives, and projected impacts will become the foundation for future monitoring and evaluation efforts.

3. *Approach*—This section of the application specifies *HOW* the goals and objectives will be accomplished. At a minimum, the following elements must be included in all grant applications:

(a) A discussion of the strategy the committee will employ to accomplish its goals and objectives;

(b) A listing, by name and title, of all existing or proposed members of the labor-management committee. The application should also offer a rationale for the selection of the committee members (e.g., members represent 70% of the area or plant workforce).

(c) A discussion of the number, type, and role of all committee staff persons.

Include proposed position description for all staff that will have to be hired as well as resumes for staff already on board.

(d) In addressing the proposed approach, applicants must also present their justification as to why Federal funds are needed to implement the proposed approach;

(e) A statement of how often the committee will meet as well as any plans to form subordinate committees for particular purposes; and

(f) For applications from existing committees (i.e., in existence at least 12 months prior to the submission deadline), a discussion of the past efforts and accomplishments and how they would integrate with the proposed future expanded effort.

4. *Major Milestone*—This section must include an implementation plan that indicates what major steps, operating activities, and objectives will be accomplished as well as a timetable for *WHEN* they will be finished. A milestone chart must be included that indicates what specific accomplishments (process and impact) will be completed by month over the life of the grant. The chart should identify months as "month 1, 2," etc., rather than by name of month as the grant start date will not be determined until all applications are reviewed. The accomplishment of these tasks and objectives, as well as problems and delays therein, will serve as the basis for quarterly progress reports to FMCS.

5. *Evaluation.*—Applicants must provide for an external evaluation or internal assessment of the project's success in meeting its goals and objectives.

An evaluation plan must be developed which will briefly discuss what basic questions or issues the assessment would examine and what baseline data the committee staff would already have/or will gather for the assessment. This section should be written with the application's own goals and objectives clearly in mine and the impact or changes that the effort is expected to cause.

6. *Letters of Commitment*—Applications must include current letters of commitment from *all* proposed or existing committee participants and chairpersons. These letters should indicate that the participants support the application and will attend scheduled committee meetings. A blanket letter signed by a committee chairperson on behalf of all members is not acceptable.

7. *Other Requirements*—Applicants are also responsible for the following:

(a) The submission of data indicating approximately how many employees will be covered or represented through the labor-management committee;

(b) From existing committees, a copy of the existing staffing levels, a copy of the bylaws, a breakout of annual operating costs and identification of all sources and levels of current financial support;

(c) A detailed budget narrative based on policies and procedures contained in the FMCS Financial and Administrative Grants Manual;

(d) An assurance that the labor-management committee will not interfere with any collective-bargaining agreements; and

(e) An assurance that committee meetings will be held at least every other month and that written minutes of all committee meetings will be prepared and made available to FMCS

Selection Criteria

The following criteria will be used in the scoring and selection of applications for award:

(1) The extent to which the application has clearly identified the problems and justified the needs that the proposed project will address.

(2) The degree to which appropriate and measurable goals and objectives have been developed to address the problems/needs of the area. For existing committees, the extent to which the committee will focus on expanded efforts.

(3) The feasibility of the approach proposed to attain the goals and objectives of the project and the perceived likelihood of accomplishing the intended project results. For in-plant applicants, this section will address the degree of innovativeness or uniqueness of the proposed effort.

(4) The appropriateness of committee membership and the degree of commitment of these individuals to the goals of the application.

(5) The feasibility and thoroughness of the implementation plan in specifying major milestones and target dates.

(6) The cost effectiveness and fiscal soundness of the application's budget request, as well as the application's fiscal feasibility vs. its goals and approach.

(7) The overall feasibility of the proposed project in light of all of the information presented for consideration and quality of the application; and,

(8) The cost value to the government of the application in light of the overall objectives of the Labor-Management Cooperation Act of 1978. This includes such factors as innovativeness, site locations, and other qualities that impact upon an applicant's value in encouraging the labor-management committee concept.

C. Eligibility

Eligible grantees include State and local units of government, private non-profit labor-management committees (or a labor or management entity on behalf of a committee that will be created through the grant), and certain third party private non-profit entities on behalf of one or more committees to be created through the grant. Federal government agencies are not eligible.

Third-party private non-profit entities which can document that a major purpose or function of their organization has been the improvement of labor relations are eligible to apply. However, all funding must be directed to the functioning of the labor-management committee, and all requirements under Part B must be followed. Applications from third-party entities must document particularly strong support and participation from all labor and management parties with whom the applicant will be working. Applicants from third-parties which do not directly support the operation of a new or expanded committee will not be deemed eligible.

Applicants who received funding under this program in the past for committee operations are generally not eligible to apply. The only exception applies to third-party grantees who seek funds on behalf of an entirely different committee.

D. Allocations

FMCS has received a tentative FY88 appropriation of $900,000 for this program. Specific funding levels will not be established for each type of committee. Instead, the review process will be conducted in such a manner that at least two awards will be made in each category (in-plant, industry, public sector, and area), providing that FMCS determines that at least two outstanding applications exist in each category. After these applications are selected for award, the remaining applications will be awarded according to merit without regard to category.

FMCS reserves the right to retain up to 5 percent of the FY88 appropriation to contract for program support purposes (other than administrative).

E. Dollar Range and Length of Grants and Continuation Policy

Awards to continue and expand existing labor-management committees (i.e., in existence at least 12 months prior to the submission deadline) will be for a period of 12 months. If successful

progress is made during this initial budget period and if sufficient appropriations for expansion and continuation projects are available, these grants may be continued up to an additional 12 months at double the initial cash match ratio.

The total project period will thus normally be no more than 24 months.

Initial awards to establish new labor-management committees (i.e., not yet established or in existence less than 12 months prior to the submission deadline), will be for a period of 18 months. If successful progress is made during this initial budget period and if sufficient appropriations for expansion and continuation projects are available, these grants may be continued up to an additional 18 months at double the initial cash match ratio. The total project period will thus normally be no more than 36 months.

The dollar range of awards is as follows:

—Up to $35,000 in FMCS funds per annum for existing in-plant applicants; up to $50,000 over 18 months for new in-plant committee applicants;
—Up to $75,000 in FMCS funds per annum for existing area, industry and public sector committees applicants;
—Up to $100,000 per 18-month period for new area, industry, and public sector committee applicants.

Applicants are reminded that these figures represent maximum Federal funds only. If total costs to accomplish the objectives of the application exceed the maximum allowable Federal funding level and grantee match, applicants may supplement these funds through voluntary contributions from other sources.

F. Match Requirements and Cost Allowability

Applicants for new labor-management committees must provide at least 10 percent of the total allowable project costs. Applicants of existing committees must provide at least 25 percent of the total allowable project costs. All matching funds must be in cash rather than in-kind goods or services. Matching funds may come from state or local government sources or private sector contributions, but may generally not include other Federal funds. Funds generated by grant-supported efforts are considered "project income," and may not be used for matching purposes.

It will be the policy of this program to reject all requests for indirect or overhead costs. In addition, grant funds must not be used to supplant private or local/State government funds currently employed for these purposes. Funding requests from existing committees should focus entirely on the costs associated with the expansion efforts only. Also, under no circumstances will business or labor officials participating on a labor-management committee be compensated out of grant funds for *time* spent at committee meetings or *time* spent in training sessions. Applicants generally will not be allowed to claim all or a portion of *existing* staff time as an expense or match contribution.

For a more complete discussion of cost allowability, applicants are encouraged to consult the FY88 FMCS Financial and Administrative Grants Manual which will be included in the application kit.

G. Application Submission and Review Process

Applications should be signed by *both* a labor and management representative and be postmarked no later than April 16, 1988. No applications or supplementary materials can be accepted after the deadline. It is the responsibility of the applicant to ensure that the application is correctly postmarked by the U.S. Postal Service or other carrier. An original application, containing numbered pages, *plus three copies* should be addressed to the Federal Mediation and Conciliation Service, Labor-Management Grant Programs, 2100 K Street NW., Washington, DC 20427. Applications submitted without sufficient copies may be returned.

After the deadline has passed, all eligible applications will be reviewed and scored initially by one or more FMCS Grant Review Board(s). The Board(s) will decide which applications will be recommended for funding consideration. The Director, Labor-Management Grant Programs, will finalize the scoring and selection process of those applications recommended by the Board(s).

All FY88 grant applicants will be notified of results, and all grant awards will be made, prior to September 30, 1988. Applications submitted after the deadline dates or that fail to adhere to eligibility or other major requirements will be administratively rejected by the Director, Labor-Management Grant Programs.

H. Application Development Training

In FY88, FMCS will offer a half-day training program to assist potential applicants with the development and writing of an FMCS grant application. This training session will be conducted in Washington, DC on December 9, 1987. Individuals interested in attending the session should contact FMCS to reserve a space. See Section I for contact information.

I. Contact

Individuals wishing to apply for funding under this program should contact the Federal Mediation and Conciliation Service as soon as possible to obtain an application kit. These kits, as well as additional information or clarification, can be obtained free of charge by contacting Lee A. Buddendeck, Federal Mediation and Conciliation Service, Labor-Management Grant Programs, 2100 K Street NW., Washington, DC 20427, or by calling 202/653–5320.

Kay McMurray,

Director, Federal Mediation and Conciliation Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on October 16, 1987.

Social Security Administration

(Call Reports Clearance Officer on 301–594–5706 for copies of package)

1. Report of New Information in Disability Cases—NEW—This form is used by disability beneficiaries to report changes in their medical or living conditions. Respondents: Individuals or households. Number of Respondents: 200,000; Frequency of Response: Occasionally; Estimated Annual Burden: 16,667 hours.

Desk Officer: Elana Norden

Health Care Financing Administration

(Call Reports Clearance Officer on 301–594–5706 for copies of package)

1. Evaluation of OPA Marketing/Educational Promotion Survey Questionnaire—NEW—This survey would evaluate pre- and post-Survey Questionnaire to determine level of

knowledge among Medicare Beneficiaries relating to prepaid health plans; effectiveness of information campaign and effectiveness of conveying medicare information to target audience. Respondents: Individuals or households. Number of Respondents: 1,200; Frequency of Response: One-time; Estimated Annual Burden: 480 hours.

OMB Desk Officer: Allison Herron

Office of Human Development Services

(Call Reports Clearance Officer on 202–472–4415 for copies of package)

1. National Institute of Mental Health, Protection and Advocacy Program Annual Program Performance Report/ Administrative on Developmental Disabilities—0980–0160—Law provides that the Secretary shall provide to Congress an annual report detailing a description of activities, accomplishments, and expenditures of the protection and advocacy for mentally ill individuals and other persons with developmental disabilities. Respondents: State or local governments, Non-profit institutions. Number of Respondents: 56; Frequency of Response: Annually; Estimated Annual Burden: 2,240 hours.

OMB Desk Officer: Shanna Koss

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

SSA: 301–594–5706
HDS: 202–472–4415
HCFA: 301–594–5706

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

ATTN: (name of OMB Desk Officer)

Dated: October 9, 1987.

Raffie Shahrigian,

Acting Deputy Assistant Secretary, Administrative and Management Services.

National Institutes of Health

Division of Research Resources; Meeting of the Animal Resources Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Animal Resources Review Committee, Division of Research Resources, November 5–6, 1987, National Institutes of Health, Building 31, Conference Room 7, 9000 Rockville Pike, Bethesda, Maryland 20892.

This meeting will be open to the public on November 5 from 1 p.m. to approximately 3 p.m. for a brief staff presentation on the current status of the Animal Resources Program and the selection of future meeting dates. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on November 5 from 3:00 p.m. to approximately 5:00 p.m. and on November 6 from 8:30 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications submitted to the Animal Resources Program. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Maryland 20892, (303) 496–5545, will provide a summary of the meeting and a roster of the committee members upon request. Dr. David L. Madden, Acting Executive Secretary of the Animal Resources Review Committee, Division of Research Resources, National Institutes of Health, Building 31, Room 5B55, Bethesda, Maryland 20892, (301) 496–5175, will furnish substantive program information upon request.

(Catalog of Federal Domestic Assistance Programs No. 13.306, Laboratory Animal Sciences, National Institutes of Health)

Dated: October 1, 1987.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

Consensus Development Conference on Geriatric Assessment Methods for Clinical Decisionmaking

Notice is hereby given of the NIH Consensus Development Conference on "Geriatric Assessment Methods for Clinical Decisionmaking," sponsored by the National Institute on Aging in collaboration with the NIH Office of Medical Applications of Research, the National Institute of Mental Health, and the Veterans Administration. The conference will be held on October 19–21, 1987, in the Masur Auditorium of the Warren Grant Magnuson Clinical Center (Building 10) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The care of older persons is becoming an ever increasing responsibility for all but a few physicians and other health care providers. Before practitioners can make reasonable judgments about the best care strategies for each older individual, it is clear that appropriate patient data must be collected.

The type of data and the methods for its collection can affect the outcome of geriatric care, improve the quality of life, and reduce overall health-care costs. Because diseases in the older patient may present themselves differently, the geriatrician must conduct the assessment with an eye toward total care. Accurate diagnosis requries information about an individual's general medical, cognitive, and behavioral status as well as the person's functional capacity or ability to carry on daily activities. In addition, the health care provider will need to obtain certain data about the individual's social supports, personal resources, and environment. To this end, a body of knowledge is being amassed about the instruments and methodologies of geriatric assessment. Although under most circumstances, information relevant to all of the above areas are needed, it is important that health professionals know which techniques are especially useful in one or another situation.

This conference will bring together physicians and other health care professionals with a special interest in geriatric medicine, social scientists, investigators in the area of health services research, and representatives of the public. Following one and a half days of presentations by leaders in the field and discussion by the audience, a consensus panel will weigh the scientific evidence and formulate a draft statement in response to the following questions:

1. What are the goals, structure, processes, and elements of assessment for clinical decisionmaking?
2. What are the comparative merits of different methods in carrying out a geriatric assessment?
3. What is the evidence that a geriatric assessment is effective? If so, in what settings, for whom, and for which outcomes?
4. Insofar as a geriatric assessment is effective, what linkages to clinical management systems are required?
5. What are the priorities for future research in geriatric assessment?

BILLING CODE 4140–01–M

National Institute on Aging; Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of meetings of the National Institute on Aging.

These meetings will be open to the public to discuss administrative details for approximately one-half hour at the beginning of the first session of the first day of the meetings. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in section 552(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, for the review, discussion, and evaluation of individual research grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. June C. McCann, Committee Management Officer, National Institute on Aging, Building 31, Room 5C05, National Institutes of Health, Bethesda, Maryland, 20892, (301/496–9322), will provide summaries of the meetings and rosters of the committee members upon request. Other information pertaining to the meetings can be obtained from the Executive Secretary indicated.

Name of Committee: Gerontology and Geriatrics Review Committee, Subcommittee B–C
Executive Secretary: Dr. James Harwood, Dr. David Lavrin, Building 31, Room 5C12, National Institutes of Health, Bethesda, Maryland 20892, Phone: 301/496–9666
Dates of Meeting: November 4–5, 1987
Place of Meeting: National Institutes of Health, Building 31, Conference Room 8, 9000 Rockville Pike, Bethesda, Maryland 20892
Open: November 4, 8:30—9:00 a.m.
Closed: November 4, 9:00 a.m. to recess; November 5, 8:30 a.m. to adjournment
Name of Committee: Gerontology and Geriatrics Review Committee, Subcommittee A
Executive Secretary: Dr. Walter Spieth, Building 31, Room 5C12, National Institutes of Health, Bethesda, Maryland 20892, Phone: 301/496–9666
Dates of Meeting: December 2–3, 1987
Place of Meeting: National Institutes of Health, Building 31, Conference Room 8, 9000 Rockville Pike, Bethesda, Maryland 20892
Open: December 2, 8:30 to 9:00 a.m.
Closed: December 2, 9:00 a.m. to recess; December 3, 8:30 a.m. to adjournment

BILLING CODE 4140–01–M

Public Health Service

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory Council scheduled to meet during the month of October 1987:

Name: National Advisory Council on Health Care Technology Assessment (Medicare Coverage Process Subcommittee).

Date and Time: October 23, 1987, 9:00 AM to 4:00 PM.

Place: Key Bridge Marriott, Potomac D Room, 1401 Lee Highway, Arlington, Virginia.

Open October 23, 9:00 AM to 9:30 AM.

Closed for remainder of meeting.

Purpose: The Council is charged to provide advice to the Secretary and to the Director of the National Center for Health Services Research and Health Care Technology Assessment (NCHSR) with respect to the performance of the health care technology assessement functions prescribed by section 305 of the Public Health Service Act, as amended. This Subcommittee is charged with studying the Medicare coverage process.

Agenda: The open session of the meeting on October 23 from 9:00 AM to 9:30 AM will be devoted to administrative matters and a presentation of an overview of the agenda for the remainder of the meeting and the process to be used by the Subcommittee to review and discuss the information and opinions gathered on the DHHS technology assessments and coverage recommendation process.

The closed sessions of the meeting will involve the review and discussion of documents which are exempt from disclosure under 5 U.S.C. 552(b), 5 U.S.C. App. 2 section 10 (b) and (d), and 5 U.S.C. 552(c) (2) and (9). These documents reflect the internal procedural practices of the NCHSR and contain the views, judgments, and deliberations of Federal employees and their disclosure would frustrate the implementation of future agency actions.

During the close sessions of the meeting, the Subcommittee will: Examine the documents which contain the information and opinions gathered; discuss the findings which emerge from the materials reflecting and discussing the Department's technology assessment and coverage recommendation practices and their relative significance; and consider options for addressing the major issues emerging form the subcommittee's examination of the assessment and coverage recommendation process. In order to maintain the confidentiality of these documents, the portions of the meeting devoted to discussion of them will be closed to the public.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Mrs. Kelly Fennington, National Center for Health Services Research and Health Care Technology Assessment, Room 1805, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone (301) 443–5650.

Agenda items are subject to change as priorities dictate.

Date: October 6, 1987.

J. Michael Fitzmaurice,

Director, National Center for Health Services Research and Health Care Technology Assessment.

BILLING CODE 4160–17–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commission

[Docket No. 87–1727; FR–2396]

Transitional Housing Demonstration Program; Notice of Fund Availability; Modification of Selection Procedures

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of Fund Availability—Modification.

SUMMARY: On September 3, 1987 (52 FR 33536), HUD published a Notice of Fund Availability announcing the requirements that will govern the use of $65 million in funds appropriated for the Transitional Housing Demonstration Program by the Supplemental Appropriations Act, 1987 (Pub. L. 100–71, approved July 11, 1987). The Notice annouunced that the selection of applications would be governed by the Transitional Housing Demonstration Program Guidelines published June 9, 1987 (52 FR 21743), with certain modifications. This notice announces additional modifications to the selection procedures.

EFFECTIVE DATE: October 16, 1987.

FOR FURTHER INFORMATION CONTACT: Lawrence Goldberger, Director, Office of Elderly and Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, D.C. 20410, telephone (202) 755–5720. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On September 3, 1987 (52 FR 33536), HUD published a Notice of Fund Availability announcing requirements that will govern the use of $65 million in funds appropriated for the Transitional Housing Demonstration Program by the Supplemental Appropriations Act, 1987 (Pub. L. 100–71, approved July 11, 1987). The Notice announced that the selection of applications would be governed by the Transitional Housing Demonstration Program Guidelines ("THDP guidelines") published June 9, 1987 (52 FR 21743), with certain modifications, and set dates for the submission of applications.

The Notice was published while HUD was in the process of analyzing applications seeking funding under the first announcement of fund availability under the Transitional Housing Demonstration Program on June 9, 1987. HUD's experience with the applications submitted under that first announcement has prompted HUD to consider additional modifications to the selection procedures.

Under the THDP guidelines, the selection process has four stages: (1) The application is reviewed to determine if it meets certain threshold requirements; (2) Applications meeting the threshold requirements are ranked in relation to other applications under specified ranking critieria; (3) HUD performs a compliance review on a number of highly ranked applications in accordance with environmental requirements; and (4) HUD makes final selections from those applications that pass the environmental review.

HUD has found that many meritorious applications are being eliminated during the threshold stage because the applicants have failed to understand the application requirements and selection procedures. This problem is largely due to the fact that many of the applicants under the Transitional Housing Demonstration Program are inexperienced with HUD procedures. HUD believes that many of these promising applications can be rehabilitated through HUD's provision of technical assistance during the application processing procedure. HUD believes that these revisions to the application selection procedure are essential to permit the use of all of the $65 million available for funding under the September 3, 1987 Notice of Fund Availability.

Accordinlgy, HUD has decided to revise the application selection procedures. Under these revised procedures, HUD will offer assistance to applicants following the submission of their applications to assist them in meeting the following threshold criteria: (1) Leveraging (THDP guidelines—section IV.D.2.(iii), 52 FR at 21764–65); (2) Site control (THDP guidelines—section IV.D.2.(iv)(d)(1), 52 FR at 21765); and (3) Zoning (THDP guidelines—section IV.D.2.(iv)(d)(2). HUD has found that these threshold criteria are the ones most often misunderstood and most readily correctable during the time period set for threshold review.

If, during the threshold review, HUD finds deficiencies in the application under any of the cited threshold criteria and determines that the deficiencies are correctable within a reasonable time, HUD will: (1) Contact the applicant, (2) Identify the deficiency and explain how the deficiency can be remedied, and (3) Provide the applicant with a reasonable time period to correct the application. In addition to this technical assistance, HUD will continue its current practice of contacting applicants for clarification regarding ambiguities in their application submissions.

HUD emphasizes that the June 9, 1987 THDP guidelines, except as revised by the Notice of Fund Availability and this Notice, continue to govern the use of amounts appropriated under the Supplemental Appropriations Act, 1987.

Other Information

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implements section 102(2) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection in the Office of the General Counsel, Rule Docket Clerk, at the above address.

The information collection requirements contained in this notice have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1960 (44 U.S.C. 3501–3520). The OMB control number is 2502–0361.

The catalog of Federal Domestic Assistance Number is 14.178.

Authority: Title IV, Subtitle C of the Stewart B. McKinney Homeless Assistance Act, Pub. L. 100–77, approved July 22, 1987; section 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: October 7, 1987

James E. Schoenberger,

General Deputy Assistant Secretary for Housing, Federal Housing Commissioner.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–965–4213–15; F–14880–A]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Kikiktagruk Inupiat Corporation for approximately 20 acres. The lands involved are in the vicinity of Kotzebue, Alaska.

Tract 10, U.S. Survey No. 2645, Alaska, *excluding* that portion retained in Federal ownership is more particularly described as follows:

Commencing at corner No. 1, Tract 10, U.S. Survey No. 2645, thence S. 32°725' E., 311 feet to corner No. 1 of this description and the true point of beginning.

From corner No. 1, by metes and bounds: S. 77°01'30" E., 945 feet to corner No. 2; thence S. 12°58'30" W., 666 feet to corner No. 3; thence N. 77°01'30" W., 945 feet to corner No. 4; thence N. 12°58'30" E., approximately 666 feet to corner No. 1, the point of beginning.

Containing approximately 14.45 acres.

This tract, as described, contains approximately 20 acres.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the *Tundra Times*. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office,

701 C Street, Box 13, Anchorage, Alaska 99513, ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government, or regional corporation, shall have until November 16, 1987, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Elizabeth Bonnell,

Lead Land Examiner.

BILLING CODE 4310–JA–M

Emergency Closure of Public Lands in Travertine Hot Springs, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of emergency closure of public lands.

SUMMARY: Notice is hereby given that effective immediately all public lands in the SW¼ of Section 34, T. 5 N., R. 25 E., MDM, located west of the Travertine Hot Springs perimeter road with the exception of the Travertine Hot Springs access road are closed to all motorized vehicle and bicycle access. The Travertine Hot Springs perimeter road is also closed to through traffic at the quarry site. The authority for this closure is 43 CFR 8341.2. The closure will remain in effect until further notice.

SUPPLEMENTARY INFORMATION: The purpose of this closure is to protect the scenic and natural resource values located within the Travertine Hot Springs ACEC. Maps of the closed area are available at the Bishop Resource Area Office, Bishop, California.

FOR FURTHER INFORMATION CONTACT: James S. Morrison, Area Manager, 873 N. Main St. Suite 201, Bishop, California 93514 (619) 872–4881.

Dated: October 9, 1987.

Robert E. Beehler,

Acting Area Manager.

BILLING CODE 4310–40–M

Designation of the Travertine Hot Springs Area of Critical Environmental Concern, Bishop Resource Area, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice that certain public lands in the Bishop Resource Area, Bakersfield District, California are designated as an Area of Critical Environmental Concern (ACEC).

SUMMARY: Notice is hereby given pursuant to authority in the Federal Land Policy and Management Act of 1976 (section 202(c)), 43 CFR Part 1610, and land use decisions developed in the Bodie/Coleville Management Framework Plan (July 1983), that public lands near Bridgeport, California are designated as an Area of Critical Environmental Concern. The approximately 160 acres of public land are described as follows:

Mount Diablo Meridian, California

T. 5 N., R. 25 E.,
Sec 34, SW¼.

SUPPLEMENTARY INFORMATION: The Travertine Hot Springs ACEC is located in Mono County about 1 mile southeast of Bridgeport, within the Bishop Resource Area of the Bakersfield District. This ACEC is established to protect the unique formations of travertine and the associated natural values. The travertine is formed by a combination of evaporation and chemical interaction between the carbonate-laden spring water and the air. This particular location is unique because of the shape and mode of disposition.

Management of this area as an ACEC will include the following:

1. Protect the geologic, interpretive and cultural resources of the site from further extensive degradation;

2. Improve public recreation access to the site and facilitate recreation use of the site;

3. Clean up debris and reclaim the area where feasible to improve aesthetics and public health and safety needs;

4. Geothermal development can occur within the above-identified goals;

5. Allow some sale of the travertine material within the above identified goals.

Opportunities for public participation were provided through the Management Framework Plan process.

FOR FURTHER INFORMATION CONTACT: James S. Morrison, Area Manager, 873 N. Main St., Suite 201, Bishop, California 93514, (619) 872–4881.

Dated: October 9, 1987.

Robert E. Beehler,

Acting Area Manager.

Big Sandy Management Framework Plan

AGENCY: Bureau of Land Management.

ACTION: Notice of Availability Amendment to the Big Sandy Management Framework Plan (MFP)/ Notice of Realty Action, Sale of Public Lands, Sweetwater County.

SUMMARY: The BLM has amended the Big Sandy MFP to allow for the direct sale of the following public lands to PacifiCorp and the Idaho Power Company for use as a flue gas desulfurization pond site:

Sixth Principal Meridian

T. 21 N., R. 101 W.;
Sec. 22, SW¼NE¼, S½NW¼, S½;
Sec. 26, N½NW¼.

Containing 520 acres, more or less.

The lands have been examined through the land use planning process and they are suitable for sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713.

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the mining laws. The segregative effect will end upon issuance of the patent or 270 days from the date of this publication, whichever occurs first.

DATE: For a period of 45 days from the date this notice is published in the **Federal Register**, any party that participated in the plan amendment and is adversely affected by the amendment may protest this action in accordance with 43 CFR 1610.5–2 only as it affects issues submitted for the record during the planning process.

For a period of 45 days from the date this notice is published in the **Federal Register** interested parties may submit comments regarding the land sale to the District Manager, Rock Springs District, Bureau of Land Management, P.O. Box 1869, Rock Springs, WY 82902. Any adverse comments to the sale will be evaluated by the State Director who may vacate or modify the realty action and issue a final determination. In the absence of adverse comments or in the absence of any action by the State Director, this realty action will become final.

FOR FURTHER INFORMATION CONTACT: Sally Haverly, Realty Specialist, (307) 362–6422.

SUPPLEMENTARY INFORMATION: Conveyance of the mineral interest except oil and gas will occur simultaneously with the sale of the land.

The patent, when issued, will be subject to existing valid rights and will contain reservations to the United States for oil and gas and ditches and canals. Grazing privileges have been waived.

The planning document and environmental assessment/land report covering the proposed exchange are available for review at the Bureau of Land Management, Green River Resource Area Office.

Hillary A. Oden,

State Director.

Kingman Resource Area Grazing Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting.

SUMMARY: The Kingman Resource Area Grazing Advisory Board will hold a meeting on Tuesday, November 17, 1987. The meeting will start at 9:00 a.m. in the Kingman Resource Area Conference Room, 2475 Beverly Avenue, Kingman, Arizona 86401.

The agenda for the meeting will include:

1. Update of the Bureau's Exchange Program.
2. Status of the Bureau's Planning and Environmental Impact Statements.
3. Burro Capture Program and Use of Helicopters and Motor Vehicles.
4. Status of Grazing Program.
5. Report on Range Improvements for F.Y. '87 and F.Y. '88.
6. Range Policy Update.
7. Request for Advisory Board Expenditures.
8. Arrangements for Future Meetings.

The meeting is open to the public. Anyone wishing to make oral or written statements to the Board is requested to do so through the office of the District Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027, at least seven days prior to the meeting date.

Summary minutes of the Board meeting will be maintained in the District office and be made available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: October 8, 1987.

Phoenix District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

DATE: November 19, 8:30 a.m.

ADDRESS: 2015 West Deer Valley Road, Phoenix, Arizona.

SUMMARY: The Phoenix District advisory Council of the Bureau of Land Management meets November 19. The Council will depart from the Phoenix District Office, 2015 W. Deer Valley Road, Phoenix, at 8:30 a.m. and proceed to Lake Carl Pleasant to tour public lands scheduled to become part of the Lake Pleasant Resource Conservation Area. A formal meeting will be held at the lake. Members of the public may accompany the Council, but must provide their own transportation and lunch.

The Council has been established by and will be managed according to the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The agenda for the meeting includes:

—Lake Pleasant Resource Conservation Area
—Phoenix Resource Area Resources Management Plan
—BLM Management Updates
—Business from the Floor
—Public Comments and Statements
—Future Meetings and Agenda Topics

SUPPLEMENTARY INFORMATION: This is a public meeting and the presentation of oral statements or the submission of written statements that address the issues on the meeting agenda or related matters are welcome.

Dated: October 8, 1987.

[WY-920-08-4111-15; W-88117]

Proposed Reinstatement of Terminated Oil and Gas Lease; Wyoming

Pursuant to the provisions of Pub. L. 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease W-88117 for lands in Crook County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10 per acre, or fraction thereof, per year and not less than 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W-88117 effective September 1, 1986, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Realty Action; Lease of Public Land in Mohave County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, lease of public land in Mohave County.

SUMMARY: The following described lands are presently a part of a Reclamation Lease for public school purposes to the Bullhead City Elementary School District No. 15. The United States Postal Service is interested in acquiring the lands for construction of a new Main Post Office in Riviera, Arizona. This action involves acceptance of a relinquishment of the subject lands from the school district and a simultaneous notice of our intent to lease them to the U.S. Postal Service under the Recreation and Public Purposes Act as amended (43 U.S.C. 869 et. seq.):

T. 20 N., R. 22 W., Gila and Salt River Meridian, Arizona,
Sec. 20, portion of NW¼SW¼NW¼, containing 5.179 acres.

Leasing of these lands is consistent with the Bureau's planning for this area and would be in the public interest.

The relinquishment from Bullhead City Elementary School District No. 15 will be accepted concurrent with publication of this Notice of Realty Action.

Subject to all valid existing rights, the lands are hereby segregated from appropriations under any other public land law, including location under the mining laws. The segregation will terminate upon issuance of a lease, publication of a Notice of Termination, or 18 months from the date of this publication, whichever occurs first.

DATES: For a period of 45 days from the date of publication of this Notice, interested parties may submit comments to the District Manager, 3150 Winsor Avenue, Yuma, Arizona 85365. Any objects will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior, effective 60 days from the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Mike Ford, Area Manager, Havasu Resource Area, Bureau of Land Management, 3189 Sweetwater Avenue, Lake Havasu City, Arizona 86403, 602-855-8017.

Date: October 6, 1987.

J. Darwin Snell,

District Manager.

BILLING CODE 4310-32-M

[CA-940-07-5410-10-ZBJK; CA 19781]

Realty Action; Conveyance of Mineral Interests in California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; conveyance of the reserved mineral interests.

SUMMARY: The private lands described in this order will be examined for suitability for conveyance of the reserved mineral interests pursuant to section 209 of the Federal Land Policy and Management Act of October 21, 1976.

The mineral interests will be conveyed in whole or in part upon favorable mineral examination.

FOR FURTHER INFORMATION CONTACT: Joan Mangold, California State Office, Bureau of Land Management, 2800 Cottage Way, Room E-2841, Federal Office Building, Sacramento, California 95825, (916) 978-4815.

The purpose is to allow consolidation of surface and subsurface ownership, for the lands described below, where there are no known mineral values or in those instances where the reservation of ownership of the mineral interests in the United States interferes with or precludes appropriate non-mineral development of the lands and such development would be a more beneficial use of the lands than its mineral development.

Mount Diablo Meridian

T. 4 S., R. 18 E.,
Sec. 15, SW¼ SE¼.

This area described contains 40.00 acres in Mariposa County. Currently 100 percent of the mineral interests in these lands is owned by the United States.

The application was filed on July 20, 1987. Upon publication of this Notice of Realty Action in the **Federal Register** as provided in 43 CFR 2091.3-1(c) and 2720.1-1(b), the mineral interests owned by the United States in the private lands covered by the application shall be segregated to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate by publication of an opening order in the **Federal Register** specifying the date and

time of opening; or upon issuance of a patent or other document of conveyance to such mineral interests; or two years from the date of filing of the application, whichever occurs first (43 CFR 2091.3–2(a)).

Date: October 6, 1987.

Nancy J. Alex,

Chief, Lands Section, Branch of Adjudication and Records.

Exchange of Public and Private Lands in Calaveras and Placer Counties, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of issuance of land exchange conveyance document.

SUMMARY: The purpose of this exchange was to acquire the non-Federal lands because they have high public values for recreation. These lands are within the North Fork of the American River canyon which was designated a Wild and Scenic River in 1978. The acquisition will protect the area and its spectacular scenery as well as provide public access to a remote section of the river. The public interest was well served through completion of this exchange.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, California State Office, (916) 978–4818.

The United States issued an exchange conveyance document to Gerald E. Hodnefield and Shirley A. Hodnefield on April 2, 1987, pursuant to Sec. 206 of the Act of October 21, 1987 (43 U.S.C. 1716), for the following described lands:

Mount Diablo Meridian, California

T. 5 N., R. 14 E.,
Sec. 5, lots 2, 10, 11, 12, and 13;
Sec. 7, E½2NW¼.
T. 6 N., R. 14 E.,
Sec. 31, SE¼NW¼;
Sec. 32, lots 9 and 10.

containing 200.13 acres of public land in Calaveras County.

In exchange for these lands, the United States acquired the following described land from Gerald E. Hodnefield and Shirley A. Hodnefield:

Mount Diablo Meridian, California

T. 15 N., R. 10 E.,
Sec. 1, lots 12 and 15, W½ of lot 1 of E½, lot 2 of E½, E½ of lot 1 and lot 2 of W½, and N½SW¼.

containing 344.09 acres of non-Federal land in Placer County.

A payment in the amount of $1,600 has been paid to the United States by Gerald E. Hodnefield and Shirley A. Hodnefield to equalize values between the non-Federal land and the public lands.

Dated: October 6, 1987.

Rose Fairbanks,

Acting Chief, Branch of Adjudication and Records.

BILLING CODE 4310–40–M

[OR 910 4212–13 GP8–003]

Exchange of Public Lands in Josephine and Curry Counties, OR

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of public lands in Josephine and Curry Counties, Oregon.

SUMMARY: This Notice is to advise the public that the Glendale and Grants Pass Resource Areas of the Medford District Bureau of Land Management (BLM) and private landowner Larry Brown are proposing a land exchange.

The following described public lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716:

Willamette Meridian

T. 35 S., R. 6 W.,
Section 29: NW¼NW¼.
T. 36 S., R. 7 W.,
Section 11: NW¼NW¼NW¼, N½SW¼NW¼NW¼.
T. 37 S., R. 6 W.,
Section 11: N½NW¼;
Section 17: SW¼SW¼, SE¼SE¼.

The area described comprises approximately 215 (±) acres in Josephine County, Oregon.

The Federal Government will acquire the following described private lands from Larry Brown:

Willamette Meridian

T. 32 S., R. 10 W.,
Section 36: SE¼SW¼, SW¼SE¼.
T. 33 S., R. 10 W.,
Section 1: Lots 1, 2, S½NE¼, S½NW¼, NE¼SW¼;
Section 2: NE¼NE¼SE¼NE¼, S½NE¼NE¼, N½SE¼SE¼NE¼.

The above described area comprises approximately 375 (±) acres in Curry County, Oregon.

The purpose of the land exchange (identified by serial number or 42239) is to facilitate resource management opportunities by the Glendale Resource Area, Medford District. The private land being offered have very important values for timber, which would be managed as mandated by the O&C Act, and for wildlife. The exchange would block of ownership of BLM administered lands in the area. The selected BLM parcels are isolated tracts, non-contiguous to other BLM lands, and in some cases lacking legal access. The parcels are mostly timbered, however, because of the above factors and their direct proximity to rural residences and highly populated areas BLM timber management on the parcel would be uneconomical and difficult. The public interest will be highly served by making this exchange.

Acreage consisting of any or all of the BLM parcels to be exchanged must be approximately equal in value to the acreage offered by Mr. Brown, and upon completion of the final appraisal of the lands, cash equalization payments will be made if the values are within twenty-five percent (25%).

The exchange will be subject to:

1. Reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All other valid existing rights, including, but not limited to, any right-of-way, easement of lease of record.

Publication of this notice in the **Federal Register** will segregate the public lands described above, to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be accepted, shall not be considered as filed and shall be returned to the applicant.

Detailed information concerning the exchange, is available for review at the Medford District Office, 3040 Biddle Road, Medford, Oregon 97504.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Medford District Manager at the above address.

Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action.

Date: October 8, 1987.

David A. Jones,

District Manager.

Geological Survey

Establishment of the Closing Date for Transmittal of Applications Under the National Earthquake Hazards Reduction Program (NEHRP) for Fiscal Year (FY) 1989

Applications are invited for research projects under the NEHRP.

Authority for this program is contained in the Earthquake Hazards Reduction Act of 1977, Pub. L. 95–124. (42 U.S.C. 7701, *et. seq.*)

The purpose of this program is to support research in earthquake hazards and earthquake prediction to provide earth-science data and information essential to mitigate earthquake losses.

Applications may be submitted by educational institutions, private firms, private foundations, individuals, and agencies of State or local governments.

Closing Date for Transmittal of Applications: Applications must be received on or before January 28, 1988.

Program Information: This program supports research related to the following general areas of national interest: (1) Current tectonic and earthquake potential studies—analysis of regional seismic network data, identification of source zone characteristics, and earthquake potential estimates; (2) earthquake prediction research—prediction methodology and evaluation, focused earthquake prediction experiments, and theoretical, laboratory, and fault zone studies; and (3) regional earthquake hazards assessments—geologic and seismic hazard evaluation and synthesis, loss estimation modeling, and implementation.

Application Forms: The program announcement is expected to be available on or about November 2, 1987. You may obtain a copy of announcement 7346 by writing to Melissa Calloway, U.S. Geological Survey, Branch of Procurement and Contracts—MS 205C, 12201 Sunrise Valley Drive, Reston, VA 22092.

Organizations that applied for a FY 1988 award and organizations that requested to be retained on the mailing list since the last announcement, will be mailed a copy of the program announcement.

Further Information: For further information contact Dr. Elaine Padovani, Deputy Chief, External Research Program, Office of Earthquakes, Volcanoes, and Engineering—MS 905, U.S. Geological Survey, 12201 Sunrise Valley Drive, Reston, VA 22092. Telephone: 703–648–6722.

(Catalog of Federal Domestic Assistance Number 15.807)

Dated: October 9, 1987.

Jack J. Stassi,

Assistant Director for Administration.

Bureau of Land Management

[Ut–942–08–4212–13; U–51387, U–53678, U–53696]

Conveyance of Public Land; Order Providing For Opening; Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The action informs the public of the conveyance of 460.30 acres of public land out of federal ownership. This action will also open 492.99 acres of reconveyed land to surface entry and 416.98 acres of reconveyed land to mining and mining leasing.

EFFECTIVE DATE: November 2, 1987.

FOR FURTHER INFORMATION CONTACT: Lillie Hikida, BLM, Utah State Office, 324 South State Street, Suite 301, Salt Lake City, Utah 84111 (Telephone 801–524–3074)

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that in an exchange of lands made pursuant to section 206 of the Act of October 21, 1976, 90 Stat. 2743, a patent has been issued transferring 11.44 acres of land in Washington County, Utah, from Federal to private ownership.

2. In exchange, the following described land has been reconveyed to the United States.

Salt Lake Meridian

Begining at the center ¼ of Section 22, T43S, R16W, SLB&M; thence N 0 degrees 03'42" W, along the center section line 583.28 feet to the special meander corner of said Section 22; thence along the 1972 meanders of the Virgin River as follows; N 64 degrees 48'00" W, 362.34 feet; thence N 2 degrees 30'16" E, 533.05 feet; thence N 52 degrees 43'00" E, 474.54 feet thence N 69 degrees 35'00" E, 433.00 feet; thence leaving said meander line S 0 degrees 03'42" E, 1,985.98 feet to a point on the East/West center line of said Section 22; thence S 89 degrees 64'47" W, 744.33 feet along the center section line to the point beginning.

The area described contains 36.01 acres in Washington County.

3. Notice is hereby given that in an exchange of lands made pursuant to Section 206 of the Act of October 21, 1976, 90 Stat 2743, a patent has been issued transferring 408.59 acres of land in Box Elder County from Federal to private ownership.

4. In exchange, the following described land has been reconveyed to the United States.

Salt Lake Meridian

T. 11 N., R. 17 W.,
Sec. 7, lot 4, SE¼¼, W½SW¼SE¼, W½E½SW¼SE¼.
T. 12 N., R. 18 W.,
Sec. 15, SW¼NW¼,
Sec. 22, N½NW½, E½W½SW¼NW¼, E½SW¼NW¼, SE¼NW¼,NW¼SE¼, W½NE¼.

The area contains 416.98 acres in Box Elder County.

5. Notice is hereby given that in an exchange of lands made pursuant to section 206 of the Act of October 21, 1976, 90 Stat 2743, a patent has been issued transferring 40 acres of land in Tooele County from Federal to private ownership.

6. In the exchange, the following described land has been reconveyed to the United States.

Salt Lake Meridian

T. 6 S., R. 6 W.,
Sec. 25, SW¼NW¼.

Area contains 40 acres in Tooele County

7. The mineral estates in the land described in paragraphs 2 and 6 are not in United States ownership and will not be opened to operation of the mining and mineral leasing laws.

8. At 9:00 am, on November 2, 1987, the lands described in paragraphs 2, 4 and 6 will be open to operation of the public land laws generally, subject to valid existing rights, the provision of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 9:00 am, on November 2, 1987, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

9. At 9:00 am, on November 2, 1987, land described in paragraph 4 will be open to location and entry under the United States mining laws. Appropriation of land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

10. At 9:00 am, November 2, 1987 the land described in paragraph 4 will be open to applications and offers under the mineral leasing laws.

Date: October 9, 1987.

Orval L.Hadley,

Chief, Branch of Lands and Minerals, Operations.

Public Workshop; San Rafael Resource Management Plan

AGENCY: Bureau of Land Management, Moab, Interior.

ACTION: Notice of public workshop, San Rafael Resource Management Plan.

SUMMARY: A public workshop will be held November 18 at 6:30 p.m. in Huntington, Utah at Canyon View Junior High School. The workshop is to gather public input for alternatives to be assessed in the San Rafael Resource Management Plan environmental impact statement (RMP/EIS).

FOR FURTHER INFORMATION CONTACT: Jim Dryden, San Rafael Resource Area Manager, 900 North 700 East, P.O. Box AB, Price, UT 84501; (801) 637-4584.

SUPPLEMENTARY INFORMATION: In response to public requests, the Moab District will hold a workshop to solicit ideas from the public regarding management of public lands in the San Rafael Resource Area and the Forest Planning Unit of the Sevier River Resource Area. The public will be asked to provide ideas for alternative plans to be assessed in the San Rafael RMP/EIS.

Interested individuals, representatives of organizations, public officials, and representatives of other governmental agencies are invited to attend. The workshop will provide an informal means to gather suggestions.

The San Rafael RMP will provide management direction for the San Rafael Resource Area, containing approximately 1.5 million acres of public land in Emery County, Utah (managed by the Moab District, BLM); and for the Forest Planning Unit, containing about 0.1 million acres of public land in Sevier County, Utah (managed by the Sevier River Resource Area, Richfield District, BLM). The RMP/EIS will also assess impacts to grazing on about 1.6 million acres of public rangelands in Emery, Sevier, and Wayne Counties. The RMP/EIS alternatives will provide different scenarios for managing public lands and resources in order to gauge the potential environmental effects.

The workshop will start at 6:30 p.m. on Wednesday, November 18, 1987. It will be held in the Common Room, Canyon View Junior High School, Huntington Canyon Road, Huntington, Utah.

Gene Nodine,

District Manger.

Colorado; Filing of Plats of Survey

October 8, 1987.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 a.m., October 8, 1987.

The plat representing the dependent resurvey of a portion of the Old North Boundary of the Southern Ute Indian Reservation (south boundary), the west boundary, and a portion of the subdivisional lines, and the survey of the subdividion of sections 6 and 7, T. 34 N., R. 16 W., North of the Ute Line, New Mexico Principal Meridian, Colorado for Group No. 717, was accepted October 2, 1987.

The plat representing the dependent resurvey of portion of the south and west boundaries and the subdivisional lines, and the survey of the subdivision of certain sections, T. 35 N., R. 16 W., New Mexico Principal Meridian, Colorado for Group No. 717 was accepted October 2, 1987.

The plat representing the dependent resurvey of portion of the north boundaries and the subdivisional lines, and the survey of the subdivision of certain sections, T. 35 N., R. 17 W., North of the Ute Line, New Mexico Principal Meridian, Colorado for Group No. 717, was accepted October 2, 1987.

These surveys were executed to meet certain administrative needs of the Bureau of Reclamation.

The plat representing the corrective dependent resurvey and the retracement of a portion of the subdivision lines, T. 36 N., R. 9 W., New Mexico Principal Meridian, Colorado for Group No. 813, was accepted October 2, 1987.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Duane E. Olsen,

Acting Chief, Cadastral Surveyor for Colorado.

Fish and Wildlife Service

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.):

PRT-721876

Applicant: Doc Jones Thurston, Charlotte, NC.

The applicant requests a permit to import one captive-born Bengal tiger (Panthera tigris) trophy that he shot while on safari in South Africa for the purpose of display.

PRT-721953

Applicant: National Museum of Natural History, Washington, DC.

The applicant requests a permit to import salvaged specimes of golden lion tamarins (Leontopithecus rosalia) resulting from accidental or natural deaths of specimens held in captivity worldwide for scientific research.

PRT-722143

Applicant: San Diego Zoological Society, San Diego, CA.

The applicant request a permit to import nine unsexed captive-born golden-shouldered (=hooded) parakeets (Psephotus chrysopterygius dissimilis) from Ken Chisholm, Quebec, Canada for the purpose of exhibition, education, and captive propagation.

PRT-72222

Applicant: Wayne H. Viden, Glassboro, NJ.

The applicant requests a permit to import the personal sport-hunted trophy of a bontebok (Damaliscus dorcas dorcas) culled from the captive herd of George Fletcher in Cape Province, Republic of South Africa, for the purpose of enhancement of propagation.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 a.m. to 4:15 p.m.), Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service at the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Date: October 9, 1987.

R.K. Robinson,

Chief, Branch of Permits, Federal Wildlife Permit Office.

Minerals Management Service

Outer Continental Shelf Development Operations Coordination Document; Hall-Houston Oil Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Hall-Houston Oil Company has submitted a DOCD describing the activities it proposes to conduct on Leases OCS-G 5714, 5715, and 5716, Blocks 202, 203, and 208, respectively, Main Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on October 5, 1987. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: October 7, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: October 8, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310–MR–M

Outer Continental Shelf Development Operations Coordination Document; Southland Royalty Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Southland Royalty Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 5405, Block 88, Vermilion Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on October 6, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert, Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: October 7, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

INTERNATIONAL BOUNDARY AND WATER COMMISSION

Action To Restore Channel Capacity in Rio Grande Rectification and Boundary Preservation Projects; Finding of No Significant Impact

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of finding of no significant impact.

SUMMARY: Based on an environmental assessment, the U.S. Section finds that the proposed action to restore channel capacity to two international projects on the Rio Grande in Hudspeth County, Texas is not a major Federal action that would have a significant adverse effect on the quality of the human environment. Therefore, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Final Regulations (40 CFR Parts 1500-1508); and the U.S. Section's Operational Procedures for Implementing Section 102 of the National Environmental Policy Act (NEPA), published in the **Federal Register** September 2, 1981 (46 FR 44083); the U.S. Section hereby gives notice that an environmental impact statement is not being prepared for the joint international project.

ADDRESS: Mr. M.R. Ybarra, U.S. Section Secretary; International Boundary and Water Commission, United States and Mexico, United States Section; The Commons, C-310; 4171 North Mesa; El Paso, Texas 79902. Telephone: (915) 534-6698, FTS 570-6698.

SUPPLEMENTARY INFORMATION:

Proposed Action

The action proposed is that the U.S. Section conduct channel work in the Rio Grande in the uppermost 2.54-mile segment of the Boundary Preservation Project including the Litle Box Canyon, the uppermost canyon reach in that project in order that flood control capacity in the Rectification Project can be restored. The proposed work will include sediment removal, channel widening, channel deepening, and appropriate mitigation. The channel work will be performed in connection with channel maintenance work

scheduled in the lowermost 16 miles of the Rectification Project.

Alternatives Considered

Two alternatives were considered:

The Proposed Action Alternative provides for widening and deepening of the Rio Grande channel from downstream of Little Box Canyon, in the Boundary Preservation Project, upstream to the Rectification Project, a distance of 2.54 miles. The aim of the channel work is to increase channel capacity in order to avoid ponding of the flows upstream of the canyon.

Channel work in the uppermost 2.54 miles of the Boundary Preservation Project requires a channel top width of 90 feet and a depth of 6 to 8 feet for a discharge of 2,000 cfs. Spoil (excavated silt), for the most part, will be placed in Mexico beyond 100 feet from the river centerline. When spoil must be placed in the United States, it will be placed beyond 100 feet from the river centerline according to current Boundary Preservation Project construction practices.

The No Action Alternative is a continuation of current conditions. Routine operation and maintenance activities will continue in both the Rectification and Boundary Preservation Projects when stream conditions permit. The "bottleneck" created by the downstream project and canyon will remain. There will be no change in current conditions with the probability these conditions will become worse in the future. Because the present situation is unacceptable and will only worsen if nothing is done, the "no action" alternative has been rejected.

Environmental Assessment

The U.S. Section completed the Draft Environmental Assessment on October 6, 1987.

Findings of the Environmental Assessment

The Draft Environmental Assessment finds that:

1. The proposed channel work will provide drainage of valuable agricultural lands in Hudspeth County, Texas protected by the Rectification Project.

2. The planned work is not expected to have significant impact on wildlife and habitat in the area, and the habitat within the Boundary Preservation Project that is subject to removal will be mitigated. The mitigation plan is being developed in coordination with the Texas Parks and Wildlife Department.

3. No endangered and/or threatened species in the area or habitat critical to the continued existence of these species will be affected by the action.

4. Existing cultural resources within the area will be avoided during the proposed channel work.

On the basis of the Draft Environmental Assessment, the U.S. Section determines that an environmental impact statement is not required for the proposed action to restore channel capacity in the Rio Grande Rectification and Boundary Preservation Projects and hereby supplies notice of a finding of no significant impact.

An environmental impact statement will not be prepared unless additional information which may affect this decision is brought to our attention within thirty (30) days of the date of this notice.

The Draft Finding of No Significant Impact (FONSI) and Draft Environmental Assessment (EA) have been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the Draft FONSI and Draft EA are available to fill single copy requests at the above address.

Dated: October 7, 1987.

Suzette Zaboroski,

Staff Counsel.
